## The President

[Public Resolution No. 20—76th Congress]

[S. J. Res. 138]

JOINT RESOLUTION PROVIDING THAT REORGANIZATION PLANS NUMBERED I AND II SHALL TAKE EFFECT ON JULY 1, 1939

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the provisions of reorganization plan numbered I, submitted to the Congress on April 25, 1939, and the provisions of reorganization plan numbered II, submitted to the Congress on May 9, 1939, shall take effect on July 1, 1939, notwithstanding the provisions of the Reorganization Act of 1939.

SEC. 2. Nothing in such plans or this joint resolution shall be construed as having the effect of continuing any agency or function beyond the time when it would have terminated without regard to such plans or this joint resolution or of continuing any function beyond the time when the agency in which it was vested would have terminated without regard to such plans or this joint resolution.

WM. B. BANKHEAD
*Speaker of the House of Representatives.*

JNO N GARNER
*Vice President of the United States and President of the Senate.*

Approved, June 7, 1939.

FRANKLIN D ROOSEVELT

---

### REORGANIZATION PLAN No. 1

*Prepared by the President and transmitted to the Senate and the House of Representatives in Congress assembled, April 25, 1939, pursuant to the provisions of the Reorganization Act of 1939, approved April 3, 1939*

#### PART 1.—EXECUTIVE OFFICE OF THE PRESIDENT

SECTION 1. *Bureau of the Budget.*—The Bureau of the Budget and all of its functions and personnel (including the Director and Assistant Director) are hereby transferred from the Treasury Department to the Executive Office of the President; and the functions of the Bureau of the Budget shall be administered by the Director thereof under the direction and supervision of the President.

SECTION 2. *Central Statistical Board.*—The Central Statistical Board and all of its functions and personnel (including the Chairman and the members of the Board) are hereby transferred to the Bureau of the Budget in the Executive Office of the President. The Chairman of the Board shall perform such administrative duties as the Director of the Bureau of the Budget shall direct.

SECTION 3. *Central Statistical Committee Abolished and Functions Transferred.*—The Central Statistical Committee is hereby abolished, and its functions are transferred to the Director of the Bureau of the Budget to be administered by him under the direction and supervision of the President. The Director of the Bureau of the Budget shall promptly wind up any outstanding affairs of the Central Statistical Committee.

SECTION 4. *National Resources Planning Board.*—(a) The functions of the National Resources Committee, established by Executive Order No. 7065 of June 7, 1935, and its personnel (except the members of the Committee) and all of the functions of the Federal Employment Stabilization Office in the Department of Commerce and its personnel are hereby transferred to the Executive Office of the President. The functions transferred by this section are hereby consolidated, and they shall be administered under the direction and supervision of the President by the National Resources Planning Board (hereafter referred to as the Board), which shall be composed of five members to be appointed by the President. The President shall designate one of the members of the Board as Chairman and another as Vice Chairman. The Vice Chairman shall act as Chairman in the absence of the Chairman or in the event of a vacancy in that office. The members of the Board shall be compensated at the rate of $50 per day for time spent in attending and traveling to and from meetings, or in otherwise exercising the functions and duties of the Board, plus the actual cost of transportation: *Provided,* That in no case shall a member be entitled to receive compensation for more than thirty days' service in two consecutive months.

(b) The Board shall determine the rules of its own proceedings, and a majority of its members in office shall constitute a quorum for the transaction of business, but the Board may function notwithstanding vacancies.

(c) The Board may appoint necessary officers and employees and may delegate to such officers authority to perform such duties and make such expenditures as may be necessary.

SEC. 5. *National Resources Committee Abolished.*—The National Resources Committee is hereby abolished, and its outstanding affairs shall be wound up by the National Resources Planning Board.

SEC. 6. *Federal Employment Stabilization Office Abolished.*—The Federal Employment Stabilization Office is hereby abolished, and the Secretary of Commerce shall promptly wind up its affairs.

SEC. 7. *Transfer of Records and Property.*—All records and property (including office equipment) of the several agencies transferred, or the functions of which are transferred, by this Part are hereby transferred to the Executive Office of the President for use in the administration of the agencies and functions transferred by this Part.

SEC. 8. *Transfer of Funds.*—So much of the unexpended balances of appropriations, allocations, or other funds available (including those available for the fiscal year ending June 30, 1940) for the use of any agency in the exercise of any functions transferred by this Part, or for the use of the head of any department or agency in the exercise of any functions so transferred, as the Director of the Bureau of the Budget shall determine, shall be transferred to the Executive Office of the President for use in connection with the exercise of functions transferred by this Part. In determining the amount to be transferred the Director of the Bureau of the Budget may include an amount to provide for the liquidation of obligations incurred against such appropriations, allocations, or other funds prior to the transfer: *Provided*, That the use of the unexpended balances of appropriations, allocations, or other funds transferred by this section shall be subject to the provisions of section 4 (d) (3) and section 9 of the Reorganization Act of 1939.

SECTION 9. *Personnel.*—Any personnel transferred by this Part found to be in excess of the personnel necessary for the efficient administration of the functions transferred by this Part shall be re-transferred under existing law to other positions in the Government service, or separated from the service subject to the provisions of section 10 (a) of the Reorganization Act of 1939.

PART 2.—FEDERAL SECURITY AGENCY

SECTION 201. *Federal Security Agency.*—(a) The United States Employment Service in the Department of Labor and its functions and personnel are transferred from the Department of Labor; the Office of Education in the Department of the Interior and its functions and personnel (including the Commissioner of Education) are transferred from the Department of the Interior; the Public Health Service in the Department of the Treasury and its functions and personnel (including the Surgeon General of the Public Health Service) are transferred from the Department of the Treasury; the National Youth Administration within the Works Progress Administration and its functions and personnel (including its Administrator) are transferred from the Works Progress Administration; and these agencies and their functions, together with the Social Security Board and its functions, and the Civilian Conservation Corps and its functions, are hereby consolidated under one agency to be known as the Federal Security Agency, with a Federal Security Administrator at the head thereof. The Federal Security Administrator shall be appointed by the President, by and with the advice and consent of the Senate, and shall receive a salary at the rate of $12,000 per annum. He shall have general direction and supervision over the administration of the several agencies consolidated into the Federal Security Agency by this section and shall be responsible for the coordination of their functions and activities.

(b) The Federal Security Administrator shall appoint an Assistant Federal Security Administrator, who shall receive a salary at the rate of $9,000 per annum, and he may also appoint such other personnel and make such expenditures as may be necessary.

(c) The Assistant Administrator shall act as Administrator during the absence or disability of the Administrator or in the event of a vacancy in that office and shall perform such other duties as the Administrator shall direct.

(d) The several agencies and functions consolidated by this section into the Federal Security Agency shall carry with them their personnel.

SECTION 202. *Social Security Board.*—The Social Security Board and its functions shall be administered as a part of the Federal Security Agency under the direction and supervision of the Federal Security Administrator. The Chairman of the Social Security Board shall perform such administrative duties as the Federal Security Administrator shall direct.

SECTION 203. *United States Employment Service.*—(a) The functions of the United States Employment Service shall be consolidated with the unemployment compensation functions of the Social Security Board and shall be administered in the Social Security Board in connection with such unemployment compensation functions under the direction and supervision of the Federal Security Administrator.

(b) The office of the Director of the United States Employment Service is hereby abolished, and all of the functions of such office are transferred to, and shall be exercised by, the Social Security Board.

(c) All functions of the Secretary of Labor relating to the administration of the United States Employment Service are hereby transferred to, and shall be exercised by, the Federal Security Administrator.

SECTION 204. *Office of Education.*—(a) The Office of Education, and its functions shall be administered by the Commissioner of Education under the direction and supervision of the Federal Security Administrator.

(b) All functions of the Secretary of the Interior relating to the administration of the Office of Education are hereby transferred to, and shall be exercised by, the Federal Security Administrator.

DEPOSITED BY THE UNITED STATES OF AMERICA

SECTION 205. *Public Health Service.*—(a) The Public Health Service and its functions shall be administered by the Surgeon General of the Public Health Service under the direction and supervision of the Federal Security Administrator.

(b) All the functions of the Secretary of the Treasury relating to the administration of the Public Health Service, except those functions relating to the acceptance and investment of gifts as authorized by sections 23 (b) and 137 (e), title 42, U. S. Code, are hereby transferred to, and shall be exercised by, the Federal Security Administrator.

SECTION 206. *National Youth Administration.*—The National Youth Administration and its functions shall be administered by the National Youth Administrator under the direction and supervision of the Federal Security Administrator.

SECTION 207. *Civilian Conservation Corps.*—The Civilian Conservation Corps and its functions shall be administered by the Director of the Civilian Conservation Corps under the direction and supervision of the Federal Security Administrator.

SECTION 208. *Transfer of Records and Property.*—All records and property (including office equipment) of the several agencies which, with their functions, are consolidated by section 201 into the Federal Security Agency are hereby transferred to the jurisdiction and control of the Federal Security Agency for use in the administration of the agencies and functions consolidated by that section.

SECTION 209. *Transfer of Funds.*—So much of the unexpended balances of appropriations, allocations, or other funds (including those available for the fiscal year ending June 30, 1940) available for the use of any agency in the exercise of any functions transferred by this Part, or for the use of the head of any department or agency in the exercise of any functions so transferred, as the Director of the Bureau of the Budget shall determine, shall be transferred for use in connection with the exercise of the functions transferred by this Part. In determining the amount to be transferred the Director of the Bureau of the Budget may include an amount to provide for the liquidation of obligations incurred against such appropriations, allocations, or other funds prior to the transfer: *Provided*, That the use of the unexpended balances of appropriations, allocations, or other funds transferred by this section shall be subject to the provisions of section 4 (d) (3) and section 9 of the Reorganization Act of 1939.

SECTION 210. *Administrative Funds.*—The Director of the Bureau of the Budget shall allocate to the Federal Security Agency, from appropriations, allocations, or other funds available (including those available for the fiscal year ending June 30, 1940) for the administrative expenses of the agencies and functions consolidated by this Part, such sums, and in such proportions, as he may find necessary for the administrative expenses of the Federal Security Agency.

SECTION 211. *Personnel.*—Any personnel transferred by this Part found to be in excess of the personnel necessary for the efficient administration of the functions transferred by this Part shall be re-transferred under existing law to other positions in the Government service, or separated from the service subject to the provisions of section 10 (a) of the Reorganization Act of 1939.

PART 3.—FEDERAL WORKS AGENCY

SECTION 301. *Federal Works Agency.*—(a) The Bureau of Public Roads in the Department of Agriculture and its functions and personnel (including the Chief thereof) are transferred from the Department of Agriculture; the Public Buildings Branch of the Procurement Division in the Treasury Department and its functions and personnel are transferred from the Treasury Department; the Branch of Buildings Management of the National Park Service in the Department of the Interior and its functions and personnel (except those relating to monuments and memorials), and the functions of the National Park Service in the District of Columbia in connection with the general assignment of space, the selection of sites for public buildings, and the determination of the priority in which the construction or enlargement of public buildings shall be undertaken, and the personnel engaged exclusively in the administration of such functions, and the United States Housing Authority in the Department of the Interior and its functions and personnel (including the Administrator) are transferred from the Department of the Interior; and all of these agencies and functions, together with the Federal Emergency Administration of Public Works and its functions, and all of the Works Progress Administration and its functions (except the National Youth Administration and its functions) are hereby consolidated into one agency to be known as the Federal Works Agency, with a Federal Works Administrator at the head thereof. The Federal Works Administrator shall be appointed by the President, by and with the advice and consent of the Senate, and shall receive a salary at the rate of $12,000 per annum. He shall have general direction and supervision over the administration of the several agencies consolidated into the Federal Works Agency by this section and shall be responsible for the coordination of their functions.

(b) The Federal Works Administrator shall appoint an Assistant Federal Works Administrator, who shall receive a salary at the rate of $9,000 per annum, and he may also appoint such other personnel and make such expenditures as may be necessary.

(c) The Assistant Administrator shall act as Administrator during the absence or disability of the Administrator, or in the event of a vacancy in that office, and shall perform such other duties as the Administrator shall direct.

(d) The several agencies and functions consolidated by this section in the Federal Works Agency shall carry with them their personnel.

SECTION 302. *Public Roads Administration.*—(a) The Bureau of Public Roads and its functions shall be administered as the Public Roads Administration at the head of which shall be the Chief of the Bureau of Public Roads whose title shall be changed to Commissioner of Public Roads. Hereafter the Commissioner of Public Roads shall be appointed by the Federal Works Administrator.

(b) All functions of the Secretary of Agriculture relating to the administration of the Bureau of Public Roads are hereby transferred to, and shall be exercised by, the Federal Works Administrator.

SECTION 303. *Public Buildings Administration.*—(a) The Public Buildings Branch of the Procurement Division and its functions, the Branch of Buildings Management of the National Park Service and its functions (except those relating to monuments and memorials) and the functions of the National Park Service in the District of Columbia in connection with the general assignment of space, the selection of sites for public buildings, and the determination of the priority in which the construction or enlargement of public buildings shall be undertaken, are hereby consolidated and shall be administered as the Public Buildings Administration, with a Commissioner of Public Buildings at the head thereof. The Commissioner of Public Buildings shall be appointed by the Federal Works Administrator and shall receive a salary at the rate of $9,000 per annum. The Commissioner of Public Buildings shall act under the direction and supervision of the Federal Works Administrator.

(b) All functions of the Secretary of the Treasury and the Director of Procurement relating to the administration of the Public Buildings Branch of the Procurement Division and to the selection of location and sites for public buildings, and all functions of the Secretary of the Interior and the Director of the National Park Service relating to the adminstration of the functions of the Branch of Buildings Management and the functions of the National Park Service in the District of Columbia in connection with the general assignment of space, the selection of sites for public buildings, and the determination of the priority in which the construction or enlargement of public buildings shall be undertaken, are hereby transferred to,

and shall be exercised by, the Federal Works Administrator.

SECTION 304. *United States Housing Authority.*—(a) The United States Housing Authority and its functions shall be administered by the United States Housing Administrator under the direction and supervision of the Federal Works Administrator.

(b) All functions of the Secretary of the Interior relating to the administration of the United States Housing Authority are hereby transferred to, and shall be exercised by, the Federal Works Administrator.

SECTION 305. *Public Works Administration.*—The Federal Emergency Administration of Public Works and its functions shall be administered as the Public Works Administration with a Commissioner of Public Works at the head thereof. The Commissioner of Public Works shall be appointed by the Federal Works Administrator and shall receive a salary at the rate of $10,000 per annum. The Commissioner of Public Works shall act under the direction and supervision of the Federal Works Administrator.

SECTION 306. *Work Projects Administration.*—The Works Progress Administration and its functions (except the National Youth Administration and its functions) shall be administered as the Work Projects Administration, with a Commissioner of Work Projects at the head thereof. The Commissioner shall be appointed by the Federal Works Administrator and shall receive a salary at the rate of $10,000 per annum. The Commissioner shall act under the direction and supervision of the Federal Works Administrator.

SECTION 307. *Transfer of Records and Property.*—All records and property (including office equipment) of the several agencies which, with their functions, are consolidated by section 301 into the Federal Works Agency are hereby transferred to the jurisdiction and control of the Federal Works Agency for use in the administration of the agencies and functions consolidated by that section.

SECTION 308. *Transfer of Funds.*—(a) So much of the unexpended balances of appropriations, allocations, or other funds available (including those available for the fiscal year ending June 30, 1940) for the use of any agency (except the United States Housing Authority) in the exercise of any functions transferred by this Part, or for the use of the head of any department or agency in the exercise of any functions so transferred, and so much of such balances available to the United States Housing Authority for administrative expenses, as the Director of the Bureau of the Budget shall determine, shall be transferred for use in connection with the exercise of the functions transferred by this Part. In determining the amount to be transferred the Director of the Bureau of the Budget may include an amount to provide for the liquidation of obligations incurred against such appropriations, allocations, or other funds prior to the transfer: *Provided*, That the use of the unexpended balances of appropriations, allocations, or other funds transferred by this section shall be subject to the provisions of section 4 (d) (3) and section 9 of the Reorganization Act of 1939.

(b) All unexpended balances of appropriations, allocations, or other funds available (including those available for the fiscal year ending June 30, 1940) for the use of the United States Housing Authority, other than those transferred by subsection (a) of this section, are hereby transferred with the United States Housing Authority and shall remain available to it for the exercise of its functions.

SECTION 309. *Administrative Funds.*—The Director of the Bureau of the Budget shall allocate to the Federal Works Agency, from appropriations, allocations, or other funds available (including those available for the fiscal year ending June 30, 1940) for the administrative expenses of the agencies and functions consolidated by section 301, such sums, and in such proportions, as he may find necessary for the administrative expenses of the Federal Works Agency.

SECTION 310. *Personnel.*—Any of the personnel transferred by this Part found to be in excess of the personnel necessary for the efficient administration of the functions transferred by this Part shall be re-transferred under existing law to other positions in the Government service, or separated from the service subject to the provisions of section 10 (a) of the Reorganization Act of 1939.

PART 4.—LENDING AGENCIES

SECTION 401. (a) *Transfers to the Department of Agriculture.*—The Farm Credit Administration, the Federal Farm Mortgage Corporation, and the Commodity Credit Corporation, and their functions and activities, together with their respective personnel, records, and property (including office equipment), are hereby transferred to the Department of Agriculture and shall be administered in such Department under the general direction and supervision of the Secretary of Agriculture, who shall be responsible for the coordination of their functions and activities.

(b) *Transfer of Administrative Funds.*—So much of the unexpended balances of appropriations, allocations, or other funds available (including those available for the fiscal year ending June 30, 1940) for the administrative expenses of any agency transferred by this section, as the Director of the Bureau of the Budget shall determine, shall be transferred to the Secretary of Agriculture for such use; and the Director of the Bureau of the Budget shall allocate to the Secretary of Agriculture from such funds, such sums, and in such proportions, as he may find necessary for the administrative expenses of the Secretary of Agriculture in connection with the agencies and functions transferred by this section. In determining the amount to be transferred, the Director of the Bureau of the Budget may include an amount to provide for the liquidation of obligations incurred against such appropriations, allocations, or other funds prior to the transfer. The use of the unexpended balances of appropriations, allocations, or other funds transferred by this subsection shall be subject to the provision of section 4 (d) (3) and section 9 of the Reorganization Act of 1939.

(c) *Transfer of other funds.*—All unexpended balances of appropriations, allocations, or other funds, other than those mentioned in subsection (b) of this section, available (including those available for the fiscal year ending June 30, 1940) for any agency transferred by subsection (a) of this section shall be transferred with such agency and shall remain available to it for the exercise of its functions.

(d) *Personnel.*—Any of the personnel transferred by this section to the Department of Agriculture which the Secretary of Agriculture shall find to be in excess of the personnel necessary for the administration of the functions transferred by this section shall be re-transferred under existing law to other positions in the Government, or separated from the service subject to the provisions of section 10 (a) of the Reorganization Act of 1939.

SECTION 402. (a) *Federal Loan Agency.*—There shall be at the seat of the Government a Federal Loan Agency, with a Federal Loan Administrator at the head thereof. The Federal Loan Administrator shall be appointed by the President by and with the advice and consent of the Senate, and shall receive a salary at the rate of $12,000 per annum.

(b) *Assistant Federal Loan Administrator.*—The Federal Loan Administrator shall appoint an Assistant Federal Loan Administrator, who shall receive a salary at the rate of $9,000 per annum. The Assistant Administrator shall act as Administrator during the absence or disability of the Administrator, or in the event of a vacancy in that office, and shall perform such other duties as the Administrator shall direct.

(c) *Powers and Duties of Administrator.*—The Administrator shall supervise the administration, and shall be responsible for the coordination of the functions and activities, of the following agencies: Reconstruction Finance Corporation, Electric Home and Farm Authority, RFC Mortgage Company, Disaster Loan Corporation, Federal National Mortgage Association, Federal Home Loan Bank Board, Home Owners' Loan Corporation, Federal Savings and Loan Insurance Corporation, Federal Housing Administration, and Export-Import Bank of Washington. The Administrator may appoint such officers and employees and make such expenditures as may be necessary.

(d) *Administrative Funds.*—The Director of the Bureau of the Budget shall allocate to the Federal Loan Agency, from appropriations, allocations, or other funds available (including those available for the fiscal year ending June 30, 1940) for the administrative expenses of the agencies named in this section, such sums, and in such proportion, as he may find necessary for the administrative expenses of the Federal Loan Agency.

---

REORGANIZATION PLAN NO. II

*Prepared by the President and transmitted to the Senate and the House of Representatives in Congress assembled, May 9, 1939, pursuant to the provisions of the Reorganization Act of 1939, approved April 3, 1939*

PART 1.—DEPARTMENTS

SECTION 1. *State Department.*—Transfers and consolidations relating to the Department of State are hereby effected as follows:

(a) *Foreign Commerce Service and Foreign Agricultural Service.*—The Foreign Commerce Service of the United States and its functions in the Bureau of Foreign and Domestic Commerce of the Department of Commerce and the Foreign Agricultural Service of the United States and its functions as established by the Act of June 5, 1930 (46 Stat. 497), in the Department of Agriculture are hereby transferred to the Department of State and shall be consolidated with and administered as a part of the Foreign Service of the United States under the direction and supervision of the Secretary of State.

(b) *Functions of the Secretary of Commerce and the Secretary of Agriculture Transferred to the Secretary of State; Exceptions.*—The functions of the Secretary of Commerce with respect to the Foreign Commerce Service and the functions of the Secretary of Agriculture with respect to the Foreign Agricultural Service (other than functions with respect to such services pertaining to activities in the United States and to the compilation, publication, and dissemination of information) are hereby transferred to, and shall be exercised by, the Secretary of State, except and provided that under regulations prescribed by the President—

(1) The Secretary of State shall cause to be made such investigations relating to commercial and industrial conditions and activities in foreign countries and such other specific investigations relating to foreign commerce as the Secretary of Commerce shall determine to be in the public interest, and shall report to the Secretary of Commerce the results of, and the information secured through, such investigations. He shall also cause to be made such investigations relating to world competition and demand for agricultural products, to production, marketing, and disposition of such products in foreign countries, and to farm management and other phases of agricultural industry in foreign countries, and shall conduct abroad such activities (including the demonstration of standards for cotton, wheat, and other American agricultural products), as the Secretary of Agriculture shall determine to be in the public interest, and shall report to the Secretary of Agriculture the results of, and the information secured through, such investigations and activities.

(2) The Secretary of Commerce may from time to time when he deems it in the public interest designate any officer in his Department to render temporary service under the provisions of, and subject to the conditions named in, section 5 of the Act of March 3, 1927, (44 Stat. 1396).

(3) The Secretary of Agriculture may from time to time when he deems it in the public interest designate any officer in his Department to render temporary service under the provisions of, and subject to the conditions named in, section 2 of the Act of June 5, 1930, (46 Stat. 498).

(4) The Secretary of Commerce and the Secretary of Agriculture may each designate an officer in his Department, acceptable to the Secretary of State, to serve in the Department of State as liaison officer in connection with the administration of the foreign service of the United States.

(5) One officer in the Department of Commerce designated by the Secretary of Commerce and acceptable to the Secretary of State and one officer in the Department of Agriculture designated by the Secretary of Agriculture and acceptable to the Secretary of State shall be added to the membership of the Board of Foreign Service Personnel for the Foreign Service.

(c) *Status of Foreign Service Officers.*—Foreign Commerce Service officers and Foreign Agricultural Service officers who by reason of transfer to the Foreign Service of the United States and by appointment according to law acquire status of Foreign Service officers therein shall not be included in the total number of officers in such Service for the purpose of determining the percentage limitation established by section 10 of the Act of February 23, 1931 (46 Stat. 1207), as amended.

(d) *China Trade Act Registrar.*—Such officer of the Foreign Service as the Secretary of State shall make available for that purpose may be authorized by the Secretary of Commerce to perform the duties of China Trade Act Registrar provided for in the Act of September 19, 1922 (42 Stat. 849), under the direction of the Secretary of Commerce.

(e) *Foreign Service Buildings Commission.*—The Foreign Service Buildings Commission and its functions are hereby transferred to the Department of State. The Commission shall exercise advisory functions, but all other functions (including administrative functions) shall be exercised under the direction and supervision of the Secretary of State by such division, bureau, or office in the Department of State as the Secretary shall determine.

SEC. 2. *Treasury Department.*—Transfers, consolidations, and abolitions relating to the Department of the Treasury are hereby effected as follows:

(a) *Bureau of Lighthouses.*—The Bureau of Lighthouses in the Department of Commerce and its functions are hereby transferred to and shall be consolidated with and administered as a part of the Coast Guard in the Department of the Treasury.

(b) *Director General of Railroads: Office Abolished and Functions Transferred.*—The office of Director General of Railroads is hereby abolished. The functions and duties of the Director General of Railroads are hereby transferred to the Secretary of the Treasury to be exercised and performed by him personally or through such officer or officers of the Department of the Treasury as he may authorize. The Secretary of the Treasury is hereby designated as the agent provided for in section 206 of the Transportation Act, 1920 (41 Stat. 461).

(c) *War Finance Corporation Abolished.*—All of the functions, property, and obligations of the War Finance Corporation not heretofore transferred by statute to the Secretary of the Treasury are hereby transferred to the Department of the Treasury. The War Finance Corporation is hereby abolished and the Secretary of the Treasury shall complete the winding up of its affairs and shall dispose of its assets in accordance with the Act of March 1, 1929 (45 Stat. 1442), not later than December 31, 1939.

SEC. 3. *Department of Justice.*—Transfers, consolidations, and abolitions relating to the Department of Justice are hereby effected as follows:

(a) *Federal Prison Industries, Inc.*—The Federal Prison Industries, Inc. (together with its Board of Directors) and its functions are hereby transferred to the Department of Justice and shall be administered under the general direction and supervision of the Attorney General.

(b) *National Training School for Boys.*—The National Training School for Boys and its functions (including the functions of its Board of Trustees) are hereby transferred to the Department of Justice and shall be administered by the Director of the Bureau of Prisons, under the direction and supervision of the Attorney General.

(c) *Board of Trustees of the National Training School for Boys Abolished.*—The Board of Trustees of the National Training School for Boys (including the consulting trustees) is hereby abolished.

SEC. 4. *Department of the Interior.*—Transfers, consolidations, and abolitions relating to the Department of the Interior are hereby effected as follows:

(a) *Functions of the National Bituminous Coal Commission Transferred.*—The functions of the National Bituminous Coal Commission (including the functions of the members of the Com-

mission) are hereby transferred to the Secretary of the Interior to be administered under his direction and supervision by such division, bureau, or office in the Department of the Interior as the Secretary shall determine.

(b) *National Bituminous Coal Commission Abolished.*—The National Bituminous Coal Commission and the offices of the members thereof are hereby abolished and the outstanding affairs of the Commission shall be wound up by the Secretary of the Interior.

(c) *Office of Consumers' Counsel Abolished and Functions Transferred.*—The office of Consumers' Counsel of the National Bituminous Coal Commission is hereby abolished and its functions are transferred to, and shall be administered in, the Office of the Solicitor of the Department of the Interior under the direction and supervision of the Secretary of the Interior.

(d) *Bureau of Insular Affairs.*—The Bureau of Insular Affairs of the War Department and its functions are hereby transferred to the Department of the Interior and shall be consolidated with the Division of Territories and Island Possessions in the Department of the Interior and administered in such Division under the direction and supervision of the Secretary of the Interior. The office of the Chief of the Bureau and offices subordinate thereto provided for in section 14 of the Act of June 4, 1920 (41 Stat. 769), are hereby abolished and all of the functions of such offices are transferred to, and shall be exercised by, the Director of the Division of Territories and Island Possessions.

(e) *Bureau of Fisheries.*—The Bureau of Fisheries in the Department of Commerce and its functions are hereby transferred to the Department of the Interior and shall be administered in that Department under the direction and supervision of the Secretary of the Interior. The functions of the Secretary of Commerce relating to the protection of fur seals and other fur-bearing animals, to the supervision of the Pribilof Islands and the care of the natives thereof, and to the Whaling Treaty Act, are hereby transferred to, and shall be exercised by, the Secretary of the Interior.

(f) *Bureau of Biological Survey.*—The Bureau of Biological Survey in the Department of Agriculture and its functions are hereby transferred to the Department of the Interior and shall be administered in that Department under the direction and supervision of the Secretary of the Interior. The functions of the Secretary of Agriculture relating to the conservation of wild life, game, and migratory birds are hereby transferred to, and shall be exercised by, the Secretary of the Interior. The provisions of the Act of May 18, 1934 (c. 299, 48 Stat. 780), as amended by the Act of February 8, 1936 (c. 40, 49 Stat. 1105), insofar as they relate to officers or employees of the Department of Agriculture designated by the Secretary of Agriculture to enforce any act of Congress for the protection, preservation or restoration of game and other wild life and animals shall apply to officers and employees of the Department of the Interior designated by the Secretary of the Interior to exercise and discharge such duties.

(g) *Officers of Biological Survey May Administer Oaths.*—The provisions of the Act of January 31, 1925 (c. 124, 43 Stat. 803), shall be applicable to such officers, agents, or employees of the Department of the Interior performing functions of the Bureau of Biological Survey as are designated by the Secretary of the Interior for the purposes named in the Act.

(h) *Migratory Bird Conservation Commission.*—The Secretary of the Interior shall be chairman of the Migratory Bird Conservation Commission, and the Secretary of Agriculture shall be a member thereof.

(i) *Mount Rushmore National Memorial Commission.*—The Mount Rushmore National Memorial Commission and its functions are hereby transferred to the National Park Service in the Department of the Interior. The functions vested in the Commission by section 3 and 4 (a) of the Act of June 15, 1938, (c. 402, 52 Stat. 694) shall continue to be exercised by the Commission. All other functions of the Mount Rushmore National Memorial Commission shall be administered by the National Park Service under the direction and supervision of the Secretary of the Interior.

SEC. 5. *Department of Agriculture: Rural Electrification Administration Transferred.*—The Rural Electrification Administration and its functions and activities are hereby transferred to the Department of Agriculture and shall be administered in that Department by the Administrator of the Rural Electrification Administration under the general direction and supervision of the Secretary of Agriculture.

SEC. 6. *Department of Commerce: Transfer of Inland Waterways Corporation.*—The Inland Waterways Corporation and all of its functions and obligations are hereby transferred to the Department of Commerce and shall be administered in that Department under the supervision and direction of the Secretary of Commerce. The capital stock of the Corporation shall continue to be held for the United States by the Secretary of the Treasury, but all other functions, rights, privileges, and powers and all duties and liabilities of the Secretary of War relating to the Inland Waterways Corporation are hereby transferred to, and shall be exercised, performed, and discharged by, the Secretary of Commerce. The Secretary of Commerce shall be substituted for the Secretary of War as, and shall be deemed to be, the incorporator of the Inland Waterways Corporation.

PART 2.—INDEPENDENT AGENCIES

SECTION 201. *Federal Security Agency.*—Transfers and consolidations relating to the Federal Security Agency are hereby effected as follows:

(a) *Radio Service and United States Film Service Transferred.*—The functions of the Radio Division and the United States Film Service of the National Emergency Council are hereby transferred to the Federal Security Agency and shall be administered in the Office of Education under the direction and supervision of the Federal Security Administrator.

(b) *American Printing House for the Blind.*—The functions of the Secretary of the Treasury with respect to the administration of the appropriations for the American Printing House for the Blind (except the function relating to the perpetual trust fund) are hereby transferred to the Federal Security Agency and shall be administered under the direction and supervision of the Federal Security Administrator. The annual report and vouchers required to be furnished to the Secretary of the Treasury by the trustees of the American Printing House for the Blind shall be furnished to the Federal Security Administrator.

SEC. 202. *National Archives.*—Transfers, consolidations, and abolitions relating to the National Archives are hereby effected as follows:

(a) *Functions of Codification Board Transferred.*—The functions of the Codification Board, established by the Act of June 19, 1937 (50 Stat. 304), are hereby transferred to the National Archives and shall be consolidated in that agency with the functions of the Division of the Federal Register and shall be administered by such Division under the direction and supervision of the Archivist.

(b) *Codification Board Abolished.*—The Codification Board is hereby abolished and its outstanding affairs shall be wound up by the Archivist through the Division of the Federal Register in the National Archives.

PART 3.—EXECUTIVE OFFICE OF THE PRESIDENT

SECTION 301. Transfers and abolitions relating to the Executive Office of the President are hereby effected as follows:

(a) *Functions of National Emergency Council Transferred.*—All functions of the National Emergency Council other than those relating to Radio Service and Film Service (transferred by section 201 (a) of this plan to the Federal Security Agency) are hereby transferred to the Executive Office of the President and shall be administered under the direction and supervision of the President.

(b) *National Emergency Council Abolished.*—The National Emergency Council is hereby abolished and its outstanding affairs shall be wound up under the direction and supervision of the President.

PART 4.—GENERAL PROVISIONS

SEC. 401. *Transfer of Functions of Heads of Departments.*—Except as otherwise provided in this Plan, the functions of the head of any Department relating to the administration of any agency or function transferred from his Department by this Plan, are hereby transferred to, and shall be exercised by, the head of the department or agency to which such transferred agency or function is transferred by this Plan.

SEC. 402. *Transfer of Records, Property, and Personnel.*—All records and property (including office equipment) of the several agencies, and all records and property used primarily in the administration of any functions, transferred by this Plan and, except as otherwise provided, all the personnel used in the administration of such agencies and functions (including officers whose chief duties relate to such administration) are hereby transferred to the respective departments or agencies concerned, for use in the administration of the agencies and functions transferred by this Plan: *Provided*, That any personnel transferred to any department or agency by this section found by the head of such department or agency to be in excess of the personnel necessary for the administration of the functions transferred to his department or agency shall be retransferred under existing law to other positions in the Government service, or separated from the service subject to the provisions of section 10 (a) of the Reorganization Act of 1939.

SEC. 403. *Transfer of Funds.*—So much of the unexpended balances of appropriations, allocations, or other funds available for the use of any agency in the exercise of any function transferred by this Plan, or for the use of the head of any department or agency in the exercise of any function so transferred, as the Director of the Bureau of the Budget with the approval of the President shall determine, shall be transferred to the department or agency concerned for use in connection with the exercise of the function so transferred. In determining the amount to be transferred the Director of the Bureau of the Budget may include an amount to provide for the liquidation of obligations incurred against such appropriations, allocations, or other funds prior to the transfer: *Provided*, That the use of the unexpended balances of appropriations, allocations, or other funds transferred by this section shall be subject to the provisions of section 4 (d) (3) and section 9 of the Reorganization Act of 1939.

SEC. 404. *Transfer of Functions Relating to Personnel.*—Except as prohibited by section 3 (b) of the Reorganization Act of 1939, all functions relating to the appointment, fixing of compensation, transfer, promotion, demotion, suspension, or dismissal of persons to or from offices and positions in any department vested by law in any officer of such department other than the head thereof are hereby transferred to the head of such department and shall be administered under his direction and supervision by such division, bureau, office, or persons as he shall determine.

SUBCHAPTER A—PART 16—EXCESS PROFITS ON ARMY CONTRACTS FOR AIRCRAFT

REGULATIONS UNDER SECTION 14 OF THE ACT OF APRIL 3, 1939, AND OTHER PROVISIONS* †

*To Officers and Employees of the Treasury Department, the War Department, and Others Concerned:*

TABLE OF CONTENTS

Sec.
16.0 Introductory.
16.1 Definitions.
16.2 Contracts and subcontracts under which excess profit liability may be incurred.
16.3 Contracts or subcontracts for scientific equipment.
16.4 Completion of contract defined.
16.5 Manner of determining liability.
16.6 Computation of excess profit liability.
16.7 Total contract price.
16.8 Cost of performing a contract or subcontract.
16.9 Credit for net loss or for deficiency in profit in computing excess profit.
16.10 Credit for Federal income taxes.
16.11 Failure of contractor to require agreement by subcontractor.
16.12 Evasion of excess profit.
16.13 Books of account and records.
16.14 Report to Secretary of War.
16.15 Annual reports for income-taxable years.
16.16 Payment of excess profit liability.
16.17 Liability of surety.
16.18 Determination of liability for excess profit, interest and penalties; assessment, collection, payment, refunds.

§ 16.0 *Introductory.* (a) Section 14 of the Act entitled "An Act to provide more effectively for the national defense by carrying out the recommendations of the President in his message of January 12, 1939, to the Congress," approved April 3, 1939 (Public, No. 18, 76th Cong., 1st sess.; I.R.B. 1939–20, 13), provides:

SEC. 14. All the provisions of section 3 of the Act of March 27, 1934, as amended (48 Stat. 505; 49 Stat. 1926), and as amended by this section shall be applicable with respect to contracts for aircraft or any portion thereof for the Army to the same extent and in the same manner that such provisions are applicable with respect to contracts for aircraft, or any portion thereof for the Navy: *Provided*, That the Secretary of War shall exercise all functions under such section with respect to aircraft for the Army which are exercised by the Secretary of the Navy with respect to aircraft for the Navy: *Provided further*, That section 3b of the Act of March 27, 1934 (48 Stat. 505), as amended (49 Stat. 1926; 34 U.S.C. Supp. IV 496), is hereby further amended by inserting in the first sentence after the words "in excess of 10 per centum of the total contract prices" the words "for the

*Sections 16.0 to 16.18 issued under the authority contained in section 14 of the Act of April 3, 1939 (Public, No. 18, 76th Cong., 1st sess.) and section 3 of the Act of March 27, 1934, 48 Stat. 505 (34 U.S.C. 496), as amended by the Act of June 25, 1936, 49 Stat. 1926 (34 U.S.C., Sup. IV, 496) and as further amended by section 14 of such Act of April 3, 1939.

†The source of sections 16.0 to 16.18 is Treasury Decision 4909, approved by the Acting Secretary of the Treasury June 16, 1939, and approved by the Acting Secretary of War June 28, 1939.

construction and/or manufacture of any complete naval vessel or portion thereof, and in excess of 12 per centum of the total contract prices for the construction and/or manufacture of any complete aircraft or portion thereof"; by inserting in the first proviso after the words "That if there is a net loss on all such contracts or subcontracts" the words "for the construction and/or manufacture of any complete naval vessel or portion thereof"; and by inserting at the end of the first proviso after the words "income taxable year" a comma and the words "and that if there is a net loss, or a net profit less than 12 per centum, as aforesaid on all such contracts or subcontracts for the construction and/or manufacture of any complete aircraft or portion thereof completed by the particular contractor or subcontractor within any income taxable year, such net loss or deficiency in profit shall be allowed as a credit in determining the excess profit, if any, during the next succeeding four income taxable years, and that the method of ascertaining the amount of excess profit, initially fixed upon shall be determined on or before June 30, 1939": *Provided further*, That when aircraft are procured by the Secretary of War as a result of competitive bids requiring the submission of sample aircraft with bid, the Secretary is authorized, in his discretion, to purchase sample aircraft of competitors to whom an award is not made, not more than one each from not more than three such competitors, in order of merit, at prices not exceeding 75, 60, and 50 per centum, respectively, of the cost applicable in the opinion of the Secretary to the development and manufacture of such sample aircraft.

(b) Section 3 of the Act entitled "An Act to establish the composition of the United States Navy with respect to the categories of vessels limited by the treaties signed at Washington, February 6, 1922, and at London, April 22, 1930, at the limits prescribed by those treaties; to authorize the construction of certain naval vessels; and for other purposes," approved March 27, 1934, 48 Stat. 505 (34 U.S.C. 496), as amended by the Act of June 25, 1936, 49 Stat. 1926 (34 U.S.C., Sup. IV, 496) and as further amended by the Act of April 3, 1939 (Public, No. 18, 76th Cong., 1st sess.; I.R.B. 1939–20, 13), reads as follows:

SEC. 3. The Secretary of the Navy is hereby directed to submit annually to the Bureau of the Budget estimates for the construction of the foregoing vessels and aircraft; and there is hereby authorized to be appropriated such sums as may be necessary to carry into effect the provisions of this Act: *Provided*, That no contract shall be made by the Secretary of the Navy for the construction and/or manufacture of any complete naval vessel or aircraft, or any portion thereof, herein, heretofore, or hereafter authorized unless the contractor agrees—

(a) To make a report, as hereinafter described, under oath, to the Secretary of the Navy upon the completion of the contract.

(b) To pay into the Treasury profit, as hereinafter provided shall be determined by the Treasury Department, in excess of 10 per centum of the total contract prices for the construction and or manufacture of any complete naval vessel or portion thereof, and in excess of 12 per centum of the total contract prices for the construction and or manufacture of any complete aircraft or portion thereof, of such contracts within the scope of this section as are completed by the particular contracting party within the income taxable year, such amount to become the property of the United States, but the surety under such contracts shall not be liable for the payment of such excess profit: *Provided*, That if there is a net loss on all such contracts or subcontracts for the construction and or manufacture of any complete naval vessel or portion thereof completed by the particular contractor or subcontractor within any income taxable year, such net loss or deficiency in profit shall be allowed as a credit in determining the excess profit, if any, for the next succeeding income taxable year, and that if there is a net loss, or a net profit less than 12 per centum, as aforesaid on all such contracts or subcontracts for the construction and or manufacture of any complete aircraft or portion thereof completed by the particular contractor or subcontractor within any income taxable year, such net loss or deficiency in profit shall be allowed as a credit in determining the excess profit, if any, during the next succeeding four income taxable years, and that the method of ascertaining the amount of excess profit, initially fixed upon shall be determined on or before June 30, 1939: *Provided further*, That if such amount is not voluntarily paid the Secretary of the Treasury shall collect the same under the usual methods employed under the internal-revenue laws to collect Federal income taxes: *Provided further*, That all provisions of law (including penalties) applicable with respect to the taxes imposed by Title I of the Revenue Act of 1934, and not inconsistent with this section, shall be applicable with respect to the assessment, collection, or payment of excess profits to the Treasury as provided by this section, and to refunds by the Treasury of overpayments of excess profits into the Treasury: *And provided further*, That this section shall not apply to contracts or subcontracts for scientific equipment used for communication, target detection, navigation, and fire control as may be so designated by the Secretary of the Navy, and the Secretary of the Navy shall report annually to the Congress the names of such contractors and subcontractors affected by this provision, together with the applicable contracts and the amounts thereof: *And provided further*, That the income-taxable years shall be such taxable years beginning after December 31, 1935, except that the above provisos relating to the assessment, collection, payment, or refunding of excess profit to or by the Treasury shall be retroactive to March 27, 1934.

(c) To make no subdivisions of any contract or subcontract for the same article or articles for the purpose of evading the provisions of this Act, but any subdivision of any contract or subcontract involving an amount in excess of $10,000 shall be subject to the conditions herein prescribed.

(d) That the manufacturing spaces and books of its own plant, affiliates, and subdivisions shall at all times be subject to inspection and audit by any person designated by the Secretary of the Navy, the Secretary of the Treasury, and/or by a duly authorized committee of Congress.

(e) To make no subcontract unless the subcontractor agrees to the foregoing conditions.

The report shall be in form prescribed by the Secretary of the Navy and shall state the total contract price, the cost of performing the contract, the net income, and the per centum such net income bears to the contract price. A copy of such report shall be transmitted to the Secretary of the Treasury for consideration in connection with the Federal income tax returns of the contractor for the taxable year or years concerned.

The method of ascertaining the amount of excess profit to be paid into the Treasury shall be determined by the Secretary of the Treasury in agreement with the Secretary of the Navy and made available to the public. The method initially fixed upon shall be so determined on or before June 30, 1934: *Provided*, That in any case where an excess profit may be found to be owing to the United States in consequence hereof, the Secretary of the Treasury shall allow credit for any Federal income taxes paid or remaining to be paid upon the amount of such excess profit.

The contract or subcontracts referred to herein are limited to those where the award exceeds $10,000.

Pursuant to the authority prescribed by section 14 of the Act of April 3, 1939 (Public, No. 18, 76th Cong., 1st sess.) and section 3 of the Act of March 27, 1934, as amended, the following regulations are hereby prescribed:*†

§ 16.1 *Definitions.* As used in these regulations the term—

(a) *Act* means the Act of April 3, 1939 (Public, No. 18, 76th Cong., 1st sess.; I.R.B. 1939–20, 13), together with the applicable provisions of section 3 of the Act of March 27, 1934, 48 Stat. 505 (34 U.S.C. 496) as amended by the Act of June 25, 1936, 49 Stat. 1926 (34 U.S.C., Sup. IV, 496) and as further amended by the Act of April 3, 1939 (Public, No. 18, 76th Cong., 1st sess.; I.R.B. 1939–20, 13).

(b) *Person* includes an individual, a corporation, a partnership, a trust or estate, a joint-stock company, an association, or a syndicate, group, pool, joint venture or other unincorporated organization or group, through or by means of which any business, financial operation or venture is carried on.

(c) *Contract* means an agreement made by authority of the Secretary of War for the construction or manufacture of any complete aircraft or any portion thereof for the Army.

(d) *Contractor* means a person entering into a direct contract with the Secretary of War or his duly authorized representative.

(e) *Subcontract* means an agreement entered into by one person with another person for the construction or manufacture of any complete aircraft or any portion thereof for the Army, the prime contract for such aircraft or portion thereof having been entered into between a contractor and the Secretary of War or his duly authorized representative.

(f) *Subcontractor* means any person other than a contractor entering into a subcontract.

(g) *Contracting party* means a contractor or subcontractor as the case may be.

(h) *Contract price* or *total contract price* means the amount or total amount to be received under a contract or subcontract as the case may be.

(i) *Income-taxable year* means the calendar year, the fiscal year ending during such calendar year, or the fractional part of such calendar or fiscal year, upon the basis of which the contracting party's net income is computed and for which its income tax returns are made for Federal income tax purposes.*†

§ 16.2 *Contracts and subcontracts under which excess profit liability may be incurred.* Except as otherwise provided with respect to contracts or subcontracts for certain scientific equipment (see section 16.3 of these regulations), every contract awarded for an amount exceeding $10,000 and entered into after the enactment of the Act of April 3, 1939 for the construction or manufacture of any complete aircraft or any portion thereof for the Army, is subject to the provisions of the Act relating to excess profit liability. Any subcontract made with respect to such a contract and involving an amount in excess of $10,000 is also within the scope of the Act. If a contracting party places orders with another party, aggregating an amount in excess of $10,000, for articles or materials which constitute a part of the cost of performing the contract or subcontract, the placing of such orders shall constitute a subcontract within the scope of the Act, unless it is clearly shown that each of the orders involving $10,000 or less is a bona fide separate and distinct subcontract and not a subdivision made for the purpose of evading the provisions of the Act.*†

§ 16.3 *Contracts or subcontracts for scientific equipment.* No excess profit liability is incurred upon a contract or subcontract entered into after the enactment of the Act of April 3, 1939, if at the time or prior to the time such contract or subcontract is made it is designated by the Secretary of War as being exempt under the provisions of the Act pertaining to scientific equipment used for communication, target detection, navigation, and fire control.*†

§ 16.4 *Completion of contract defined.* The date of delivery of the aircraft or portion thereof covered by the contract or subcontract shall be considered the date of completion of the contract or subcontract unless otherwise determined jointly by the Secretary of War and the Secretary of the Treasury or their duly authorized representatives. Except as otherwise provided in the preceding sentence, the replacement of defective parts of delivered articles or the performance of other guarantee work in respect of such articles will not operate to extend the date of completion. As to the treatment of the cost of such work as a cost of performing a contract or subcontract, see section 16.8 (h) of these regulations. As to a refund in case of adjustment due to any subsequently incurred additional costs, see section 16.18 of these regulations. If a contract or subcontract is at any time cancelled or terminated, it is completed at the time of the cancellation or termination.*†

§ 16.5 *Manner of determining liability. The first step* in the determination of the excess profit to be paid to the United States by a contracting party with respect to contracts and subcontracts completed within an income-taxable year is to ascertain the total contract prices of all contracts and subcontracts completed by the contracting party within the income-taxable year. As to total contract prices, see section 16.7 of these regulations.

*The second step* is to ascertain the cost of performing such contracts and subcontracts and to deduct such cost from the total contract prices of such contracts and subcontracts as computed in the first step. See section 16.8 of these regulations.

The amount remaining after such subtraction is the amount of net profit or net loss upon the contracts and subcontracts completed within the income-taxable year.

*The third step*, in case there is a net profit upon such contracts and subcontracts, is to subtract from the amount of such net profit as computed in the second step the sum of—

(1) An amount equal to 12 percent of the total contract prices of the contracts and subcontracts completed within the income-taxable year;

(2) The amount of any net loss sustained in a prior income-taxable year and allowable as a credit in determining the excess profit for the income-taxable year (see section 16.9 of these regulations); and

(3) The amount of any deficiency in profit sustained in a prior income-taxable year and allowable as a credit in determining the excess profit for the income-taxable year (see section 16.9 of these regulations).

The amount remaining after such subtraction is the amount of excess profit for the income-taxable year.

*The fourth step* is to ascertain the amount of credit allowed for Federal income taxes paid or remaining to be paid upon the amount of such excess profit (see section 16.10 of these regulations) and then subtract from the amount of such excess profit the amount of credit for Federal income taxes.

The amount remaining after this subtraction is the amount of excess profit to be paid to the United States by the contracting party for the income-taxable year.*†

§ 16.6 *Computation of excess profit liability.* The application of the provisions of section 16.5 of these regulations may be illustrated by the following example:

*Example:* On September 1, 1939, the B Corporation which keeps its books and makes its Federal income tax returns on a calendar year basis entered into a contract coming within the scope of the Act, the total contract price of which was $200,000. On March 10, 1940, the corporation entered into another such contract, the total contract price of which was $40,000. Both contracts were completed within the calendar year 1940, the first at a cost of $155,000 and the second at a cost of $45,000. During the year 1939 the B Corporation sustained a net loss of $2,500 and a deficiency in profit of $1,000 on contracts and subcontracts entered into after April 3, 1939 and completed within the income-taxable year 1939. For purposes of the Federal income tax, the net income of the B Corporation for the year 1940 amounted to $96,000, which included the total net profit of $40,000 upon the two contracts. For the year 1940 the B Corporation paid a Federal income tax of $13,240 upon its entire net income. The excess profit liability is $6,700 computed as follows:

| | | |
|---|---|---|
| Total contract prices: | | |
| Contract No. 1 | $200,000 | |
| Contract No. 2 | 40,000 | |
| | | $240,000 |
| Less: Cost of performing contracts: | | |
| Contract No. 1 | 155,000 | |
| Contract No. 2 | 45,000 | |
| | | 200,000 |
| Net profit on contracts | | 40,000 |
| Less: 12 percent of total contract prices (12 percent of $240,000) | $28,800 | |
| Net loss from 1939 | 2,500 | |
| Deficiency in profit from 1939 | 1,000 | |
| | | 32,300 |
| Excess profit for year 1940 | | 7,700 |
| Less: Credit for Federal income taxes (Federal income tax on $7,700 at the rates for 1940) | | 1,000 |
| Amount of excess profit payable to the United States | | 6,700 |

*†

§ 16.7 *Total contract price.* The total contract price of a particular contract or subcontract (see section 16.1 of these regulations) may be received in money or its equivalent. If something other than money is received, only the fair market value of the thing received, at the date of receipt, is to be included in determining the amount received. Bonuses earned for bettering performance and penalties incurred for failure to meet the contract guarantees are to be regarded as adjustments of the original contract price. Trade or other discounts granted by a contracting party in respect of a contract or subcontract performed by such party are also to be deducted in determining the true total contract price of such contract or subcontract.*†

§ 16.8 *Cost of performing a contract or subcontract*—(a) *General rule.* The cost of performing a particular contract or subcontract shall be the sum of (1) the direct costs, including therein expenditures for materials, direct labor and direct expenses, incurred by the contracting party in performing the contract or subcontract; and (2) the proper proportion of any indirect costs (including therein a reasonable proportion of management expenses) incident to and necessary for the performance of the contract or subcontract.

(b) *Elements of cost.* No definitions of the elements of cost may be stated which are of invariable application to all contractors and subcontractors. In general, the elements of cost may be defined for purposes of the Act as follows:

(1) Manufacturing cost, which is the sum of factory cost (see paragraph (c) of this section) and other manufacturing cost (see paragraph (d) of this section);

(2) Miscellaneous direct expenses (see paragraph (e) of this section);

(3) General expenses, which are the sum of indirect engineering expenses, usually termed "engineering overhead" (see paragraph (f) of this section) and expenses of distribution, servicing and administration (see paragraph (g) of this section); and

(4) Guarantee expenses (see paragraph (h) of this section).

(c) *Factory cost.* Factory cost is the sum of the following:

(1) *Direct materials.* Materials, such as those purchased for stock and subsequently issued for contract operations and those acquired under subcontracts, which become a component part of the finished product or which are used directly in fabricating, converting or processing such materials or parts.

(2) *Direct productive labor.* Productive labor, usually termed "shop labor," which is performed on and is properly chargeable directly to the article manufactured or constructed pursuant to the contract or subcontract, but which ordinarily does not include direct engineering labor (see subparagraph (3) of this paragraph).

(3) *Direct engineering labor.* The compensation of professional engineers and other technicists (including reasonable advisory fees), and of draftsmen, properly chargeable directly to the cost of the contract or subcontract.

(4) *Miscellaneous direct factory charges.* Items which are properly chargeable directly to the factory cost of performing the contract or subcontract but which do not come within the classifications in subparagraphs (1), (2), and (3) of this paragraph, as for example, royalties which the contracting party pays to another party and which are properly chargeable to the cost of performing the contract or subcontract (but see paragraph (d) of this section).

(5) *Indirect factory expenses.* Items, usually termed "factory overhead," which are not directly chargeable to the factory cost of performing the contract or subcontract but which are properly incident to and necessary for the performance of the contract or subcontract and consist of the following:

(A) *Labor.* Amounts expended for factory labor, such as supervision and inspection, clerical labor, timekeeping, packing and shipping, stores supply, services of tool crib attendants, and services in the factory employment bureau, which are not chargeable directly to productive labor of the contract or subcontract.

(B) *Materials and supplies.* The cost of materials and supplies for general use in the factory in current operations, such as shop fuel, lubricants, heat-treating, plating, cleaning and anodizing supplies, nondurable tools and gauges, stationery (such as time tickets and other forms), and boxing and wrapping materials.

(C) *Service expenses.* Factory expenses of a general nature, such as those for power, heat and light (whether purchased or produced), ventilation and air-conditioning and operation and maintenance of general plant assets and facilities.

(D) *Fixed charges and obsolescence.* Recurring charges with respect to property used for manufacturing purposes of the contract or subcontract, such as premiums for fire and elevator insurance, property taxes, rentals and allowances for depreciation of such property, including maintenance and depreciation of reasonable stand-by equipment; and depreciation and obsolescence of special equipment and facilities necessarily acquired primarily for the performance of the contract or subcontract. In making allowances for depreciation, consideration shall be given to the number and length of shifts.

(E) *Miscellaneous indirect factory expenses.* Miscellaneous factory expenses not directly chargeable to the factory cost of performing the contract or subcontract, such as purchasing expenses; ordinary and necessary expenses of rearranging facilities within a department or plant; employees' welfare expenses; premiums or dues on compensation insurance; employers' payments to unemployment, old age and social security Federal and State funds not including payments deducted from or chargeable to employees or officers; pensions and retirement payments to factory employees; factory accident compensation (as to self-insurance, see paragraph (g) of this section); but not including any amounts which are not incident to services, operations, plant, equipment or facilities involved in the performance of the contract or subcontract.

(d) *Other manufacturing cost.* Other manufacturing cost as used in paragraph (b) of this section includes items of manufacturing costs which are not properly or satisfactorily chargeable to factory costs (see paragraph (c) of this section) but which upon a complete showing of all pertinent facts are properly to be included as a cost of performing the contract or subcontract, as for instance, payments of royalties and amortization of the cost of designs purchased and patent rights over their useful life; and "deferred" or "unliquidated" experimental and development charges. For example, in case experimental and development costs have been properly deferred or capitalized and are amortized in accordance with a reasonably consistent plan, a proper portion of the current charge, determined by a ratable allocation which is reasonable in consideration of the pertinent facts, may be treated as a cost of performing the contract or subcontract. In the case of general experimental and development expenses which may be charged off currently, a reasonable portion thereof may be allocated to the cost of performing the contract or subcontract. If a special experimental or development project is carried on in pursuance of a contract, or in anticipation of a contract which is later entered into, and the expense is not treated as a part of general experimental and development expenses or is not otherwise allowed as a cost of performing the contract, there clearly appearing no reasonable prospect of an additional contract for the type of article involved, the entire cost of such project may be allowed as a part of the cost of performing the contract.

(e) *Miscellaneous direct expenses.* Miscellaneous direct expenses as used in paragraph (b) of this section include—

(1) *Cost of installation and construction.* Cost of installation and construction includes the cost of materials, labor and expenses necessary for the erection and installation prior to the completion of the contract and after the delivery of the product or material manufactured or constructed pursuant to the contract or subcontract.

(2) *Sundry direct expenses.* Items of expense which are properly chargeable directly to the cost of performing a contract or subcontract and which do not constitute guarantee expenses (see paragraph (h) of this section) or direct costs classified as factory cost or other manufacturing cost (see paragraphs (c) and (d) of this section), such as premiums on performance or other bonds required under the contract or subcontract; State sales taxes imposed on the contracting party; freight on outgoing shipments; fees paid for wind tunnel and model basin tests; demonstration and test expenses; crash insurance premiums; traveling expenses. In order for any such item to be allowed as a charge directly to the cost of performing a contract or subcontract, (1) a detailed record shall be kept by the contracting party of all items of a similar character, and (2) no item of a similar character which is properly a direct charge to other work shall be allowed as a part of any indirect expenses in determining the proper proportion thereof chargeable to the cost of performing the contract or subcontract. As to allowable indirect expenses, see paragraphs (c) (5), (f), (g) and (j) of this section.

(f) *Indirect engineering expenses.* Indirect engineering expenses, usually termed "engineering overhead," which are treated in this section as a part of general expenses in determining the cost of performing a contract or subcontract (see paragraph (b) of this section), comprise the general engineering expenses which are incident to and necessary for the performance of the contract or subcontract, such as the following:

(1) *Labor.* Reasonable fees of engineers employed in a general consulting capacity, and compensation of employees for personal services to the engineering

department, such as supervision, which is properly chargeable to the contract or subcontract, but which is not chargeable as direct engineering labor (see paragraph (c) (3) of this section).

(2) *Material.* Supplies for the engineering department, such as paper and ink for drafting and similar supplies.

(3) *Miscellaneous expenses.* Expenses of the engineering department, such as (A) maintenance and repair of engineering equipment, and (B) services purchased outside of the engineering department for blue printing, drawing, computing, and like purposes.

(g) *Expenses of distribution, servicing and administration.* Expenses of distribution, servicing and administration, which are treated in this section as a part of general expenses in determining the cost of performing a contract or subcontract (see paragraph (b) of this section), comprehend the expenses incident to and necessary for the performance of the contract or subcontract, which are incurred in connection with the distribution and general servicing of the contracting party's products and the general administration of the business, such as—

(1) *Compensation for personal services of employees.* The salaries of the corporate and general executive officers and the salaries and wages of administrative clerical employees and of the office services employees such as telephone operators, janitors, cleaners, watchmen and office equipment repairmen.

(2) *Bidding and general selling expenses.* Bidding and general selling expenses which by reference to all the pertinent facts and circumstances reasonably constitute a part of the cost of performing a contract or subcontract. The treatment of bidding and general selling expenses as a part of general expenses in accordance with this paragraph is in lieu of any direct charges which otherwise might be made for such expenses. The term "bidding expenses" as used in this section includes all expenses in connection with preparing and submitting bids.

(3) *General servicing expenses.* Expenses which by reference to all the pertinent facts and circumstances reasonably constitute a part of the cost of performing a contract or subcontract and which are incident to delivered or installed articles and are due to ordinary adjustments or minor defects; but including no items which are treated as a part of guarantee expenses (see paragraph (h) of this section) or as a part of direct costs, such as direct materials, direct labor, and other direct expense.

(4) *Other expenses.* Miscellaneous office and administrative expenses, such as stationery and office supplies; postage; repair and depreciation of office equipment; contributions to local charitable or community organizations to the extent constituting ordinary and necessary business expenses; employees' welfare expenses; premiums and dues on compensation insurance; employers' payments to unemployment, old age and social security Federal and State funds not including payments deducted from or chargeable to employees or officers; pensions and retirement payments to administrative office employees and accident compensation to office employees (as to self-insurance, see the following subparagraph).

Subject to the exception stated in this subparagraph, in cases where a contracting party assumes its own insurable risks (usually termed "self-insurance"), losses and payments will be allowed in the cost of performing a contract or subcontract only to the extent of the actual losses suffered or payments incurred during, and in the course of, the performance of the contract or subcontract and properly chargeable to such contract or subcontract. If, however, a contracting party assumes its own insurable risks (a) for compensation paid to employees for injuries received in the performance of their duties, or (b) for unemployment risks in States where insurance is required, there may be allowed as a part of the cost of performing a contract or subcontract a reasonable portion of the charges set up for purposes of self-insurance under a system of accounting regularly employed by the contracting party, as determined by the Commissioner of Internal Revenue, at rates not exceeding the lawful or approved rates of insurance companies for such insurance, reduced by amounts representing the acquisition cost in such companies, provided the contracting party adopts and consistently follows this method with respect to self-insurance in connection with all contracts and subcontracts subsequently performed by him.

Allowances for interest on invested capital are not allowable as costs of performing a contract or subcontract.

Among the items which shall not be included as a part of the cost of performing a contract or subcontract or considered in determining such cost, are the following: Entertainment expenses; dues and memberships other than of regular trade associations; donations except as otherwise provided above; losses on other contracts; profits or losses from sales or exchanges of capital assets; extraordinary expenses due to strikes or lockouts; fines and penalties; amortization of unrealized appreciation of values of assets; expenses, maintenance and depreciation of excess facilities (including idle land and building, idle parts of a building, and excess machinery and equipment) vacated or abandoned, or not adaptable for future use in performing contracts or subcontracts; increases in reserve accounts for contingencies, repairs, compensation insurance (except as above provided with respect to self-insurance) and guarantee work; Federal and State income and excess-profits taxes and surtaxes; cash discount earned up to one percent of the amount of the purchase, except that all discounts on subcontracts subject to the Act will be considered; interest incurred or earned; bond discount or finance charges; premiums for life insurance on the lives of officers; legal and accounting fees in connection with reorganizations, security issues, capital stock issues and the prosecution of claims against the United States (including income tax matters); taxes and expenses on issues and transfers of capital stock; losses on investments; bad debts; and expenses of collection and exchange.

In order that the cost of performing a contract or subcontract may be accounted for clearly, the amount of any excess profits repayable to the United States pursuant to the Act should not be charged to or included in such cost.

(h) *Guarantee expenses.* Guarantee expenses include the various items of factory cost, other manufacturing cost, cost of installation and construction, indirect engineering expenses and other general expenses (see paragraphs (c) to (g), inclusive, of this section) which are incurred after delivery or installation of the article manufactured or constructed pursuant to the particular contract or subcontract and which are incident to the correction of defects or deficiencies which the contracting party is required to make under the guarantee provisions of the particular contract or subcontract. If the total amount of such guarantee expenses is not ascertainable at the time of filing the report required to be filed with the collector of internal revenue (see section 16.15 of these regulations) and the contracting party includes any estimated amount of such expenses as part of the claimed total cost of performing the contract or subcontract, such estimated amount shall be separately shown on the report and the reasons for claiming such estimated amount shall accompany the report; but only the amount of guarantee expenses actually incurred will be allowed. If the amount of guarantee expenses actually incurred is greater than the amount (if any) claimed on the report and the contracting party has made an overpayment of excess profit, a refund of the overpayment shall be made in accordance with the provisions of section 16.18 of these regulations. If the amount of guarantee expenses actually incurred is less than the amount claimed on the report and an additional amount of excess profit is determined to be due, the additional amount of excess profit shall be assessed and paid in accordance with the provisions of section 16.18 of these regulations.

(i) *Unreasonable compensation.* The salaries and compensation for services which are treated as a part of the cost of performing a contract or subcontract include reasonable payments for salaries, bonuses, or other compensation for services. As a general rule, bonuses paid to employees (and not to officers) in pursuance of a regularly established incentive bonus system may be allowed

as a part of the cost of performing a contract or subcontract.

The test of allowability is whether the aggregate compensation paid to each individual is for services actually rendered incident to, and necessary for, the performance of the contract or subcontract, and is reasonable. Excessive or unreasonable payments whether in cash, stock or other property ostensibly as compensation for services shall not be included in the cost of performing a contract or subcontract.

(j) *Allocation of indirect costs.* No general rule applicable to all cases may be stated for ascertaining the proper proportion of the indirect costs to be allocated to the cost of performing a particular contract or subcontract. Such proper proportion depends upon all the facts and circumstances relating to the performance of the particular contract or subcontract. Subject to a requirement that all items which have no relation to the performance of the contract or subcontract shall be eliminated from the amount to be allocated, the following methods of allocation are outlined as acceptable in a majority of cases:

(1) *Factory indirect expenses.* The allowable indirect factory expenses (see paragraph (c) (5) of this section) shall ordinarily be allocated or "distributed" to the cost of the contract or subcontract on the basis of the proportion which the direct productive labor (see paragraph (c) (2) of this section) attributable to the contract or subcontract bears to the total direct productive labor of the production department or particular section thereof during the period within which the contract or subcontract is performed, except that if the indirect factory expenses are incurred in different amounts and in different proportions by the various producing departments consideration shall be given to such circumstances to the extent necessary to make a fair and reasonable determination of the true profit and excess profit.

(2) *Engineering indirect expenses.* The allowable indirect engineering expenses (see paragraph (f) of this section) shall ordinarily be allocated or "distributed" to the cost of the contract or subcontract on the basis of the proportion which the direct engineering labor attributable to the contract or subcontract (see paragraph (c) (3) of this section) bears to the total direct engineering labor of the engineering department or particular section thereof during the period within which the contract or subcontract is performed. If the expenses of the engineering department are not sufficient in amount to require the maintenance of separate accounts, the engineering indirect costs may be included in the indirect factory expenses (see paragraph (c) (5) of this section) and allocated or distributed to the cost of performing the contract or subcontract as a part of such expenses, provided the proportion so allocated or distributed is proper under the facts and circumstances relating to the performance of the particular contract or subcontract.

(3) *Administrative expenses (or "overhead").* The allowable expenses of administration (see paragraph (g) of this section) or other general expenses except indirect engineering expenses, bidding and general selling expenses, and general servicing expenses shall ordinarily be allocated or distributed to the cost of performing a contract or subcontract on the basis of the proportion which the sum of the manufacturing cost (see paragraph (b) of this section) and the cost of installation and construction (see paragraph (e) of this section) attributable to the particular contract or subcontract bears to the sum of the total manufacturing cost and the total cost of installation and construction during the period within which the contract or subcontract is performed.

(4) *Bidding, general selling, and general servicing expenses.* The allowable bidding and general selling expenses and general servicing expenses (see paragraph (g) (2) and (3) of this section) shall ordinarily be allocated or distributed to the cost of performing a contract or subcontract on the basis of—

(i) The proportion which the contract price of the particular contract or subcontract bears to the total sales made (including contracts or subcontracts completed) during the period within which the particular contract or subcontracts is performed, or

(ii) The proportion which the sum of the manufacturing cost (see paragraph (b) of this section) and the cost of installation and construction (see paragraph (e) of this section) attributable to the particular contract or subcontract bears to the sum of the total manufacturing cost and the total cost of installation and construction during the period within which the contract or subcontract is performed,

except that special consideration shall be given to the relation which certain classes of such expenses bear to the various classes of articles produced by the contracting party in each case in which such consideration is necessary in order to make a fair and reasonable determination of the true profit and excess profit. See section 16.13 of these regulations.*†

§ 16.9 *Credit for net loss or for deficiency in profit in computing excess profit.* The term "net loss" as used in the Act and as applied to contracts and subcontracts coming within these regulations means the amount by which the total costs of performing all such contracts and subcontracts entered into after April 3, 1939 and completed by a particular contracting party within the income-taxable year exceeds the total contract prices of such contracts and subcontracts. As to the meaning of income-taxable year, see section 16.1 of these regulations.

The term "deficiency in profit" as used in the Act and as applied to contracts and subcontracts coming within these regulations means the amount by which 12 percent of the total contract prices of all such contracts and subcontracts entered into after April 3, 1939 and completed by a particular contracting party within the income-taxable year exceeds the net profit upon all such contracts and subcontracts.

A net loss or a deficiency in profit sustained by a contracting party for an income-taxable year is allowable as a credit in computing the contracting party's excess profit on contracts and subcontracts coming within these regulations and completed during the four next succeeding income-taxable years. Credit for such a net loss or deficiency in profit may be claimed in the contracting party's annual report of profit filed with the collector of internal revenue (see section 16.15 of these regulations), but it shall be supported by separate schedules for each contract or subcontract involved showing total contract prices, costs of performance and pertinent facts relative thereto, together with a summarized computation of the net loss or deficiency in profit. The net loss or deficiency in profit claimed is subject to verification and adjustment. As to preservation of books and records, see section 16.13 of these regulations.

Net loss or deficiency in profit sustained on contracts and subcontracts completed within one income-taxable year may not be considered in computing net loss or deficiency in profit sustained on contracts and subcontracts completed within another income-taxable year.

The provisions of this section may be illustrated by the following example:

*Example:* The A Corporation, which keeps its books and makes its Federal income tax returns on a calendar year basis, entered into and completed contracts for aircraft for the Army coming within the scope of the Act as follows: Contracts were completed within the calendar year 1939 on which the A Corporation sustained a net loss of $30,000 and a deficiency in profit of $10,000; contracts totaling $175,000 were completed in 1940 at a cost of $155,000, the A Corporation thereby realizing a net profit of $20,000 but sustaining a deficiency in profit of $1,000 (i. e., 12 percent of $175,000, or $21,000, less $20,000); contracts totaling $400,000 were completed in 1941 at a cost of $300,000, or at a net profit of $100,000. After deducting from the net profit of $100,000 for the year 1941 the amount of $48,000 (i. e., 12 percent of the total contract prices of $400,000), there remains $52,000 in excess profit on the contracts completed in the year 1941. The net loss of $30,000 and the deficiency in profit of $10,000 sustained in 1939 and the deficiency in profit of $1,000 sustained in 1940 may be deducted from such $52,000 in determining the amount of excess profit payable by the A Corporation for the year 1941 with respect to the contracts completed in such year.*†

§ 16.10 *Credit for Federal income taxes.* For the purpose of computing the amount of excess profit to be paid to the United States, a credit is allowable against the excess profit for the amount of Federal income taxes paid or remaining to be paid on the amount of such excess profit. The "Federal income taxes" in respect of which this credit is allowable include the income taxes imposed by Titles I and IA of the Revenue Act of 1938, and chapter 1 and subchapter A of chapter 2 of the Internal Revenue Code, and the excess-profits taxes imposed by section 602 of the Revenue Act of 1938 and subchapter B of chapter 2 of the Internal Revenue Code. This credit is allowable for these taxes only to the extent that it is affirmatively shown that they have been finally determined and paid or remain to be paid and that they were imposed upon the excess profit against which the credit is to be made. In case such a credit has been allowed and the amount of Federal income taxes imposed upon the excess profit is redetermined, the credit previously allowed shall be adjusted accordingly.*†

§ 16.11 *Failure of contractor to require agreement by subcontractor.* Every contract or subcontract coming within the scope of the Act and these regulations is required by the Act to contain, among other things, an agreement by the contracting party to make no subcontract unless the subcontractor agrees—

(a) To make a report, as described in the Act, under oath to the Secretary of War upon the completion of the subcontract;

(b) To pay into the Treasury excess profit, as determined by the Treasury Department, in the manner and amounts specified in the Act;

(c) To make no subdivision of the subcontract for the same article or articles for the purpose of evading the provisions of the Act;

(d) That the manufacturing spaces and books of its own plant, affiliates, and subdivisions shall at all times be subject to inspection and audit as provided in the Act.

If a contracting party enters into a subcontract with a subcontractor who fails to make such agreement, such contracting party shall, in addition to its liability for excess profit determined on contracts or subcontracts performed by it, be liable for any excess profit determined to be due the United States on the subcontract entered into with such subcontractor. In such event, however, the excess profit to be paid to the United States in respect of the subcontract entered into with such subcontractor shall be determined separately from any contracts or subcontracts performed by the contracting party entering into the subcontract with such subcontractor.*†

§ 16.12 *Evasion of excess profit.* Section 3 of the Act of March 27, 1934, as amended, provides that the contracting party shall agree to make no subdivisions of any contract or subcontract for the same article or articles for the purpose of evading the provisions of the Act. If any such subdivision or subcontract is made it shall constitute a violation of the agreement provided for in the Act, and the cost of completing a contract or subcontract by a contracting party which violates such agreement shall be determined in a manner necessary clearly to reflect the true excess profit of such contracting party.*†

§ 16.13 *Books of account and records.* It is recognized that no uniform method of accounting can be prescribed for all contracting parties subject to the provisions of the Act. Each contracting party is required by law to make a report of its true profits and excess profit. Such party must, therefore, maintain such accounting records as will enable it to do so. See section 16.8 of these regulations. Among the essentials are the following:

(1) The profit or loss upon a particular contract or subcontract shall be accounted for and fully explained in the books of account separately on each contract or subcontract.

(2) Any cost accounting methods, however standard they may be and regardless of long continued practice, shall be controlled by, and be in accord with, the objectives and purposes of the Act and of any regulations prescribed thereunder.

(3) The accounts shall clearly disclose the nature and amount of the different items of cost of performing a contract or subcontract.

In cases where it has been the custom priorly to use so-called "normal" rates of overhead expense or administrative expenses, or "standard" or "normal" prices of material or labor charges, no objection will be made to the use temporarily during the period of performing the contract or subcontract of such methods in charging the contract or subcontract, if the method of accounting employed is such as clearly to reflect, in the final determination upon the books of account, the actual profit derived from the performance of the contract or subcontract and if the necessary adjusting entries are entered upon the books and they explain in full detail the revisions necessary to accord with the facts. As to the elements of cost, see section 16.8 of these regulations.

All books, records, and original evidences of costs (including, among other things, production orders, bills or schedules of materials, purchase requisitions, purchase orders, vouchers, requisitions for materials, standing expense orders, inventories, labor time cards, payrolls, cost distribution sheets) pertinent to the determination of the true profit, excess profit, deficiency in profit or net loss from the performance of a contract or subcontract shall be kept at all times available for inspection by internal-revenue officers, and shall be carefully preserved and retained so long as the contents thereof may become material in the administration of the Act. This provision is not confined to books, records, and original evidences pertaining to items which may be considered to be a part of the cost of performing a contract or subcontract. It is applicable to all books, records, and original evidences of costs of each plant, branch or department involved in the performance of a contract or subcontract or in the allocation or distribution of costs to the contract or subcontract.*†

§ 16.14 *Report to Secretary of War.* Upon the completion of a contract or subcontract coming within the scope of the Act and these regulations, the contracting party is required to make a report, under oath, to the Secretary of War. As to the date of completion of a contract or subcontract, see section 16.4 of these regulations. Such report shall be in the form prescribed by the Secretary of War and shall state the total contract price, the cost of performing the contract, the net income from such contract, and the per centum such income bears to the contract price. The contracting party shall also include as a part of such report a statement showing—

(1) the manner in which the indirect costs were determined and allocated to the cost of performing the contract or subcontract (see section 16.8 of these regulations);

(2) the name and address of every subcontractor with whom a subcontract was made, the object of such subcontract, the date when completed and the amount thereof; and

(3) the name and address of each affiliate or other organization, trade or business owned or controlled directly or indirectly by the same interests as those who so own or control the contracting party, together with a statement showing in detail all transactions which were made with such affiliate or other organization, trade or business and are pertinent to the determination of the excess profit.

A copy of the report required to be made to the Secretary of War is required to be transmitted by the contracting party to the Secretary of the Treasury. Such copy shall not be transmitted directly to the Secretary of the Treasury but shall be filed as a part of the annual

report. See section 16.15 of these regulations.*†

§ 16.15 *Annual reports for income-taxable years*—(a) *General requirements.* Every contracting party completing a contract or subcontract within the contracting party's income-taxable year ending after April 3, 1939 shall file with the collector of internal revenue for the collection district in which the contracting party's Federal income tax returns are required to be filed an annual report on the prescribed form of the profit and excess profit on all contracts and subcontracts coming within the scope of the Act and these regulations and completed within the particular income-taxable year. There shall be included as a part of such report a statement, preferably in columnar form, showing separately for each such contract or subcontract completed by the contracting party within the income-taxable year the total contract price, the cost of performing the contract or subcontract and the resulting profit or loss on each contract or subcontract together with a summary statement showing in detail the computation of the net profit or net loss upon all contracts and subcontracts completed within the income-taxable year and the amount of the excess profit, if any, for the income-taxable year covered by the report. A copy of the report made to the Secretary of War (see section 16.14 of these regulations) with respect to each contract or subcontract covered in the annual report, shall be filed as a part of such annual report. In case the income-taxable year of the contracting party is a period of less than twelve months (see section 16.1 of these regulations), the report required by this section shall be made for such period and not for a full year.

(b) *Time for filing annual reports.* Annual reports of contracts and subcontracts coming within the scope of the Act and these regulations completed by a contracting party within an income-taxable year must be filed on or before the 15th day of the ninth month following the close of the contracting party's income-taxable year. It is important that the contracting party render on or before the due date an annual report as nearly complete and final as it is possible for the contracting party to prepare. An extension of time granted the contracting party for filing its Federal income tax return does not serve to extend the time for filing the annual report required by this section. Authority consistent with authorizations for granting extensions of time for filing Federal income tax returns is hereby delegated to the various collectors of internal revenue for granting extensions of time for filing the reports required by this section. Application for extensions of time for filing such reports should be addressed to the collector of internal revenue for the district in which the contracting party files its Federal income tax returns and must contain a full recital of the causes for the delay.*†

§ 16.16 *Payment of excess profit liability.* The amount of the excess profit liability to be paid to the United States shall be paid on or before the due date for filing the report with the collector of internal revenue. See section 16.15 of these regulations. At the option of the contracting party, the amount of the excess profit liability may be paid in four equal installments instead of in a single payment, in which case the first installment is to be paid on or before the date prescribed for the payment of the excess profit as a single payment, the second installment on or before the 15th day of the third month, the third installment on or before the 15th day of the sixth month, and the fourth installment on or before the 15th day of the ninth month, after such date.*†

§ 16.17 *Liability of surety.* The surety under contracts entered into with the Secretary of War for the construction or manufacture of any complete aircraft or any portion thereof for the Army shall not be liable for payment of excess profit due the United States in respect of such contracts.*†

§ 16.18 *Determination of liability for excess profit, interest and penalties; assessment, collection, payment, refunds.* The duty of determining the correct amount of excess profit liability on contracts and subcontracts coming within the scope of the Act and these regulations is upon the Commissioner of Internal Revenue. Under section 3 (b) of the Act of March 27, 1934, as last amended, all provisions of law (including the provisions of law relating to interest, penalties and refunds) applicable with respect to the taxes imposed by Title I of the Revenue Act of 1934 and not inconsistent with section 3 of the Act of March 27, 1934, as last amended, are applicable with respect to the assessment, collection, or payment of excess profits on contracts and subcontracts coming within the scope of the Act and these regulations and to refunds of overpayments of profits into the Treasury under the Act. Claims by a contracting party for the refund of an amount of excess profit, interest, penalties, and additions to such excess profit shall conform to the general requirements prescribed with respect to claims for refund of overpayments of taxes imposed by Title I of the Revenue Act of 1934 and, if filed on account of any additional costs incurred pursuant to guarantee provisions in a contract, shall be supplemented by a statement under oath showing the amount and nature of such costs and all facts pertinent thereto.

Administrative procedure for the determination, assessment and collection of excess profit liability under the Act and these regulations and the examination of reports and claims in connection therewith will be prescribed from time to time by the Commissioner of Internal Revenue.*†

## UNITED STATES PROCESSING TAX BOARD OF REVIEW

### RULES OF PRACTICE

*Correction*

F. R. Doc. 39-2233, filed, June 27, 1939, at 4:01 p. m., appearing in the issue for Thursday, June 29, 1939, should be corrected as indicated below:

§ 601.5 (a) appearing in the first column on Page 2515 should read as follows:

(a) A caption in the following form:

UNITED STATES PROCESSING TAX BOARD OF REVIEW

| | |
|---|---|
| PETITIONER, v. COMMISSIONER OF INTERNAL REVENUE, RESPONDENT | Docket No. — |

(The respondent shall be the *Commissioner of Internal Revenue*, and the name of the incumbent of that office shall not appear in the caption of the petition.)

The second paragraph in the first column of Page 2516 should read as follows:

"If a motion, other than one relating to the receipt of evidence during a hearing, is made orally at the hearing, the presiding officer may direct that it be reduced to writing and, unless he directs otherwise, it shall be filed with the Board at Washington, D. C."

## TITLE 30—MINERAL RESOURCES

### NATIONAL BITUMINOUS COAL COMMISSION

[Order No. 278]

AN ORDER REQUIRING DISTRIBUTORS WHO PHYSICALLY HANDLE COAL OVER DOCKS TO REPORT CERTAIN INFORMATION TO THE COMMISSION

The Commission having, by Order in General Docket No. 12 on the 20th day of June, 1939, amended the definition of a "distributor" as previously defined in "Rules and Regulations for Registration of Distributors" dated March 24, 1939, as amended June 6, 1939,[1] so as to include a dock operator who physically handles coal with respect to transactions which have been recognized by custom to be definitely wholesale in character, and it appearing to the Commission that the "Rules and Regulations for Registration of Distributors" dated March 24, 1939, as amended June 6, 1939 and June 20, 1939, as such rules and regulations relate to dock operators, would be more effectively administered by requiring that certain information be filed with the Commission by such distributors,

Now, therefore, Pursuant to the provisions of subsection (f) of Section III, entitled "Terms of 'Agreement by Registered Distributor'", of the "Rules and Regulations for Registration of Distributors" dated March 24, 1939, as amended June 6, 1939 and June 20, 1939, and to the provisions of the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders and directs:

1. That a "distributor", as such distributor is defined in the aforesaid rules and regulations, who has been registered by the Commission, shall file with the Statistical Division of the Commission at Washington, D. C., on or before the 15th day of each month from and after the effective date of Minimum Prices and Marketing Rules and Regulations, a report as to each dock operated during the preceding month by such distributor, giving the following information:

(a) Total net tons of coal received on each dock during the preceding month, by sizes and grades, the f. o. b. mine price thereof, the name of mine and producer from whom such coal was purchased, and the amount of discount to be received as to each transaction.

(b) Number of net tons sold during the preceding month as to transactions which, by custom, are recognized to be definitely wholesale in character.

(c) Number of net tons sold during the preceding month as to transactions which are not wholesale in character.

2. That the initial report required herein shall contain an inventory showing the amount of coal, and the sizes and grades of such coal, on each dock on the effective date of Minimum Prices and Marketing Rules and Regulations.

3. That the reports required to be filed under this Order shall be signed by the distributor if an individual, by a member of the firm if a partnership, or, if a corporation, by a responsible officer thereof who is familiar with the facts.

The Secretary of the Commission is hereby directed to cause a copy of this Order to be published forthwith in the FEDERAL REGISTER, and to cause a copy hereof to be mailed to the Consumers' Counsel, to the Secretary of each District Board, and to all parties who have filed their appearances in Docket No. 12, and to mail a copy of this Order to all Code Members and to all applicants who have filed with the Commission, on Form No. 326-W, application for Registration as a "distributor", and to cause copies of this Order to be made available for inspection by interested parties at the Office of the Secretary of the Commission, Washington, D. C., and at the office of each Statistical Bureau of the Commission.

By order of the Commission.

Dated this 29th day of June 1939.

[SEAL] F. WITCHER MCCULLOUGH,
*Secretary.*

## TITLE 50—WILDLIFE

### BUREAU OF FISHERIES

SUBCHAPTER B—ALASKA AQUATIC MAMMALS OTHER THAN WHALES

PART 242—ALASKA WALRUSES AND SEA LIONS

Sec.
242.1 Purposes for which walruses may be taken.
242.2 Purposes for which sea lions may be taken.

§ 242.1 *Purposes for which walruses may be taken.* The killing of walruses in the Territory of Alaska or in any of the waters of Alaska over which the United States has jurisdiction is prohibited from July 1, 1939, to June 30, 1941, both dates inclusive. This prohibition shall not apply to the killing of walruses by natives for food or clothing, by miners or explorers when in need of food, or to the collection of specimens for scientific purposes under permits issued by the Secretary of Commerce. (§ 2, 35 Stat. 102) (41 Stat. 716; 48 U.S.C. 191)

§ 242.2 *Purposes for which sea lions may be taken.* The killing of sea lions in the Territory of Alaska, or in any of the waters of Alaska over which the United States has jurisdiction, is permitted as follows:

(a) By natives for food or clothing, and by miners or explorers when in need of food.

(b) By anyone in the necessary protection of property, or while such animals are destroying salmon or other food fish.

(c) Under permits issued by the Secretary of Commerce authorizing the taking of specimens for scientific purposes. (48 Stat. 976; 16 U.S.C. 659)

[SEAL] EDWARD J. NOBLE,
*Acting Secretary of Commerce.*

JUNE 29, 1939.

## WAR DEPARTMENT.

### APPOINTMENT OF CHAPLAINS IN THE REGULAR ARMY

1. Examination of applicants for appointment as chaplains in the grade of first lieutenant in the Regular Army under provisions of AR 605-30 and the following special conditions will be held on September 12, 13, 14, and 15, 1939, in Washington, D. C.

2. In order to provide for existing or prospective denominational vacancies, applications will be restricted to clergymen duly accredited to the following denominations:

Colored (any Protestant denomination).
Baptist, South.
Churches of Christ.
Disciples of Christ.
Lutheran (except Missouri Synod).
Methodist.
Roman Catholic.

3. Eligibility to compete in the examination will be confined to candidates who are at the time of the examination—

a. Male citizens of the United States between the ages of 23 and 34 years.

b. Regularly ordained, duly accredited by, and in good standing with one of the religious denominations listed above.

c. Graduates of both a 4-year college course and a 3-year theological seminary course.

d. Actively engaged in the ministry as the principal occupation in life and credited with 3 years' experience therein.

4. Formal applications on WD, AGO Form No. 62, accompanied by at least three letters of recommendation, small photographs of applicants, and proper ecclesiastical indorsements must reach The Adjutant General not later than August 30, 1939. Application received after that date will not be considered.

[SEAL] E. S. ADAMS,
*Major General,*
*The Adjutant General.*

## DEPARTMENT OF THE INTERIOR.

### National Bituminous Coal Commission.

[Order No. 279]

AN ORDER AMENDING ORDER NO. 277 WITH RESPECT TO THE DESIGNATION OF THE EMPLOYEE MEMBER OF DISTRICT BOARD NO. 18

Pursuant to Act of Congress entitled "An Act to regulate interstate commerce in bituminous coal and for other purposes" (Public No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders and directs:

1. That paragraph 2 of Order No. 277[1] of the Commission be and the same is hereby amended by striking opposite the words *"District 18—New Mexico:"* the name of Eben Jones, 736 South 5th Street, Raton, New Mexico, and inserting

[1] 4 F.R. 2451 DI.

in lieu thereof the name of Earle Stucker, 110 East Mesa Avenue, Gallup, New Mexico.

2. Except as herein modified, Order No. 277 shall remain in full force and effect.

By order of the Commission.
Dated this 29th day of June 1939.

[SEAL] F. WITCHER MCCULLOUGH,
*Secretary.*

[Docket No. 602-FD]

ORDER IN THE MATTER OF THE WEST KENTUCKY COAL COMPANY; COMPLAINT OF THE UNITED MINE WORKERS OF AMERICA, DISTRICT NO. 23, ALLEGING VIOLATION OF SECTION 9 OF THE BITUMINOUS COAL ACT OF 1937

At a regular session of the National Bituminous Coal Commission held at its offices in Washington, D. C., on the 28th day of June 1939.

It appearing that on the 19th day of January, 1939, the United Mine Workers of America, District No. 23, a party of interest within the meaning of Section 9 (c) of the Bituminous Coal Act of 1937, hereinafter referred to as the Act, filed with the Commission a complaint alleging violation of Section 9 of the Act on the part of the West Kentucky Coal Company, a corporation actively engaged in the production of bituminous coal in the State of Kentucky, said Company being hereinafter referred to as the respondent; and

It appearing that after copy of said complaint had been duly served on the respondent, notice of a hearing [1] on said complaint before an authorized Examiner of the Commission was promptly served on all parties of interest, said hearing to be held at the Hearing Room of the Commission, Washington, D. C. on the 25th day of January, 1939, but pursuant to the request of the respondent continued until the 6th day of February, 1939, on which date said hearing was begun; and

It further appearing, That at said hearing all parties of interest were represented by counsel and evidence adduced and testimony heard, said hearing was continued for the purpose of permitting the respondent to take depositions of 50 witnesses which respondent claimed were necessary in the proper presentation of its defense, and such depositions having been taken and made a part of the record in this case, the Examiner submitted a Report together with the Proposed Findings of Fact to the Commission, and copies of such Report and Proposed Findings were duly served upon all interested parties; and

It appearing, That on the 4th day of April 1939, the respondent duly filed with the Commission its Exceptions to the Report and Proposed Findings of Fact of the Examiner and a Brief in support thereof, together with a Motion for Rehearing and Request for Oral Argument; and

The Commission having granted the respondent's Request for Oral Argument and having heard the same on the 15th day of June 1939, and the Commission being fully advised of the testimony, evidence, exhibits and depositions as contained in the official transcript of the proceedings as filed herein, and after thorough consideration of the Pleadings, Record, Briefs, Objections and Arguments in the premises, the Commission made its Findings and Conclusions thereon, a copy of which is attached hereto and made a part hereof by reference;

Now, therefore, It is hereby ordered:

1. That the respondent's Motion for a Rehearing in this matter is denied.

2. That the objections of the respondent to the aforesaid Report and Proposed Findings of Fact of the Examiner are overruled insofar as said Report and Proposed Findings conform with the Findings and Conclusions of the Commission.

3. That the Secretary of the Commission is directed forthwith to certify the Findings and Conclusions of the Commission and this Order to all United States departments or agencies concerned; to cause to be published in the FEDERAL REGISTER this Order together with the Findings and Conclusions of the Commission; [2] and to cause copies of the same to be mailed to the Secretary of each District Board, to the Consumers' Counsel, and to all interested parties.

By Order of the Commission.
Dated this 28th day of June 1939.

[SEAL] F. WITCHER MCCULLOUGH,
*Secretary.*

[Docket No. 619-FD]

ORDER IN THE MATTER OF THE APPLICATION OF SOUTHWEST COAL COMPANY FOR PROVISIONAL APPROVAL AS A MARKETING AGENCY

At a session of the National Bituminous Coal Commission, held at its offices in Washington, D. C., on the 28th day of June 1939.

It appearing, That the above-named applicant, Southwest Coal Company, a Missouri corporation authorized to engage in business in the State of Missouri, filed its application for provisional approval as a marketing agency on the 6th day of April 1939, pursuant to Order No. 6 [3] of the Commission, and the matter being assigned to Trial Examiner Edward J. Hayes, and proper notice having been given, the same came on for hearing before the said Examiner on the 1st day of May 1939,[4] and at said hearing the applicant having duly appeared and representatives of the Legal Division of the Commission and of the Consumers' Counsel having entered their respective appearances therein, the evidence was adduced; and

It further appearing, That the Trial Examiner having received said evidence, did, on the 10th day of June 1939, file, with the Commission, his report and proposed findings of fact, together with his recommendations that said application be granted, and it appearing that true copies of said report and proposed findings of fact of the Examiner were duly served upon all parties appearing at said hearing, on the 12th day of June 1939, and more than fifteen days having elapsed since the service of said report, no exceptions having been filed thereto; and

The Commission having considered the application, the Report, the Proposed Findings of Fact, and Recommendation of the Examiner, and being fully advised of the evidence as the same is contained in the official transcript thereof, finds that the "Findings of Fact" as proposed by the Examiner are in all respects true and correct, and are hereby adopted as the findings of the Commission.

Now, therefore, pursuant to the provisions of the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders:

That the application of the Southwest Coal Company for provisional approval as a marketing agency be and the same is hereby granted and the said Southwest Coal Company be and the same is hereby considered to be a marketing agency and provisionally approved as such within the purview of Section 12 of the Bituminous Coal Act of 1937 until further order of the Commission.

By order of the Commission.
Dated this 28th day of June 1939.

[Docket No. 498-FD]

ORDER IN THE MATTER OF THE APPLICATION OF WESTERN PENNSYLVANIA COAL CORPORATION FOR PROVISIONAL APPROVAL AS A MARKETING AGENCY

IN RE: PETITION OF WESTERN PENNSYLVANIA COAL CORPORATION FOR PROVISIONAL AUTHORIZATION OF MODIFICATION OF MARKETING AGENCY CONTRACT

At a regular session of the National Bituminous Coal Commission held at its offices in Washington, D. C., on the 28th day of June 1939.

It appearing that the above named petitioner, Western Pennsylvania Coal Corporation, a Pennsylvania corporation authorized to engage in business in the State of Pennsylvania, on June 26, 1939 filed its petition for provisional authorization of modification of form of marketing agency contract, which was heretofore approved by Order of the Commission dated the 21st day of December, 1938, requesting that there be deleted from Section 2, paragraph 1 of said form of marketing agency contract the following clause:

"such coal as Producer may sell from its mines or from truck loading facilities adjacent to any of Producer's mines for delivery by truck,"

so that said paragraph of said section as revised will read as follows:

"2. The Producer hereby appoints the Selling Agent as its exclusive agent for the sale of the coal produced by it in its mines, in above-mentioned area, and the Selling Agent hereby accepts the appointment of such Selling Agent, all on the terms and conditions hereinafter contained; provided, however, that the Producer hereby expressly reserves from the terms of this Agreement such coal as may be produced and used by it in the operations of its mines; such coal as it may furnish or sell to its employees for their use; such coal as is used by Producer in the production of coke; such coal as is transported by the Producer to itself for consumption by it or is sold or delivered to a subsidiary of the Producer for consumption by such subsidiary, or is sold or delivered by the Producer to a corporation of which the Producer is a subsidiary for consumption by such corporation of which Producer is a subsidiary; and such coal as remains to be delivered on legally enforceable bona fide written contracts entered into prior to June 16, 1933 and not yet completed at the date of the taking effect of this agreement.";

and

It appearing to the Commission upon due consideration of said petition that such modification and revision in the form of marketing agency contract between petitioner and its agency members will not unreasonably restrict the supply of coal in interstate commerce, will not prevent the public from receiving coal at fair and reasonable prices, and will not operate against the public interest,

Now, therefore, Pursuant to the provisions of the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders:

That the Western Pennsylvania Coal Corporation be and hereby is granted provisional authorization to modify its form of marketing agency contract as hereinabove set forth, effective thirty (30) days from the date of this Order, unless within such time any interested party files a protest to this Order and requests that a hearing be held upon the aforesaid petition.

Except as herein modified, the Order of the Commission dated December 21, 1938 in the above entitled matter shall remain in full force and effect.

The Secretary of the Commission is directed forthwith to mail a copy of this Order to the petitioner, to the Consumers' Counsel, to the Secretary of each District Board, and to the Code Members within District No. 2; and shall cause a copy hereof to be filed and made available for inspection at each of the Statistical Bureaus of the Commission; and shall cause a copy hereof to be published in the FEDERAL REGISTER.

By order of the Commission.
Dated this 28th day of June 1939.

[SEAL] F. WITCHER MCCULLOUGH,
*Secretary.*

DEPARTMENT OF LABOR.

Wage and Hour Division.

NOTICE OF HEARING ON PETITIONS FOR REVIEW OF FINDINGS AND DETERMINATION BY THE PRESIDING OFFICER ON APPLICATION FOR PERMISSION TO EMPLOY LEARNERS IN THE APPAREL INDUSTRY

Whereas, The National Association of Shirt and Pajama Manufacturers, Inc., and sundry other parties pursuant to Part 522 [1] (Regulations applicable to the Employment of Learners pursuant to Section 14 of the Fair Labor Standards Act) made application for permission to employ learners in the apparel industry at wages lower than the applicable minimum wage specified in Section 6 of the Act; and

Whereas, a hearing on said application was held before Merle D. Vincent, the representative of the Administrator of the Wage and Hour Division, duly authorized to conduct the said hearing and to determine—

(a) what if any occupation or occupations in the apparel industry require a learning period, and

(b) whether it is necessary in order to prevent curtailment of opportunities for employment to provide for the employment of persons in occupations requiring a learning period at wage rates lower than the minimum wage applicable under Section 6 of the Fair Labor Standards Act of 1938, and

(c) if such necessity is found to exist, at what wages lower than the minimum wage applicable under Section 6, such employment of learners shall be permitted, and with what limitations as to time, number, proportion and length of service.

and

Whereas, following such hearing the said Merle D. Vincent duly made his findings of fact and determination, and filed same with the Administrator on May 20, 1939, and

Whereas, on May 23, 1939, the Administrator caused to be published in the FEDERAL REGISTER a notice [2] which set forth in full the findings of fact and determination of the presiding officer and stated that, pursuant to the provisions of Section 522.13 of the aforesaid Regulations, as amended, within fifteen days after May 23, 1939, persons aggrieved by the said findings and determination might file, with the Administrator, petitions for review of the findings and determination of the said representative, and

Whereas, petitions for review, copies of which are on file in the office of the Administrator, Room 5144, Department of Labor Building, Washington, D. C., and available for examination by all interested parties, have been duly filed with the Administrator by the National Association of Shirt and Pajama Manufacturers and sundry other parties.

Now, therefore, notice is hereby given of a public hearing to be held pursuant to Section 522.13 of the aforesaid Regulations, as amended, at 10 o'clock A. M. on July 18, 1939, at the Raleigh Hotel, 12th and Pennsylvania Avenue, N. W., Washington, D. C. before Paul Sifton, Deputy Administrator of the Wage and Hour Division, hereby duly authorized to conduct said hearing and to review the aforementioned findings of fact and determination of the presiding officer and to make a final determination of the questions set forth in the second paragraph of this notice.

Any person interested in appearing, either in support of or in opposition to the matters prayed for in the petition for review, may appear on his own behalf or on the behalf of any other person, provided that he shall file with the Administrator, at his office in Washington, prior to noon on July 15, 1939, A Notice of Intention To Appear, which shall contain the following information:

(1) The name and address of the person appearing.

(2) If he is appearing in a representative capacity, the name and address of the person or persons whom he is representing.

(3) Whether he is appearing in support of or in opposition to any petition for review.

(4) The approximate length of time which his presentation will consume.

(5) Scope of appearance, i. e., for which branch of the apparel industry appearance will be made.

Signed at Washington, D. C., this 30th day of June, 1939.

ELMER F. ANDREWS,
*Administrator.*

## CIVIL AERONAUTICS AUTHORITY.

[Amendment 16 of Civil Air Regulations]

REAPPLICATION FOR PILOT, GROUND INSTRUCTOR AND AIR CARRIER DISPATCHER CERTIFICATES

At a session of the Civil Aeronautics Authority held at its office in Washington, D. C., on the 27th day of June 1939.

Acting pursuant to the Authority vested in it by the Civil Aeronautics Act of 1938, particularly section 205 and subsections (a) and (b) of section 602 of said Act, and finding that its action is desirable in the public interest and is necessary to carry out the provisions of, and to exercise and perform its powers and duties under, said Act, the Civil Aeronautics Authority hereby amends the Civil Air Regulations as follows:

Subsections (a) and (b) of section 20.39, section 20.47, section 21.29, section 23.29, and section 27.29 are amended by striking the phrase "30 days" appearing in each of such subsections and inserting the phrase "90 days" in lieu thereof.

This amendment shall become effective on and after 12:01 A. M., E. S. T., July 27, 1939.

By the Authority.

IN THE MATTER OF UTILITIES POWER & LIGHT CORPORATION AND UTILITIES POWER & LIGHT CORPORATION AND CHARLES TRUE ADAMS

NOTICE OF AND ORDER FOR HEARING AND ARGUMENT

The Commission having on August 29, 1938 entered an order entitled "Order for Consolidation of Hearings for Stated Purposes and Governing Certain Procedural Matters" consolidating the above entitled matters for purposes of hearing;

Hearing pursuant to said order with respect to valuation and plans of reorganization having been held before the Commission's Trial Examiner jointly on the same subject matter with a hearing before the Special Master appointed by the District Court of the United States for the Northern District of Illinois, Eastern Division, Cause No. 64605;

Oral arguments having been made before the Securities and Exchange Commission and the Special Master jointly; and the hearing with respect to valuation and plans of reorganization having been closed;

The Commission having on April 14, 1939 entered an order[1] reopening said hearing with respect to valuation and plans of reorganization, and further hearing having been had and further argument made before said Trial Examiner and Special Master jointly; the transcript of said argument having been submitted to the Commission pursuant to stipulation, and said hearing with respect to valuation and plans of reorganization having again been closed;

Subsequently Atlas Corporation, the proponent of a Plan of Reorganization dated February 1, 1939, comprising the subject matter of the application having file number 52-9, having tendered for filing an amendment of said application for the purpose of amending said plan;

The Commission having considered the amendment so tendered and the record, briefs and arguments herein;

It appearing to the Commission that such amendment should be permitted to be filed;

*It is ordered*, That said amendment be permitted to be filed and that such hearing be reopened for the purpose of receiving evidence with respect thereto;

*It is further ordered*, That such hearing be held on July 10, 1939, at 10:00 o'clock in the forenoon of that day, at the Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C. On such day the hearing-room clerk in Room 1102 will advise as to the room where such hearing will be held.

*It is further ordered*, That Edward C. Johnson or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearing in such matter. The officer so designated to preside at such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the Public Utility Holding Company Act of 1935 and to continue or postpone such hearing from time to time or to a date thereafter to be fixed by such presiding officer.

*It is further ordered*, That in the event a hearing shall be ordered to be held before said Special Master at said time and place such hearing before an officer of the Commission may be held jointly with such hearing before said Special Master;

*It is further ordered*, That at the conclusion of such hearing the Commission hear oral argument with respect to such amendment and with respect to whether or not the Commission's approval of said plan as amended, if granted, should be conditioned upon the filing of a further amendment eliminating those provisions of said plan which provide for the granting of rights to subscribe to shares of the new common stock therein mentioned;

Notice of such hearing and of such oral argument is hereby given to the parties and to any other person whose participation may be in the public interest or for the protection of investors or consumers. It is requested that any person not already a party who shall desire to be heard or admitted as a party, file a notice to that effect with the Commission on or before July 7, 1939.

[1] 4 F.R. 1638 DI.

Changes in said plan, effected by said amendment include the following:

(1) Amendment of Article 1 of said plan so as to provide, in substance, that a plan of integration under Section 11 (e) of the Public Utility Holding Company Act of 1935 shall be filed by the New Company contemplated by said plan of reorganization; that Interstate Power Company, Central States Utilities Corporation and Central States Power & Light Corporation (subsidiaries of Utilities Power & Light Corporation, Debtor) shall join in such plan of integration; that such plan of integration shall contain certain provisions more fully set forth in such amendment for the enforcement of such plan of integration (including provisions with respect to the appointment of a trustee) in the event such plan of integration shall not be consummated within two years from the date of filing thereof plus such extension of time as the Commission may grant.

(2) Provisions added to Article II of the plan whereby all holders of outstanding debentures and allowed claims against the Debtor other than Atlas Corporation and its subsidiaries may elect to take (a) in lieu of any or all shares of new common stock which they are entitled to receive under the plan, 1 share of new preferred stock instead of each 8⅓ shares of new common stock or (b) in lieu of any or all shares of new preferred stock which they are entitled to receive under the plan, 8⅓ shares of new common stock instead of each 1 share of new preferred stock; and whereby at the expiration of the time fixed for the exercise of such rights of election, Atlas Corporation and its subsidiaries shall have like rights of election except that they shall exercise such rights in such a manner and to such extent that the initial capital structure of the New Company will include no greater amount of preferred stock than would be issuable if the rights of election mentioned in this paragraph (2) were not included in the plan.

(3) Amendments providing in substance (a) that the New Company shall pay over to the trustee for the sinking fund for its debentures 100% of the net proceeds received by the New Company from any sale of assets acquired by it in reorganization, until all such debentures shall have been retired; (b) thereafter the New Company shall set aside 30% of the net proceeds received by it from any such sales, in a sinking fund to be applied to the retirement of its preferred stock; (c) that the initial board of directors of the New Company shall consist of nine or seven members (such number to be determined by Atlas Corporation prior to the final confirmation of the plan by the Court) of whom two members shall be chosen by the holders of the outstanding shares of preferred stock of the Debtor, with the right to vote cumulatively, and of whom the remaining members shall be chosen by the holders of outstanding debentures of the Debtor, with the right to vote cumulatively; (d) that in subsequent elections of directors, the preferred stock of the New Company shall be entitled to elect two members, voting as a class, the remaining members to be elected by the holders of the common stock of the New Company, voting as a class, with the right of cumulative voting within each class; except that whenever there shall be dividends of $1.87½ accumulated and unpaid on any shares of the preferred stock of the New Company, the holders of such stock as a class shall be entitled to elect two-thirds of the directors until all arrears are paid (such right, however, not to accrue until after the first dividend payment date next succeeding one year from the date from which dividends on such preferred stock shall be cumulative); (e) that the common stock to be issued by the New Company shall have a par value of $4 per share; (f) that no dividend shall be declared or paid on the common stock of the New Company unless after the payment of such dividend the capital and surplus of the New Company shall be at least equal to $100 per share of the outstanding preferred stock of the New Company, and the surplus of the New Company shall be at least equal to $7.50 per share of such preferred stock; (g) that the affirmative vote of the holders of at least two-thirds in interest of the outstanding preferred stock issued by the New Company pursuant to the plan be required, not only for the authorization of any preferred stock senior thereto, but also for the authorization of any preferred stock on a parity therewith; and

(4) Certain other changes set out in the amendment on file with the Commission.

By the Commission.

[File No. 37-39]

IN THE MATTER OF SOUTHERN UNION SERVICE COMPANY

NOTICE OF AND ORDER FOR HEARING

An application pursuant to section 13 (b) of the Public Utility Holding Company Act of 1935, having been duly filed with this Commission by the above-named party;

*It is ordered*, That a hearing on such matter be held on July 7, 1939, at 10 o'clock in the forenoon of that day, at the Securities and Exchange Building,

1778 Pennsylvania Avenue NW., Washington, D. C. On such day the hearing-room clerk in room 1102 will advise as to the room where such hearing will be held. At such hearing, if in respect of any declaration, cause shall be shown why such declaration shall become effective.

*It is further ordered*, That James G. Ewell or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice to continue or postpone said hearing from time to time.

Notice of such hearing is hereby given to such declarant or applicant and to any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before July 6, 1939.

The matter concerned herewith is in regard to an application for an order of the Commission temporarily exempting Southern Union Service Company as a subsidiary service company of Southern Union Gas Company from the prohibitions of Section 13 of the Act and the rules promulgated thereunder, and permitting such company to enter into and perform service, sales and construction contracts for associate companies thereof, pending Commission action on an application (File No. 37-39) for approval of such company as a mutual service company.

By the Commission.

VOLUME 4 NUMBER 128

*Washington, Thursday, July 6, 1939*

## *The President*

EXCLUDING CERTAIN LANDS FROM THE BEAVERHEAD NATIONAL FOREST AND ADDING THEM AND OTHER LANDS TO THE BIG HOLE BATTLEFIELD NATIONAL MONUMENT—MONTANA

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS the unsurveyed E½NE¼SE¼NW¼ sec. 24, T. 2 S., R. 17 W., P. M., Montana, was reserved by Executive Order No. 1216 of June 23, 1910, as the Big Hole Battlefield Monument; and

WHEREAS upon survey it has been found that the area intended to be reserved by that Executive order is the five-acre tract designated as the "Big Hole Battlefield Monument" on General Land Office supplemental plat of the survey of sec. 24, approved July 19, 1917, and described by metes and bounds as follows:

Beginning at a point S. 0°1' W., 5.00 chs. and N. 89°42' E., 3.00 chs. from the northwest sixteenth-section corner of Sec. 24, T. 2 S., R. 17 W., M. P. M.; thence S. 0°2' W., 10.00 chs.; S. 89°42' W., 5.00 chs.; N. 10 chs.; N. 89°42' E., 5.00 chs; to point of beginning;

WHEREAS it appears that certain public lands within the Beaverhead National Forest, adjacent to the Big Hole Battlefield Monument, are historic landmarks, forming a part of the battle grounds where Chief Joseph and a band of Nez Perce Indians were defeated by a detachment of United States Soldiers;

WHEREAS certain other public lands within the aforesaid national forest are contiguous to the said national monument and are necessary for the proper care, management, and protection of the historic landmarks included within the monument; and

WHEREAS it appears that it would be in the public interest to reserve all of the aforesaid public lands as a part of the said national monument:

NOW, THEREFORE, I, FRANKLIN D. ROOSEVELT, President of the United States of America, under and by virtue of the authority vested in me by the act of June 4, 1897, 30 Stat. 11, 36 (U.S.C., title 16, sec. 473), and the act of June 8, 1906, c. 3060, 34 Stat. 225 (U.S.C., title 16, sec. 431), do proclaim that the above-mentioned Executive Order of June 23, 1910, is hereby construed in conformity with the supplemental plat of survey approved July 19, 1917, to embrace the tract described above by metes and bounds, as well as the area erroneously reserved thereby; and that the hereinafter-described lands are hereby excluded from the Beaverhead National Forest and, subject to valid existing rights, added to and made a part of the said monument, which is hereby designated as the Big Hole Battlefield National Monument:

*Montana Principal Meridian*

T. 2 S., R. 17 W.,
sec. 24, lots 1 and 2, N½NW¼;
sec. 23, E½NE¼NE¼, E½SE¼NE¼;
comprising 195 acres.

Warning is hereby expressly given to all unauthorized persons not to appropriate, injure, destroy, or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

The Director of the National Park Service under the direction of the Secretary of the Interior, shall have the supervision, management, and control of the monument as provided in the act of Congress entitled "An act to establish a National Park Service, and for other purposes," approved August 25, 1916 (39 Stat. 535, U.S.C., title 16, secs. 1 and 2), and acts supplementary thereto or amendatory thereof.

IN WITNESS WHEREOF I have hereunto set my hand and caused the seal of the United States to be affixed.

DONE at the City of Washington this 29th day of June in the year of [SEAL] our Lord nineteen hundred and thirty-nine, and of the Independence of the United States of America the one hundred and sixty-third.

FRANKLIN D ROOSEVELT

By the President:
CORDELL HULL
*The Secretary of State.*

MODIFICATION OF POSTAGE RATES BY THE PRESIDENT OF THE UNITED STATES

A PROCLAMATION

WHEREAS the interests of the public and the promotion of the cultural growth, education, and development of the American people require the continuation of the postage rates on books as prescribed by Proclamation No. 2309 of October 31, 1938:[1]

NOW, THEREFORE, I, FRANKLIN D. ROOSEVELT, President of the United States, under and by virtue of the authority vested in me by section 2 of the act of June 16, 1933, 48 Stat. 254, as amended by section 515 of title III of the act of May 10, 1934, 48 Stat. 760, Public Resolution 36, approved June 28, 1935, 49 Stat. 431, Public Resolution 48, approved June 29, 1937, 50 Stat. 358, and section 1 of title I of the Revenue Act of 1939, approved June 29, 1939, (Public No. 155, 76th Congress, 1st Session), do proclaim that the postage rate on books consisting wholly of reading matter and containing no advertising matter other than incidental announcements of books, when mailed under such regulations as the Postmaster General shall prescribe, shall, for the period commencing July 1, 1939, and ending June 30, 1941, continue to be one and one-half cents a pound or fraction thereof, irrespective of the zone of destination.

IN WITNESS WHEREOF I have hereunto set my hand and caused the seal of the United States of America to be affixed.

[1] 3 F.R. 2588 DI.

DONE at the City of Washington this 30" day of June in the year of our Lord nineteen hundred and thirty-
[SEAL] nine and of the Independence of the United States of America the one hundred and sixty-third.

FRANKLIN D ROOSEVELT

By the President:

CORDELL HULL
*Secretary of State.*

EXECUTIVE ORDER

ADMINISTRATION OF THE FOREIGN SERVICE UNDER REORGANIZATION PLAN NO. II

Under the authority vested in me by the act of May 24, 1924, 43 Stat. 140, 144, the act of February 23, 1931, 46 Stat. 1207, 1211, and Reorganization Plan No. II, transmitted by the President to the Congress (H. Doc. 288) on May 9, 1939, and by Public Resolution No. 20, 76th Congress, 1st Session, approved June 7, 1939, I hereby prescribe the following regulations pertaining to the membership of the Board of Foreign Service Personnel:

1. The officer of the Department of Commerce who shall be added to the membership of the Board of Foreign Service Personnel in accordance with the provisions of subsection (b) (5) of section 1 of Reorganization Plan No. II shall sit as a member of the Board only when nominations and assignments of commercial attaches, the selection or assignment of Foreign Service officers for specialized training in commercial work, or other matters of interest to the Department of Commerce are under consideration;

2. The officer of the Department of Agriculture who shall be added to the membership of the Board of Foreign Service Personnel in accordance with the provisions of subsection (b) (5) of section 1 of Reorganization Plan No. II shall sit as a member of the Board only when nominations and assignments of agricultural attaches, the selection or assignment of Foreign Service officers for specialized training in agricultural work, or other matters of interest to the Department of Agriculture are under consideration.

3. The officers of the Department of Commerce and the Department of Agriculture who shall be designated as members of the Board of Foreign Service Personnel shall also be members of the School Board directing the Foreign Service Officers' Training School, as established and provided for by section 8 of Executive Order No. 5642 of June 8, 1931, which is hereby amended accordingly, and each shall sit as a member of the School Board when matters of interest to his respective Department shall be under consideration.

4. With reference to the Board of Examiners for the Foreign Service, the first paragraph of section 3 of the said Executive Order No. 5642 of June 8, 1931, is hereby amended to read as follows:

"3. *Examination for the Foreign Service.* There is hereby constituted a Board of Examiners, which shall conduct examinations to determine the eligibility of candidates for the Foreign Service, composed as follows: Three Assistant Secretaries of State designated by the Secretary of State, an officer of the Department of Commerce designated by the Secretary of Commerce and acceptable to the Secretary of State, an officer of the Department of Agriculture designated by the Secretary of Agriculture and acceptable to the Secretary of State, the Chief of the Division of Foreign Service Personnel, and the Chief Examiner of the Civil Service Commission.

"Any member of the Board may, when he deems it necessary, designate another officer of his Department to serve for him on the Board, provided such officer as may be designated to represent a member of the Board shall be acceptable to the Secretary of State and approved by him.

"The rules for the conduct of examinations as established in subsections (a) to (k), inclusive, of section 3 of the said Executive Order No. 5642 of June 8, 1931, shall remain in full force and effect."

This order shall become effective on July 1, 1939.

EXECUTIVE ORDER

TRANSFERRING TO THE FEDERAL WORKS ADMINISTRATOR THE FUNCTIONS TRANSFERRED TO THE SECRETARY OF THE TREASURY BY EXECUTIVE ORDER NO. 7641 OF JUNE 22, 1937

By virtue of and pursuant to the authority vested in me by the act entitled "An Act to authorize the President to provide housing for war needs", approved May 16, 1918 (40 Stat. 550), as amended and supplemented, it is ordered that all powers, rights, privileges, and duties (including the power to execute deeds, contracts, or other instruments of conveyance) delegated to the Secretary of Labor by Executive Order No. 2889 of June 18, 1918, and transferred to the Secretary of the Treasury by Executive Order No. 7641 of June 22, 1937,[1] be, and they are hereby, transferred to the Federal Works Administrator to be exercised and performed by the said Administrator through the Commissioner of Public Buildings; and the Secretary of the Treasury shall take such action as may be necessary to carry out the purposes of this order, including the transfer of all the stock of the United States Housing Corporation, now held by the Secretary of the Treasury as Trustee, to the Federal Works Administrator as Trustee for the United States.

This order shall supersede Executive Order No. 7641 of June 22, 1937, and shall become effective July 1, 1939.

EXECUTIVE ORDER

REVOCATION OF EXECUTIVE ORDER NO. 4539 OF NOVEMBER 6, 1926, WITHDRAWING PUBLIC LANDS

UTAH

By virtue of and pursuant to the authority vested in me by the act of June 25, 1910, c. 421, 36 Stat. 847, Executive Order No. 4539 of November 6, 1926, withdrawing public lands in Utah pending a resurvey, and heretofore partially revoked, is hereby revoked as to the remainder of the lands affected thereby.

This order shall become effective upon the date of the official filing of the plat of the resurvey of the lands involved.

## *Rules, Regulations, Orders*

### TITLE 7—AGRICULTURE

### FEDERAL CROP INSURANCE CORPORATION

[FCIR, Series 1, No. 1, Supp. 7]

### PART 401—WHEAT CROP INSURANCE REGULATIONS

#### AMENDMENTS

By virtue of the authority vested in the Federal Crop Insurance Corporation by the Federal Crop Insurance Act, approved February 16, 1938, as amended by Public Law No. 691 of the 75th Congress, approved June 22, 1938, Section 140[1] of the Regulations Relating to Wheat Crop Insurance, as amended, is hereby amended to read, as follows:

#### PART 14—POLICY PERIOD

§ 140 Notwithstanding any of the foregoing provisions of these Regulations, the application for wheat crop insurance and the wheat crop insurance policy, insurance under any policy duly countersigned and issued by the Corporation shall attach at 12 o'clock noon on the date of signature of the Application for Wheat Crop Insurance, Form FCI–1, by the insured, but not before the wheat crop is seeded.

Adopted by the Board of Directors on June 12, 1939.

[SEAL] M. L. WILSON,
*Chairman.*

Approved, June 30, 1939.

H. A. WALLACE,
*Secretary of Agriculture.*

[F. R. Doc. 39–2297; Filed, July 1, 1939; 9:31 a. m.]

---

[FCI–Regulations–1, Wheat–1940]

### PART 402—1940 WHEAT CROP INSURANCE REGULATIONS

The Federal Crop Insurance Program for wheat is part of the general program of the United States Department of Agriculture administered for the benefit of agriculture.

By virtue of the authority vested in the Federal Crop Insurance Corporation by the Federal Crop Insurance Act, approved February 16, 1938, as amended, these regulations are hereby published and prescribed to be in force and effect, with respect to the 1940 Wheat Crop Insurance Program, until amended or superseded by regulations hereafter made.

#### PART I—DEFINITIONS

§ 1 *Meaning of terms.* For the purposes of the 1940 Wheat Crop Insurance Program, the term—

*Department* means the United States Department of Agriculture.

*Secretary* means the Secretary of Agriculture of the United States.

*Corporation* means the Federal Crop Insurance Corporation.

*Board* means the Board of Directors of the Corporation.

*Manager* means the Manager of the Corporation.

*Branch manager* means the representative of the Corporation in charge of a branch office of the Corporation.

*Insurance contract* means the contract of insurance entered into between the applicant and the Corporation by virtue of the application for insurance, Form FCI–12, Wheat—1940, the acceptance in writing by the Corporation of the application for insurance, Form FCI–18, Wheat—1940, and these regulations, FCI–Regulations–1, Wheat—140, and amendments thereto.

*Application* means a properly executed form prescribed by the Corporation for the purpose of applying for insurance.

*Base period* means the crop years 1930–38, inclusive.

*Adjusted average* yield means the average of the recorded and appraised annual yields of wheat per seeded acre on the farm for the base period as adjusted by the Corporation, or the yield appraised on the basis of the adjusted average yield for a key farm, whichever is applicable.

*Insured percentage* means the percentage of the adjusted average yield for the farm covered, or to be covered, by insurance, and shall be either 50 or 75 percent.

*Total insured production* means the maximum number of bushels for which the insured may be indemnified under the insurance contract.

*Wheat crop* means all seeded winter wheat and spring wheat on the farm in any crop year which is normally harvested in that crop year.

*Crop year* means the period within which a wheat crop is normally seeded and harvested. A crop year shall be designated by reference to the calendar year in which the wheat crop is normally harvested.

*Person* means an individual, partnership, association, corporation, estate, or trust, and, wherever applicable, a State, a political subdivision of a State, or any agency thereof.

*Landlord or owner* means a person who owns land and rents such land to another person or operates such land.

*Tenant* means a person other than a sharecropper who rents land from another person (for cash, a fixed commodity payment, or a share of the proceeds of the crops) and is entitled under a written or oral lease or agreement to receive all or a share of the proceeds of the crops produced thereon.

*Sharecropper* means a person who works a farm in whole or in part under the general supervision of the operator and is entitled to receive for his labor a share of the proceeds of the crop produced thereon.

*Harvesting* means any severance of mature wheat.

*Harvesting as grain* means any severance of mature wheat for the purpose of using the same for grain, whether threshed or not.

*County* means a political or civil division of a State.

*County committee* means the group of persons elected within any county to administer the agricultural conservation program in such county.

*State committee* means the group of persons designated within any State to administer the agricultural conservation program in such State.

*Seeded wheat* means wheat seeded either by drilling and covering after proper preparation of the seedbed or by broadcasting and covering after preparation of the seedbed, but does not include succotash, volunteer wheat, or self-seeded wheat.

*Farm* means all adjacent or nearby farm land under the same ownership which is operated by one person, including also any field-rented tract (whether operated by the same or another person) which, together with any other land included in the farm, constitutes a unit with respect to the rotation of crops: *Provided, however*, That where any tract or tracts of such farm land vary widely from the remainder of such farm land in productivity, topography, farming practices, or risk of loss, such tract or tracts, in accordance with instructions issued by the Manager, may be considered a separate farm.

A farm shall be regarded as located in the county in which the principal dwelling is situated, or, if there is no dwelling thereon, it shall be regarded as located in the county in which the major portion of the farm is located.

*Price differentials* means the amount per bushel fixed by the Corporation representing (1) transportation charges between the local delivery point specified for the farm and the designated basic market, wherever, in the determination of the Corporation, such charges are applicable, and (2) other usual charges in connection with the handling of grain.

*Basic market* means the market designated by the Corporation, for the computation of the cash equivalent of premiums, deposits, refunds, or indemnities, for the area in which the farm is located.

#### PART II—CONDITIONS GOVERNING APPLICATION FOR INSURANCE, THE INSURANCE CONTRACT, AND THE INSURANCE PERIOD

§ 20 *Application for insurance.* (a) Application for insurance shall be made upon a form prescribed for such purpose by the Corporation. Any person who has an interest as landlord, owner, tenant, or sharecropper in a wheat crop to be seeded on a farm may apply for insurance to cover his interest in such crop.

(b) An application shall cover the applicant's interest in the wheat to be seeded on a farm (except as provided in subsection (c) of this section) if his interest is the same in the wheat to be seeded on all tracts constituting the farm, and if the persons other than the applicant having an interest in the wheat to be seeded are the same with respect to all tracts. The applicant shall file a separate application for each tract or tracts with respect to which the applicant's interest in the wheat to be seeded differs from his interest in the wheat to be seeded on another tract or tracts within the farm. The applicant shall also file a separate application for each tract with respect to which the other person or persons having an interest in the wheat to be seeded on such tract are different from the person or persons having an interest in the wheat to be seeded on the other tract or tracts within the farm.

(c) An application may be submitted covering only spring wheat even though both winter and spring wheat are seeded on the farm, but, as provided in Part VI of these regulations, the total production of wheat for the purpose of determining the amount of loss under the insurance contract shall include the production from both winter and spring wheat.

(d) An application must be submitted at the office of the county committee, together with the premium, before the beginning of the seeding of the wheat crop (or the seeding of the spring wheat where an application is submitted, in accordance with the provisions of subsection (c) of this section, covering only spring wheat even though both winter and spring wheat are being seeded on the farm) or the final date established by the Corporation for the submission of applications in the area in which the farm is located, whichever occurs first.

§ 21 *Acceptance of application by the Corporation.* Acceptance of applications shall be made by the issuance to the applicant of a notice of acceptance signed by the Manager and countersigned by a duly authorized officer or representative of the Corporation. Applications shall not be accepted by the Corporation until the premium has been paid. Applications shall be accepted only with respect to farms upon which soil conservation and other good farming practices are being followed. The Corporation may reject any application for insurance, or may limit the insured percentage to 50 percent of the adjusted average yield for the farm, in any case where it determines that the risks to be incurred under the insurance contract warrant either such action.

§ 22 *Period of insurance.* Insurance under the insurance contract shall attach at the time the wheat crop is seeded if the premium has been paid and the application is accepted by the Corporation.

The insurance shall cease with respect to any portion of the insured crop upon threshing (unless combined, field-sacked, and remaining in the field, in which event the insurance shall not cease for 120 hours thereafter) or removal from the farm, but in no event later than midnight of the 30th day of September, 1940, unless such time is extended in writing by the Corporation. Midnight means midnight of standard time at the place where the farm is located.

§ 23 *Fraud, misrepresentation, etc.* The entire insurance contract shall be voidable, and the premium paid thereon shall be forfeited at the election of the Corporation, if the insured has concealed or misrepresented, or conceals or misrepresents, any material fact or circumstance concerning the insurance contract or the subject thereof, or if the interest of the insured in the crop covered hereunder be not truly stated in the application, or if the insured is guilty of any fraud or makes any false statements relating to the insurance contract or the subject thereof, whether before or after a loss, or if the insured shall neglect to use all reasonable means to develop, care for, and save the entire crop covered by the insurance contract, whether before or after damage has occurred.

§ 24 *Modification of insurance contract.* No notice to any representative of the Corporation or knowledge possessed by any such representative or by any other person shall be held to effect a waiver or change in any part of the insurance contract or estop the Corporation from asserting any right or power under such contract; nor shall the terms of such contract be waived or changed except by a form prescribed by the Corporation, signed by the Manager and countersigned by a duly authorized officer or representative of the Corporation; nor shall any provision or condition of this insurance contract or any forfeiture be held to be waived by any delay or omission by the Corporation in exercising its rights and powers hereunder or by any requirement, act, or proceeding, on the part of the Corporation or of its representatives relating to appraisal or to any examination herein provided for.

§ 25 *Insurance contract voidable unless full compliance.* Failure to give any notice to the Corporation or to furnish proof of loss within the time and in the manner prescribed herein, or failure to comply with any of the terms, conditions, or covenants of the insurance contract, shall render the insurance contract voidable and, at the election of the Corporation, shall constitute a forfeiture of the premium paid.

#### PART III—TIME AND MANNER OF PAYMENT OF PREMIUMS AND TENDER OF DEPOSITS

§ 30 *Time and place of payment of premiums.* Premiums shall be payable at the office of the county committee for the county in which the farm is located. Premiums may be paid either in wheat or the cash equivalent thereof, at the option of the insured. Premiums shall be payable at the time the application is taken, and in no event shall a premium (except an additional payment supplementing a premium payment) be paid after the beginning of the seeding of the wheat crop, except as provided in subsection (c) of section 20, or after the date specified by the Corporation as the closing date for the receipt of applications, whichever occurs first.

§ 31 *Deposits to be applied toward future premiums.* Any person who submits an application for insurance may tender, at such time, with his premium payment toward the payment of future premiums a deposit of wheat or cash in an amount not in excess of the premium for the crop year during which the deposit is made. The Corporation reserves the right to reject the tender of any deposit. A tender of deposit shall be made at the office of the county committee for the county in which the farm is located.

The receiving of any deposit by the Corporation shall not obligate the Corporation to insure the interest of the depositor, and any insurance contract for which such deposit is made will be subject to the provisions of the regulations applicable to the insurance program for which the deposit is made.

A depositor shall have no title or interest in any wheat (including any wheat deposited) held by the Corporation. The Corporation shall be liable to the depositor only for the cash equivalent of the quantity of wheat credited or to be credited to the depositor's account, such cash equivalent to be determined in accordance with the provisions of section 32 of these regulations.

§ 32 *Payment of premium or tender of deposits in cash equivalent.* The payment of premiums in the cash equivalent shall be made in cash, check, money order, or bank draft payable to the Treasurer of the United States, or by means of an advance from the Secretary of Agriculture. The tender of deposits in the cash equivalent shall be made in cash, check, money order, or bank draft payable to the Treasurer of the United States. All checks and drafts will be accepted subject to collection and premiums or deposits shall not be regarded as paid unless collection is made.

The cash equivalent of any premium or deposit shall be determined by multiplying the number of bushels of wheat of the applicable class and grade constituting the premium or deposit by the price of such wheat at the current basic market designated by the Corporation, less price differentials. The price of such wheat at the current basic market shall be the price, as determined by the Corporation, for the day when the premium is paid or the deposit is made.

The cash equivalent of any additional payment supplementing a premium payment shall be determined by multiplying the number of bushels of wheat of the applicable class and grade constituting such additional payment, by the price of such wheat used for the com-

[1] 4 F.R. 1947 DI.

putation of the original premium payment.

§ 33 *Payment of premium or tender of deposits in wheat.* (a) When premiums are paid in wheat, such payments shall be made by the delivery of a negotiable warehouse receipt, or some other instrument acceptable to the Corporation (both hereinafter referred to as "warehouse receipt"), representing the number of bushels of wheat of merchantable quality constituting the current year's premium and representing wheat of the class specified in the application and the grade specified for such class by the Corporation for the current year's premium. Tender of deposits in wheat shall be made in a similar manner. Warehouse receipts shall be accepted only when issued by a warehouse designated by the Corporation. No warehouse receipt will be accepted as a payment of premium or tender of deposit unless it is received at the office of the county committee within the time fixed by the Corporation and unless there are no warehouse charges or other liens outstanding against the wheat represented by the warehouse receipt other than the usual charges for receiving and storage, if any, for a period not in excess of ten days prior to the date the payment or tender was made. Premiums or deposits shall not be regarded as paid unless the warehouse receipts representing wheat tendered in payment of the premium or the deposit are accepted by the Corporation. One warehouse receipt representing wheat may be tendered to cover both the premium and the deposit.

(b) If, for any reason whatsoever, it appears at any time that the transfer of a warehouse receipt, whether received by the Corporation or its agent as payment of premium or deposit, did not convey to the Corporation complete and unencumbered title to the receipt and the wheat represented thereby, except for the usual charges for receiving and storage not in excess of ten days, or if at any time the Corporation's title to such receipt or the wheat represented thereby is questioned by any person, then, unless the question of title to or charges against such wheat is immediately settled without cost to the Corporation, the Corporation shall not be liable for the payment of any indemnity under the insurance contract for which such receipt was tendered as premium and shall not be liable for a deposit or refund because of the tendering of such receipt. Any payment of indemnity or refund of premium made under the insurance contract for which any such receipt was tendered as premium, and any refund of deposit, shall be returned to the Corporation without limiting any other right or remedy of the Corporation. Any charges or cost to the Corporation in connection with such warehouse receipt, or the wheat represented thereby, may be set off against any indemnity which may be or become due under any insurance contract entered into with the applicant or in which he may have an interest. Settlement necessitated by the transfer of receipts failing to convey complete and unencumbered title to the receipt and the wheat represented thereby shall be on the basis of the cash equivalent applicable on the date when such receipt was tendered to the Corporation.

§ 34 *Disposition of 1939 crop-year deposits.* Any amount which is on deposit with the Corporation pursuant to the Regulations Relating to Wheat Crop Insurance, as amended, F.C.I.R.–Series 1, No. 1, as amended, at the election of the depositor (1) shall be applied in payment of the premium for any insurance for which his application is accepted, (2) shall be re-deposited and shall become a deposit subject to the provisions of these regulations, or, (3) shall be refunded in accordance with the Regulations Relating to Wheat Crop Insurance, as amended, F.C.I.R.–Series 1, No. 1, as amended.

At the time the depositor makes application for insurance with respect to the 1940 crop he shall specify one or more of the foregoing methods of disposition of his deposit: *Provided, however,* That any such deposit or any portion thereof which, at the direction of the depositor, is not applied in payment of premium or re-deposited will be refunded as soon as practicable by the Corporation in accordance with the Regulations Relating to Wheat Crop Insurance, as amended, F.C.I.R.–Series 1, No. 1, as amended: *And provided, further,* That any excess of the amount applied in payment of the premium will become a deposit, or will be refunded at the election of the depositor, in accordance with the provisions of section 40 of these regulations.

§ 35 *Conversion of cash into deposits of wheat.* Any tender of deposit made in cash will be credited to the depositor's account in terms of the wheat equivalent of such cash at the time the tender of deposit is made and will be deposited on the basis of the class and grade of wheat specified for the payment of the current year's premium. The wheat equivalent of any cash tendered for deposit will be determined on the same basis as that provided in section 32 of these regulations for the determination of the cash equivalent of a deposit.

§ 36 *Application of wheat deposits toward premiums.* A deposit, at the direction of the depositor, will be applied by the Corporation toward the payment of the premium for any insurance for which the depositor's application is accepted. Where the deposit is to be applied toward a premium for an insurance contract covering a farm for which different price differentials are applicable, the depositor will be charged or credited with an amount of wheat, as determined by the Corporation, reflecting the difference between the price differentials applicable at the place where the deposit was made and the price differentials at the local delivery point for the farm for which the application for insurance was made.

§ 37 *Premium earned upon seeding.* Premiums shall be regarded as earned upon the seeding of the wheat crop.

PART IV—REFUND OF PREMIUMS AND DEPOSITS

§ 40 *Computation of refunds; claim for refunds.* (a) Any refund of premiums, excess payments, or deposits shall be made only in the cash equivalent of the quantity of wheat to be refunded, less an amount, fixed by the Corporation, to cover storage and handling expenses. In no case shall such deduction exceed one-twentieth of one cent per day per bushel. The period for which such deductions shall be computed shall commence with and include the day following the day on which the premium was paid or the deposit was delivered. Such period shall end with and include the day on which payment of the refund is approved by the Corporation.

(b) Claims for refunds shall be made on forms prescribed by the Corporation. Claims for refunds of premiums or deposits shall be submitted to the Corporation at the office of the county committee where the premium was paid or the deposit was delivered. No claim for refund of premium shall be acted upon by the Corporation until the acreage seeded to wheat on the farm covered by the insurance contract has been determined. Except as may otherwise be provided by the Corporation, no claim for refund of a deposit shall be considered prior to the final date fixed by the Corporation for the receipt of applications for the 1941 Wheat Crop Insurance Program in the county where the farm in connection with which the deposit was made is located. Nothing in this subsection shall be construed to restrict the Corporation's right to refund any deposit or premium at such earlier date as it may determine.

(c) The cash equivalent of any refund of a deposit shall be determined by multiplying the amount to be refunded in terms of bushels of wheat of the class and grade specified for the payment of the premium for the insurance contract with respect to which the deposit was made by the price of such wheat, at the local delivery point, applicable for the day the deposit was tendered to the Corporation, whether or not such deposit was made in wheat or in the cash equivalent thereof.

(d) The cash equivalent of any refund, other than a refund of a deposit, shall be determined by multiplying the amount to be refunded in terms of bushels of wheat of the class and grade specified for the payment of the premium for the insurance contract by the price of such wheat, at the local delivery point, applicable for the day the premium was paid, whether or not such premium was paid in wheat or in the cash equivalent thereof.

(e) No refund shall be made if the amount thereof is less than one bushel.

§ 41 *Refund or deposit of excess payment.* In any case where an excess payment results from an adjustment in the total insured production, or the computing of the total insured production on the basis of the wheat acreage allotment, or the permitted acreage, whichever is applicable, as set forth in section 50 of these regulations, or from any other reason, such excess payment, other than payment by an advance by the Secretary, shall be credited to the insured's account as a deposit to be applied toward the payment of the premium on any application which is accepted by the Corporation, unless the insured has indicated in his application that he elects to have such excess payment refunded. Any amount credited to the insured's account pursuant to this section shall be deemed to have been deposited on the date of payment of the premium.

§ 42 *Death, incompetency, or disappearance of person entitled to refund; change of fiduciaries.* In any case where a person who is entitled to a refund of premium or deposit has died, has become incompetent, has disappeared leaving his whereabouts unknown for a period of 150 days from the date the Corporation determines that a refund is due, or has ceased to act as a fiduciary, such refund will be made to his legal representative or successor. If no such legal representative or successor has been appointed, or is otherwise legally qualified, and the quantity of wheat to be refunded before deduction of storage and handling expenses is less than 500 bushels, such refund may be made to any one or more of the persons beneficially entitled to share in such refund on behalf of all the persons so entitled upon proof of the facts satisfactory to the Corporation. The determination of the Corporation as to the existence or non-existence of a circumstance in the event of which payment of a refund may be made to a person other than the person who paid the premium or made the deposit, as the case may be, shall be final and conclusive and payment in accordance with such determination shall constitute a complete discharge of the Corporation's obligation with respect to the refund.

§ 43 *Assignment of claims for refunds; creditors.* (a) No claim solely for a refund, or any part or share thereof, or any interest therein, shall be transferable except where the Corporation has recognized an assignment of the insurance contract pursuant to the provisions of section 86 of these regulations. Notwithstanding any assignment for receiving payment of any such refunds, the Corporation reserves the right to make payment of the refund jointly to the assignor and assignee, and payment in such manner shall constitute a complete discharge of the Corporation's obligation with respect to such refund.

(b) The provisions of section 87 of these regulations shall be applicable to the payment of refunds.

PART V—TOTAL INSURED PRODUCTION

§ 50 *Total insured production.* (a) The total insured production for the insurance contract shall be the product of the adjusted average yield, the insured percentage, the insured's interest in the crop, and the acreage used for the computation of the premium: *Provided, however,* That if special practices are accepted as the basis for insurance, the total insured production for the insurance contract shall be the sum of the products of the adjusted average yield, the insured percentage, the insured's interest in the crop, and the acreage used for the computation of the premium computed separately for the acreage under each special practice.

(b) If the acreage of wheat seeded for harvest as grain is in excess of the wheat acreage allotment for the farm under the 1940 Agricultural Conservation Program or the acreage permitted to be planted to wheat under such program without deduction from payment, the wheat acreage allotment or such permitted acreage shall be used in lieu of the acreage of wheat seeded for harvest as grain for the purpose of computing the total insured production.

In the event that the farm covered by the insurance contract is grouped with other farms to constitute one farm under the 1940 Agricultural Conservation Program, the acreage of wheat used in computing the total insured production for the farm covered by the insurance contract may exceed the wheat acreage allotment, or the permitted acreage for such farm, whichever is applicable, if the acreage seeded on all such farms constituting one farm under the 1940 Agricultural Conservation Program is not in excess of the total wheat acreage allotment or the permitted acreage for the farm as constituted under the 1940 Agricultural Conservation Program. If the acreage of wheat seeded on all such farms constituting one farm under the 1940 Agricultural Conservation Program is in excess of the total acreage allotment for all such farms, or the permitted acreage, the acreage used in computing the total insured production for each such farm covered by an insurance contract shall be the same percentage of the acreage seeded to wheat for harvest as grain on the farm that the total acreage allotment for all such farms is of the acreage seeded on all such farms.

If the total acreage used for the computation of the premium under one or more practices is in excess of the wheat acreage allotment for the farm or the permitted acreage, whichever is applicable, the insured production as computed for each practice shall be reduced in the proportion that the total acreage allotment is to the total acreage seeded.

§ 51 *Adjustment of total insured production.* (a) If the acreage seeded for harvest as grain is less than the acreage used for the computation of the premium as specified in the application, the total insured production shall be adjusted, subject to the provisions of section 50 (b), to the basis of the acreage seeded. If the acreage seeded for harvest as grain is greater than the acreage used for computation of the premium as specified in the application, the total insured production shall not be adjusted except upon proper application and approval of such application by the Corporation and upon payment of an additional premium to the Corporation, prior to the date specified by the Corporation for receiving such payments.

(b) If the acreage seeded for harvest as grain under any one or more special practices differs from the respective acreages used for the computation of the premium as specified for each of such practices in the application, the total insured production shall be subject to adjustment by the Corporation, subject to the provisions of section 50 (b), on the basis of the acreage seeded for each such practice. If the adjustment would result in a smaller total insured production, the Corporation shall make such adjustment and reduce the total insured production. If the adjustment would result in a larger total insured production, the Corporation shall make such adjustment and increase the total insured production: *Provided, however,* That if an additional premium is required, the total insured production shall not be increased except upon payment of such additional premium to the Corporation prior to the date specified by the Corporation for receiving such payments.

(c) The total insured production shall be adjusted if the Corporation finds that the insured seeded the wheat crop on land of poorer average quality for the production of wheat than the average quality of the land seeded to wheat on the farm during the base period and such seeding is not the result of a regularly established rotation. Such adjusted total insured production shall be computed by substituting for the adjusted average yield for the farm a yield per acre appraised on the basis of the quality of the land on which the wheat crop is seeded.

(d) The total insured production shall be adjusted if the Corporation's risk has been increased by (1) the seeding of a different class of wheat than the class of wheat considered in determining or appraising the adjusted average yield or (2) the following of a different fertilizer or other farming practice than the practice considered in determining or appraising such adjusted average yield. Such adjusted total insured production shall be computed by substituting for the adjusted average yield a yield for the land seeded to the wheat crop appraised

on the basis of the practice followed for the 1940 wheat crop.

(e) Any adjustment in the total insured production made pursuant to subsections (c) and (d) of this section may be made at the time of the determination of loss under the insurance contract.

(f) Notwithstanding any previous adjustments of the total insured production, the Corporation reserves the right to further adjust such total insured production on the basis of the acreage seeded, if at the time of determination of loss under the insurance contract it is determined that the acreage seeded to wheat for harvest as grain is less than the acreage indicated in the notice provided for in section 52 of these regulations or the acreage and practices are different from those indicated in such notice.

§ 52 *Notice of seeding of wheat crop.* The insured, on a form prescribed by the Corporation, and on or before the date prescribed by the Corporation, shall indicate the acreage seeded to wheat on the farm and any change from the acreage and practices specified in the application. The adjustement of the total insured production under the insurance contract will be made on the basis of such notice.

PART VI—DETERMINATION OF LOSS

§ 60 *Notice of damage during growing season.* (a) Immediately after material damage to the insured crop by reason of any cause, whether or not such cause is insured against by the insurance contract, notice in writing thereof shall be given, on a form provided for that purpose, to the Corporation at the office of the county committee for the county in which the farm is located, containing such information as may reasonably be required regarding the damaged crop.

(b) The Corporation may make an investigation of the insured crop where it appears that the reported damage may be of such a nature as to result in a loss under the insurance contract. The Corporation shall have a reasonable period after receipt of such notice in which to investigate the condition of the insured crop and appraise the yield of such crop, or portion thereof.

(c) Proper measures shall be taken to protect the crop from further damage until threshing, unless the Corporation gives its permission to devote the acreage seeded to wheat to some other use. No acreage seeded to wheat shall be considered as put to another use as long as there is any wheat on such acreage remaining for harvest. In no event shall there be any abandonment of any crop or portion thereof to the Corporation.

§ 61 *Notice before harvest, removal, transfer, or other use.* Notwithstanding any other notice given as required by the insurance contract, if it is probable that there will be a loss under such insurance contract, notice in writing of the intention to harvest, remove, transfer, or make other use of the insured crop, or any portion thereof, shall be given to the Corporation, at the office of the county committee for the county in which the farm is located, in time to give the Corporation reasonable opportunity to inspect the insured crop before such harvest, removal, transfer, or other use.

§ 62 *Time of loss.* Loss shall be deemed to have occurred at the time of the completion of threshing of the insured crop (unless combined, field-sacked, and remaining in the field, in which event the loss shall be deemed to have occurred upon the expiration of the insurance period) or noon of the 30th day of September, 1940, whichever occurs first, unless there is a total or substantially total destruction of the entire crop at an earlier time, in which event the loss shall be deemed to have occurred at the time of such total or substantially total destruction. The wheat crop shall be deemed to have been substantially totally destroyed if the Corporation finds that it has been so badly damaged that the farmers generally in the area where the farm is located would not further care for the crop for wheat production.

§ 63 *Proof of loss.* If a loss is claimed, the insured shall submit to the Corporation at the office of the county committee for the county in which the farm is located, on a form provided for that purpose, a statement in proof of loss containing such information as may reasonably be required regarding the insured crop. Such statement in proof of loss shall be submitted not later than 30 days after threshing, but in no event later than October 15, 1940, unless such time is extended in writing by the Corporation. It shall be a condition precedent to any liability under the insurance contract that the insured establish that any loss for which claim is made has been directly caused by a hazard insured against by the insurance contract during the term of the contract, and that the insured further establish that such loss has not arisen from or been caused by, either directly or indirectly, any of the hazards not insured against by the insurance contract.

§ 64 *Amount of loss.* The amount of loss for which indemnity will be paid under this insurance contract shall be the amount by which the total production of wheat on the farm, multiplied by the percentage representing the insured's interest in the insured crop, is less than the total insured production for the insurance contract. The total production for the farm, for the purpose of determining the amount of loss, shall include:

1. Wheat produced from any acreage, except succotash and volunteer or self-seeded wheat, which was threshed;

2. Wheat production appraised from any acreage, except succotash and volunteer or self-seeded wheat, which was not threshed, but which was otherwise harvested as grain;

3. Wheat production appraised from any acreage seeded with the intention of harvesting as grain, which was not harvested as grain, was not threshed, but which, after maturity, was left standing in the field;

4. Wheat production appraised from any acreage, seeded with the intention of harvesting as grain, which was substantially totally destroyed and put to another use with the consent of the Corporation;

5. For acreage seeded with the intention of harvesting as grain which before maturity was pastured off, cut for hay, or used for soil conservation, a number of bushels equal to the product of (1) the adjusted average yield, (2) the insured percentage, and (3) such acreage;

6. For acreage seeded with the intention of harvesting as grain which was not reseeded in areas and under circumstances where it is customary to reseed, a number of bushels equal to the quantity of wheat by which the actual production per acre is less than the product of (1) the adjusted average yield, (2) the insured percentage and (3) such acreage;

7. For acreage seeded with the intention of harvesting as grain with a complete failure in yield due to causes not insured against, a number of bushels equal to the product of such acreage and the adjusted average yield;

8. For acreage seeded with the intention of harvesting as grain which has been damaged by reason of causes not insured against, or which has been damaged or destroyed by reasons of causes insured against and causes not insured against, a number of bushels equal to the appraised reduction in production due to causes not insured against;

9. For acreage seeded with the intention of harvesting as grain with respect to which the insured's interest is terminated by voluntary transfer or process of law before the crop is harvested, except as otherwise provided in section 81 of these regulations, a number of bushels equal to (1) the product of the adjusted average yield, the insured percentage, and such acreage, or (2) the actual production from such acreage, whichever is higher.

§ 65 *Records, access to farm.* For the purpose of enabling the Corporation to determine the loss under the insurance contract the insured shall keep, or cause to be kept, records of the harvesting, threshing, storage, shipment, sale, or other disposition, of all wheat produced on the farm, which will be made available for examination by the Corporation, and as often as may reasonably be required, any person or persons designated by the Corporation will have access to the farm.

PART VII—TIME AND MANNER OF PAYMENT OF INDEMNITY

§ 70 *When indemnity payable.* The amount of loss for which the Corporation may be liable under any insurance contract shall be payable within 30 days after satisfactory proof of loss is approved by the Corporation. Notwithstanding the fact that payment of any indemnity is delayed for any reason beyond the time specified, the Corporation shall not be liable for interest or damages on account of such delay.

§ 71 *Manner of payment of indemnity.* The indemnity under any insurance contract for which the Corporation may be liable shall be paid in wheat or the cash equivalent thereof. The insured may indicate in his statement in proof of loss whether he wishes the indemnity to be paid in wheat or in cash, but the Corporation reserves the right to make payment in a form other than that indicated by the insured.

§ 72 *Payment of indemnity in cash.* Where an indemnity is paid in cash, the amount thereof shall be computed by multiplying the amount of loss, in terms of bushels of wheat, of the class and grade specified for the payment of the premium for the insurance contract, by the price of such wheat at the current basic market, as determined by the Corporation, less the amount per bushel fixed by the Corporation representing price differentials. The current basic market price for any class or grade of wheat at such basic market shall be the basic market price, determined by the Corporation, for the day when the claim for indemnity is approved for payment by the Corporation.

§ 73 *Payment of indemnity in wheat.* (a) Where an indemnity is paid in wheat, payment shall be in the form of a warehouse receipt representing wheat of the basic class and grade specified for the payment of the premium for the insurance contract, or its current equivalent in wheat of any other class and grade, as determined by the Corporation.

(b) If the warehouse receipt represents wheat (other than "flat wheat") stored at the basic market, it shall be for a number of bushels computed by dividing the amount of indemnity which would have been paid in cash by the current market price for such wheat at the basic market. When a warehouse receipt is delivered as provided in this subsection, it shall be accompanied by evidence of the payment of sufficient inbound freight bills or tonnage credit slips to assure the customary transit privileges.

(c) If the warehouse receipt represents wheat (other than "flat wheat") stored at any point or market other than the basic market, it shall be for a number of bushels computed by dividing the amount of the indemnity which would have been paid had the indemnity been paid in cash by the current market price for such wheat at such other point or market. The current market price at such other point or market shall be determined by deducting from the current basic market price at the designated basic market, an amount per bushel, fixed by the Corporation, to cover freight, from the point at which the wheat originated to the basic market, and adding thereto an amount per bushel representing the freight necessary to move such wheat from such point of origin to the point or market at which the wheat is stored. When the warehouse receipt is delivered as provided in this subsection, it shall be accompanied by evidence of the payment of the freight from the point of origin on such wheat to the point of storage.

(d) If the warehouse receipt represents "flat wheat" stored at any point, it shall be for a number of bushels computed by dividing the amount of indemnity which would have been paid in cash by the current market price for such "flat wheat" at such point. The current market price at such point shall be determined by deducting from the current basic market price at the designated basic market an amount per bushel fixed by the Corporation to cover price differentials.

(e) "Flat wheat," as used herein, means wheat represented by warehouse receipts not accompanied by paid freight bills showing previous movement of such wheat.

(f) The current market prices to be applied under this section shall be such prices for the day when the proof of loss is approved for payment by the Corporation.

§ 74 *Adjustments in connection with indemnity payments.* Where an indemnity has been paid under the insurance contract and an adjustment of such indemnity is made, such adjustment shall be made on the basis of the cash equivalent applicable to the indemnity paid, whether or not such indemnity was paid in wheat or the cash equivalent thereof.

PART VIII—CHANGE OF INSURED'S INTEREST

§ 80 *Termination of interest.* Except as is otherwise provided in these regulations, if at the time of loss the insured's interest in the crop has been terminated, whether by death, voluntary action, or process of law, no indemnity shall be payable. The insured's interest shall not be deemed to have been terminated by virtue of the imposition of a lien, whether by voluntary action or process of law, upon the insured crop, or by the appointment of a receiver or moratorium officer with respect to such crop, the commencement of bankruptcy proceedings, or proceedings for the foreclosure of a lien. The insured shall be deemed to have an interest in the crop so long as he has any right of redemption therein or so long as the continued existence of the crop will be of direct financial benefit to him.

§ 81 *Diverse interest.* Subject to the provisions of sections 80 and 87 of these regulations, if at the time of loss it appears that one or more persons have an interest with the insured in the percentage of the crop covered by the insurance contract, or that the insured has contracted to sell his interest in the insured crop or any portion thereof to another person or persons, or has contracted to sell the farm covered by the insurance contract, or any portion thereof, to such other person or persons, but the sale has not been completed, such other person or persons, if and insofar as their interests in the crop are not otherwise insured by them or on their behalf against such loss, shall be entitled to the benefit of the insurance contract as their interests may appear. However, the loss may be adjusted with the insured, and payment of any indemnity may be made to the insured in behalf of all persons interested in such crop, whether or not the insured has been authorized to receive such payment by such other persons, and such payment shall constitute a complete discharge of the Corporation's obligation with respect to such loss under the insurance contract.

In the event that the insured makes a voluntary transfer of his entire interest in a portion of the wheat acreage to another person or persons, and such other person or persons comply with the provisions of the insurance contract as applied to such portion of the crop, the amount of loss shall be determined as if such transfer did not take place and the Corporation may pay the indemnity to the insured on behalf of the insured and such other person or persons having an interest in the crop, or may issue a joint check to the insured and such other person or persons.

§ 82 *Death, incompetency, or disappearance of the insured.*—(a) *Death.* (1) Before loss with administration: If the insured dies before the time of loss, and his interest in the crop forms part of his estate, payment of any indemnity will be made to the duly appointed representative of his estate.

(2) After loss with administration: If the insured dies after the time of loss, payment of any indemnity on account of such loss will be made to the duly appointed representative of his estate.

(3) Before loss without administration: If the insured dies before the time of loss and no legal representative of his estate is appointed or is otherwise legally qualified, payment of any indemnity may be made after the expiration of 30 days from the date of death to any one or more of the persons beneficially entitled to share in the insured's interest in the crop in behalf of all the persons so entitled. Payment will be made under the provisions of this subsection only if the amount of the indemnity is less than 500 bushels and upon the submission of proof satisfactory to the Corporation that the insured's interest in the crop is part of his estate.

(4) After loss without administration: If the insured dies after the time of loss and no legal representative of his es-

tate is appointed or is otherwise legally qualified, then, subject to the conditions outlined in subsection (a) (3) of this section 82, payment of any indemnity on account of such loss may be made after expiration of 30 days from the date of death to any one or more of the persons beneficially entitled to share in the insured's interest in the crop in behalf of all the persons so entitled.

(b) *Incompetency.* (1) Before loss: If, before the time of loss, the insured is judicially declared incompetent to manage his affairs, or his incompetency is otherwise established to the satisfaction of the Corporation, and his interest in the crop remains part of his estate, payment of any indemnity will be made to the guardian, or other legally constituted representative of his estate appointed by a court of competent jurisdiction, or who is otherwise legally qualified. In such case if no guardian or other legal representative of the insured's estate is appointed, or is otherwise legally qualified and the amount of the indemnity is less than 500 bushels, payment of any indemnity may be made to a member of his family standing in the position of a voluntary guardian upon presentation of proof satisfactory to the Corporation that the indemnity is needed and is to be used for the purchase of necessities for the incompetent, or for his wife or minor children or other persons dependent upon him for support. If the insured's interest in the crop is terminated by reason of his incompetency, any relative by blood or connection by marriage of the insured who succeeds to such interest, but no other person, shall be entitled to the benefit of the insurance contract.

(2) After loss: If, after the time of loss, the insured is judicially declared incompetent to manage his affairs, or his incompetency is otherwise established to the satisfaction of the Corporation, payment of any indemnity will be made to the guardian or other legally constituted representative of his estate appointed by a court of competent jurisdiction or who is otherwise legally qualified. If there be no such guardian or other legal representative, and the amount of the indemnity is less than 500 bushels, payment of any indemnity may be made to a member of the insured's family standing in a position of voluntary guardian upon presentation of proof satisfactory to the Corporation that the indemnity is needed and is to be used for the purchase of necessities for the incompetent, or for his wife or minor children or other persons dependent upon him for support.

(c) *Disappearance.* (1) Before loss: If, before the time of loss, the insured disappears and such insured's interest in the crop covered by the insurance contract is not terminated thereby, any indemnity payable will be paid to the conservator or other legally qualified representative of his estate. If there be no such conservator or other legal representative, and the amount of the indemnity is less than 500 bushels, payment of the indemnity may be made to any member of the insured's family upon the presentation of proof satisfactory to the Corporation that the proceeds of such indemnity are needed and are to be used for the purchase of necessities for the insured's wife or minor children or other persons dependent upon him for support. If the insured's interest in the crop is terminated by reason of his disappearance, any relative by blood or connection by marriage of the insured who succeeds to his interest in the crop, but no other person, shall be entitled to the benefit of the insurance contract.

(2) After loss: If, after the time of loss, the insured disappears, payment of any indemnity will be made to the conservator or other legally qualified representative of his estate, but if there be no such conservator or other legal representative and the amount of the indemnity is less than 500 bushels, payment of the indemnity may be made to a member of the insured's family upon presentation of proof satisfactory to the Corporation that the proceeds of such indemnity are needed and are to be used for the purchase of necessities for the insured's wife or minor children or other persons dependent upon him for support.

(3) Definition of disappearance: An insured shall be deemed to have disappeared within the meaning of this section if he leaves the farm covered by the insurance contract and his whereabouts have been unknown for a period of 150 days after the time of loss under such contract.

§ 83 *Fiduciaries.* Any indemnity payable under an insurance contract entered into in the name of a fiduciary who is no longer acting in such capacity at the time for the payment of indemnity will be paid to the succeeding fiduciary upon appropriate application and proof satisfactory to the Corporation of his incumbency. In the event that there is no succeeding fiduciary, payment of indemnity shall be made to the persons beneficially entitled to the interest in the insured crop to the extent of their respective interests upon proper application and proof of the facts: *Provided, however,* That the loss may be adjusted with any one or more of the persons so entitled, and payment may be made to such person or persons in behalf of all the persons so entitled, whether or not the person to whom payment is made has been authorized to receive such payment by the other persons so entitled, and such payment shall constitute a complete discharge of the obligation of the Corporation with respect to the loss for which the indemnity is paid.

§ 84 *Determination of person to whom indemnity shall be paid.* In any case where the insured has died, has become incompetent, has disappeared, or has ceased to act as a fiduciary, payment in accordance with the provisions of these regulations will be made only after the facts have been established to the satisfaction of the Corporation. The determination of the Corporation as to the existence or nonexistence of a circumstance in the event of which payment may be made to a person other than the named insured and of the person to whom such payment shall be made shall be final and conclusive. Payment of any indemnity in accordance with an adjustment made with such person shall constitute a complete discharge of the Corporation's obligation with respect to the loss for which such indemnity is paid and shall be a bar to recovery by any other person.

§ 85 *Payment conditioned upon compliance with provisions of the insurance contract.* Payment of any indemnity, whether to the applicant or any other person determined by the Corporation to be entitled to such indemnity in accordance with the provisions of these regulations, will be made only upon full compliance with all the provisions of the contract, including the warranties and provisions relating to notice and proof of loss.

§ 86 *Limitation on transfer*—(a) *General.* Except as is otherwise provided in these regulations, neither the insurance contract nor any claim for indemnity thereunder, or any part or share thereof, or any interest therein, shall be transferable, nor shall any pledge of the contract be recognized. Notwithstanding any assignment, power of attorney, order, or other authority for receiving payment of any claim for indemnity under the insurance contract, any indemnity payable shall be made only to persons entitled to the benefit of the insurance contract as provided in the application and these regulations. The Corporation shall in no case be bound to accept notice of any assignment of the insurance contract, and nothing therein contained shall give any right against the Corporation to any person other than the insured except to an assignee approved by the Corporation.

(b) Assignment to secure loans and amounts due under lease, purchase, mortgage, or trust agreement: An insurance contract may be assigned as collateral security for a loan, the amount of the current year's rental due under a leasing agreement with respect to the farm upon which the insured crop is or will be seeded, or the amount of the current annual installment due under a purchase, mortgage, or trust agreement with respect to the farm upon which the insured crop is or will be seeded and an additional amount of any delinquency which may be due under the purchase, mortgage, or trust agreement of not to exceed the amount of the current annual installment including interest and taxes. Such assignment shall be made by the execution of a form prescribed by the Corporation, and, upon approval thereof by the Corporation as evidenced by the signature of the Manager and the countersignature of a duly authorized representative of the Corporation, the interests of the assignee will be recognized in the event of the payment of indemnity under the insurance contract to the extent of the unpaid balance of the amount (including interest and other charges) for which such assignment was made as collateral security: *Provided, however,* That (1) where any person has paid the premium for any insurance contract by an advance from the Secretary, any indemnity payable under any insurance contract of such person shall be subject to deduction for payment to the Secretary for the amount advanced which is owing at the time the indemnity is payable under any such contract; (2) the Corporation, in payment of the indemnity, may issue a check payable jointly to all persons entitled thereto and that such payment shall constitute a complete discharge of the Corporation's obligation with respect to such loss under the insurance contract; and (3) payment of any indemnity will be subject to all conditions and provisions of the insurance contract. The Corporation's approval of an assignment shall not create in the assignee any right other than that derived from the assignor. Only one such assignment will be recognized in connection with the insurance contract.

(c) Assignment of the insurance contract with transfer of the crop: An insurance contract may be assigned before the time of loss with the approval of the Corporation only in connection with the voluntary transfer by the insured of all or part of his interest in the entire insured crop before the crop is harvested. Such assignment shall be made by the execution of a form prescribed by the Corporation. The approval of such assignment by the Corporation shall be evidenced by the signature of the Manager and the countersignature of a duly authorized representative of the Corporation upon such form. The Corporation shall in no case be bound to accept notice of any assignment of the insurance contract, and nothing herein contained shall give any right against the Corporation to any person other than the insured, except to an assignee approved by the Corporation. A transfer made in order to forestall loss of the property covered by the insurance contract by operation of law shall not be regarded as a voluntary transfer within the meaning of these regulations.

§ 87 *Creditors.* An interest existing by virtue of a debt, lien, mortgage, garnishment, levy, execution, bankruptcy, or any other legal process shall not be considered an interest in an insured crop within the meaning of these regulations.

Any indemnity payable under an insurance contract shall be paid to the insured, or to such other person as may be entitled to the benefits of the insurance contract under the provisions of these regulations, notwithstanding any attachment, garnishment, receivership, trustee process, judgment, levy, execution, lien, mortgage, foreclosure, order, decree, or similar process of law, equity, or bankruptcy directed against the insured or such other person, or against any indemnity alleged to be due to such person, nor shall the Corporation or any officer, employee, or representative thereof be a proper party to any suit or action with reference to such indemnity or the proceeds thereof nor be bound by any judgment, order, or decree rendered or entered therein. No officer, agent, or employee of the Corporation shall pay, or cause to be paid, to any person other than the insured or other person entitled to the benefits of the insurance contract, any indemnity payable in accordance with the provisions of the insurance contract because of any such process, order, or decree. Nothing herein contained shall excuse any person entitled to the benefits of the insurance contract from full compliance with, or performance of, any lawful judgment, order, or decree with respect to the disposition of any sums paid thereunder as an indemnity.

PART IX—ADVANCES BY THE SECRETARY

§ 90. *Payment of premium by means of advances.* Premiums may be paid by means of advances from the Secretary under the provisions of "An Act to amend section 12 of the Soil Conservation and Domestic Allotment Act, as amended, by authorizing advances for crop insurance," approved March 25, 1939. The cash equivalent of any such premium shall be determined in the manner provided for in Part III of these regulations and the date for the determination of such cash equivalent shall be the date upon which the request for such advance is made. Requests for advances from the Secretary for the payment of premiums on behalf of applicants participating or agreeing to participate in the 1940 Agricultural Conservation Program shall be made at the time the application is submitted to the Corporation.

§ 91 *Refund of payments made by means of advances.* Refund of any payment made to the Corporation by means of an advance by the Secretary shall be made to the Secretary, unless, (1) the Secretary has recovered the entire amount advanced, in which case the refund will be made to the insured, or (2) the Secretary has recovered a portion of the advance, in which case the amount of the refund necessary to reimburse the Secretary for the unrecovered amount advanced will be made to the Secretary and the remainder to the insured. The amount of any such refund shall be determined in the manner provided in Part IV of these regulations.

§ 92 *Deductions from indemnities to reimburse Secretary.* The Corporation may deduct and pay to the Secretary, from the indemnity payable under any insurance contract to a person who has secured an advance from the Secretary for payment of the premium on any such contract, the amount necessary in order that the Secretary may be reimbursed for the entire amount advanced.

PART X—MISCELLANEOUS

§ 100 *Gender and plural meaning of terms.* Any term used in the masculine or in the singular shall also be construed or applied in the feminine or neuter gender, or in the plural person, wherever the context or application of such term so requires.

§ 101 *Fractional units in acres and yields.* Fractions of yields per acre, loss costs, and premium rates shall be rounded to the nearest tenth of a bushel. Fractions of bushels, other than yields per acre, loss costs and premium rates, shall be rounded to the nearest bushel. Fractions of acres representing total acres of wheat shall be rounded to the nearest tenth of an acre. Fractions representing five one-hundredths or less shall be dropped, and fractions representing more than five one-hundredths shall be considered as a whole tenth.

§ 102 *Other insurance.* If the insured has or acquires any other "all-risk" insurance against substantially all the risks that are insured against under the insurance contract on the crop or portion thereof covered in whole or in part by such insurance contract, whether valid or not, or whether collectible or not, the liability of the Corporation shall not be greater than its share would be if the amount of its obligation were divided equally between the Corporation and such other insurer or insurers.

§ 103 *Subrogation.* The Corporation may require from the insured an assignment of all rights of recovery against any party for loss or damage to the extent that payment therefor is made by the Corporation, and the insured shall execute all papers required and shall do everything that may be necessary to secure such rights.

§ 104 *Suit.* No suit or action shall be brought to enforce any claim for loss under the insurance contract unless all the requirements of such contract shall have been complied with.

§ 105 *Restriction on purchase and sale of wheat.* Insofar as practicable, the Corporation shall purchase wheat only at the rate and to a total amount equal to the payment of premiums in cash by farmers or to replace promptly wheat sold to prevent deterioration; and shall sell wheat only to the extent necessary to cover payments of indemnities and to prevent deterioration: *Provided, however,* That nothing in this section shall prevent prompt offset purchases and sales of wheat for convenience in handling.

§ 106 *Review of determinations of county committees.* All determinations by county committees shall be subject to review and approval or revision by

duly authorized representatives of the Corporation.

Adopted by the Board of Directors on June 2, 1939.

[SEAL] M. L. WILSON,
*Chairman.*

Approved, June 30, 1939.

H. A. WALLACE,
*Secretary of Agriculture.*

## TITLE 9—ANIMALS AND ANIMAL PRODUCTS

### BUREAU OF ANIMAL INDUSTRY

[Amendment 2 to BAI Order 370[1]]

SUBCHAPTER D—EXPORTATION AND IMPORTATION OF ANIMALS AND ANIMAL PRODUCTS

PART 94—RINDERPEST AND FOOT-AND-MOUTH DISEASE; PROHIBITED AND RESTRICTED IMPORTATIONS

JUNE 30, 1939.

§ 94.1 *Existence of rinderpest or foot-and-mouth disease; importations prohibited*—(a) *Domestic ruminants and swine and fresh meats derived therefrom.* Under authority conferred upon the Secretary of Agriculture by Section 306 of the Tariff Act of 1930, the order to prevent the introduction into the United States of rinderpest or foot-and-mouth disease (BAI Order 370[2]), dated May 31, 1939, and effective June 16, 1939, as amended, is hereby further amended by striking out the name "Lithuania" from the list of countries in Section 94.1 (a) of said order, inasmuch as I have determined that neither foot-and-mouth disease nor rinderpest now exists in said foreign country of Lithuania, and I have so officially notified the Secretary of the Treasury.

The effect of this amendment is to render commodities specified in BAI Order 370, originating in Lithuania, no longer subject to the provisions of that order.

This amendment, which for purpose of identification is designated Amendment 2 to BAI Order 370 (9 CFR 94.1 (a)), shall be effective on and after July 5, 1939. (Sec. 306, 46 Stat., 689, Sec. 2, 32 Stat. 792, 45 Stat. 59; 19 U.S.C. 1306 (a), (b), and (c), 21 U.S.C. 111) [BAI Order 370, Section 94.1, paragraph (a), as amended by Amendment 1, June 13, 1939 and Amendment 2, June 30, 1939]

Done at Washington this 30th day of June 1939.

Witness my hand and the seal of the Department of Agriculture.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

NOTICE UNDER PACKERS AND STOCKYARDS ACT[1]

JULY 1, 1939.

To MILAN LIVESTOCK SALES CORPORATION, *Spokane, Wash.*

Notice is hereby given that after inquiry, as provided by Section 302 (b) of the Packers and Stockyards Act, 1921 (7 U.S.C. Sec. 202 (b)), it has been ascertained by me as Secretary of Agriculture of the United States that the stockyard known as the Milan Livestock Sales Corporation, at Spokane, State of Washington, is subject to the provisions of said Act.

The attention of stockyard owners, market agencies, dealers, and other persons concerned is directed to Sections 303 and 306 (7 U.S.C. Secs. 203 and 207) and other pertinent provisions of said Act and the rules and regulations issued thereunder by the Secretary of Agriculture.

[SEAL] HARRY L. BROWN,
*Acting Secretary of Agriculture.*

[F. R. Doc. 39-2316; Filed, July 5, 1939; 9:22 a. m.]

## TITLE 10—ARMY: WAR DEPARTMENT

### CHAPTER VII—PERSONNEL

PART 73—APPOINTMENT OF COMMISSIONED OFFICERS AND CHAPLAINS[1]

*Appointment of Second Lieutenants, Regular Army, From Honor Graduates of Senior Reserve Officers' Training Corps Units*

§ 73.52 *Authority.* Under the provisions of Section 24e, National Defense Act, as amended by Section 7 of the Act approved April 3, 1939, selection of members of Group 3 (honor graduates) for appointment as second lieutenant in the Regular Army will be made as indicated herein. (41 Stat. 774; 10 U.S.C. 484, amended by sec. 7, Act April 3, 1939) [Par. 1b, AR 605-7, April 26, 1939]

§ 73.53 *Apportionment of appointments.* The number of second lieutenants to be appointed in the Regular Army annually from Group 3 will be determined by the Secretary of War. These appointments will be divided among corps areas in proportion to the number of second year advanced senior Reserve Officers' Training Corps students of institutions, other than medical, within the continental United States which offer a college degree upon satisfactory completion of four years' college work. Appointments from Group 3 will be made only in the arms other than the Air Corps. (41 Stat. 774; 10 U.S.C. 484, amended by sec. 7, Act April 3, 1939) [Par. 2, AR 605-7, April 26, 1939]

§ 73.54 *Eligibility for appointment.* (a) In order to be eligible for appointment a candidate must be at the time of appointment—

(1) A male citizen of the United States;

(2) Between the ages of 21 and 30 years;

(3) Single, and never previously married.

(b) Appointments will be confined to honor graduates in the senior Reserve Officers' Training Corps division of institutions, other than medical, within the continental United States which offer a college degree upon satisfactory completion of four years' college work except as indicated in (c) below. The term "honor graduate" will apply to graduates of the institution in the current academic year (except as indicated in (d) below) who are graduates of the Reserve Officers' Training Corps, citizens of the United States, who have been selected by the president of the institution for scholastic excellence and who have been designated as honor graduates by the professors of military science and tactics as possessing outstanding qualities of leadership, character, and aptitude for military service.

(c) Appointments from Group 3 also may be made from honor Reserve Officers' Training Corps graduates of Class MI institutions (see Sec. 62.05, par. (a)), provided:

(1) That in this case the term "honor graduate" will apply to graduates of such institutions who hold either a commission or a certificate of appointment in the Officers' Reserve Corps, citizens of the United States, who have been selected by the president for scholastic excellence, and who have been designated as honor graduates by the professors of military science and tactics as possessing outstanding qualities of leadership, character, and aptitude for military service.

(2) Further, that they will graduate in the current academic year (except as indicated in (d) below) from an institution which offers a college degree upon satisfactory completion of four years' college work, and that they have been selected by the president of the institution as honor graduates for scholastic excellence.

(d) In order to be eligible for consideration for selection for appointment in the Regular Army, honor graduates must attain the age of 21 years on or before the date designated by the War Department for appointments to be made in the Regular Army. Honor graduates who are ineligible for appointment in the Regular Army in the year in which they graduate in honor status because they were under the prescribed age will be permitted to compete for appointments in the Regular Army with honor graduates in the first year subsequent thereto in which they attain the prescribed age. (41 Stat. 774; 10 U.S.C. 484, amended by sec. 7, Act April 3, 1939) [Par. 3, AR 605-7, April 26, 1939, amended by C 1, June 16, 1939]

§ 73.55 *Application.* (a) Candidates will make application on WD, AGO Form No. 62 at the earliest practicable date for the examinations to be held in the fiscal year 1939 and not later than December 1 for examinations to be held annually thereafter.

(b) Candidates who are students in institutions which have senior Reserve Officers' Training Corps units will submit their applications with a photograph not less than 3 by 5 inches in size to the professors of military science and tactics.

(c) Candidates who are students in institutions which do not have senior Reserve Officers' Training Corps units will submit their application to the commander of the corps area in which their institution is located, inclosing a photograph not less than 3 by 5 inches in size and conclusive evidence that they are honor Reserve Officers' Training Corps graduates of a class MI institution, or were so designated under regulations pertinent at the time of graduation from the class MI institution, and that they have been designated as probable honor graduates of an institution which offers a college degree upon satisfactory completion of four years' college work by the president thereof. The corps area commander will notify the applicant whether or not he is authorized to appear before the board and if so authorized, where and when he will report, at his own expense, for examination by the board. The corps area commander's decision in this matter will be final. (41 Stat. 774; 10 U.S.C. 484, amended by sec. 7, Act April 3, 1939) [Par. 4, AR 605-7, April 26, 1939]

§ 73.56 *Method of selection.* (a) A board of Regular Army officers consisting of not less than two line officers and one medical officer will be appointed annually by each corps area commander to examine the candidates and recommend selections for appointment therefrom to fill the corps area allotment. These boards will visit each institution which has eligible candidates in their respective corps areas without delay during the fiscal year 1939, and during the month of February annually thereafter, for the purpose of examining all eligible applicants.

(b) The professors of military science and tactics of each institution concerned, after consultation with the president of the institution, will designate annually the probable honor graduates in the senior Reserve Officers' Training Corps unit for the current school year, and will submit to their respective corps area commanders without delay for the fiscal year 1939, and not later than January 1 annually thereafter, the written applications of the candidates (see sec. 73.55), photographs and fitness reports.

(c) Members of the Reserve Officers' Training Corps who attend a summer training camp just prior to the beginning of their senior year will be given a thorough physical examination during the summer camp period. Professors of military science and tactics will obtain a copy of these reports of physical examination of honor graduates and will forward these reports to corps area commanders.

(d) Upon arrival of the board at each school, all candidates authorized to appear before the board who desire to apply for appointment in the Regular Army will be requested to report to the board for examination. The examination will consist of study of the records submitted to the board by the professors of military science and tactics of the institution and of any other records necessary to determine whether or not the applicants comply with all legal requirements for appointment as commissioned officers in the Regular Army and a physical and oral examination of each candidate. The candidates will be given an opportunity to express to the board their preference as to the arm, other than the Air Corps, in which they desire to be assigned but will be informed by the board that final assignment to arms will be determined by the War Department. They also will be informed by the board that actual appointment is subject to appropriations of the necessary funds by Congress, and to meeting the requirements of a final physical examination prior to appointment.

(e) The War Department board will recommend a number of alternates in order of priority for each corps area similar to the number to be appointed therefrom.

(f) (1) Corps area commanders will be notified by The Adjutant General of the candidates selected for appointment and will arrange for the final physical examinations. Corps area commanders will notify the candidates concerned that they have been selected for appointment in the Regular Army, subject to passing satisfactorily a final physical examination, and the place and time to report, at their own expense, for this physical examination.

(2) In case any of the candidates decline to take the final physical examination, or fail to pass it satisfactorily, additional candidates will be designated by the War Department from alternates from the corps area concerned in order of priority indicated in paragraph (e) above, and their examination will be carried out in the same manner as described above.

(g) Candidates selected by the War Department who pass satisfactorily the final physical examination will be tendered appointments as second lieutenants, Regular Army, in the arms designated by the War Department. In case any of these decline appointment, the appointment will be tendered to the next qualified alternate in order of priority indicated in paragraph (e) above, from the corps area in which the original appointee was selected. (41 Stat. 774; 10 U.S.C. 484, amended by sec. 7, Act April 3, 1939) [Par. 5, AR 605-7, April 26, 1939]

[SEAL] E. S. ADAMS,
*Major General,*
*The Adjutant General.*

## TITLE 16—COMMERCIAL PRACTICES

### FEDERAL TRADE COMMISSION

[Docket No. 3228]

IN THE MATTER OF PATTERSON SCHOOL

§ 3.6 (a) (9a) *Advertising falsely or misleadingly—Business status, advantages or connections of advertiser—Government connection:* § 3.6 (j) (1) *Advertising falsely or misleadingly—Government approval or connection—Civil Service Commission connections:* § 3.6 (m) *Advertising falsely or misleadingly—Jobs and employment service.* Representing, in connection with offer, etc., in interstate commerce or in District of Columbia, of correspondence courses of study and instruction for Civil Service positions, that such positions are at the disposal of respondents, or that respondents can in any manner control appointments to such positions, or can assist applicants for such positions in any manner other than by preparing them to take Civil Service examinations, or that respondents have any information pertaining to examinations for such positions other than, or in advance of, regular official notices, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, Patterson School, Docket 3228, June 23, 1939]

§ 3.6 (a) (9a) *Advertising falsely or misleadingly—Business status, advantages or connections of advertiser—Government connection:* § 3.6 (m) *Advertising falsely or misleadingly—Jobs and employment service.* Representing, in connection with offer, etc., in interstate commerce or in District of Columbia, of correspondence courses of study and instruction for Civil Service positions, that jobs are available at all times, or, through use of "Help Wanted" columns in newspapers and similar devices, that United States Government jobs are open and that men and women may secure such jobs through respondents' school, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, Patterson School, Docket 3228, June 23, 1939]

§ 3.6 (w) *Advertising falsely or misleadingly—Refunds:* § 3.72 (i) *Offering deceptive inducements to purchase—Money back guarantee.* Representing, in connection with offer, etc., in interstate commerce or in District of Columbia, of correspondence courses of study and instruction for Civil Service positions, that,

under the money-back agreement, the purchase price for the course of instruction will be refunded, unless and until all of the conditions under which said refunds are made are clearly and fully set forth, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, Patterson School, Docket 3228, June 23, 1939]

§ 3.6 (a) (20) *Advertising falsely or misleadingly—Business status, advantages or connections of advertiser—Personnel.* Representing, in connection with offer, etc., in interstate commerce or in District of Columbia, of correspondence courses of study and instruction for Civil Service positions, that respondent Patterson is a Civil Service expert or has 33 years' Civil Service experience, or has any special knowledge qualifying him as an expert in preparing students for Civil Service examinations, or has acquired any special knowledge with respect to such examinations because of his former employment on a local board of the United States Civil Service Commission, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, Patterson School, Docket 3228, June 23, 1939]

*United States of America—Before Federal Trade Commission*

At a regular session of the Federal Trade Commission, held at its office in the City of Washington, D. C., on the 23rd day of June, A. D. 1939.

Commissioners: Robert E. Freer, Chairman; Garland S. Ferguson, Charles H. March, Ewin L. Davis, William A. Ayres.

IN THE MATTER OF ARTHUR R. PATTERSON, ALBERT C. KEHR, ARTHUR W. EDSON, EVA O. BROWN, AND MINNETHA COE, INDIVIDUALLY, AND DOING BUSINESS UNDER THE NAME AND STYLE OF PATTERSON SCHOOL

ORDER TO CEASE AND DESIST

This proceeding having been heard [1] by the Federal Trade Commission upon the complaint of the Commission, the answer of respondents, testimony and other evidence taken before William C. Reeves, an examiner of the Commission theretofore duly designated by it, in support of the allegations of said complaint and in opposition thereto, briefs filed herein, and oral arguments by William L. Pencke, counsel for the Commission, and by Nelson E. Spencer, counsel for the respondents, and the Commission having made its findings as to the facts and its conclusion that said respondents have violated the provisions of the Federal Trade Commission Act;

*It is ordered*, That the respondents, Arthur R. Patterson, Albert C. Kehr, Arthur W. Edson, Eva O. Brown, and Minnetha Coe, individually, and doing business under the name and style of Patterson School, their representatives, agents, and employees, directly, or through any corporate or other device, in connection with the offering for sale, sale and distribution of correspondence courses of study and instruction for Civil Service positions in interstate commerce or in the District of Columbia, do forthwith cease and desist from representing that:

(1) Civil Service positions are at the disposal of respondents; or that they can in any manner control appointments to Civil Service positions;

(2) Respondents can assist applicants for Civil Service positions in any manner other than by preparing them to take Civil Service examinations;

(3) Respondents have any information pertaining to examinations for Civil Service positions other than, or in advance of, regular official notices;

(4) Jobs are available at all times; or, through the use of "Help Wanted" columns in newspapers and similar devices, that United States Government jobs are open and that men and women may secure such jobs through respondents' school;

(5) Under the money-back agreement the purchase price for the course of instruction will be refunded, unless and until all of the conditions under which said refunds are made are clearly and fully set forth;

(6) Respondent Patterson is a Civil Service expert or has 33 years' Civil Service experience, or has any special knowledge qualifying him as an expert in preparing students for Civil Service examinations;

(7) Respondent Patterson has acquired any special knowledge with respect to Civil Service examinations because of his former employment on a local board of the United States Civil Service Commission.

*It is further ordered*, That the respondents shall, within sixty days after service upon them of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which they have complied with this order.

By the Commission.

[SEAL] OTIS B. JOHNSON, *Secretary.*

[F. R. Doc. 39-2302; Filed, July 1, 1939; 9:42 a. m.]

[Docket No. 3437]

IN THE MATTER OF KING CANDY COMPANY

§ 3.99 (b) *Using or selling lottery devices—In merchandising.* Selling, etc., in connection with offer, etc., in commerce, of candy or any other merchandise, candy or any other merchandise so packed and assembled that sales of such candy or other merchandise to the general public are to be made or may be made by means of a lottery, etc., prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, King Candy Company, Docket 3437, June 26, 1939]

§ 3.99 (b) *Using or selling lottery devices—In merchandising.* Supplying, etc., in connection with offer, etc., in commerce, of candy or any other merchandise, others with assortments of candy or other merchandise together with push or pull cards, punch boards or other lottery devices, which said push or pull cards, etc., are to be used or may be used in selling or distributing such candy or other merchandise to the general public, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, King Candy Company, Docket 3437, June 26, 1939]

§ 3.99 (b) *Using or selling lottery devices—In merchandising.* Supplying, etc., in connection with offer, etc., in commerce, of candy or any other merchandise, others with assortments of candy or other merchandise together with push or pull cards, punch boards or other lottery devices, which said push or pull cards, etc., are to be used or may be used in selling or distributing such candy or other merchandise to the general public, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, King Candy Company, Docket 3437, June 26, 1939]

§ 3.99 (b) *Using or selling lottery devices—In merchandising.* Selling etc., in connection with offer, etc., in commerce, of candy or any other merchandise, any merchandise by means of a game of chance, gift enterprise or lottery scheme, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, King Candy Company, Docket 3437, June 26, 1939]

*United States of America—Before Federal Trade Commission*

At a regular session of the Federal Trade Commission, held at its office in the City of Washington, D. C., on the 26th day of June, A. D. 1939.

Commissioners: Robert E. Freer, Chairman; Garland S. Ferguson, Charles H. March, Ewin L. Davis, William A. Ayres.

ORDER TO CEASE AND DESIST

This proceeding having been heard [1] by the Federal Trade Commission upon the complaint of the Commission (respondent having filed no answer), testimony and other evidence taken before Arthur F. Thomas, an examiner of the Commission theretofore duly designated by it, in support of the allegations of said complaint, brief filed herein by counsel for the Commission (respondent having offered no proof, filed no brief, and oral argument not having been requested), and the Commission having made its findings as to the facts and its conclusion that said respondent has violated the provisions of the Federal Trade Commission Act;

*It is ordered*, That the respondent King Candy Company, a corporation, its officers, agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, sale and distribution of candy or any other merchandise in commerce, as commerce is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

(1) Selling or distributing candy or any other merchandise so packed and assembled that sales of such candy or other merchandise to the general public are to be made or may be made by means of a lottery, gaming device, or gift enterprise;

(2) Supplying to or placing in the hands of others assortments of candy or other merchandise together with push or pull cards, punch boards, or other lottery devices, which said push or pull cards, punch boards, or other lottery devices are to be used or may be used in selling or distributing such candy or other merchandise to the general public;

(3) Supplying to or placing in the hands of others push or pull cards, punch boards or any other lottery devices, either with assortments of candy or other merchandise or separately, which said push or pull cards, punch boards or other lottery devices are to be used or may be used in selling or distributing such candy or other merchandise to the general public;

(4) Selling or otherwise disposing of any merchandise by means of a game of chance, gift enterprise or lottery scheme.

*It is further ordered*, That the respondent shall, within sixty (60) days after service upon it of this order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with this order.

By the Commission.

[SEAL] OTIS B. JOHNSON, *Secretary.*

## TITLE 19—CUSTOMS DUTIES

### BUREAU OF CUSTOMS

[T. D. 49901]

NOTICE OF ADDITIONAL INFORMATION REQUIRED ON INVOICES OF CERTAIN ARTICLES COMPOSED WHOLLY OR IN CHIEF VALUE OF METAL [1]

*To Collectors of Customs and Others Concerned:*

With reference to article 274 (e) (2) of the Customs Regulations of 1937, as amended by (1938) T.D. 49426, [Sec. 6.1 (c)], invoices of articles composed wholly or in chief value of metal and provided for under items 339 and 397 of the trade agreement with the United Kingdom, (1938) T.D. 49753, are hereby required to set forth in addition to all other information required by law or regulation the following:

(1) The name of the metal which is in chief value;

(2) Whether or not the article is plated;

(3) If the article is plated the name of the metal or metals with which the article is plated and the name of the metal or metals upon which the plating is plated.

This requirement will be effective as to invoices certified after sixty days after publication of this document in the weekly Treasury Decisions. (Sec. 481 (a) (10), 46 Stat. 719; 19 U.S.C. 1481 (a) (10))

[SEAL] J. H. MOYLE, *Commissioner of Customs.*

Approved, June 24, 1939,

STEPHEN B. GIBBONS, *Acting Secretary of the Treasury.*

[F. R. Doc. 39-2291; Filed, June 30, 1939; 3:28 p. m.]

## TITLE 21—FOOD AND DRUGS

### BUREAU OF NARCOTICS

[T. D. 30]

AMENDMENT TO REGULATIONS RELATING TO THE APPEAL TO THE SECRETARY OF THE TREASURY FROM ANY ORDER, RULE OR DECISION OF THE COMMISSIONER OF NARCOTICS; AND THE COOPERATION WITH THE SEVERAL STATES IN THE INSTITUTION AND PROSECUTION OF CASES IN THE COURTS OF THE UNITED STATES AND BEFORE THE LICENSING BOARDS AND COURTS OF THE SEVERAL STATES

JUNE 30, 1939.

Pursuant to the authority contained in Section 5 of the Act of June 14, 1930, as amended, Articles 1 to 7, inclusive, of Narcotic Regulations No. 4 [1] (Sections 930.1 to 930.7, inclusive, of Title 21, Code of Federal Regulations) are hereby amended to read as follows:

ARTICLE 1. *Appeals*—(a) *From decision of Commissioner.* The appeal to the Secretary of the Treasury (hereinafter referred to as the Secretary) from an order, rule, or decision of the Commissioner of Narcotics (hereinafter referred to as the Commissioner) may be initiated by the aggrieved party in the following manner only:

1. He shall file with the Secretary, within 15 days from the date of the order, rule, or decision, a notice in writing of his intention to appeal. At the time of the filing of such notice he shall serve a copy thereof upon the Commissioner.

2. He shall file with the Secretary, within 30 days from the date of such order, rule, or decision, a written petition in the form of a brief as hereinafter provided.

(b) *From failure of Commissioner to rule upon or decide matter.* The appeal to the Secretary from the failure of the Commissioner to rule upon or decide any matter presented to him by proper application may be initiated by the aggrieved party in the following manner only:

1. He shall file with the Secretary, after the lapse of a reasonable time from the date of the presentation of such matter, a notice in writing of his intention to appeal. At the time of the filing of such notice he shall serve a copy thereof upon the Commissioner.

2. He shall file with the Secretary, within 30 days from the date of the filing of such notice, a written petition in the form of a brief as hereinafter provided.

ART. 2. *Suspension of orders.* Pending the presentation of the appeal to the Secretary and his decision thereon, the Secretary may, upon application and for cause shown, suspend the operation of any order, rule, or decision after his receipt of a timely notice of the intention to appeal.

ART. 3. *Briefs*—(a) *Brief of appellant.* The brief filed with the Secretary shall be printed or typewritten and shall set forth clearly the complaint and shall contain numbered statements of the facts and arguments upon which the appellant relies in support thereof. At the time of filing his brief the appellant shall serve a copy thereof upon the Commissioner.

(b) *Brief of the Commissioner.* The Commissioner shall, within 20 days from the date of the filing of the brief of the appellant, file with the Secretary a brief for his side of the case. The brief of the Commissioner shall be so drawn as fully and completely to advise the appellant and the Secretary of the nature of the defense. There shall be included therein, in addition to the arguments of the Commissioner, a specific admission or denial of each material allegation of fact contained in the brief of the appellant, and clear and concise numbered statements of the facts upon which the Commissioner relies in his defense. At the time of filing his brief the Commissioner shall serve a copy thereof upon the appellant.

(c) *Reply.* The appellant may file with the Secretary, within 10 days from the date of the filing of the brief of the Commissioner, a reply brief, a copy of which shall be served upon the Commissioner.

(d) *Further pleadings.* The Secretary, upon motion of either party in which good cause is shown, or upon his own motion, may order a further and better

[1] 3 F.R. 1231 DI.

statement of the nature of the claim or defense, or of any matter stated in any of the briefs. Such a motion filed by a party shall point out the defects complained of and the details desired. If the order of the Secretary is not obeyed within 10 days or within such other time as the Secretary may fix, the Secretary may make such order in view thereof as shall be equitable and just. A copy of any further statement of the nature of the claim or defense filed pursuant to this Article shall be served upon the appellant or Commissioner as the case may be.

ART. 4. *Hearing*—(a) *Before Secretary.* The Secretary will notify the appellant and Commissioner of the time and place where he will conduct the hearing to afford interested parties, their representatives, and witnesses an opportunity to present evidence and argument on the controverted issues. The notification thus served will also advise the parties of the manner in which the hearing before the Secretary shall be conducted.

(b) *Before Examining Board.* If, however, the Secretary deems it essential to a judicious determination of the controverted issues, he may appoint an Examining Board (hereinafter referred to as the Board), which will consist of one or more persons in the employ of the Treasury Department who have not previously considered the subject matter of the appeal, to conduct a hearing to afford interested parties, their representatives, and their witnesses an opportunity to appear and present evidence and arguments. Each member of the Board, within 2 days after his appointment, shall file with the Secretary a statement made under oath that he has not previously considered the subject matter of the appeal. Thereafter the Secretary will notify the respective parties of the appointment of the member or members to the Board.

The hearing before the Board will be conducted in the following manner:

1. The Board shall determine the time and place of the hearing, giving due regard to any request filed by either party within 5 days from the date of his notification of the appointment of the member or members to the Board.

2. A reporter shall be appointed by the Board and shall be present at all sessions of the Board at which a reporter may be necessary. With the exception of oral arguments on questions of law, he shall record, verbatim, the proceedings before the Board and the testimony, if any, taken before it. He may set down the proceedings and testimony, in the first instance, in shorthand.

3. Witnesses shall be sworn or affirmed by a member of the Board.

4. Evidence submitted at the hearing may include testimony of witnesses, real evidence, affidavits, depositions, and documents and records or duly authenticated copies thereof.

5. Either party may object to the introduction of any evidence, and the Board shall rule on such objection, but may, in its discretion, relax the ordinary rules of evidence. If the ruling of the Board is adverse to the objecting party, an exception may be taken thereto. Any exception taken by either party to the ruling of the Board shall be noted in the record at the time it is taken and shall briefly specify the grounds upon which it is made.

6. Depositions may be arranged by either party with the consent of the Board and shall be taken in the manner prescribed by it. Due regard shall be given by the Board to the convenience of the parties and the testimony to be elicited.

7. The Board, for cause shown, may, in its discretion, permit other interested parties to intervene and present additional evidence and argument. However, any written argument shall be received and considered only upon a proper showing that a copy thereof has been served upon the Commissioner and the appellant.

8. Other questions of procedure shall be determined by the Board.

ART. 5. *Findings of law and facts*—(a) *Proposed findings of law and facts by opposing parties.* Before the closing of proof in any appeal referred to a Board, the parties shall have 15 days within which to file with the Board proposed findings of law and facts and arguments in support thereof. At the time of such filing, the respective parties shall serve a copy thereof upon the opposite party. Such proposed findings and arguments shall, upon the filing of the Board's report with the Secretary, be filed with the original record in the case for consideration of the Secretary in connection with any exception by either party and may be referred to by either party in support of any exception to the findings of the Board.

(b) *Oral argument before Board.* The Board shall hear oral arguments on the issues in controversy upon the request of either party and shall notify the parties of the time and place thereof.

(c) *Findings of law and facts by Board.* The Board shall prepare and file with the Secretary its findings of law and facts, recommendations, and a summary of all evidence and argument presented at the hearing. At the same time the Board shall serve a copy thereof upon the respective parties. The Board shall also file with the Secretary the original record, including all evidence presented at the hearing.

(d) *Exceptions.* Each party shall have 10 days from the date of the filing of the Board's findings of law and facts, recommendations, and summary of evidence and argument to file with the Secretary exceptions thereto.

ART. 6. *Decision of Secretary.* The Secretary will consider all matters presented to or filed with him pursuant to the foregoing provisions, and on the basis thereof he will affirm, reverse, or modify the action of the Commissioner, or direct such action to be taken as the Secretary shall deem equitable and just.

ART. 7. *Time*—(a) *Extension or restriction of time.* The Secretary may, in his discretion, for cause shown, extend the foregoing time limits in any case. If the Secretary considers that the public interest so requires, he may, in his discretion, further restrict the time limits upon giving reasonable notice to such parties as he considers to be interested.

(b) *Computation of time.* Whenever these regulations prescribe a time for the performance of any act, Sundays and legal holidays shall count just as any other days, except that when the time prescribed for the performance of an act expires on a Sunday or a legal holiday, such time shall extend to and include the next succeeding day that is not a Sunday or legal holiday.

[SEAL] STEPHEN B. GIBBONS,
*Acting Secretary of the Treasury.*

## TITLE 23—HIGHWAYS

### BUREAU OF PUBLIC ROADS

ORDER AMENDING REGULATIONS FOR ADMINISTERING FOREST ROADS AND TRAILS

The Regulations for Administering Forest Roads and Trails approved March 11, 1922, as amended (Title 23, CFR, Chapter I, Part 15), are amended as follows:

1. Revise subsection (b) of Section 15.1 of the Regulations (designated as Regulation 1, Section 2, prior to the Codification) so that, as revised, the subsection will read as follows:

"(b) (1) *Administration.* Public Roads Administration of the Federal Works Agency.

"(2) *Commissioner.* Commissioner of Public Roads."

2. Revise subsection (a) of Section 15.7 of the Regulations (designated as Regulation 7, Section 1, prior to the Codification) by striking out the following clause, "a lump sum allotment shall be set up by the Forest Service with the district fiscal agent of the Forest Service for disbursement on vouchers approved by authorized officers of the bureau covering," and by inserting in lieu thereof the following clause, "the Secretary shall allot, transfer or otherwise make available for disbursement by the Administration such amounts as may be necessary from time to time to carry out the approved program, covering."

3. Revise subsection (f) of Section 15.7 of the Regulations (designated as Regulation 7, Section 6, prior to the Codification) so that, as revised, the subsection will read as follows:

"(f) Cooperative funds contributed by cooperators shall be deposited in the United States Treasury to the credit of the 'Forest Service Cooperative Fund', authorized by the Act of June 30, 1914 (16 U.S.C., Sec. 498), which deposits will be made available for expenditure by the agency concerned from the appropriation 'Cooperative Work, Forest Service, Trust Fund' (Act of June 26, 1934, 31 U.S.C., Sec. 725s), and shall be audited, disbursed, and recorded in the same manner as funds under the Federal Highway Act. Cooperative expenditures made by cooperators shall be audited and disbursed as provided in the cooperative agreement."

4. Strike out the word "Bureau" and the words "Bureau of Public Roads" wherever they appear in the Regulations and insert in lieu thereof the word "Administration".

5. Strike out the words "Chief of Bureau", "Chief of the Bureau", and "Chief of the Bureau of Public Roads" wherever they appear in the Regulations and insert in lieu thereof the word "Commissioner".

6. Strike out the word "Forester" wherever it appears in the Regulations and insert in lieu thereof the words "Chief of the Forest Service".

7. Strike out the words "district forester" wherever they appear in the Regulations and insert in lieu thereof the words "Regional Forester".

These amendments shall become effective on June 30, 1939.

Done at Washington, D. C., this 30th day of June 1939. Witness my hand and the seal of the Department of Agriculture.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

[F. R. Doc. 39-2318; Filed, July 5, 1939; 9:22 a. m.]

## TITLE 24—HOUSING CREDIT

### FEDERAL HOME LOAN BANK BOARD

AMENDMENT TO RULES AND REGULATIONS FOR THE FEDERAL HOME LOAN BANK SYSTEM

PERMITTING UNAMORTIZED SHORT-TERM ADVANCES TO MEMBERS

*Be it resolved*, That the first sentence of paragraph a of Section 5.2 and the first sentence of Section 5.3 of the Rules and Regulations for the Federal Home Loan Bank System are hereby amended, effective July 1, 1939, by striking the period at the end thereof and adding a comma and the following:

"except that advances for periods not exceeding one year need not be amortized."

(Sec. 10 (a) of F.H.L.B.A., 47 Stat. 731, as amended by Sec. 501, 48 Stat. 1261, as amended by Sec. 5, 49 Stat. 294; 12 U.S.C. 1430 (a) and Sup.; Sec. 10 (c) of F.H.L.B.A., 47 Stat. 732; 12 U.S.C. 1430 (c); Sec. 10 (d) of F.H.L.B.A., 47 Stat. 732; 12 U.S.C. 1430 (d); Sec. 17 of F.H.L.B.A., 47 Stat. 736; 12 U.S.C. 1437)

Adopted by the Federal Home Loan Bank Board on June 30, 1939.

[SEAL] R. L. NAGLE,
*Secretary.*

[F. R. Doc. 39-2285; Filed, June 30, 1939; 1:09 p. m.]

### HOME OWNERS' LOAN CORPORATION

[Administrative Order No. 298]

PART 402—LOAN SERVICE

PAYMENT OF TAXES UNDER SPECIAL DEPOSITS AGREEMENTS

Amending Part 402 of Chapter IV, Title 24 of the Code of Federal Regulations.

The paragraph identified as paragraph (c) and the two paragraphs following immediately thereafter of Section 402.03–65, are amended to read as follows:

(c) All such items becoming payable on properties securing obligations held by the Corporation or sold under sales instruments by the Corporation where the home owner has Special Deposits Agreement Form 533 in effect, and the tax statements or other information for the items to be paid have been received by the Corporation.

The Regional Manager with the advice of the Regional Counsel and the Assistant Regional Manager in Charge of Loan Service shall determine whether a form letter shall be sent requesting the home owner to obtain tax statements or other information and forward to the Corporation for payment, or, the Corporation should request taxing authorities to forward the tax statements or other information direct to the Corporation for payment. Consideration should be given to local usage and the necessity, if any, of having tax statements reviewed by the home owner before payment. When such form letters are used, they should be prepared by the Tax Section and forwarded to the home owner through the Control Section.

At the time of payment of such items, in the event the balance in the Special Deposits Account for any home owner with the agreement of Special Deposits, Form 533, in effect, is insufficient to provide for the payment of all items, then payable, the Regional Manager shall direct the payment of such items and an advance for the account of the home owner to the extent that the balance in the Special Deposits Account may be deficient.

(Effective July 1, 1939)

(Above procedure promulgated by General Manager and General Counsel pursuant to authority vested in them by the Federal Home Loan Bank Board acting pursuant to Secs. 4 (a), 4 (k) of Home Owners' Loan Act of 1933, 48 Stat. 129, 132, as amended by Section 13 of the Act of April 27, 1934, 48 Stat. 647; 12 U.S.C. 1463 (a) (k)).

Promulgated by the General Manager and General Counsel of Home Owners' Loan Corporation.

[SEAL] R. L. NAGLE,
*Secretary.*

[F. R. Doc. 39-2286; Filed, June 30, 1939; 1:09 p. m.]

PART 410—PURCHASE AND SUPPLY

PAYMENT OF PHOTOGRAPHIC EXPENSE

Amending Part 410 of Chapter IV, Title 24 of the Code of Federal Regulations.

Section 410.04 is amended to read as follows:

§ 410.04 Expense incurred by salaried employees in obtaining photographs of property for the Corporation may be paid and charged to the proper account.

(Effective July 15, 1939.)

(Secs. 4 (a), 4 (k) of Home Owners' Loan Act of 1933, 48 Stat. 129, 132 as amended by Section 13 of the Act of April 27, 1934, 48 Stat. 647; 12 U.S.C. 1463 (a), (k).)

Adopted by the Federal Home Loan Bank Board on June 26, 1939.

[SEAL] R. L. NAGLE,
*Secretary.*

[F. R. Doc. 39-2284; Filed, June 30, 1939; 1:09 p. m.]

521.36 Dwelling unit located on property.
521.37 Standards for buildings.
521.38 Location of property.
521.39 Effective date.

APPROVAL OF MORTGAGEES

§ 521.1 *Governmental institutions approved as mortgagees.* The following institutions are hereby approved as mortgagees under section 203 (b) of the National Housing Act:

(a) National Mortgage Associations,
(b) Federal Reserve Banks,
(c) Federal Home Loan Banks,
(d) Reconstruction Finance Corporation,
(e) RFC Mortgage Company, and
(f) any other Federal, State, or municipal governmental agency that is or may hereafter be empowered to hold mortgages insured under Title II of the National Housing Act as security or as collateral or for any other purpose.*†

§ 521.2 *Federal Reserve members, etc.* Members of the Federal Reserve System, institutions whose accounts are insured by the Federal Savings & Loan Insurance Corporation and institutions whose deposits are insured by the Federal Deposit Insurance Corporation may be approved as mortgagees upon application.*†

§ 521.3 *Charitable or nonprofit organizations.* Any charitable or nonprofit organization which presents evidence that it is responsible, has permanent funds of not less than one hundred thousand dollars ($100,000), and has experience in mortgage investment, may be approved upon application.*†

§ 521.4 *Approval of other institutions.* Any other institution not hereinbefore mentioned may be approved as a mortgagee upon application if it has the following qualifications and meets the following conditions to the satisfaction of the Administrator:

(a) it is a chartered institution or other permanent organization having succession;

(b) it is subject to the inspection and supervision of a governmental agency which is required by law to make periodic examinations of its books and accounts and it submits satisfactory evidence that it has sound capital funds of a value of not less than $25,000 (or if a mutual company or association without capital funds, it has a net worth of not less than $25,000); or

if not subject to such inspection and supervision of a governmental agency, it shall submit an independent detailed audit of its books made by an accountant satisfactory to the Administrator and reflecting a condition satisfactory to him, and also, so long as its approval as mortgagee continues, shall file with the Administrator similar audits at least once in each calendar year and submit at any time to such examination of its books and affairs as the Administrator may require, and comply with any other conditions that the Administrator may impose;

(c) its principal activity is lending on or investing in mortgages, funds which are under its own control; and it has sound capital funds properly proportioned to its liabilities and to the character and extent of its operations. Such funds shall be of a value of not less than $100,000. It is provided that the qualification and condition contained in the preceding sentence shall not apply—

(1) to an institution or other permanent organization of the character described in the first division of paragraph (b) above; or

(2) to an institution or other permanent organization that establishes to the satisfaction of the Administrator that it is a duly authorized loan correspondent of, and whose approval is requested by, an approved mortgagee or assignee which lends on, or invests in, mortgages on a national scale and is subject to the inspection and supervision of a governmental agency, on the condition that the termination of its relationship as such correspondent will be cause (subject to the provisions of section 521.6) for withdrawal of its approval as an approved mortgagee and on the further condition that the correspondent institution and the institution for which it is authorized to act shall agree to notify promptly the Administrator of the termination of such relationship, and on the further condition that the correspondent institution shall agree to originate insured mortgage loans for the purpose of sale only to the institution or institutions which requested its approval or to some other institution for which it regularly acts as mortgage loan correspondent under written agreement which has been submitted to and approved by the Administrator; and

(d) if it is not an institution or other permanent organization of the character described in the first division of paragraph (b) above, it shall submit an agreement in writing: (1) that so long as it continues to be approved as a mortgagee, it will not issue any mortgage participating certificates on which it assumes personal liability, or issue any guaranty with respect to principal or interest of any mortgage, except that any such obligations outstanding on the date of the application of such institution may thereafter be renewed; and (2) that it will segregate all monthly payments under mortgages insured by the Administrator, received by it on account of ground rents, taxes, assessments, and insurance premiums, and will deposit such funds in a special account, or accounts, with some banking institution whose accounts are insured by the Federal Deposit Insurance Corporation and shall use such funds for no purpose other than that for which they were received.*†

§ 521.5 *Approval of fiduciary investments.* Approval as a mortgagee under sections 521.1–521.8, of a banking institution or trust company which is subject to the inspection and supervision of a governmental agency, shall be deemed to constitute approval of such institution or company when lawfully acting in a fiduciary capacity in investing fiduciary funds which are under its individual or joint control. Upon termination of such fiduciary relationship, whether by revocation or otherwise, any insured mortgages held in the fiduciary estate shall be transferred to a mortgagee approved under this or the succeeding section and the fiduciary relationship must be such as to permit such transfer.

Nothing in sections 521.1–521.8 shall be construed to permit the sale to the general public of instruments representing the beneficial interest in all or part of one or more insured mortgages.*†

§ 521.6 *Approval may be withdrawn.* Approval of an institution as a mortgagee may be withdrawn at any time by notice from the Administrator. In the discretion of the Administrator, the transfer of an insured mortgage to a mortgagee not approved to act under sections 521.1–521.11, or the failure of a mortgagee not subject to the inspection and supervision of a governmental agency, to segregate all funds received from mortgagors on account of ground rents, taxes, assessments and insurance premiums, and to deposit such funds in a special account, or accounts, with some banking institution whose accounts are insured by the Federal Deposit Insurance Corporation, or the use of such funds for any purpose other than that for which they were received, or the failure of a mortgagee to conduct its business on the plan indicated by its application for approval, or the termination of its supervision by a governmental agency will be cause for withdrawal of approval. Withdrawal of approval will in no case affect the insurance on mortgages theretofore accepted for insurance.*†

§ 521.7 *Financial statements to be furnished.* All approved mortgagees shall at any time upon request furnish the Administrator with a copy of their latest periodic financial statement or report.*†

§ 521.8 *Proper servicing of mortgages.*—All approved mortgagees are required to service insured loans in accordance with acceptable mortgage practices of prudent lending institutions. In the event of default, the mortgagee should be able to contact the mortgagor and otherwise exercise diligence in collecting the amounts due. The holder of the mortgage is responsible to the Administrator for proper servicing, even though the actual servicing may be performed by an agent of such holder.*†

APPROVAL OF ACCEPTABLE ASSIGNEES

§ 521.9 *Requisites for approval as assignee.* The Administrator will upon application approve a chartered institution or other permanent organization as an acceptable assignee if such institution or organization meets the following conditions to the satisfaction of the Administrator:

(a) It is a corporation or other permanent organization having succession;
(b) It has sound capital funds of not less than $100,000;
(c) It is subject to the inspection and supervision of a governmental agency;
(d) Its investments in mortgage loans are intended for its own portfolio; and
(e) Its facilities are such that it will be able properly to service mortgages held by it.*†

§ 521.10 *Acquisition of insured mortgages.* Such an acceptable assignee shall be entitled to acquire insured mortgages from approved mortgagees by assignment after the execution and insurance of such mortgages, and to hold such mortgages without invalidating the insurance thereof, and to service them while so held. An acceptable assignee is not authorized to initiate insured mortgage loans originally or to apply for the insurance of mortgages under Section 203 (a) of the National Housing Act; but shall in all other respects be considered as included in the term "mortgagee" as used in these Administrative rules in this part and the regulations of the Federal Housing Administrator in part 522.*†

§ 521.11 *Withdrawal of approval.* Approval of an institution as an acceptable assignee may be withdrawn at any time by notice from the Administrator. Except in individual cases, approved by the Administrator, transfer of an insured mortgage to a mortgagee not approved to act under sections 521.1–521.11 will be cause for withdrawal of approval. Withdrawal of approval will in no case affect the insurance on mortgages theretofore accepted for insurance.*†

APPLICATION AND COMMITTMENT

§ 521.12 *Submission of application.* Any approved mortgagee may submit an application for insurance of a mortgage about to be executed, or of a mortgage already executed.*†

§ 521.13 *Form of application.* The application must be made upon a standard form prescribed by the Administrator.*†

§ 521.14 *Fee to accompany application.* The application must be accompanied by the mortgagee's check for a sum computed at a rate of three dollars ($3) per thousand dollars ($1,000) of the original principal amount of the mortgage loan applied for, to cover the costs of appraisal by the Administrator, but in no case shall such sum be less than ten dollars ($10). If an application is refused without an appraisal being made by the Administrator, the fee will be returned to the applicant but no portion of the fee will be returned after appraisal or on account of any difference between the amount applied for and the amount approved for insurance.

If, after insurance, the outstanding principal amount of an insured mortgage is increased either by amendment or by the substitution of a new insured mortgage, the fee herein provided for shall be based upon the amount of such increase but in no case shall be less than ten dollars ($10).*†

§ 521.15 *Approval of application.* Upon approval of an application, acceptance of the mortgage for insurance will be evidenced by the issuance of a commitment setting forth, upon a form prescribed by the Administrator, the terms and conditions upon which the mortgage will be insured.*†

§ 521.16 *Refinancing existing mortgage.* If on the date of the application for a firm commitment there is a then existing mortgage on the property, whether insured or uninsured, held by a mortgagee other than the applicant, which mortgage is to be refinanced in whole or in part by the mortgage offered for insurance, such application must be accompanied by a certificate executed by the proposed mortgagor certifying that he has applied to the holder of such existing mortgage for refinancing and that after reasonable opportunity, such holder has failed or refused to make a loan of a like amount and on as favorable terms as those of the loan offered for insurance as described in the application submitted therewith after taking into account amortization provisions, commission, interest rate, mortgage insurance premium, and costs to the mortgagor for legal services, appraisal fees, title expenses, and similar charges.*†

ELIGIBLE MORTGAGES

To be eligible for insurance—

§ 521.17 *Form, lien, etc.* The mortgage must be executed upon a form approved by the Administrator for use in the jurisdiction in which the property covered by the mortgage is situated, by a mortgagor with the qualifications hereinafter set forth in sections 521.31–521.34, must be a first lien upon property that conforms with the property standards prescribed by the Administrator, and the entire principal amount of the mortgage must have been disbursed to the mortgagor, or to his creditors for his account and with his consent.*†

§ 521.18 *Maximum amount of mortgage and appraisal value of property.* The mortgage should involve a principal obligation in an amount of one hundred dollars ($100) or multiples thereof but must not exceed sixteen thousand dollars ($16,000) and must not exceed eighty per centum (80%) of the appraised value of the property as of the date the mortgage is accepted for insurance except under the following circumstances:

(a) If the amount of the mortgage does not exceed $5400 and there is located upon the property a dwelling designed principally for a single family residence, the construction of which

(1) is begun after February 3, 1938, and which is approved for mortgage insurance prior to the beginning of construction, or

(2) the construction of which was begun after January 1, 1937, and before February 3, 1938, and which at the time the mortgage is accepted for insurance has not been sold or occupied since completion.

Such mortgage may exceed 80%, provided at the time the mortgage is insured the mortgagor is the owner and occupant and has paid on account of the property at least 10% of its appraised value, in cash or its equivalent, but must not exceed 90% of the appraised value of the property as of the date the mortgage is accepted for insurance.

(b) If the amount of the mortgage does not exceed $8600 and the property complies with all of the conditions set forth in paragraph (a) above, except as to the amount of the mortgage, and has an appraised value (as of the date the mortgage is accepted for insurance) in excess of $6000, the amount of such mortgage must not exceed 90% of $6000 of such value, plus 80% of the balance of such value.*†

§ 521.19 *Payments and maturity dates.* The mortgage should come due on the first of a month and must have a maturity satisfactory to the Administrator, not to be less than four nor more than twenty years from the date of insurance, except that a mortgage of the character described in section 521.18 (a) may have a maturity satisfactory to the Administrator, not more than twenty-five years from the date of insurance. The amortization period should be either 5, 8, 10, 12, 15, 17, 19 or 20 years by providing for either 60, 96, 120, 144, 180, 204, 228 or 240 monthly amortization payments except that as to mortgages of the character described in section 521.18 (a) such period may also be either 24 or 25 years by providing for 288 or 300 monthly amortization payments.*†

§ 521.20 *Rate of interest.* The mortgage may bear interest at such rate as may be agreed upon between the mortgagee and the mortgagor, but in no case

shall such interest rate be in excess of five per centum (5%) per annum. Interest shall be payable in monthly installments on the principal then outstanding.*†

§ 521.21 *Amortization provisions.* The mortgage must contain complete amortization provisions satisfactory to the Administrator, requiring monthly payments by the mortgagor not in excess of his reasonable ability to pay as determined by the Administrator. The sum of the principal and interest payments in each month shall be substantially the same.*†

§ 521.22 *Payment of insurance premiums.* The mortgage may provide for monthly payments by the mortgagor to the mortgagee of an amount equal to one-twelfth (1/12) of the annual mortgage insurance premium payable by the mortgagee to the Administrator. Such payments shall continue only so long as the contract of insurance shall remain in effect. The mortgage should provide that upon the payment of the mortgage before maturity, the mortgagor shall pay the adjusted premium charge referred to in section 522.3 (b) of the regulations in Part 522, but shall not provide for the payment of any further charge on account of such prepayment.*†

§ 521.23 *Mortgagor's payments to include other charges.* The mortgage shall provide for such equal monthly payments by the mortgagor to the mortgagee as will amortize the ground rents, if, any, and the estimated amount of all taxes, special assessments, if any, and fire and other hazard insurance premiums, within a period ending one month prior to the dates on which the same become delinquent. The mortgage shall further provide that such payments shall be held by the mortgagee in a manner satisfactory to the Administrator, for the purpose of paying such ground rents, taxes, assessments, and insurance premiums, before the same become delinquent, for the benefit and account of the mortgagor. The mortgage must also make provision for adjustments in case the estimated amount of such taxes, assessments, and insurance premiums shall prove to be more, or less, than the actual amount thereof so paid by the mortgagor.*†

§ 521.24 *Mortgagee's application of payments.* All monthly payments to be made by the mortgagor to the mortgagee as hereinabove provided, in sections 521.20–521.23, inclusive, shall be added together and the aggregate amount thereof shall be paid by the mortgagor each month in a single payment. The mortgagee shall apply the same to the following items in the order set forth:

(a) premium charges under the contract of insurance;

(b) ground rents, taxes, special assessments, and fire and other hazard insurance premiums;

(c) interest on the mortgage; and

(d) amortization of the principal of the mortgage.

Any deficiency in the amount of any such aggregate monthly payment shall, unless made good by the mortgagor prior to, or on, the due date of the next such payment, constitute an event of default under the mortgage.*†

§ 521.25 *Late charge.* The mortgage may provide for a charge by the mortgagee of a "late charge", not to exceed two (2) cents for each dollar of each payment more than fifteen (15) days in arrears, to cover the extra expense involved in handling delinquent payments.*†

§ 521.26 *Mortgagor's payments when mortgage is executed.* The mortgagor must pay to the mortgagee, upon the execution of the mortgage, a sum that will be sufficient to pay the ground rents, if any, and the estimated taxes, special assessments, and fire and other hazard insurance premiums for the period beginning on the date to which such ground rents, taxes, assessments, and insurance premiums were last paid and ending on the date of the first monthly payment under the mortgage and may be required to pay a further sum equal to the first annual mortgage insurance premium, plus an amount sufficient to pay the mortgage insurance premium from the date of closing the loan to the date of the first monthly payment.*†

§ 521.27 *Service charge.* The mortgagee may charge the mortgagor the amount of the appraisal fee provided for in section 521.14 and an initial service charge to reimburse itself for the cost of closing the transaction. Such service charge shall not exceed one per centum (1%) of the original principal amount of the mortgage or a charge of twenty dollars ($20), whichever is the greater, except that in cases of property under construction or to be constructed where the mortgagee makes partial disbursements and inspections of the property during the progress of construction, such initial service charge may be in an amount not in excess of two and one-half per centum (2½%) of the original principal amount of the mortgage or a charge of fifty dollars ($50), whichever is the greater.*†

§ 521.28 *Approval of other charges.* In addition to the charges hereinbefore mentioned, the mortgagee may collect from the mortgagor only recording fees and such appraisal fees and cost of title search as are approved by the Administrator. Nothing in this and section 521.27 shall be construed as prohibiting the mortgagor from dealing through a broker, who does not represent the mortgagee, if he prefers to do so, and paying the broker such compensation as is satisfactory to the mortgagor.*†

§ 521.29 *Project must be economically sound.* The mortgage must be executed with respect to a project which, in the opinion of the Administrator, is economically sound.*†

§ 521.30 *Properties insured on or after July 1, 1941.* On and after July 1, 1941, no mortgages will be insured except mortgages

(a) That cover property which is approved for mortgage insurance prior to the completion of the construction of such property, or

(b) That cover property which had been previously covered by a mortgage insured by the Administrator.*†

ELIGIBLE MORTGAGORS

§ 521.31 *Mortgage must be only lien upon property.* A mortgagor must establish that after the mortgage offered for insurance has been recorded, the mortgaged property will be free and clear of all liens other than such mortgage and that there will not be outstanding any other unpaid obligation contracted in connection with the mortgage transaction or the purchase of the mortgaged property, except obligations which are secured by property or collateral owned by the mortgagor independently of the mortgaged property.*†

§ 521.32 *Relationship of income to mortgage payments.* A mortgagor must establish that the periodic payments required in the mortgage submitted for insurance bear a proper relation to his present and anticipated income and expenses.*†

§ 521.33 *Credit standing of mortgagor.* A mortgagor must have a general credit standing satisfactory to the Administrator*†

§ 521.34 *Residence of mortgagor.* A mortgagtor is not restricted as to place of residence and need not be the occupant of the property covered by the mortgage, except where the principal obligation of the mortgage exceeds 80% of the appraised value under the conditions set forth in section 521.18 (a), (b).*†

ELIGIBLE PROPERTIES

§ 521.35 *Nature of title to the realty.* A mortgage to be eligible for insurance must be on real estate held in fee simple, or on leasehold under a lease for not less than ninety-nine (99) years which is renewable, or under a lease with a period of not less than fifty (50) years to run from the date the mortgage is executed.*†

§ 521.36 *Dwelling unit located on property.* At the time a mortgage is insured there must be located on the mortgaged property a dwelling unit designed principally for residential use for not more than four families. Such unit may be connected with other dwellings by a party wall or otherwise.*†

§ 521.37 *Standards for buildings.* The buildings on the mortgaged property must conform with the standards prescribed by the Administrator.*†

§ 521.38 *Location of property.* The mortgaged property, if otherwise acceptable to the Administrator, may be located in any community where the housing standards meet the requirements of the Administrator.*†

§ 521.39 *Effective date.* These Administrative Rules are effective as to all mortgages on which a commitment to insure is issued to an approved mortgagee on or after July 1, 1939.*†

Issued at Washington, D. C., June 15, 1939.

[SEAL] STEWART MCDONALD,
*Federal Housing Administrator.*

§ 522.1 *Citation.* The regulations in this part may be cited and referred to as "Part 522—Regulations of the Federal Housing Administrator for Mutual Mortgage Insurance under Section 203 of the National Housing Act, as amended, revised July 1, 1939."*†

§ 522.2 *Definitions.* As used in the regulations in this part:

(a) The term "Administrator" means the Federal Housing Administrator.

(b) The term "Act" means the National Housing Act.

(c) The term "mortgage" means such a first lien upon real estate as is commonly given to secure advances on, or the unpaid purchase price of, real estate under the laws of the jurisdiction where the real estate is situated, together with the credit instruments, if any, secured thereby.

(d) The term "insured mortgage" means a mortgage which has been insured by the endorsement of the Administrator.

(e) The term "mortgagor" means the original borrower under a mortgage and his heirs, executors, administrators, and assigns.

(f) The term "mortgagee" means the original lender under a mortgage and its successors and such of its assigns as are approved by the Administrator.

(g) The term "contract of insurance" means the endorsement of the Administrator upon the credit instrument given in connection with an insured mortgage, incorporating by reference these regulations.*†

§ 522.3 *Premiums.* (a) The mortgagee shall pay to the Administrator an annual mortgage insurance premium equal to one-half of one per centum (½%) of the average outstanding principal obligation for the twelve-month period following the date on which such premium becomes payable, and calculated in accordance with the amortization provisions without taking into account delinquent payments or prepayments.

The first such premium is to be paid on the date on which such insurance becomes effective by endorsement and shall be calculated on the average outstanding principal balance for the year beginning with a day thirty (30) days prior to the date of the first monthly payment. Until the mortgage is paid in full or the mortgaged property is acquired by the Administrator as hereinafter set forth, or until the contract of insurance is otherwise terminated as hereinafter provided, the next and each succeeding premium shall be paid annually thereafter on the anniversary of such day, and the amount of the second premium payment will be adjusted accordingly. Such premiums shall be paid either in cash or debentures issued under Title II of the National Housing Act at par plus accrued interest.

The provisions of this section with reference to the amount of principal on which the premium charge is calculated shall also apply to mortgages insured prior to the date of these regulations but only in respect to premiums payable after February 3, 1938.

(b) In the event that the principal obligation of any mortgage accepted for insurance is paid in full prior to maturity, the mortgagee shall within thirty (30) days thereafter notify the Administrator of the date of prepayment and shall pay to the Administrator an adjusted premium charge of one per centum (1%) of the original principal amount of the prepaid mortgage, except that if at the time of such prepayment there is placed on the mortgaged property a new insured mortgage in an amount less than the original amount of the prepaid mortgage, such adjusted premium shall be one per centum (1%) of the difference in such amounts.

In no event shall the adjusted premium exceed the aggregate amount of premium charges which would have been payable if the mortgage had continued to be insured until maturity.

No adjusted premium shall be due or payable in the following cases:

(1) Where at the time of such prepayment there is placed on the mortgaged property a new insured mortgage for an amount equal to or greater than the original principal amount of the prepaid mortgage; or

(2) Where the final maturity specified in the mortgage is accelerated solely by reason of partial prepayments made by the mortgagor which do not exceed in any one calendar year fifteen per centum (15%) of the original face amount of the mortgage; or

(3) Where the final maturity specified in the mortgage is accelerated solely by reason of payments to principal to compensate for (i) damage to the mortgaged property, or (ii) a release of a part of such property if approved by the Administrator; or

(4) Where payment in full is made of a delinquent mortgage on which foreclosure proceedings have been commenced, or for the purpose of avoiding foreclosure, if the transaction is approved by the Administrator.

Upon such prepayment the contract of insurance shall terminate.

(c) If at the time of prepayment a new insured mortgage is placed on the same property, the Administrator will refund to the mortgagee for the account of the mortgagor an amount equal to the pro rata portion of the current annual mortgage insurance premium theretofore paid, which is applicable to the portion of the year subsequent to such prepayment.*†

§ 522.4 *Insurance endorsement.* Upon compliance, satisfactory to the Administrator, with the terms of his commitment to insure, the Administrator will endorse the original credit instrument in form as follows:

No. ------
Insured under the
National Housing Act
And Regulations of the
Federal Housing Administrator
For Mutual Mortgage Insurance
Dated November 1, 1934
as amended ----------
FEDERAL HOUSING ADMINISTRATOR
By ----------
Authorized agent
Date ----------

The mortgage shall be an insured mortgage from the date of such endorsement. The Administrator and the mortgagee shall thereafter be bound by these regulations with the same force and to the same extent as if a separate contract had been executed relating to the insured mortgage, including the provisions of these regulations and of the National Housing Act.*†

§522.5 *Classification of mortgages.* Insured mortgages shall be so classified in groups that the mortgages in any group shall involve substantially similar risk characteristics.*†

§ 522.6 *Premium charges and other fees credited to group account.* Premium charges received for the insurance of any mortgage, appraisal and other fees, the receipts derived from the property covered by the mortgage and claims assigned to the Administrator in connection therewith, and all earnings on the assets of the group account shall

*§§ 522.1 to 522.19, inclusive, issued under the authority contained in the National Housing Act, as amended June 3, 1939, Pub. No. 111, 76th Cong., 1st Sess.

†The source of §§ 522.1 to 522.19, inclusive, is Regulations of the Federal Housing Administrator for Mutual Mortgage Insurance under section 203 of the National Housing Act, as amended, revised July 1, 1939.

be credited to the account of the group to which the mortgage is assigned.*†

§ 522.7 *Charges against group account.* The principal of, and interest paid or to be paid on, debentures issued in exchange for any property, payments made or to be made to the mortgagee and mortgagor, and expenses incurred in the handling of the property covered by the mortgage and in collection of claims assigned to the Administrator in connection therewith, shall be charged to the account of the group to which such mortgage is assigned.*†

§ 522.8 *Termination of group account.* The Administrator shall terminate the insurance as to any group of mortgages

(a) When he shall determine that the amounts to be distributed as hereinafter set forth to each mortgagee under an outstanding mortgage assigned to such group are sufficient to pay off the unpaid principal of each such mortgage; or

(b) When all the outstanding mortgages in any group have been paid.

Upon such termination, the Administrator shall charge the group account with the estimated losses arising from transactions relating to that group, shall transfer to the General Reinsurance Account an amount equal to 10 per centum of the total premium charges theretofore credited to such group account, and shall distribute to the mortgagees, for the benefit and account of the mortgagors of the mortgages assigned to such group, the balance remaining in such group in such proportions as may be equitable as among such mortgages and in accordance with sound actuarial and accounting practice.*†

§ 522.9 *Application of funds by mortgagee.* The mortgagee shall accept such payment and apply it on account of the obligation, if any, of the mortgagor under the insured mortgage and distribute the balance, if any, to the mortgagor. If such payment is sufficient to satisfy the obligation of the mortgagor in full, the mortgagee shall thereupon deliver to the mortgagor any instrument or instruments necessary or proper to discharge such mortgage.*†

§ 522.10 *Amount of payment determined by Administrator.* No mortgagor or mortgagee shall have any vested right in a credit balance in any such account or be subject to any liability arising out of the mutuality of the Mutual Mortgage Insurance Fund, and the determination of the Administrator as to the amount to be paid by him to any mortgagee or mortgagor shall be final and conclusive.*†

§ 522.11 *Rights of parties on termination of insurance.* In the event the mortgagee forecloses on the mortgaged property, but does not convey it to the Administrator in accordance with section 522.14 of the regulations in this part, and the Administrator is given written notice thereof, or in the event the mortgagor pays the obligation under the mortgage in full, prior to the maturity thereof, and the mortgagee pays any adjusted premium required under section 522.3 (b) of the regulations in this part, and the Administrator is given written notice by the mortgagee of such payment by the mortgagor, the obligation to pay any subsequent premium charge for insurance shall cease and all rights of the mortgagee and mortgagor, under section 522.14, shall terminate as of the date of such notice. Upon such termination, the mortgagor shall be entitled to receive a share of the credit balance of the group account to which the mortgage has been assigned in such amount as the Administrator shall determine to be equitable and not inconsistent with the solvency of the group account and of the Fund.*†

§ 522.12 *Time of default.* If the mortgagor fails to make any payment, or to perform any other covenant or obligation under the mortgage, and such failure continues for a period of thirty (30) days, the mortgage shall be considered in default, and the mortgagee shall, within sixty (60) days thereafter, give notice in writing to the Administrator of such default, unless such default has been cured or unless the Administrator has been notified of a previous default which remains uncured.*†

§ 522.13 *Transfer of property to the Administrator; conditions of default in mortgage.* At any time within one year from the date of default the mortgagee, at its election, shall either—

(a) With, and subject to, the consent of the Administrator, acquire by means other than foreclosure of the mortgage, possession of, and title to, the mortgaged property; or

(b) Commence foreclosure of the mortgage: *Provided*, That if the laws of the State in which the mortgaged property is situated do not permit the commencement of such foreclosure within such period of time, the mortgagee shall commence such foreclosure within sixty (60) days after the expiration of the time during which such foreclosure is prohibited by such laws.

The mortgagee shall promptly give notice in writing to the Administrator of the institution of foreclosure proceedings and shall exercise reasonable diligence in prosecuting such proceedings to completion.

For the purposes of this section, the date of default shall be considered as thirty (30) days after (a) the first uncorrected failure to perform a covenant or obligation, or (b) the first failure to make a monthly payment which subsequent payments by the mortgagor are insufficient to cover when applied to the overdue monthly payments in the order in which they became due.

If after default and prior to the completion of foreclosure proceedings, the mortgagor shall pay to the mortgagee all monthly payments in default and such expenses as the mortgagee shall have incurred in connection with the foreclosure proceedings, notice shall be given to the Administrator, and the insurance shall continue as if such default had not occurred.

Nothing contained in this section shall be construed so as to prevent the mortgagee, with the written consent of the Administrator, from taking action at a later date than herein specified.*†

§ 522.14 *Condition of property when transferred; delivery of debentures; certificate of claim and definition of the term "waste".* If the default is not cured as aforesaid, and if the mortgagee has otherwise complied with the provisions of section 522.13, and at any time within thirty (30) days (or such further time as may be necessary to complete the title examination and perfect such title) after acquiring possession of the mortgaged property by foreclosure, or by other means in accordance with paragraph (a) of section 522.13, tenders to the Administrator possession of, and a deed containing a covenant which warrants against the acts of the mortgagee and all claiming by, through, or under it, conveying good merchantable title (evidenced as hereinafter provided in section 522.15) to, such property undamaged by fire, earthquake, flood, or tornado, and undamaged by waste, except as hereinafter in this section provided, and assigns (without recourse or warranty) any and all claims which it has acquired in connection with the mortgage transaction, and as a result of the foreclosure proceedings or other means by which it acquired such property, except such claims as may have been released with the approval of the Administrator, the Administrator shall promptly accept conveyance of such property and such assignment and shall deliver to the mortgagee:

(a) Debentures of the Mutual Mortgage Insurance Fund as set forth in Section 204 of the Act, issued as of the date foreclosure proceedings were instituted or the property was otherwise acquired by the mortgagee after default, bearing interest at the rate of two and three-quarters per centum (2¾%) per annum payable semi-annually on the first day of January and the first day of July of each year, and having a total face value equal to the value of the mortgage as defined in Section 204 (a) of the Act. Such value shall be determined by adding to original principal of the mortgage, which was unpaid on the date of the institution of foreclosure proceedings or the acquisition of the property otherwise after default, the amount of all payments, which have been made by the mortgagee for taxes, ground rent and water rates, which are liens prior to the mortgage, special assessments, which are noted on the application for insurance or which become liens after the insurance of the mortgage, insurance on the property mortgaged and any mortgage insurance premium paid after the institution of foreclosure proceedings or the acquisition of the property otherwise after default, and by deducting from such total any amount received on account of the mortgage after the institution of foreclosure proceedings or the acquisition of the property otherwise after default and from any source relating to the property on account of rent or other income after deducting reasonable expenses incurred in handling the property: *Provided, however*, That with respect to mortgages which are accepted for insurance prior to July 1, 1941, under Section 203 (b) (2) (B), on which the unpaid principal obligation at the time of the institution of foreclosure proceedings exceeds 80% of the appraised value of the property as of the date the mortgage was accepted for insurance, there will be included in the debentures issued by the Administrator, on account of foreclosure costs actually paid by the mortgagee and approved by the Administrator an amount not in excess of 2 per centum of the unpaid principal of the mortgage as of the date of the institution of foreclosure proceedings, but in no event in excess of $75.

Such debentures shall be registered as to principal and interest and all or any such debentures may be redeemed, at the option of the Administrator with the approval of the Secretary of the Treasury, at par and accrued interest on any interest payment day on three (3) months' notice of redemption given in such manner as the Administrator shall prescribe.

(b) A Certificate of Claim in accordance with Section 204 (e) of the Act, which shall become payable, if at all, upon the sale and final liquidation of the interest of the Administrator in such property in accordance with Section 204 (f) of the Act. This certificate shall be for an amount which the Administrator shall determine to be sufficient to pay all amounts due under the mortgage and not covered by the amount of debentures and shall include a reasonable amount for necessary expenses incurred by the mortgagee in connection with the foreclosure proceedings or the acquisition of the mortgaged property otherwise and the conveyance thereof to the Administrator, including reasonable attorney's fees, unpaid interest and cost of repairs to the property made by the mortgagee after default to remedy the waste mentioned in this section. Each such Certificate of Claim shall provide that there shall accrue to the holder thereof with respect to the face amount of such certificate, an increment at the rate of three per centum (3%) per annum.

The term "waste" as used in this section means permanent or substantial injury caused by unreasonable use, or abuse, and is not intended to include damage caused by ordinary wear and tear.

The provisions of this section concerning waste, shall not apply to mortgages on which the unpaid principal obligation at the time of the institution of foreclosure proceedings exceeds 75% of the appraised value of the property as of the date the mortgage was accepted for insurance.*†

§ 522.15 *Satisfactory title evidence.* Evidence of title of the following types will be satisfactory to the Administrator:

(a) A fee or owner's policy of title insurance, a guaranty or guarantee of title, or a certificate of title, issued by a title company, duly authorized by law and qualified by experience to issue such; or

(b) An abstract of title prepared by an abstract company or individual engaged in the business of preparing abstracts of title and accompanied by the legal opinion as to the quality of such title signed by an attorney at law experienced in examination of titles; or

(c) A Torrens or similar title certificate; or

(d) Evidence of title conforming to the standards of a supervising branch of the Government of the United States or of any State or Territory thereof.

Such evidence of title shall be furnished without cost to the Administrator and shall be executed as of a date to include the recordation of the deed to the Administrator, and shall show that, according to the public records, there are not, at such date, any outstanding prior liens, including any past due and unpaid ground rents, general taxes, or special assessments.

If the title and title evidence are such as to be acceptable to prudent lending institutions and leading attorneys generally in the community in which the property is situated, such title and title evidence will be satisfactory to the Administrator and will be considered by him as good and merchantable.

The Administrator will not object to the title by reason of the following matters, provided they are not such as to impair the value of the property for residence purposes, or provided they have been brought to the attention of the insuring office for consideration in fixing the valuation:

(1) customary easements for public utilities, party walls, driveways, and other purposes; customary building or use restrictions for breach of which there is no reversion and which have not been violated to a material extent;

(2) such restrictions when coupled with a reversionary clause, provided there has been no violation prior to the date of the deed to the Administrator;

(3) slight encroachments by adjoining improvements;

(4) outstanding oil, water, or mineral rights which, in the opinion of the Administrator, do not impair the value of the property for residence purposes, or which are customarily waived by prudent lending institutions and leading attorneys generally in the community.*†

§ 522.16 *Assignment of mortgages.* When the insured mortgage is transferred to another approved mortgagee, such transferor and transferee shall both notify the Administrator of such transfer within thirty (30) days thereof, and the transferee shall thereupon succeed to all the rights and become bound by all the obligations of the transferor under the contract of insurance; and the transferor shall thereupon be released from its obligations under the contract of insurance.

Whenever the insured mortgage is transferred to another approved mortgagee for the purposes of collateral only, no notice need be given to the Administrator until such collateral is foreclosed, but the transferor shall remain subject to all the obligations of the contract of insurance.*†

§ 522.17 *Termination of contract of insurance.* The contract of insurance shall terminate upon the happening of either of the following events:

(a) the acquisition of the insured mortgage by, or the pledge thereof to, any person, firm, or corporation, public or private, other than an approved mortgagee, whether individually or in trust for another; provided, that this paragraph (a) shall not be applicable to a mortgage acquired or held by an approved mortgagee, which is a banking institution or trust company inspected and supervised by some governmental agency, for a trust held or administered by it in a fiduciary capacity, as long as such fiduciary relationship shall remain in effect;

(b) the disposal by an approved mortgagee of any partial interest in an insured mortgage or group of insured mortgages (whether to another approved mortgagee or otherwise) by means of a declaration of trust, or by a participation or trust certificate, or by any other device; provided that this paragraph (b) shall not be applicable to any mortgage so long as it is held in a common trust fund maintained by a bank or trust company (1) exclusively for the collective investment and reinvestment of moneys contributed thereto by the bank or trust company in its capacity as a trustee, executor or administrator; and (2) in conformity with the rules and regulations prevailing from time to time of the Board of Governors of the Federal Reserve System, pertaining to the collective investment of trust funds.

Upon the termination of the insurance under this section, the mortgagor shall be entitled to receive a share of the credit balance of the account of the group to which the insured mortgage has been assigned, in such amount as the Administrator shall determine to be equitable and not inconsistent with the preservation of the solvency of such account and of the Mutual Mortgage Insurance Fund.*†

§ 522.18 *Amendments.* The regulations in this part may be amended by the Administrator at any time and from time to time, in whole or in part, but

such amendment shall not affect the contract of insurance on any mortgage already insured, or any mortgage or prospective mortgage on which the Administrator has made a commitment to insure.*†

§ 522.19 *Effective date.* The regulations in this part are effective as to all mortgages on which a commitment to insure is issued to an approved mortgagee on or after July 1, 1939. Wherever a mortgagee so desires, the provisions of these regulations shall become a part of any contract of insurance heretofore made.*†

Issued at Washington, D. C., June 15, 1939.

[SEAL] STEWART MCDONALD,
*Federal Housing Administrator.*

## TITLE 30—MINERAL RESOURCES

### NATIONAL BITUMINOUS COAL COMMISSION

[Docket No. 51-FD]

ORDER IN THE MATTER OF HEARING TO DETERMINE WHETHER OR NOT THE COALS AND PRODUCERS THEREOF IN STATES OF NORTH DAKOTA AND SOUTH DAKOTA ARE SUBJECT TO THE PROVISIONS OF THE BITUMINOUS COAL ACT OF 1937, ETC.

At a regular session of the National Bituminous Coal Commission held at its offices in Washington, D. C., on the 28th day of June 1939.

The Commission, having on the 11th day of August, 1937, promulgated its Order No. 35[1] providing for a public hearing for the purpose of receiving evidence to enable the Commission to determine whether or not the coals, and the producers thereof, in the States of North Dakota and South Dakota are subject to the provisions of the Bituminous Coal Act of 1937, and to determine whether a change in the territorial boundaries or limits of District No. 21 and Minimum Price Area No. 8, as defined in said Act, or a consolidation of such district and price area with other districts and price areas is necessary, and the matter being assigned to Examiner Carman A. Newcomb for hearing, and, proper notice having been given, said hearing was commenced on the 13th day of September, 1937 at the Prince Hotel, Bismarck, North Dakota, where evidence relating to the character of the coals produced in North Dakota was received, and, thereafter, upon proper notice, said hearing was adjourned to the State Capitol Building, Pierre, South Dakota where evidence was received relating to the character of the coals produced in the State of South Dakota commencing on the 16th day of September 1937, and

Thereafter, on the 14th day of October, 1937, the Examiner having filed his Report, Proposed Findings of Fact, Conclusion and Recommendation with the Commission, which were thereafter duly served upon all parties to the proceeding, and within fifteen days of the date of said service, to wit, on June 20, 1938 Exceptions to said Report, Proposed Findings of Fact, Conclusion and Recommendation of the Examiner, in re North Dakota, being filed by Stanley B. Houck, Attorney for North Dakota Lignite Operators, excepting to the Findings and Conclusion of the Examiner that the Counties of Burke, Divide, Ward and Williams in North Dakota should be excepted from the general conclusion that all coal producing counties in the State of North Dakota produced only lignite as defined by the Bituminous Coal Act of 1937, and

The Commission having considered said Report, Proposed Findings of Fact, Conclusion and Recommendation of the Examiner, and the Exceptions filed thereto by the North Dakota Lignite Operators, and being fully advised of the evidence, as the same is contained in the official transcript of the aforesaid hearings, finds that the Findings of Fact as proposed by the Examiner, and his Conclusion stated in said Report, are true and correct except as to his Findings and Conclusion relating to the coals produced in Burke, Divide, Ward, and Williams Counties in North Dakota, and with such exceptions are hereby adopted as the Findings of the Commission, and

With respect to the Counties of Burke, Divide, Ward and Williams in the State of North Dakota, the Commission finds:

That the analyses of samples of lignite taken from the mines in Burke, Divide, Ward, and Williams Counties, showing a moisture content of slightly less than 30%, but showing a B. T. U. of less than 7600, are not truly representative analyses of the coals produced in said counties, but that average analyses of lignite produced in said counties reveal that the coals produced therein are lignite within the meaning of the Bituminous Coal Act of 1937, and, therefore, not subject to the provisions of said Act.

Now, therefore, It is by order determined:

1. That all of the underlying coal in the States of North Dakota and South Dakota is a lignitic coal having a calorific value in British thermal units of less than 7600 per pound and having a natural moisture content in place in the mine of 30 per centum or more.

2. That the geographical area designated in the Act as District No. 21, and Minimum Price Area No. 8, embracing the States of North Dakota and South Dakota, produces no coal subject to the provisions of the Bituminous Coal Act of 1937.

3. There being no bituminous coal produced within District No. 21 or Minimum Price Area No. 8, as defined in the Bituminous Coal Act of 1937, no change or changes in the boundaries thereof are necessary to carry out the provisions of said Act, and the descriptions set forth in the Act shall remain unchanged, but no minimum prices or marketing rules and regulations will be established for any coals produced therein.

4. That this Order shall be effective from and after the 29th day of July, 1939, subject, however, to any subsequent determination made by the Commission, pursuant to notice and hearing, instituted either upon its own motion or upon complaint of any interested party.

5. That the Secretary be and he is hereby directed to cause a copy of this Order to be published in the FEDERAL REGISTER, and a copy mailed to the Consumers' Counsel, and the Secretary of each District Board, to each party to the proceeding herein, and to cause copies hereof to be made available for inspection at the Office of the Secretary, Washington, D. C. and at the office of each Statistical Bureau of the Commission.

By order of the Commission.
Dated this 28th day of June 1939.

[SEAL] F. WITCHER MCCULLOUGH,
*Secretary.*

## TITLE 33—NAVIGATION AND NAVIGABLE WATERS

### WAR DEPARTMENT

CHAPTER II—RULES RELATING TO NAVIGABLE WATERS

PART 203—BRIDGE REGULATIONS

§ 203.675 *Little Calumet River, Illinois; Michigan Central Railroad Bridge 8.11 miles from Lake Michigan.*[1] (a) (1) The railroad company shall provide and maintain suitable signals for signaling vessels. The signal for use in the daytime shall be a red ball not less than two feet in diameter; for use at night it shall be a red lantern; arranged in both cases so as to be visible on the river for a distance of at least 600 feet in each direction from the bridge.

(2) A vessel approaching the bridge and desiring to pass shall give a signal consisting of three short sounds of the whistle or horn given in rapid succession.

(3) When a vessel gives the above signal, the bridge shall be immediately opened, unless a train be on the bridge or approaching it so closely as to be unable to stop; and in that case the bridge may be kept closed long enough for the passage of one train and no more.

(4) When the bridge cannot be opened immediately after the signal from the vessel, the bridge tender shall hoist the signal specified in paragraph (1) and shall keep it elevated until the bridge can be opened, when he shall lower it.

(5) Vessels shall not attempt to pass the bridge while the bridge signal is up, or while the bridge is in course of opening or closing.

(6) The bridge shall not be used for switching purposes.

(7) The locking devices for securing the bridge when closed must be such as can be promptly opened. The use of splices bolted to the rail, which involve the screwing or unscrewing of nuts whenever the bridge is closed or opened, is forbidden.

(b) The special regulations of January 4, 1933, governing the operation of this bridge are hereby revoked. (Sec. 5, River and Harbor Act, Aug. 18, 1894, 28 Stat. 362; 33 U.S.C. 499) [Special regs., June 22, 1939 (E.D. 6371 (Michigan Central R. R., Little Calumet River, Kensington, Ill.), 3/1)]

[SEAL] E. S. ADAMS,
*Major General,*
*The Adjutant General.*

[F. R. Doc. 39-2319; Filed, July 5, 1939; 9:47 a. m.]

[1] 2 F.R. 1399, 1560.

[1] These regulations supersede section 203.675, Title 33, Code of Federal Regulations, paragraph (a) of that section having been previously revoked by 4 F.R. 2005.

## TITLE 43—PUBLIC LANDS

### GENERAL LAND OFFICE

STOCK DRIVEWAY WITHDRAWAL NO. 255, WYOMING NO. 46

JUNE 21, 1939.

It appearing that the following-described public lands in Wyoming are necessary for the purpose, it is ordered, under and pursuant to the provisions of section 7 of the act of June 28, 1934, 48 Stat. 1269, as amended by the act of June 26, 1936, 49 Stat. 1976, and section 10 of the act of December 29, 1916, 39 Stat. 862, as amended by the act of January 29, 1929, 45 Stat. 1144, that such lands, excepting any mineral deposits therein, be, and they are hereby, withdrawn from all disposal under the public-land laws and reserved for use by the general public for stock driveway purposes, subject to valid existing rights:

*Sixth Principal Meridian*

T. 23 N., R. 73 W.,
sec. 20, all;
T. 22 N., R. 74 W.,
sec. 4, SE¼,
sec. 8, SE¼,
sec. 18, all;
T. 24 N., R. 74 W.,
sec. 6, W½,
sec. 14, N½, NE¼SE¼,
sec. 20, SE¼;
T. 25 N., R. 74 W.,
sec. 30, all;
T. 22 N., R. 75 W.,
sec. 28, all;
T. 23 N., R. 75 W.,
sec. 2, all,
sec. 28, N½, N½SE¼;
T. 24 N., R. 75 W.,
sec. 12, E½;
T. 21 N., R. 76 W.,
sec. 12, E½E½;
aggregating 5,288.18 acres.

Any mineral deposits in the lands shall be subject to location and entry only in the manner prescribed by the Secretary of the Interior in accordance with the provisions of the aforesaid act of January 29, 1929, and existing regulations.

HARRY SLATTERY,
*Under Secretary of the Interior.*

[F. R. Doc. 39-2320; Filed, July 5, 1939; 9:47 a. m.]

### BUREAU OF RECLAMATION

TUCUMCARI PROJECT, NEW MEXICO

FIRST FORM RECLAMATION WITHDRAWAL

JUNE 16, 1939.

The SECRETARY OF THE INTERIOR.

Sir: In accordance with the authority vested in you by the Act of June 26, 1936 (49 Stat., 1976), it is recommended that the following described lands be withdrawn from public entry under the first form withdrawal as provided in Section 3, Act of June 17, 1902 (32 Stat., 388).

TUCUMCARI PROJECT

*New Mexico Principal Meridian*

Township 11 North, Range 30 East,
Section 5, lot 4, SW¼NW¼ and NW¼SW¼;
Township 12 North, Range 30 East,
Section 27, lot 1 and NE¼SE¼;
Section 28, lot 2;
Section 32, W½SE¼ and E½SW¼;
Township 10 North, Range 32 East,
Section 2, NE¼SW¼;
Township 12 North, Range 33 East,
Section 29, E½NW¼.

Respectfully,

JOHN C. PAGE,
*Commissioner.*

The foregoing recommendation is hereby approved, as recommended, and the Commissioner of the General Land Office will cause the records of his office and the local land office to be noted accordingly.

HARRY SLATTERY,
*Under Secretary of the Interior.*

JUNE 21, 1939.

[F. R. Doc. 39-2294; Filed, July 1, 1939; 9:19 a. m.]

KLAMATH PROJECT, OREGON-CALIFORNIA

FIRST FORM RECLAMATION WITHDRAWAL

JUNE 19, 1939.

The SECRETARY OF THE INTERIOR.

Sir: In accordance with the authority vested in you by the Act of June 26, 1936 (49 Stat. 1976) it is recommended that the following described land be withdrawn from public entry under the first form withdrawal as provided in Sec. 3, Act of June 17, 1902 (32 Stat. 388).

KLAMATH PROJECT, OREGON-CALIFORNIA

*Willamette Meridian, Oregon*

T. 40 S., R. 14 E., Sec. 19, SE¼NE¼, NE¼SW¼, and NE¼SE¼.

Respectfully,

JOHN C. PAGE,
*Commissioner.*

The foregoing recommendation is hereby approved and the Commissioner of the General Land Office will cause the records of his office and the local land office to be noted accordingly.

HARRY SLATTERY,
*Under Secretary of the Interior.*

JUNE 22, 1939.

## TITLE 45—PUBLIC WELFARE

### FEDERAL WORKS AGENCY—PUBLIC WORKS ADMINISTRATION

[General Order No. 1]

ADOPTION BY PUBLIC WORKS ADMINISTRATION IN FEDERAL WORKS AGENCY, OF RULES, REGULATIONS, ORDERS, BULLETINS, CIRCULARS, FORMS, MANUALS AND SIMILAR DOCUMENTS OF FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

JULY 1, 1939.

1. All rules, regulations, orders, bulletins, circulars, forms, manuals and similar documents heretofore duly issued by the Federal Emergency Administration of Public Works or by any official thereof, in force and effect as of June 30, 1939 (hereinafter referred to as the "Documents"), are hereby adopted by and, insofar as appropriate, made applicable to the Public Works Administration in the Federal Works Agency.

2. All references in the Documents to the Administrator or to the Assistant Administrator of the Federal Emergency Administration of Public Works shall hereafter be deemed to refer to the Commissioner of Public Works.

3. All references in the Documents to the Federal Emergency Administration of Public Works shall hereafter be deemed to refer to the Public Works Administration in the Federal Works Agency.

4. Any rights, privileges or obligations of the Administrator or of the Assistant Administrator of the Federal Emergency Administration of Public Works under any Offers, contracts or agreements shall be the rights, privileges and obligations of the Commissioner of Public Works.

5. This order is issued pursuant to the Reorganization Act of 1939 and Reorganization Plan No. 1 transmitted to the Congress by the President.

E. W. CLARK,
*Acting Commissioner of Public Works.*

Approved:
JOHN M. CARMODY,
*Federal Works Administrator.*

## TITLE 49—TRANSPORTATION AND RAILROADS

### INTERSTATE COMMERCE COMMISSION

[No. M-17810]

WAIVE TARIFF RULES

AUTOMATIC POSTPONEMENT

JUNE 29, 1939.

Present: John L. Rogers, Commissioner, to whom the above entitled matter has been assigned for action thereon.

*Ordered:* That all carriers by motor vehicle, subject to the Motor Carrier Act, 1935, and their duly appointed agents are hereby authorized to publish the following provisions in supplements announcing resuspension of the rates and other tariff provisions:

"If this supplement is not cancelled on or before (here insert date to which resuspended) the effective date of the above-described suspended schedules remaining under suspension on that date is hereby postponed to the date upon which this supplement is cancelled. The rates, charges, classifications, rules, regulations, practices, and other provisions, continued in force by the above-mentioned order of suspension, will apply during the period of this postponement unless changed under authority of special permission or order of the Interstate Commerce Commission."

*Provided*, That any supplement filed under this authority shall not include the announcement of suspension in more than one I. and S. Docket,

*Provided further*, That the authority granted hereby may be used only to postpone the effective date of suspended matter beyond the date of expiration of the second period of suspension,

*And provided further*, That the continuance of this authorization is made subject to the condition, that subject to the decision of the Commission in I. and S. Docket proceedings involved, carriers or their agents shall, with reasonable promptness, file schedules making final disposition of the matter under suspension or postponement.

Dated at Washington, D. C., this 29th day of June 1939.

By the Commission, Commissioner Rogers.

[SEAL] W. P. BARTEL, *Secretary.*

## *Notices*

### DEPARTMENT OF AGRICULTURE.

#### Agricultural Adjustment Administration.

[NCR-301B, Supp. 1]

1939 AGRICULTURAL CONSERVATION PROGRAM

BOONE COUNTY, INDIANA

Pursuant to the authority vested in the Secretary of Agriculture under section 7 to 17, inclusive, of the Soil Conservation and Domestic Allotment Act, as amended, NCR-301B, 1939 Agricultural Conservation Program, Boone County, Indiana,[1] is hereby amended as follows:

1. Section 1, subsection c, is amended by adding at the end thereof the following new paragraph:

For all purposes relating to the 1939 Boone County program, farming operations and practices carried out during the program year, November 1, 1938 to September 30, 1939, will be deemed to have been carried out in 1939, but any acreage of land seeded in the fall of 1939 to a small grain crop will not for that reason be regarded as having been devoted to that crop in 1939.

2. Section 2, d, Item (2), is amended to read as follows:

(2) *Acreage planted to wheat* means (a) any acreage of land devoted to seeded wheat (except when such crop is seeded in a mixture containing less than 50 percent by weight of wheat, or containing 25 percent or more by weight of rye, barley, vetch or Austrian winter peas, and the seeding mixture may reasonably be expected to produce a crop containing such proportions of plants other than wheat that the crop could not be harvested as wheat for grain or seed) which is on the farm on or after December 15, 1938; (b) any acreage of land devoted to volunteer wheat which remains on the land until May 1, 1939; and (c) any acreage of land which is seeded to a mixture containing wheat but the crops other than wheat fail to reach maturity and the wheat matures as grain or is harvested for hay.

However, there shall be excluded from the acreage regarded as planted to wheat any acreage of wheat in excess of the wheat allotment which is designated on NCR-303 at the time this form is completed and which is disposed of prior to May 20, 1939, in such a manner as to leave no wheat available to mature as grain or for harvest as hay. In no event shall the acreage regarded as planted to wheat on any farm be less than the acreage used in computing the final total insured production for adjusting losses with respect to crop insurance.

3. Section 2, d, (3), Item (m), is amended to read as follows:

(m) Wheat matured as grain on a non-wheat-allotment farm, except when credit is earned by the use of such crop for soil-building practice (3) Section 6, a. Wheat harvested for hay on a non-wheat-allotment farm, except (1) when grown in a mixture containing at least 25 percent by weight of winter legumes, or (2) when cut green for hay and used as a nurse crop for legumes or perennial grasses of which a good stand is established in 1939.

(i) In cases where a good stand of approved legumes or grasses is not on the farm at the time of checking the performance, a good stand will be considered as having been established if the county committee finds that such legumes or grasses were seeded in a workmanlike manner, and

(aa) failure to secure and maintain a good stand was due to flood or drought conditions which prevented the establishment of a good stand on farms generally in the community, or

(bb) failure to have a good stand was due to grasshoppers or other insects and the farm operator has made every reasonable effort to prevent damage by such insects, including in any event cooperation in the insect control program of the Bureau of Entomology and Plant Quarantine in any area in which such programs are in effect.

(ii) In cases where a good stand of legumes or perennial grasses is actually established in 1939 but the legume or grass is plowed under before October 1, 1939, a good stand will not be considered as having been established and the acreage will be classified as soil-depleting. If a good stand of such legumes or grasses is not actually established and the acreage is plowed before October 1, 1939, the acreage will be classified as soil-depleting unless the county committee determines that under (i) a good stand should be considered as having been established and that plowing the acreage was a good farming practice.

4. Section 2, d, (3), Item (n), is amended to read as follows:

(n) Oats, barley, rye, emmer, speltz, mixtures of these crops or wheat mixtures matured as grain, except when credit is earned by the use of such crop for soil-building practice (3) Section 6, a. Oats, barley, rye, emmer, speltz, mixtures of these crops or wheat mixtures harvested for hay except (1) when grown in mixtures containing at least 25 percent by weight of winter legumes or (2) when cut green for hay and used as a nurse crop for legumes or perennial grasses of which a good stand is established in 1939.

(i) In cases where a good stand of approved legumes or grasses is not on the farm at the time of checking the performance, a good stand will be considered as having been established if the county committee finds that such legumes or grasses were seeded in a workmanlike manner, and

(aa) failure to secure and maintain a good stand was due to flood or drought conditions which prevented the establishment of a good stand on farms generally in the community, or

(bb) failure to have a good stand was due to grasshoppers or other insects and the farm operator has made every reasonable effort to prevent damage by such insects, including in any event cooperation in the insect control program of the Bureau of Entomology and Plant Quarantine in any area in which such programs are in effect.

(ii) In cases where a good stand of legumes or perennial grasses is actually established in 1939 but the legume or grass is plowed under before October 1, 1939, a good stand will not be considered as having been established and the acreage will be classified as soil-depleting. If a good stand of such legumes or grasses is not actually established and the acreage is plowed before October 1, 1939, the acreage will be classified as soil-depleting unless the county committee determines that under (i) a good stand should be considered as having been established and that plowing the acreage was a good farming practice.

5. Section 2, c, is amended by adding the following new item:

(8) Idle farm means any farm which the county committee determines to be idle in 1939 in accordance with the usual meaning of the term in the community. The county committee shall regard as idle any farm on which normal cropping operations are not carried out during the 1939 crop year. Normal cropping operations will not be deemed to be carried out on a farm in 1939 if the sum of the following acreages is less than one-half of the acreage in the total soil-depleting acreage allotment; (1) the acreage upon which a crop is seeded for harvest in 1939; (2) the acreage of volunteer crops harvested in 1939; (3) the acreage summer fallowed in 1939; (4) the acreage seeded or devoted to tame grasses or legumes in 1939, excluding seedings in the fall of 1939; and (5) the acreage seeded to small grains to be pastured in 1939 (other than small grains seeded in the fall of 1939). However, a farm upon which normal cropping operations were not carried out will not be regarded as idle if the State committee determines that the failure to carry out normal cropping operations was beyond the control of the farmer.

6. Section 6, a, Item (7), is amended by deleting the words "2½ tons blast furnace slag" in the second from the last line and inserting in their place the words, "2,750 pounds blast furnace slag."

7. Section 6, b, Item (3) is amended by deleting the phrase "November 1, 1939" in both places where it occurs and inserting in lieu thereof the phrase "October 1, 1939."

8. Section 7, a, Item (2), is amended to read as follows:

(2) 3 cents per bushel of the normal yield per acre of corn for the farm for each acre in the corn allotment.

9. Section 7, b, Item (2), is amended to read as follows:

(2) 6 cents per bushel of the normal yield per acre of wheat for the farm for each acre in the wheat allotment.

10. Section 8, c, Item (2), is amended to read as follows:

(2) *Non-general-allotment farms.* (a) $8.00 per acre adjusted for productivity for each acre classified as soil-depleting in excess of the sum of (1) twenty acres, and (2) the acreage on which corn and wheat deductions are computed.

11. Section 9, Paragraph a, is amended to read as follows:

a. *Payments and deductions on acreage allotments.* The net payment or net deduction computed for any farm in connection with general crops or any crop for which a special allotment is established will be divided among the landlords and tenants in the proportion that they are entitled as of the time of harvest to share in such crops on the farm in 1939. Any person who receives a portion of a crop as a fixed commodity payment will not be regarded as receiving a share of the crop.

If any crop for which payment is computed is not grown on the farm in 1939 or the acreage of the crop is substantially reduced by flood, hail, drought, insects or plant bed diseases, the net payment or net deduction for the crop will be divided among the landlords and tenants if the county committee determines that such persons would have shared in the crop if the entire allotment had been planted and harvested in 1939. In cases where two or more separately owned tracts of land comprise a farm and Section II of the Combination Farm Share Agreement, Form ACP-95, is executed and the form is signed by all persons who are entitled to receive a share of the crops, the share of each person in the net payment or net deduction for the crops will be that indicated on Form ACP-95.

12. Section 15 is amended by adding at the end thereof the following new subsection d:

d. *Time within which to file form NCR-303 and similar forms.* No inspection of any farm will be made for the purpose of determining the extent of performance under the 1939 Boone County Agricultural Conservation Program unless there is received on or before May 1, 1939, by the Boone County Committee, either (1) a Farm Plan for Participation, NCR-303 for the farm, duly executed by a person eligible to make application for payment with respect to such farm; or (2) a letter from the landlord or operator of such farm indicating that he is participating in the 1939 Boone County Agricultural Conservation Program and requesting an inspection of his farms in the county.

Done at Washington, D. C., this 30th day of June, 1939. Witness my hand and seal of the Department of Agriculture.

[SEAL] H. A. WALLACE, *Secretary of Agriculture.*

[2] 3 F.R. 1979 DI.

[Docket No. A-104—O-104]

NOTICE OF HEARING, PROPOSED AMENDMENTS TO MARKETING AGREEMENT AND ORDER REGULATING HANDLING OF HOPS GROWN IN STATES OF OREGON, CALIFORNIA, AND WASHINGTON; AND NOTICE OF MEETING RELATIVE TO DETERMINATION OF THE SALEABLE QUANTITY OF 1939 HOPS

Whereas, pursuant to the provisions of Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (hereinafter referred to as the "act"), notice of hearing is required in connection with a proposed marketing agreement, a proposed order, or proposed amendments thereto, and the General Regulations, Series A, No. 1, as amended,[1] of the Agricultural Adjustment Administration, United States Department of Agriculture, provide for such notice; and

Whereas the Secretary of Agriculture of the United States (hereinafter referred to as the "Secretary") executed a marketing agreement and issued an order, on August 11, 1938,[2] effective on and after August 15, 1938, regulating the handling of hops grown in the States of Oregon, California, and Washington; and

Whereas, the Secretary has reason to believe that the execution of certain amendments to the marketing agreement and the issuance of certain amendments to the order will tend to effectuate the declared policy of the act with respect to the handling of hops grown in the States of Oregon, California, and Washington; and

Whereas, it is provided, among other things, in paragraph numbered 2, section 1, article IV of said marketing agreement and order, that, for the purpose of obtaining additional information pertinent to the determination of the saleable quantity of 1939 crop hops, the Secretary shall hold a meeting or meetings, within the production area covered by said marketing agreement and order, subsequent to such notice as the Secretary may deem proper;

Now, therefore, pursuant to the said act and the aforesaid regulations, notice is hereby given of a hearing to be held on certain proposed amendments to the marketing agreement and certain proposed amendments to the order regulating the handling of hops grown in the States of Oregon, California, and Washington; and said hearing is to be held in the Auditorium, Chamber of Commerce, 27½ North Third Street, in Yakima, Washington, on July 11, 1939, at 9:30 a. m., Pacific standard time; in the Marion Hotel, Salem, Oregon, on July 14, 1939, at 9:30 a. m., Pacific standard time; and in the Elks Club Building, 521 Third Street, Santa Rosa,

California, on July 17, 1939, at 9:30 a. m., Pacific standard time.

This hearing is for the purpose of receiving evidence as to the general economic conditions which may, in order to effectuate the declared policy of the act, necessitate said amendments to the aforesaid marketing agreement and order, and as to the specific provisions which said proposed amendments to the marketing agreement and order should contain. The aforesaid public hearing is also for the purpose of receiving evidence and obtaining additional information, pursuant to the provisions of article IV, section 1, paragraph numbered 2 of the aforesaid marketing agreement and order, relative to the determination of the saleable quantity of 1939 crop hops.

The proposed amendments to the marketing agreement and the proposed amendments to the order provide, in similar terms, that the provisions of article I, section 1, paragraph numbered 9; article IV, section 3, paragraph numbered 1; article IV, section 4; article IV, section 6; article IV, section 7, article V, section 1, paragraph numbered 2, of the aforesaid marketing agreement and order, be amended in the respects stated in said proposed amendments, and by inserting an additional section after section 4 of article IV, and, accordingly renumbering section 5 and subsequent sections of said article IV; and such proposed amendments are summarized, omitting some of the details and provisions thereof, as follows: (a) restrict the definition of "grower-dealer," in article I, section 1, paragraph numbered 9; (b) permit the Growers Allocation Committee to reduce, under certain conditions, the saleable quantity of any grower, pursuant to article IV, section 3, paragraph numbered 1; (c) authorize the Control Board to issue in the name of any grower, who by reason of a written contract executed prior to June 14, 1938, is legally obligated to deliver at a definite and stated price, a definite and stated quantity of hops produced by the respective grower during 1939, an additional allotment certificate covering or relating to the excess quantity, if any, of the quantity of hops specified in such contract over and above the quantity represented by the respective grower's saleable allotment for 1939; (d) authorize cancellation of allotment certificates, under certain conditions, and issuance of new allotment certificates; (e) permit the allotment certificates applicable to 1939 hops to be used, under certain conditions, by growers to market hops produced in 1938 in excess of the respective grower's allotment for 1938; (f) permit a grower to purchase from another grower uncertificated hops, under certain conditions; (g) authorize the issuance, under certain conditions, of emergency allotment certificates; (h) provide that, among other things, in the event any grower who handles hops is not within the definition of "first handler," the person who handles said hops next following the aforesaid handling thereof by said grower shall constitute the first handler of said hops within the provisions of article V.

Copies of said proposed amendments to the marketing agreement and proposed amendments to the order may be obtained from the Hearing Clerk, Office of the Solicitor, United States Department of Agriculture, in Room 0310 South Building, or may be there inspected.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

Dated June 30, 1939.

## Office of the Secretary.

[Memorandum No. 826]

MAKING APPLICABLE TO THE EMERGENCY RELIEF APPROPRIATION ACT OF 1939 CERTAIN ORDERS, RULES, REGULATIONS AND DELEGATIONS OF AUTHORITY ISSUED UNDER AUTHORITY OF THE EMERGENCY RELIEF APPROPRIATION ACT OF 1938

JUNE 30, 1939.

By virtue of and pursuant to the authority vested in me by the Emergency Relief Appropriation Act of 1939, approved June 30, 1939, particularly Sections 3 and 14 thereof, I hereby order and direct that the expenditure of funds appropriated to this Department by the said Act, and the administration of all activities conducted with such funds, shall be in accordance with the orders, rules, regulations and delegations of authority heretofore issued and in effect on this date relating to the expenditure of funds appropriated to this Department by the Emergency Relief Appropriation Act of 1938, to the extent such orders, rules, regulations and delegations of authority are consistent with the provisions of the Emergency Relief Appropriation Act of 1939. Whenever any authority heretofore granted limited the amount of money which might be expended thereunder, such limit shall be deemed applicable to the total amount to be expended under such authorization out of funds appropriated by prior acts and the Emergency Relief Appropriation Act of 1939. Any redelegations of authority in effect on the date of this order shall continue in effect subject to any powers heretofore granted to revoke such redelegations. The foregoing rules and regulations shall remain in effect until my further order.

[SEAL] HARRY L. BROWN,
*Acting Secretary.*

## FEDERAL TRADE COMMISSION

*United States of America—Before Federal Trade Commission*

[Docket No. 3834]

IN THE MATTER OF C. R. ANTHONY COMPANY, A CORPORATION, BURRELL-BERGER, INC., A CORPORATION, MISS PLAZA, INC., A CORPORATION, SAMUEL R. PARNES, INC., A CORPORATION, GORGEOUS FROCKS, INC., A CORPORATION

COMPLAINT

The Federal Trade Commission, having reason to believe that the parties respondent named in the caption hereof and hereinafter more particularly designated and described, since June 19, 1936 have violated and are now violating the provisions of Subsection C, Section 2 of the Clayton Act, as amended by the Robinson-Patman Act, approved June 19, 1936 (U.S.C., Title 15, Section 13) hereby issues its complaint stating its charges with respect thereto as follows:

PARAGRAPH 1. Respondent C. R. Anthony Company is a corporation organized and existing under and by virtue of the laws of the State of Oklahoma with its principal office and place of business at 540 First National Bank Building, Oklahoma City, Oklahoma. Said C. R. Anthony Co. owns and operates 57 retail department stores located in the States of Oklahoma, Kansas, Texas and New Mexico.

PAR. 2. Respondent C. R. Anthony Company also maintains an office in Room 1409 at 1450 Broadway, New York City, New York, under the name of The Anco Co. All maintenance expenses of said office, including salaries, are paid by the respondent C. R. Anthony Company and the functions of the said New York City office are wholly performed by employees of said respondent C. R. Anthony Company on a flat salary basis paid solely by said respondent, which employees act for and in behalf of, and are subject to and under the direct and exclusive control of said respondent, C. R. Anthony Company.

Said employees purchase for and in the name of respondent, C. R. Anthony Company, the requirements of its retail department stores consisting of women's apparel, allied and other merchandise from various sellers and manufacturers located in New York City, among whom are the seller respondents hereinafter named. The merchandise so purchased is then shipped by said sellers from New York City into and through the various states of the United States to the various retail department stores of the respondent C. R. Anthony Company, invoices therefor being sent to and paid by said respondent C. R. Anthony Company.

PAR. 3. Respondent Burrell-Berger, Inc. is a corporation organized and existing under the laws of the State of New York with its principal office and place of business at 1375 Broadway, New York City, New York.

Respondent Miss Plaza, Inc., is a corporation organized and existing under and by virtue of the laws of the State of New York with its principal office and place of business at 1400 Broadway, New York City, New York.

Respondent Samuel R. Parnes, Inc. is a corporation organized and existing under and by virtue of the laws of the State of New York with its principal office and place of business at 1400 Broadway, New York City, New York.

Respondent Gorgeous Frocks, Inc., is a corporation organized and existing under and by virtue of the laws of the State of New York with its principal office and place of business at 1400 Broadway, New York City, New York.

The respondents named in this paragraph will hereinafter be referred to as "seller-respondents."

PAR. 4. Each of said seller respondents is engaged in the sale of merchandise to respondent C. R. Anthony Company and to other customers in states other than the State of New York, pursuant to which sales merchandise is shipped and caused to be transported by each of said seller respondents into and through various states of the United States to their respective customers. Said seller respondents are fairly typical and representative members of a large group or class of manufacturers and sellers engaged in selling their merchandise in interstate commerce to respondent C. R. Anthony Company and to its competitors but the sellers comprising said group are too numerous to be specifically named herein or to be brought before the Commission in this proceeding without manifest inconvenience and delay.

PAR. 5. In the course of the purchasing transactions by the respondent C. R. Anthony Company, under the name of The Anco Co., as set forth in Paragraph Two hereof, said seller respondents and other sellers have since June 19, 1936 transmitted, paid and delivered and do transmit, pay and deliver to said respondent C. R. Anthony Company, under the name The Anco Co. so called brokerage fees and commissions, the same being a certain percentage on quoted sales prices agreed upon between each of the said sellers and the respondent C. R. Anthony Company, and said respondent C. R. Anthony Company since June 19, 1936 has received and accepted and is receiving and accepting such so-called brokerage fees or commissions paid to it under the name of The Anco Co., upon merchandise purchased by said respondent C. R. Anthony Company under the name of The Anco Co., while said respondent C. R. Anthony Company is the sole party in interest in and is the actual purchaser in said transaction.

In all of the purchasing transactions hereinabove referred to, in connection with which the so-called brokerage fees or commissions have been and are paid and transmitted by said seller respondents and other sellers and have been and are accepted and received by said respondent C. R. Anthony Company, no services whatsoever in connection with said purchases have been rendered or are now being rendered to, for, or on behalf of said seller respondent or any other sellers by said respondent C. R. Anthony Company under its own name or under the name of The Anco Co.

PAR. 6. The transmission and payment of said so-called brokerage fees or commissions by the seller respondents and other sellers to and the receipt and acceptance thereof by the respondent C. R. Anthony Company under the name of The Anco Co. in the manner and under the circumstances hereinabove set forth, is in violation of the provisions of Section 2 (c) of the above mentioned Act of Congress entitled "An Act to supplement existing laws against unlawful restraints and monopolies and for other purposes", approved October 15, 1914 (The Clayton Act) as amended by the Act of Congress entitled "An Act to amend Section 2 of an act entitled 'An Act to supplement existing laws against unlawful restraints and monopolies and for other purposes', approved October 15, 1914, as amended (U.S.C. Title 15, Section 13) and for other purposes", approved June 19, 1936 (The Robinson-Patman Act).

Wherefore, the premises considered, the Federal Trade Commission on this 27th day of June, A. D., 1939, issues its complaint against said respondents.

NOTICE

Notice is hereby given you, C. R. Anthony Company, Burrell-Berger, Inc., Miss Plaza, Inc., Samuel R. Parnes, Inc. and Gorgeous Frocks, Inc., respondents herein, that the 4th day of August, A. D.,

1939, at 2 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * *

Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.

If respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on the allegations of fact set forth in said complaint and to have authorized the Commission, without further evidence, or other intervening procedure, to find such facts to be true, and if in the judgment of the Commission such facts admitted constitute a violation of law or laws as charged in the complaint, to make and serve findings as to the facts and an order to cease and desist from such violations. Upon application in writing made contemporaneously with the filing of such answer, the respondent, in the discretion of the Commission, may be heard on brief, in oral argument, or both, solely on the question as to whether the facts so admitted constitute the violation or violations of law charged in the complaint.

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 27th day of June, A. D. 1939.

By the Commission.

[SEAL] OTIS B. JOHNSON,
*Secretary.*

[Docket No. 3671]

IN THE MATTER OF JAMES S. SUTTON, INC., A CORPORATION, AND JAMES S. SUTTON, AN INDIVIDUAL

ORDER APPOINTING EXAMINER AND FIXING TIME AND PLACE FOR TAKING TESTIMONY

This matter being at issue and ready for the taking of testimony, and pursuant to authority vested in the Federal Trade Commission under an Act of Congress (38 Stat. 717; 15 U.S.C.A., Section 41),

*It is ordered*, That John W. Addison, an examiner of this Commission, be and he hereby is designated and appointed to take testimony and receive evidence in this proceeding and to perform all other duties authorized by law;

*It is further ordered*, That the taking of testimony in this proceeding begin on Wednesday, July 12, 1939, at nine o'clock in the forenoon of that day (eastern standard time), in Room 500, 45 Broadway, New York, New York.

Upon completion of testimony for the Federal Trade Commission, the examiner is directed to proceed immediately to take testimony and evidence on behalf of the respondent. The examiner will then close the case and make his report.

By the Commission.

## SECURITIES AND EXCHANGE COMMISSION.

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission, held at its office in the City of Washington, D. C., on the 28th day of June, A. D. 1939.

[File No. 32-145]

IN THE MATTER OF NEW YORK STATE ELECTRIC & GAS CORPORATION

ORDER RELATIVE TO ISSUE AND SALE OF NOTE AND PLEDGE

New York State Electric & Gas Corporation, a subsidiary of NY PA NJ Utilities Company, Associated Gas and Electric Corporation, and Associated Gas and Electric Company, registered holding companies, having duly filed with this Commission an application pursuant to section 6 (b) of the Public Utility Holding Company Act of 1935 for exemption from the provisions of section 6 (a) of said Act, of the issue and sale by the applicant to the Rural Electrification Administration of the United States of America, for cash, at its face value, of a 2.73% serial note for $300,000 to be secured by applicant's First Mortgage bonds, 4% Series, due 1965, in a principal amount not to exceed $400,000 (exemption also being sought for the pledge of such bonds for collateral security);

A hearing on said application as amended having been duly held[1] after appropriate notice; the record in this matter having been examined; and the Commission having made and filed its findings herein;

*It is ordered*, That the issue and sale of such note and the pledge as collateral security of such bonds be and the same hereby are exempted from the provisions of section 6 (a) of the Public Utility Holding Company Act of 1935, subject, however, to the following conditions:

1. That such issue and sale of such note and pledge of the bonds shall be in compliance with the terms and conditions of and for the purposes represented by said application as amended, and in compliance with the terms and conditions imposed by the order of the Public Service Commission of New York; and

2. That such exemption shall immediately terminate without further order of this Commission if at any time the authorization of the issue and sale of the note and pledge of the bonds by the Public Service Commission of New York shall be revoked or shall otherwise terminate; and

3. That such bonds shall not be sold except at a bona fide sale by or on behalf of the pledgee or its successors or assigns, to satisfy said note, or by the purchaser at such sale, or by his or its successors or assigns; and

4. That within ten days after the issue and sale of such note and the pledge of the bonds the applicant shall file with this Commission its Certificate of Notification showing that the issue and sale of the note and the pledge of the bonds have been effected in accordance with the terms and conditions of, and for the purposes represented by, said application as amended; and

5. That copies of all reports submitted to the New York State Public Service Commission in connection with the fulfillment of the terms of its order be supplied at the same time to this Commission; and

6. That when all expenses incurred in connection with the issue and sale of such note and the pledge of the bonds shall be actually paid, the applicant shall file a detailed statement of such expenses showing the names of persons or entities to whom such payments were made, the amounts of such payments, and a detailed description of the services rendered in connection with the issue and sale of said note and the pledge of the bonds.

By the Commission.

[File No. 43-210]

IN THE MATTER OF BRADFORD ELECTRIC COMPANY

ORDER RELATIVE TO EFFECTIVENESS OF DECLARATION

Bradford Electric Company, a direct subsidiary of NY PA NJ Utilities Company and an indirect subsidiary of Associated Gas and Electric Corporation and Associated Gas and Electric Company, the latter three named companies being registered holding companies, having filed a declaration pursuant to section 7 of the Public Utility Holding Company Act of 1935, regarding the issue and sale by it to The Chase National Bank of the City of New York of its $395,000 3% unsecured promissory note to be dated June 29, 1939 and to mature eleven months from the date of issue, partial liquidation of the principal amount thereof to be made periodically by the payment of $5,000 on July 29, 1939 and by similar monthly payments thereafter to and including April 29, 1940, with the balance of the principal amount thereof, together with all interest accrued and unpaid thereon, to be paid at maturity;

A hearing on such declaration, as amended, having been held[1] after appropriate notice; the record in this matter having been duly considered; and the Commission having filed its findings herein;

[1] 4 F.R. 2283 DI.

*It is ordered*, That such declaration be and become effective forthwith, subject, however, to the following conditions;

1. That such issue and sale of such note shall be in compliance with the terms and conditions of, and for the purposes represented by, said declaration as amended; and

2. That within ten days after the issue and sale of such note, the declarant shall file with this Commission its Certificate of Notification showing that the issue and sale of the note has been effected in accordance with the terms and conditions of, and for the purposes represented by, said declaration as amended; and

3. That when all expenses incurred in connection with the issue and sale of such note shall have been actually paid, the declarant shall file a detailed statement of such expenses showing the names of persons or entities to whom such payments were made, the amounts of such payments and a detailed description of the services rendered in connection with the issue.

By the Commission.

IN THE MATTER OF SUBURBAN GAS AND ELECTRIC CO., GLOUCESTER ELECTRIC CO., HAVERHILL ELECTRIC CO., BEVERLY GAS AND ELECTRIC CO., SALEM GAS LIGHT CO., NORTH BOSTON LIGHTING PROPERTIES, NEW ENGLAND POWER ASSOCIATION

ORDER RELATIVE TO EFFECTIVENESS OF DECLARATIONS

Declarations pursuant to Section 7 of the Public Utility Holding Company Act of 1935 having been duly filed with this Commission by Suburban Gas and Electric Company, Gloucester Electric Company, Haverhill Electric Company, Beverly Gas and Electric Company, Salem Gas Light Company, which are all subsidiary companies of North Boston Lighting Properties, an indirect subsidiary of New England Power Association, a registered holding company, regarding the issue and sale of unsecured 3% promissory notes to be dated July 1, 1939 and to mature 10 months after date in an aggregate principal amount as follows:

| | |
|---|---|
| Suburban Gas and Electric Company | $785,000 |
| Gloucester Electric Company | 235,000 |
| Haverhill Electric Company | 1,014,375 |
| Beverly Gas and Electric Company | 650,000 |
| Salem Gas Light Company | 425,000 |

North Boston Lighting Properties and New England Power Association having filed applications in connection with such declarations requesting approval of the pledge by North Boston Lighting Properties of the notes proposed to be issued with State Street Trust Co., Trustee, as part of the collateral securing North Boston's outstanding Secured Notes, 3½% Series, due 1947.

A hearing upon said declarations and applications having been held[1] after appropriate notice; the record in this matter having been examined; the Commission having made and filed its findings herein;

*It is ordered*, That each of said declarations be, and become effective forthwith and that each of the said applications by North Boston Lighting Properties and New England Power Association be, and the same hereby is approved, subject, however, to the following conditions:

(1) That all acts in connection with said declarations and applications shall be performed in all respects as set forth in, and for the purposes represented by, said declarations and applications; and

(2) That within ten days after the issuance of the securities referred to herein and the acquisition and pledge of such notes the declarants and applicants shall respectively file with this Commission certificates of notification showing that such issuances and sales and acquisitions and pledges have been effected in accordance with the terms and conditions of, and for the purposes represented by, said declarations and applications.

[File No. 32-149]

IN THE MATTER OF NEW YORK STATE ELECTRIC & GAS CORPORATION

ORDER RELATIVE TO ISSUE AND SALE OF BONDS AND PREFERRED STOCK

New York State Electric & Gas Corporation, a direct subsidiary company of NY PA NJ Utilities Company, and an indirect subsidiary company of Associated Gas and Electric Corporation and Associated Gas and Electric Company, the latter three named companies being registered holding companies, having filed an Application, pursuant to

[1] 4 F.R. 2374 DI.

[1] 4 F.R. 2251 DI.

Section 6 (b) of the Public Utility Holding Company Act of 1935, for exemption from the provisions of Section 6 (a) of that Act of the issue and sale to underwriters at 100, for sale to the public at 102, of $13,000,000 principal amount of First Mortgage Bonds, 3¾% Series, due May 1, 1964, and of the issue and sale of 60,000 shares of 5½% Cumulative Preferred Stock with a par value of $100 per share, 29,276 shares of such Stock to be issued to underwriters and 30,724 shares thereof to be issued to certain associate companies of Applicant (18,073 shares to Associated Power Corporation, and 12,651 shares to General Utility Investors Corporation) in exchange for 5% Cumulative Preferred Stock of Applicant now held by such associate companies, and by such associate companies to be sold to the same group of underwriters, such underwriters to pay 96 for all such 5½% Preferred and to sell the same to the public at 100; a hearing on said Application having been held [1] after appropriate notice; the record in this matter having been examined, and the Commission having made its Findings herein;

*It is ordered*, That the issuance and sale of such Bonds and Preferred Stock be, and the same hereby are, exempted from the provisions of Section 6 (a) of the Public Utility Holding Company Act of 1935, subject, however, to the following conditions:

(1) That such issue and sale of such Bonds and Preferred Stock shall be in compliance with the terms and conditions of, and for the purposes represented by, such Application, and in compliance with the terms and conditions imposed by the Order of the Public Service Commission of New York;

(2) That such exemption shall immediately terminate without further order of this Commission if at any time the authorization of the issue and sale of such Bonds and Preferred Stock by the Public Service Commission of New York shall be revoked or shall otherwise terminate;

(3) That within ten days after the issue and sale of such Bonds and Preferred Stock the Applicant shall file with this Commission its Certificate of Notification showing that the issue and sale of such securities have been effected in accordance with the terms and conditions of, and for the purposes represented by, said Application; and

(4) That within thirty days after the payment of all expenses incurred in connection with the issue and sale of such Bonds and Preferred Stock the Applicant shall file a detailed statement of such expenses showing the names of all persons or entities to whom such payments were made, the amount of such payments, and a detailed description of the services rendered in connection with the issue and sale of said Bonds and Preferred Stock.

By the Commission, Frank, C., not participating.

[File No. 46-150]

IN THE MATTER OF TRUSTEES UNDER PENSION TRUST AGREEMENT, GENERAL UTILITY INVESTORS CORPORATION, ASSOCIATED POWER CORPORATION, NY PA NJ UTILITIES COMPANY, ASSOCIATED GAS AND ELECTRIC CORPORATION, ASSOCIATED GAS AND ELECTRIC COMPANY

ORDER RELATIVE TO SALE OF PREFERRED STOCK

Trustees Under Pension Trust Agreement Dated December 14, 1937, a subsidiary company of Associated Gas and Electric Company, a registered holding company, having filed an Application, pursuant to Section 12 (d) of the Public Utility Holding Company Act of 1935, to sell 2500 shares of 5% Cumulative Preferred Stock, $100 par, of New York State Electric & Gas Corporation, an associate company, to Associated Power Corporation, an associate company; and Associated Power Corporation having filed an Application, pursuant to Section 10 (a) (1) of said Act, to acquire such shares; and Associated Power Corporation and General Utility Investors Corporation having filed an Application to acquire 30,724 shares of 5½% Cumulative Preferred Stock, $100 par, of New York State Electric & Gas Corporation, such shares to be issued by that corporation in exchange for 33,796 shares of its 5% Cumulative Preferred Stock, $100 par, now outstanding;

It appearing that Associated Power Corporation and General Utility Investors Corporation intend to sell such 5½% Preferred Stock to underwriters to be sold to the public, and to pay the proceeds of such sale, together with a small balance aggregating in all $3,000,000, in settlement of alleged debts to their parent company, NY PA NJ Utilities Company, a registered holding company, which intends to pay such sum in settlement of alleged debts to its parent company, Associated Gas and Electric Corporation, a registered holding company, which intends to use such funds in making a down payment to the Treasury Department of the United States in settlement of claims for income taxes for the years 1927 to 1933, inclusive, against Associated Gas and Electric Company, a registered holding company, which is the parent of Associated Gas and Electric Corporation, and against various companies in the Associated Gas and Electric Company holding-company system, and that Associated Gas and Electric Corporation intends to make the remaining payments on such tax settlement, which aggregate $5,700,000;

It appearing that the state of accounts between New York State Electric & Gas Corporation and Associated Power Corporation is doubtful, and that the validity of the alleged debts from General Utility Investors Corporation and Associated Power Corporation to NY PA NJ Utilities Company, and from NY PA NJ Utilities Company to Associated Gas and Electric Corporation is subject to serious questions both of law and of fact, and that the validity of other alleged debts from NY PA NJ Utilities Company to Associated Utilities Corporation, a subsidiary company of Associated Gas and Electric Corporation, against which other payments may be made which may eventually reach Associated Gas and Electric Corporation, is subject to similar questions of law and fact.

The Commission having instituted a proceeding, pursuant to Sections 12 (b), 12 (c) and 12 (f) of said Act, to determine whether the movement of funds between such companies respecting such tax payments and otherwise, and the failure of Associated Gas and Electric Company to contribute to such tax settlement involves the lending of credit by a registered holding company or subsidiary company thereof to other companies in the same holding-company system, or the payment of dividends not out of earned surplus on a security of one or more of such companies, or the partial retirement or redemption of a security of one or more of such companies, and whether such activities have detrimental results which necessitate the issuance by the Commission of an order pursuant to said Sections to prevent, condition, or circumscribe the payment of funds between such companies; and the Commission having ordered all proceedings herein mentioned to be joined for purposes of hearing;

A hearing on said proceedings having been held [1] after appropriate notice, the record in these matters having been examined, and the Commission having made its Findings herein;

*It is ordered*, That the sale of 2500 shares of 5% Cumulative Preferred Stock, $100 par, of New York State Electric & Gas Corporation, by Trustees Under Pension Trust Agreement, to Associated Power Corporation, and the acquisition of such shares by such corporation be, and the same hereby are, approved in accordance with the terms and conditions and for the purposes represented by said Applications.

*It is further ordered*, That the acquisition by Associated Power Corporation and General Utility Investors Corporation of 30,724 shares of 5½% Cumulative Preferred Stock of New York State Electric & Gas Corporation be, and the same hereby is, approved in accordance with the terms and conditions and for the purposes represented by said Applications.

*It is further ordered*, Pursuant to Sections 12 (b), 12 (c) and 12 (f) of the Public Utility Holding Company Act of 1935, and as a condition to the issuance under Sections 10 (a) (1) and 12 (d) of said Act of the permissive orders herein contained, that subsequent to the payment of $3,000,000 by Associated Power Corporation and General Utility Investors Corporation to NY PA NJ, and by NY PA NJ to Associated Gas and Electric Corporation, and by Associated Gas and Electric Corporation to the Treasury Department (which payments are not forbidden by this order), such companies and Associated Gas and Electric Company make adjustments of accounts, limit payments on such accounts, and furnish to the Commission reports and information as hereinafter specified:

(1) Associated Power Corporation, or the then owner of said open account indebtedness, shall cancel $4,410,000 of open account indebtedness due from New York State Electric & Gas Corporation.

(2) NY PA NJ Utilities Company is to cancel $4,410,000 of convertible obligations due from Associated Power Corporation.

(3) General Utility Investors Corporation shall make no payments which will reduce the principal of its convertible obligations held by NY PA NJ Utilities Company to less than $21,150,000, and shall not increase the rate of interest thereon, and shall make no payments which will reduce its open account indebtedness to NY PA NJ Utilities Company below $1,000,000.

(4) Associated Power Corporation shall make no payments which will reduce the principal of its convertible obligations held by NY PA NJ Utilities Company to less than $340,000 (which is the remaining amount due thereon after the cancellation mentioned in paragraph two above), and shall not reduce its open account indebtedness to NY PA NJ Utilities Company below $300,000.

(5) NY PA NJ Utilities Company shall make no payments which will reduce the principal of its convertible obligations held by Associated Gas and Electric Corporation to less than $202,000,000, shall not increase the rate of interest due on said convertible obligations, and shall not reduce its open account indebtedness with Associated Utilities Corporation below $24,000,000.

(6) The following information shall be furnished promptly:

(a) Transcript of open accounts between New York State Electric & Gas Corporation and constituent companies, and Associated Power, Corporation and predecessors.

(b) Transcript of open account between General Utility Investors Corporation and NY PA NJ Utilities Company, and detail of all transactions which resulted in the creation of the convertible obligation between such companies.

(c) Transcript of open account between Associated Power Corporation and NY PA NJ Utilities Company and predecessors, and detail of all transactions which resulted in the creation of the convertible obligation between such companies.

(d) Transcript of open account between NY PA NJ Utilities Company and predecessors, and between Associated Utilities Corporation and predecessors, and detail of all transactions which resulted in the creation of the convertible obligation between NY PA NJ Utilities Company and Associated Gas and Electric Corporation.

(7) The disposition of the accounting entries and the adjustment thereof, and the final settlement of intercorporate accounts between the companies herein mentioned, all arising from the tax settlement, intercorporate payments in connection therewith, and prior intercorporate credits or payments on account of the estimated tax liabilities of individual companies, shall be subject to the order of the Commission to be entered in this cause pursuant to jurisdiction retained herein after notice to the abovementioned companies and opportunity for hearing.

(8) The various companies herein mentioned have leave to apply to this Commission for modification, in particular instances, after notice and hearing, of the order herein.

Jurisdiction is retained for the issuance pursuant to the Public Utility Holding Company Act of 1935 of further orders modifying or supplementing this order, but not affecting the validity of the issuance or sale of such 5½% preferred stock.

*It is further ordered*, That, within ten days of the doing and performing of any of the acts permitted or required by this order, the companies file a report with this Commission of the details of such transactions, and showing that such transactions have been effected in accordance with the terms and conditions of this order.

By the Commission, Frank, C., not participating.

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission, held at its office in the City of Washington, D. C., on the 1st day of July, A. D. 1939.

[File 1-2431]

IN THE MATTER OF THE REGISTRATION OF ALLGEMEINE ELEKTRICITÄTS GESELLSCHAFT 20-YEAR 7% SINKING FUND GOLD DEBENTURES DUE 1945, 15-YEAR 6½% SINKING FUND GOLD DEBENTURES DUE 1940, AND 20-YEAR 6% SINKING FUND GOLD DEBENTURES DUE 1948

I

It appearing to the Commission,

That the Allgemeine Elektricitäts Gesellschaft, a corporation organized under the laws of Germany, is the issuer of 20-year 7% Sinking Fund Gold Debentures due 1945, 15-year 6½% Sinking Fund Gold Debentures due 1940, and 20-year 6% Sinking Fund Gold Debentures due 1948, and

That said Allgemeine Elektricitäts Gesellschaft registered such securities on the New York Stock Exchange, a national securities exchange, by filing on or about February 11, 1936, an application on Form 21 with the said exchange and with the Commission, pursuant to Section 12 (b) of the Securities Exchange Act of 1934, as amended, and pursuant to Rule X-12B-1, as amended, formerly designated as Rule JB-1, promulgated by the Commission thereunder; and

That pursuant to Section 13 (a) of the said Securities Exchange Act of 1934, as amended, and Rules X-13A-1 and X-13A-2, formerly designated Rules KA-1 and KA-2 respectively, promulgated by the Commission thereunder, said Allgemeine Elektricitäts Gesellschaft filed on or about September 7, 1937, its annual report on Form 21-K for the fiscal year ended September 30, 1936, and on or about April 29, 1938, its annual report on Form 21-K for the fiscal year ended September 30, 1937; and

That said Rule X-13A-1 did and does require that an annual report for each issuer of a security registered on a national securities exchange, shall be filed on the appropriate form prescribed therefor; and

That said Rule X-13A-2 did and does prescribe Form 21-K as the annual report form to be used for the annual reports of nationals of a foreign country, other than a North American country or Cuba, with respect to bonds or other evidences of indebtedness.

II

The Commission having reason to believe that,

(a) The Allgemeine Elektricitäts Gesellschaft has failed to comply with said Section 13 (a) and the Rules and Regulations promulgated thereunder in that the annual reports filed by it for the years ended September 30, 1936, and September 30, 1937,

[1] 4 F.R. 2350 DI.

[1] 4 F.R. 2412 DI.

(1) Fail to furnish the information required by Item 4 of Form 21–K with respect to each issue of funded debt of the registrant and its subsidiaries, and

(2) Do not contain a signature paragraph or signature as required by Form 21–K, and

(b) The said Allgemeine Elektricitäts Gesellschaft has also failed to file the information and documents required by said Rule X–13A–1 in that it has failed to file its annual report for the year ended September 30, 1938, on Form 21–K as prescribed by said Rule X–13A–2.

III

The Commission being of the opinion that pursuant to Section 19 (a) (2) of the said Securities Exchange Act of 1934, as amended, a hearing should be held to determine whether said Allgemeine Elektricitäts Gesellschaft has so failed to comply with said Section 13 (a) of said Rules and Regulations promulgated by the Commission thereunder, and if so, whether it is necessary or appropriate for the protection of investors to suspend for a period not exceeding twelve months or to withdraw the registration of said 20–year 7% Sinking Fund Gold Debentures due 1945, 15–year 6½% Sinking Fund Gold Debentures due 1940, and 20–year 6% Sinking Fund Gold Debentures due 1948, on the said New York Stock Exchange;

*It is ordered*, That a public hearing be held for such purpose before the officer of the Commission herein designated, beginning on the 16th day of August, 1939, at 10 o'clock, A. M. in Room 1102 at the office of the Securities and Exchange Commission, 1778 Pennsylvania Avenue NW., Washington, D. C., and to continue thereafter at such times and places as said officer may determine; and

*It is further ordered*, That for the purpose of such proceedings James G. Ewell, an officer of the Commission, be and he hereby is designated to administer oaths and affirmations, subpoena witnesses, compel their attendance, take testimony, and require the production of any books, papers, correspondence, memoranda or other records deemed relevant or material to the inquiry and to perform all other duties in connection therewith authorized by law.

By direction of the Commission.

IN THE MATTER OF THE REGISTRATION OF SIEMENS & HALSKE AKTIENGESELLSCHAFT, SIEMENS SCHUCKERTWERKE AKTIENGESELLSCHAFT TWENTY-FIVE YEAR 6½% SINKING FUND GOLD DEBENTURES DUE SEPTEMBER 1, 1951

I

It appearing to the Commission,

That Siemens & Halske Aktiengesellschaft and Siemens Schuckertwerke Aktiengesellschaft, corporations organized under the laws of Germany, are the issuers of Twenty-five year 6½% Sinking Fund Gold Debentures due September 1, 1951; and

That said Siemens & Halske Aktiengesellschaft and Siemens Schuckertwerke Aktiengesellschaft registered such security on the Boston Stock Exchange and the New York Stock Exchange, national securities exchanges, by filing on or about March 17, 1936, an application on Form 21 with the said exchanges and with the Commission, pursuant to Section 12 (b) of the Securities Exchange Act of 1934, as amended, and pursuant to Rule X–12B–1, as amended, formerly designated as Rule JB1, promulgated by the Commission thereunder; and

That pursuant to Section 13 (a) of the said Securities Exchange Act of 1934, as amended, and Rules X–13A–1 and X–13A–2, formerly designated Rules KA1 and KA2, respectively, promulgated by the Commission thereunder, said Siemens & Halske Aktiengesellschaft and Siemens Schuckertwerke Aktiengesellschaft filed on or about December 15, 1937, their annual report on Form 21–K for the fiscal year ended September 30, 1936, and on or about October 29, 1938, their annual report on Form 21–K for the fiscal year ended September 30, 1937; and

That said Rule X–13A–1, promulgated pursuant to Section 13 (a) of said Securities Exchange Act of 1934, as amended, did and does require that an annual report for each issuer of a security registered on a national securities exchange shall be filed on the appropriate form prescribed therefor; and

That said Rule X–13A–2, promulgated pursuant to Section 13 (a) of said Securities Exchange Act of 1934, as amended, did and does prescribe Form 21–K as the annual report form to be used for the annual reports of nationals of a foreign country, other than a North American country or Cuba, with respect to bonds or other evidences of indebtedness; and

II

That Siemens & Halske Aktiengesellschaft and Siemens Schuckertwerke Aktiengesellschaft have failed to comply with said Section 13 (a) and the rules and regulations promulgated thereunder, in that they have failed to file an annual report containing the information and documents required by said Rule X–13A–1, for the fiscal year ended September 30, 1938, on Form 21–K as prescribed by said Rule X–13A–2; and

III

The Commission being of the opinion that pursuant to Section 19 (a) (2) of the said Securities Exchange Act of 1934, as amended, a hearing should be held to determine whether said Siemens & Halske Aktiengesellschaft and Siemens Schuckertwerke Aktiengesellschaft have so failed to comply with said Section 13 (a) and said rules and regulations promulgated by the Commission thereunder, and if so whether it is necessary or appropriate for the protection of investors to suspend for a period not exceeding twelve months or to withdraw the registration of said 25-year 6½% Sinking Fund Gold Debentures due September 1, 1951, on the Boston Stock Exchange and the New York Stock Exchange;

*It is ordered*, That a hearing be held for such purpose before the officer of the Commission herein designated, beginning on the 15th day of August, 1939, at 10:00 o'clock A. M. in Room 1102, at the office of the Securities and Exchange Commission, 1778 Pennsylvania Avenue, N. W., Washington, D. C., and continuing thereafter at such times and places as said officer may determine; and

*It is further ordered*, That for the purpose of such proceeding James G. Ewell, an officer of the Commission, be and he hereby is designated to administer oaths and affirmations, subpoena witnesses, compel their attendance, take testimony, and require the production of any books, papers, correspondence, memoranda, or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law.

By direction of the Commission.

[File 1–2510]

IN THE MATTER OF THE REGISTRATION OF SIEMENS & HALSKE AKTIENGESELLSCHAFT PARTICIPATING DEBENTURES, SERIES A

It appearing to the Commission,

That Siemens & Halske Aktiengesellschaft, a corporation organized under the laws of Germany, is the issuer of Participating Debentures, Series A; and

That said Siemens & Halske Aktiengesellschaft registered such security on the Boston Stock Exchange, a national securities exchange, by filing on or about March 17, 1936, an application on Form 21 with the said exchange and with the Commission, pursuant to Section 12 (b) of the Securities Exchange Act of 1934, as amended, and pursuant to Rule X–12B–1, as amended, formerly designated as Rule JB1, promulgated by the Commission thereunder; and

That pursuant to Section 13 (a) of said Securities Exchange Act of 1934, as amended, and Rules X–13A–1 and X–13A–2, formerly designated as Rules KA1 and KA2, respectively, promulgated by the Commission thereunder, said Siemens & Halske Aktiengesellschaft filed on or about December 15, 1937, its annual report on Form 21–K for the fiscal year ended September 30, 1936, and on or about October 29, 1938, its annual report on Form 21–K for the fiscal year ended September 30, 1937; and

That said Rule X–13A–1 did and does require that an annual report for each issuer of a security registered on a national securities exchange shall be filed on the appropriate form prescribed therefor; and

That said Rule X–13A–2 did and does prescribe Form 21–K as the annual report form to be used for the annual reports of nationals of a foreign country, other than a North American country or Cuba, with respect to bonds or other evidences of indebtedness; and

II

The Commission having reason to believe,

That Siemens & Halske Aktiengesellschaft has failed to comply with said Section 13 (a) and the rules and regulations promulgated thereunder in that it has failed to file an annual report containing the information and documents required by said Rule X–13A–1, for the year ended September 30, 1938, on Form 21–K, as prescribed by Rule X–13A–2; and

III

The Commission being of the opinion that pursuant to Section 19 (a) (2) of the said Securities Exchange Act of 1934, as amended, a hearing should be held to determine whether said Siemens & Halske Aktiengesellschaft has so failed to comply with said Section 13 (a) and said rules and regulations promulgated by the Commission thereunder, and if so whether it is necessary or appropriate for the protection of investors to suspend for a period not exceeding twelve months or to withdraw the registration of said Participating Debentures, Series A, on the said Boston Stock Exchange;

*It is ordered*, That a hearing be held for such purpose before the officer of the Commission herein designated, beginning on the 14th day of August, 1939, at 10:00 A. M. in Room 1102, at the office of the Securities and Exchange Commission, 1778 Pennsylvania Avenue NW., Washington, D. C., and continuing thereafter at such times and places as said officer may determine; and

*It is further ordered*, That for the purpose of such proceeding, James G. Ewell, an officer of the Commission, be and he hereby is designated to administer oaths and affirmations, subpoena witnesses, compel their attendance, take testimony, and require the production of any books, papers, correspondence, memoranda, or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law.

By direction of the Commission.

IN THE MATTER OF SECURITIES CORPORATION GENERAL

NOTICE OF AND ORDER FOR HEARING

A declaration pursuant to section 7 of the Public Utility Holding Company Act of 1935, having been duly filed with this Commission by the above-named party;

*It is ordered*, That a hearing on such matter be held on July 11, 1939, at 10:00 o'clock in the forenoon of that day, at the Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C. On such day the hearing-room clerk in room 1102 will advise as to the room where such hearing will be held. At such hearing, if in respect of any declaration, cause shall be shown why such declaration shall become effective.

*It is further ordered*, That Willis E. Monty or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearing in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice to continue or postpone said hearing from time to time.

Notice of such hearing is hereby given to such declarant or applicant and to any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before July 10, 1939.

The matter concerned herewith is in regard to a declaration filed by Securities Corporation General, a subsidiary of a registered holding company, in regard to the extension on a demand basis of two promissory notes, one in the face amount of $50,000 which is due on July 11, 1939, and the other in the face amount of $35,000 which is due on August 23, 1939, both of which are held by the Guaranty Trust Company, New York, and bear interest at the rate of 1¾% per annum.

By the Commission.

IN THE MATTER OF THE DAKOTA POWER COMPANY, GENERAL PUBLIC UTILITIES, INC.

NOTICE OF AND ORDER FOR HEARING

A declaration pursuant to Section [illegible] of the Public Utility Holding Company Act of 1935 having been duly filed with this Commission by The Dakota Power Company, an application pursuant to Section 10 of the Public Utility Holding Company Act of 1935 having been filed with this Commission by General Public Utilities, Inc., and an application pursuant to Rule U–12D–1 having been duly filed with this Commission by General Public Utilities, Inc.;

*It is ordered*, That a hearing on such matters be held on July 19, 1939, at 10:00 o'clock in the forenoon of that day, at the Securities and Exchange Building, 1778 Pennsylvania Avenue, NW., Washington, D. C. On such day the hearing-room clerk in room 1102 will advise as to the room where such hearing will be held. At such hearing, if in respect of any declaration, cause shall be shown why such declaration shall become effective.

*It is further ordered*, That Charles S. Moore or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice to continue or postpone said hearing from time to time.

Notice of such hearing is hereby given to such declarant or applicant and to any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before July 15, 1939.

The matter concerned herewith is in regard to a declaration by The Dakota Power Company, a subsidiary of a registered holding company, pursuant to Section 7 regarding the issue and sale of $675,000 First Mortgage 4¼% serial bonds of which $658,000 are to be sold at par to the Equitable Life Assurance Society of United States and $17,000 to be sold at par to General Public Utilities, Inc., and the issue and sale to General Public Utilities, Inc., at par, $337,000 of 4% Unsecured Notes, due April 1, 1960; and

An application filed by General Public Utilities, Inc., pursuant to the provisions of Section 10 of the Public Utility Holding Company Act of 1935 for the acquisition of $17,000 of the First Mortgage 4¼% serial bonds proposed to be issued by its subsidiary The Dakota Power Company, and acquisition of $337,000 of 4% Unsecured Serial Notes, due April 1, 1960, proposed to be issued by its subsidiary, The Dakota Power Company; and

An application by General Public Utilities, Inc., pursuant to Rule U–12D–1 for the approval of the sale by General Public Utilities, Inc., to The Dakota Power Company of $266,500 of First Mortgage 7% bonds, due September 1, 1943, and $337,000 of 4% Unsecured Notes due April 1, 1956.

By the Commission.

## UNITED STATES CIVIL SERVICE COMMISSION.

### CONDITION OF THE APPORTIONMENT AT CLOSE OF BUSINESS FRIDAY, JUNE 30, 1939

*Important.* Although the apportioned classified civil service is by law located only in Washington, D. C., it nevertheless includes only about half of the Federal Civilian positions in the District of Columbia. Positions in local post offices, customs districts and other field services outside of the District of Columbia which are subject to the Civil Service Act are filled almost wholly by persons who are local residents of the general community in which the vacancies exist. It should be noted and understood that so long as a person occupies, by original appointment, a position in the apportioned service, the charge for his appointment continues to run against his State of original residence. Certifications of eligibles are first made from States which are in arrears.

| State | Number of positions to which entitled | Number of positions occupied |
|---|---|---|
| **IN ARREARS** | | |
| 1. Puerto Rico | 617 | 41 |
| 2. Hawaii | 147 | 17 |
| 3. California | 2,268 | 795 |
| 4. Alaska | 24 | 9 |
| 5. Texas | 2,327 | 919 |
| 6. Louisiana | 840 | 397 |
| 7. Michigan | 1,935 | 916 |
| 8. Arizona | 174 | 88 |
| 9. New Jersey | 1,615 | 863 |

## *The President*

### EXECUTIVE ORDER

AMENDING THE FOREIGN SERVICE REGULATIONS OF THE UNITED STATES

By virtue of and pursuant to the authority vested in me by section 1752 of the Revised Statutes of the United States (22 U.S.C. § 132), it is ordered that the Foreign Service Regulations of the United States be, and they are hereby, amended by prescribing the following as Chapter IV thereof:

CHAPTER IV—ADMINISTRATION

IV–1. *Transfer of office.*

(a) *Permanent transfer.* A permanent transfer of office shall be effected under the following circumstances:

1. Upon the relinquishment of office by a principal officer who has been transferred
2. Upon the assumption of charge by a new principal officer
3. Upon the death of the principal officer
4. Upon specific instructions from the Department of State.

(b) *Temporary transfer.* A temporary transfer of office shall be effected:

1. Upon the departure of a principal officer on simple leave of absence
2. Upon the departure of a principal officer on home leave of absence, or home leave under orders
3. Upon specific instructions from the Department of State.

IV–2. *Assumption of charge of office.*

(a) *Transfer of Government-owned property.* Upon assuming charge of an office, the diplomatic representative or consular officer shall request the delivery to him of all Government-owned property in the possession of his predecessor or the subordinate in charge, with the exception of the public funds, for which the outgoing officer is responsible to the Government. The officer relinquishing charge may transfer public funds to his successor or forward them to the Department of State for deposit in the Treasury (sec. V–23). If he transfers them to his successor, he shall take proper receipts to be transmitted with his accounts.

(b) *Forms executed upon assumption of charge.* Upon every transfer of office, whether permanent or temporary, the officer assuming charge and his predecessor, if present, shall jointly execute and sign Form No. 5, Transfer of Office Certificate. When a permanent transfer of office takes place, or when the principal officer departs on home leave of absence, the officer assuming charge shall transmit with Form No. 5 a survey of the Government-owned realty or a report on Government-leased property, as the case may be (secs. IV–6 and IV–8 (d)), and Inventory Transfer Form No. 298 (sec. IV–7).

IV–3. *Responsibility of officer in charge for Government-owned property.* The officer in charge shall observe and shall require his subordinates to observe the regulations governing the occupation, preservation, and maintenance of Government-owned Foreign Service property prescribed by the Secretary of State, and shall be held liable for any damage thereto occasioned by waste, negligence, or improper usage.

The officer in charge shall also be held responsible for the safeguarding of official records, archives, codes, and devices bearing the insignia of office.

IV–4. *Submission of recommendations and estimates in connection with acquisition and maintenance of Government-owned realty.* The officer in charge shall make such recommendations and estimates in connection with the acquisition and maintenance of Government-owned realty as are advisable or necessary.

IV–5. *Submission of recommendations in connection with the acquisition, maintenance, and disposition of Government-owned property, other than realty.* The officer in charge shall make recommendations to the Department of State in connection with the acquisition, maintenance, and disposition of Government-owned property, other than realty, at such times and in such manner as may be prescribed by the Department of State.

IV–6. *Survey of Government-owned realty.*

(a) *Survey to be submitted on transfer of office.* Whenever a permanent transfer of office takes place, or when the principal officer departs on home leave of absence, the officer assuming charge shall submit a report, in the form prescribed by the Department of State, on the condition of Government-owned buildings and grounds at the post, if there be any, noting therein any evidence of waste, negligence, or misuse of the property.

(b) *Survey to be submitted by Foreign Service inspectors.* Whenever a Foreign Service inspector inspects a post, he shall make a survey report to the Department of State.

IV–7. *Inventory of and reports on Government-owned property, other than realty.* A card inventory of all Government-owned property, other than realty, of a non-expendable and movable character, including records, archives, seals, and devices bearing the insignia of office, shall be maintained at each post in the Service. Whenever a permanent transfer of office takes place, or the principal officer departs on home leave of absence, the officer assuming charge and the officer relinquishing charge shall jointly check the personal property against the card inventory file and shall execute Form No. 298, which acknowledges the receipt of the personal property.

IV–8. *Leased Foreign Service quarters.*

(a) *Execution, renewal, and termination of leases.* The officer in charge is hereby authorized to execute a lease agreement for Foreign Service quarters in the name of the Secretary of State, provided the quarters selected, the rental to be paid therefor, and a draft of the proposed lease agreement shall have been approved by the Department of State.

In renewing or terminating a lease, an officer shall be guided by the rules and regulations prescribed by the Secretary of State.

(b) *Responsibility of officer in charge for leased quarters.* Subject to the terms of the lease agreement, the officer in charge shall observe and shall require his subordinates to observe the regulations prescribed by the Secretary of State for the occupation, preservation, and maintenance of leased Foreign Service property.

The officer in charge shall be held liable for any loss which the Government as lessee may sustain by reason of damage to leased property occasioned by waste, negligence, or improper usage.

(c) *Submission of recommendations and estimates in connection with the maintenance of leased quarters.* The officer in charge shall make such recommendations and estimates in connection with the maintenance of leased quarters as are in conformity with the terms of the lease agreement.

(d) *Report on leased quarters to be submitted on transfer of office and on visit of Foreign Service inspectors.* Whenever a permanent transfer of office takes place, or when the principal officer departs on home leave of absence, the officer assuming charge shall submit a report, in the form prescribed by the Department of State, on the condition of leased quarters, noting therein any evidence of waste, negligence, or misuse of the property. A similar report shall be submitted by a Foreign Service inspector whenever he inspects the post.

IV–9. *Restrictions on place of residence of diplomatic representatives and consular officers.*

(a) *Residence of diplomatic representative.* A diplomatic representative may establish a temporary residence at a place other than the seat of mission, provided that such residence is within the confines of the country to which he is accredited and at a point convenient to the mission, and provided that the office of the mission is opened daily by a secretary thereof. He shall report to the Department the location of such residence and the dates of his departure thereto and return therefrom.

(b) *Residence of consular officer.* A consular officer shall reside in the town or city in which his office is located, unless a special exemption has been made at a particular post. A consular officer shall not reside outside of his consular district.

IV–10. *Office hours.* Diplomatic and consular offices shall be kept open for the convenience of the public from 9:00 a. m. to 4:30 p. m. continuously from Monday to Friday, inclusive, and from 9:00 a. m. to 1:00 p. m. on Saturdays throughout the year except on days declared holidays by act of Congress or executive order. On national holidays of the country in which the office is located, the office shall be closed for the transaction of business of a routine nature, but shall be open to receive American citizens who may have urgent business with the office.

All officers and employees of the Foreign Service shall be required to work not less than seven hours a day from Monday to Friday, inclusive, and not less than four hours on Saturdays throughout the year except on holidays and during absence on annual or sick leave.

The Secretary of State may in his discretion order a rearrangement of office hours at particular posts where local custom, climatic conditions, or the exigencies of the Service warrant such rearrangement, but may not authorize a shorter working day for officers and employees of the Foreign Service.

IV–11. *Leaves of absence.* Officers and employees of the Foreign Service may avail themselves of statutory leave subject to regulations prescribed by the Secretary of State governing the granting of such leave.

IV–12. *Reports of leaves of absence.* The officer in charge shall report to the Department the absence from his post of any officer or employee, whether on leave or otherwise.

IV–13. *Submission of administrative reports.* The officer in charge shall submit such administrative reports as may be required by the Department of State. Instructions with reference to the time of submitting such reports and the form required shall be carefully observed. When printed forms are used, officers are enjoined to read carefully and to adhere strictly to any instructions appearing thereon.

IV–14. *Use of coat of arms of the United States.*

(a) *At missions.* The coat of arms of the mission shall be placed above the principal entrance of the diplomatic representative's residence, and the office of the mission, when these are separate from his residence, unless such procedure is in conflict with local custom.

(b) *At consulates.* The coat of arms of the consulate shall be placed over the entrance to the consulate unless specifically prohibited by the laws of the country.

(c) *At combined offices.* At combined offices only the coat of arms of the mission shall be displayed on the outside of the premises. If the consular section of the combined office is organized as a distinct unit occupying a suite of connecting rooms, the consular coat of arms may, in the discretion of the chief of mission, be displayed above the main entrance thereto from the waiting room or interior hallway.

IV–15. *Care and display of the flag.*

(a) *Care of flag.* Officers shall use and care for the flag of the United States in a manner indicative of deep respect for the national emblem. Every precaution shall be exercised for its preservation.

(b) *Display of flag.* The flag shall be flown over an American mission or consulate between the hours of sunrise and sunset on all American national holidays and flag days, on all holidays in the country in which the mission or consulate is located, and on such other occasions as the officer in charge may deem appropriate. When necessary, the flag may also be flown for purposes of protection.

IV–16. *Official mourning.* Upon the death of the President of the United States, the flag shall be flown at half-staff daily for one month.

Officers shall observe the usual symbols of mourning. They shall not entertain formally and shall excuse themselves from attendance at any formal social function. Mourning bands, black ties, or other mourning symbols may appropriately be worn.

*Cancellation of Regulations*

The following provisions of the Foreign Service Regulations of the United States are hereby canceled:

*Part I*

Sections V–6, VI–1, VI–2, VI–3, VI–5 to VI–11, inclusive, XVI–1, XVI–3, and XVII–1 to XVII–5, inclusive.

*Part II*

Sections III–57, III–59 to III–68, inclusive, III–79, VI–98, XXIV–429 to XXIV–433, inclusive, XXIV–464 to XXIV–470, inclusive, and XXIV–472 to XXIV–474, inclusive.

## EXECUTIVE ORDER

PARTIAL REVOCATION OF EXECUTIVE ORDER NO. 2608 OF MAY 4, 1917, AND REWITHDRAWAL FOR USE BY THE FOREST SERVICE AS AN ADDITION TO AN EXISTING ADMINISTRATIVE SITE

ALASKA

By virtue of and pursuant to the authority vested in me by the act of March 12, 1914, c. 37, 38 Stat. 305, and the act of June 25, 1910, c. 421, 36 Stat. 847, as amended by the act of August 24, 1912, c. 369, 37 Stat. 497, it is ordered as follows:

SECTION 1. Executive Order No. 2608 of May 4, 1917, temporarily withdrawing certain lands along the Alaska Railroad for townsite purposes, is hereby revoked as to the following-described land:

Beginning at point for Corner No. 1, U. S. Survey 608, Alaska, on line of mean high water, Kenai Lake, thence N. 78°56' E., 11.07 chains to Corner No. 5; S. 11°04' E., 3.26 chains to Corner No. 4; S. 19°21' E., 6.95 chains to right bank of Ptarmigan Creek; southwesterly, down stream along the right bank of Ptarmigan Creek to line of mean high water, Kenai Lake; northwesterly, along line of mean high water, Kenai Lake, to point for Corner No. 1, U. S. Survey 608, the place of beginning, containing 12.5 acres.

SECTION 2. Subject to the conditions expressed in the above-mentioned acts and to valid existing rights, the land de-

scribed in section 1 of this order is hereby temporarily withdrawn from settlement, location, sale, or entry and reserved for use of the Forest Service, Department of Agriculture, as an addition to an existing administrative site.

SECTION 3. The reservation made by section 2 of this order shall remain in force until revoked by the President or by act of Congress.

# *Rules, Regulations, Orders*

## TITLE 10—ARMY: WAR DEPARTMENT

### CHAPTER VI—ORGANIZED RESERVES

#### PART 63—REGULAR ARMY RESERVE[1]

§ 63.11 *Discharge before expiration of enlistment.* (a) When in an inactive status, a member of the Regular Army Reserve will not be discharged before the expiration of his term of enlistment except—

* * * * * * *

(2) By direction of the corps area commander—

* * * * * * *

(iii) To enlist in the Navy, Marine Corps, National Guard, or Coast Guard.

* * * * * * *

(4) To enlist in the Regular Army. See section 71.21.

* * * * * * *

(52 Stat. 221; 10 U.S.C. 343) [Par. 16a (1), AR 155-5, February 16, 1939, as amended by Sec. I, Cir. No. 43, WD, June 21, 1939]

### CHAPTER VII—PERSONNEL

#### PART 71—ENLISTMENT IN THE REGULAR ARMY[2]

§ 71.4 *Men with dependents, including married men.* (a) No man with a dependent, or dependents, in any of the following classes will be accepted for original enlistment in the Regular Army in time of peace:

(1) Lawful wife.

(2) Legitimate children, step children, or adopted children under twenty-one years of age, who are legally or in fact dependent upon the applicant for support.

(3) Mother, who is in fact dependent upon the applicant for her chief support.

(4) Any other persons who are in fact dependent upon the applicant for support.

(b) Marriage will not affect reenlistment of enlisted men in grades 1, 2, or 3.

(c) (1) Enlisted men except those in grades 1, 2, or 3, who marry without the written permission of the corps area commander after June 30, 1939, will be discharged without delay for the convenience of the Government and will not be reenlisted.

(2) Permission to marry may be granted in worthy cases to enlisted men in the fourth grade only who have completed eight or more years service in the Army. Such permission will be granted by corps area commanders and will be given in writing. Appropriate notation will be made under "Remarks" in the enlisted man's Service Record (WD, AGO Form No. 24), indicating the authority and date. For this purpose corps area commanders will have jurisdiction over all enlisted personnel stationed within their respective corps areas.

(d) Men who married in accordance with the conditions indicated in paragraphs (b) and (c) (2) above, but who have been reduced in grade or rating so that their status is below that specified may be reenlisted at the discretion of corps area commanders, due regard being had to the interests of the individual and the Government.

(e) The obtainment of a divorce will not render eligible for reenlistment an applicant who, under the provisions of these regulations was, at any time during his current or last enlistment, rendered ineligible for reenlistment.

(f) Marriage will not affect the reenlistment of the following classes of enlisted men now in the service:

(1) Those in the first three grades.

(2) Those who obtained permission to marry under the provisions of paragraph (c) (2) above.

(3) Those who can present to the corps area commander authentic evidence of having been granted military permission to marry prior to the effective date of these regulations, provided the enlisted man can maintain his dependents on his pay.

(4) Those who have previously been reenlisted as married men, even though military permission had not been obtained to marry, provided the enlisted man can maintain his dependents on his pay.

(g) Enlisted men of the Philippine Scouts and the 65th Infantry in Puerto Rico may be granted permission to marry, and their reenlistment may be authorized, under regulations prescribed by the commanding general, Philippine Department, and the commanding general, Puerto Rican Department, respectively, due consideration being given to the interests of the enlisted man and the Government.

(h) No man will be accepted for enlistment or reenlistment conditional upon any written, verbal, or implied promise that any portion of his pay will be allotted to a relative or other person. (41 Stat. 765; 10. U.S.C. 42) [Par. 14, AR 600-750, April 10, 1939, as amended by Sec. I, Cir. No. 43, WD, June 21, 1939]

§ 71.21 *Regular Army Reserve.* (a) When a member of the Regular Army Reserve, in an inactive status, applies for reenlistment in the Regular Army, he may be enlisted prior to the actual delivery of his certificate of discharge from the Regular Army Reserve, provided he meets the requirements for enlistment.

(b) Prior to enlistment the recruiting officer will inform the applicant that reenlistment in the Regular Army will officially constitute termination of his enlistment in the Regular Army Reserve, and that his certificate of discharge will be forwarded to him at a later date.

(c) Immediately after reenlistment in the Regular Army of a member of the Regular Army Reserve the recruiting officer will notify the corps area commander having custody of the Reservist's records informing him of the date of reenlistment, the organization or arm or service for which enlisted, and the station to which the enlisted man was forwarded.

(d) Upon receipt of notification of reenlistment in the Regular Army the corps area commander will cause the formal certificate of discharge to be prepared as of the date of reenlistment in the Regular Army and forwarded to the enlisted man through channels. (41 Stat. 765; 10 U.S.C. 42) [Par. 26, AR 600-750, April 10, 1939, as amended by Sec. I, Cir. No. 43, WD, June 21, 1939]

#### PART 74—ENLISTMENT OF FLYING CADETS[2]

§ 74.1 *Eligibility.*

* * * * * * *

(b) *Candidates must agree to serve.* Each applicant for appointment as a flying cadet will sign an agreement, with the consent of his parents or guardian, if a minor, by which he will agree—

(1) To enlist for 3 years as a flying cadet of the Air Corps, with the understanding that upon completion of the course of instruction, which normally will not require more than 1 year, he will be discharged as a flying cadet.

* * * * * * *

(41 Stat. 765; 10 U.S.C. 42) [Par. 1d, AR 615-160, July 20, 1938, as amended by Cir. No. 41, WD, June 19, 1939]

§ 74.5 *Training.* (a) The duration and scope of training will be as announced from time to time by the War Department.

* * * * * * *

(41 Stat. 765; 10 U.S.C. 42) [Par. 15a, AR 615-160, July 20, 1938, as amended by Cir. No. 41, WD, June 19, 1939]

[SEAL] E. S. ADAMS,
*Major General,*
*The Adjutant General.*

[F. R. Doc. 39-2340; Filed, July 6, 1939; 9:09 a. m.]

* These regulations amend the indicated sections and paragraphs of Part 74, Title 10, Code of Federal Regulations.

* §§ 501.1 to 501.21, inclusive, issued under the authority contained in Public, No. 111—76th Congress (H. R. 5324), Section 2.

† The source of §§ 501.1 to 501.21, inclusive, is regulations governing Property Improvement loans under section 2, Title I of the National Housing Act, as amended, effective July 1, 1939.

§ 501.1 *Citation.* The regulations in this part may be cited and referred to as "Regulations of the Federal Housing Administrator governing the insurance of qualified lending institutions against loss resulting from loans made under the provisions of Title I, Section 2, of the National Housing Act, as amended, effective July 1, 1939."

§ 501.2 *Definitions.* As used in the regulations in this part—

(a) The term "owner" includes, in addition to owners in fee, persons holding an equity under a mortgage, trust or contract.

(b) The term "note" includes a note, bond, mortgage, or other evidence of indebtedness.

(c) The term "payment" includes a deposit to an account or fund.

(d) The term "installment payment" includes that deposit to an account or fund which represents the partial repayment of an advance of credit.

(e) The term "loan" includes any loan, advance of credit, or purchase of an obligation representing a loan or advance of credit for the purpose of financing eligible repairs, alterations or improvements as authorized by the National Housing Act, as amended, effective July 1, 1939, and by the regulations in this part.

(f) The term "Administrator" means the Federal Housing Administrator.

(g) The term "borrower" means one who is an eligible owner or lessee of real property to be improved pursuant to the provisions of the Act and who applies for and receives an advance of credit in reliance upon the provisions of the Act.

(h) The term "Act" means the National Housing Act, as amended, effective July 1, 1939.

(i) The term "Contract of Insurance" includes all of the provisions of the regulations in this part and of the applicable provisions of the Act.

(j) The term "insured institution" means any bank, trust company, personal finance company, mortgage company, building and loan association, installment lending company or other such financial institution which the Administrator has found to be qualified by experience or facilities and has approved as eligible for credit insurance and to which he has issued a Contract of Insurance effective July 1, 1939.

§ 501.3 *Eligible notes.* Promissory notes in order to be eligible for insurance:

(a) Shall bear the genuine signature, as maker, of an owner of the real property to be improved, or of a lessee thereof

under a lease expiring not less than six calendar months after the maturity of the loan or advance of credit.

(b) Shall be in a form which is valid and enforceable in the jurisdiction in which they are issued.

(c) Shall be payable in equal monthly, semi-monthly, or weekly installments. The final installment may be slightly more or less than the other installments, subject to such exceptions as may be made by the Administrator. Notes may not provide for a first payment less than six days or more than two calendar months after the date of the note. However, if fifty-one percent or more of the income of the maker is derived directly from the sale of agricultural crops, commodities, or livestock produced by him, a note may be made payable in installments corresponding to income periods shown on the credit statement. In such cases, the first payment must be made within twelve months of the date of the note and at least one payment must be made during each calendar year thereafter and the proportion of total principal to be paid in later years must not exceed the proportion of total principal payable in earlier years.

(d) Shall contain a provision for acceleration of maturity, either automatic or at the option of the holder, in the event of default in the payment of any installment upon the due date thereof.

(e) Shall not have a final maturity in excess of three years and thirty-two days from the date thereof, except in the case of loans for the purpose of financing the building of new structures to be used in whole or in part for residential or agricultural purposes, in which event the final maturity of any such loan shall not be in excess of ten years and thirty-two days.

(f) May provide for a late charge, to be paid by the maker, not to exceed five cents (5¢) for each $1.00 of each installment more than fifteen days in arrears. In lieu of late charges, notes may provide for interest on past due installments at a rate not in excess of the contract rate in the jurisdiction in which the note is drawn. No late charge or interest on a past due installment may be accrued in excess of $5.00. The borrower must be billed for the penalties collected as such, and evidence of such billing must be in the file if claim is made under the Contract of Insurance.

(g) May be in a series provided each is of an equal amount as provided in this section and that each note indicates on its face that it is one of a series signed by the same maker.

§ 501.4 *Maximum loan.* (a) A loan shall not involve a principal amount, exclusive of financing charges to the borrower in excess of $2,500.

(b) No loan shall involve a principal amount outstanding at any one time, with respect to any one piece of property, in excess of $2,500 exclusive of financing charges to the borrower.

(c) One borrower may obtain any number of loans to improve any number of separate pieces of property, subject to the credit requirements contained in section 501.6.

§ 501.5 *Maximum permissible financing charges.* (a) The maximum permissible financing charge which may be paid by the borrower for interest, discount and fees of all kinds in connection with the transaction may not be in excess of an amount equivalent to $5.00 discount per $100 original face amount of a one-year note, to be paid in equal monthly installments, calculated from the date of the note; except that in the case of loans for the purpose of financing the building of new structures for use in whole or in part for residential purposes, the maximum permissible charge which may be paid by the borrower for interest, discount and fees of all kinds in connection with the transaction (subject to the provisions of Section 501.16) may not be in excess of an amount equivalent to $3.50 discount per $100 original face amount of a one-year note, to be paid in equal monthly installments, calculated from the date of the note. Such charges correctly based on tables of calculations issued by the Federal Housing Administrator are deemed to comply with this Section.

(b) If the insured institution in purchasing a note takes the maximum charge permitted by this section, but employs a "holdback" and does not advance the entire proceeds of the note to the seller, it shall calculate its financing charge on the amount advanced and credit to the account of the seller the difference between the financing charge calculated on the face amount of the note and the financing charge calculated on the amount advanced.

(c) The acceptance of a voluntary payment of one or more installments prior to due date shall not be construed as increasing the maximum permissible financing charge as provided in paragraph (a) of this section. However, if the entire balance outstanding on the loan is paid in advance the insured institution must make a rebate as follows:

(1) If the maximum permissible financing charge in connection with the transaction is in an amount equivalent to $5.00 discount as provided in paragraph (a) of this section, the insured institution shall make a rebate at a rate not less than 5% per annum of the amounts so paid in advance of their due dates. If a lesser charge has been taken, the rebate shall be at not less than a proportional rate.

(2) If the maximum permissible financing charge in connection with the transaction is in an amount equivalent to $3.50 discount as provided in paragraph (a) of this section, the insured institution shall make a rebate at a rate not less than 3½% per annum of the amounts so paid in advance of their due dates. If a lesser charge has been taken, the rebate shall be not less than a proportional rate.

(d) An increase in the ratio of the charge to the average amount outstanding on the debt over the maximum provided in this section, which increase results from the first payment falling due less than thirty days after the date of the note as provided in section 501.3 (c), shall not be deemed to be in conflict with this section.

§ 501.6 *Credits.* (a) The insured institution shall obtain a signed and dated Credit Statement-Application from the borrower, on a form approved by the Administrator. The Credit Statement-Application must, in the judgment of the insured institution, clearly show the borrower to be solvent, with reasonable ability to pay the obligation and in other respects a reasonable credit risk.

(b) A separate Credit Statement-Application is required in connection with each loan made or note purchased.

(c) An insured institution acting in good faith may rely upon the statements of the borrower who signs the Credit Statement-Application. The Administrator does not place upon the insured institution the burden of verifying the truth of any such statements. Even if such statements are investigated after the loan is made and found to be false, this will not affect in any way the eligibility of the note for insurance. However, any borrower making such false statement or misusing the funds, or any dealer, contractor, or lender who knowingly assists in such a violation, will be committing a Federal offense under the provisions of the National Housing Act. In all cases where the insured institution discovers a material misstatement in the Credit Statement-Application, or misuse of the funds, it must promptly report such a discovery to the Administrator.

(d) A loan shall not be made to a borrower who is delinquent at the time the loan is made, as to either principal or interest, with respect to an obligation owing to or insured by any department or agency of the Federal Government.

(e) The prior credit approval of the Administrator shall be obtained on all loans which increase the net amount outstanding, exclusive of financing charges, to any individual borrower to an amount in excess of $2,500 with respect to any obligation incurred pursuant to the provisions of Title I of the National Housing Act since July 1, 1939.

§ 501.7 *Eligible improvements.* (a) A loan must be for the purpose of financing eligible improvements within the United States, its Territories and Possessions, commenced on or after July 1, 1939 and prior to July 1, 1941, in reliance upon the credit facilities afforded by Title I of the National Housing Act as approved June 3, 1939.

(b) The proceeds of a loan shall be used only to finance alterations, repairs and improvements upon urban, suburban or rural real property (including

the restoration, rehabilitation, rebuilding and replacement of such improvements which have been damaged or destroyed by earthquake, conflagration, tornado, cyclone, flood or other catastrophe). For the purpose of this section the following classes of improvements are deemed to be eligible:

*Class 1.* The repair, alteration or improvement of an existing structure, or the real property in connection therewith. For the purposes of this section, the term "existing structure" means a completed building that has or had a distinctive functional use. The alteration, repair or improvement shall not involve the completion of an unfinished structure.

*Class 2.* The erection of new structures, exclusive of those used wholly or in part for residential purposes, if;

(i) Used wholly for non-agricultural purposes;

(ii) Used wholly or in part for agricultural purposes.

*Class 3.* The erection of new structures used wholly or in part for residential purposes.

(c) The proceeds of a Class 2 or Class 3 loan shall not be used to supplement another loan or advance of credit not reported for insurance, the payment of which is secured by a prior lien created in connection with the building of such new structure.

(d) The proceeds of a loan shall not be used for the purchase of land.

(e) The proceeds of a loan may be used to pay for architectural and engineering services performed in connection with eligible alterations, repairs or improvements financed in accordance with the regulations in this part.

(f) The proceeds of a loan shall not be used for the purpose of refinancing existing obligations not previously reported for insurance pursuant to the regulations in this part.

(g) Where any doubt exists as to the eligibility of a transaction which is to be financed with an insured loan, the facts of the case should be submitted to the Administrator for a decision and ruling.

§ 501.8 *Effect of prior mortgages insured or held by the Administrator.* If the applicant's Credit Statement-Application reveals that the property to be improved, altered or repaired with proceeds of a loan applied for pursuant to the terms of Title I of the National Housing Act, as amended, is already the subject of a mortgage held by the Administrator or insured by him under the provisions of Title II of the National Housing Act, the loan application shall be submitted to the Administrator for prior approval only as to credit and as to the purpose for which the proceeds of the loan applied for are to be used; provided, however, that no such approval shall be deemed to be binding upon the Administrator with respect to compliance with any other provision of the regulations in this part or the eligibility of the proposed alterations, repairs or improvements for financing under Title I of the National Housing Act, as amended.

§ 501.9 *Completion certificate; statements.* (a) An insured institution may not disburse the proceeds of a loan to one other than the borrower or to the borrower and another jointly until it has first:

(1) Obtained a Completion or Installation Certificate signed by the borrower in the following, or a substantially similar, form:

BORROWER'S COMPLETION CERTIFICATE

*Notice to Borrower*[1]*—Do not sign this Certificate until the work is satisfactorily completed*

Dated at _____
_____ 19__

I (we) the undersigned hereby certify that all articles and materials have been furnished and installed and the work satisfactorily completed on premises at _____, in accordance with my application for a loan dated _____ pursuant to the provisions of Title I of the National Housing Act, as amended.

(Signature) _____
_____

(2) Obtained a statement signed by the dealer, contractor or applicator in the following, or a substantially similar, form:

DEALER/CONTRACTOR/APPLICATOR STATEMENT

_____ 19__

To the _____ (lending institution) of _____.

In consideration of your accepting the note of _____ (Name of borrower(s) for $_____, dated _____, we (I) hereby certify that all articles and materials contracted for have been furnished and installed and the work fully completed, that the signature(s) on the note and Completion Certificate are genuine, that the Completion or Installation Certificate was signed after the articles and materials contracted for had been furnished and installed and the work fully completed, and we (I) guarantee that all bills will be paid both for labor and materials, and that no liens have or will be filed against the improved property in connection with this work other than those which have been or may be filed as collateral security for the payment of this note.

(Signature) _____
(Name)
_____
(Title)

(3) A written authorization signed by the borrower authorizing payment of the proceeds to the person to whom paid, in the following, or a substantially similar, form:

BORROWER'S AUTHORIZATION FORM

_____ 19__

I (we) hereby authorize and direct the _____ (financial institution) to pay $____ of the proceeds of my (our) note dated _____, for $____ to _____.

(Signature) _____
_____

(b) For the purpose of this section, if there are two or more eligible borrowers involved in the transaction only one signature is required on the Completion Certificate or Authorization Form.

§ 501.10 *Refinancing.* (a) New obligations to liquidate loans previously reported for insurance pursuant to Title I of the Act effective July 1, 1939 which may or may not include an additional amount advanced will be covered by insurance, provided:

(1) They meet the requirements of all applicable regulations;

(2) Are reported to the Administrator on the proper form within 31 days from date of execution;

(3) Have a maturity not in excess of the maximum permitted under the regulations in this part from the date of the original obligation;

(4) If an additional advance is made, the full unearned charge on the original note shall be refunded to the borrower;

(5) If no additional advance is made, the full unearned charge on the original note shall be refunded to the borrower, except that a handling charge not in excess of $2.00 may be assessed to the borrower;

(6) They are evidenced by notes which meet with the requirements of section 501.3 and other applicable regulations.

(b) An agreement to defer payments on a note previously reported for insurance under the regulations in this part without rewriting the note will not affect the insurance coverage on the loan provided:

(1) That such agreement is evidenced in writing;

(2) That payments shall not be deferred for more than five months from the due date of the last fully-paid installment;

(3) That such agreement shall not extend the final maturity of the obligation beyond the maturity date of the obligation as provided by its original terms;

(4) That if the lending institution assesses the borrower for the cost of such deferment, such charge may not be in excess of an equivalent amount of late charges as provided in section 501.3 (f).

§ 501.11 *Report of loans.* Eligible loans shall be reported on the proper form to the Federal Housing Administration, Washington, D. C., within 31 days from the date of the note, or the date upon which it was purchased, in order to be covered by the insurance. All loans refinanced shall likewise be reported within 31 days, on the proper form. In any case, the Administrator may, in his discretion, accept a late report.

§ 501.12 *Claims.* (a) Claim for reimbursement for loss on a qualified loan shall be made as provided in this section.

(b) (1) Claim for reimbursement for loss on a qualified loan may be made to the Administrator after default on any installment, provided demand has been made upon the debtor for the full unpaid balance.

[1] (Insured Institution please note) The wording "Notice to borrower—Do not sign this Certificate until the work is satisfactorily completed." must be in type size at least three times the size of the next largest type appearing upon the form of Borrower's Completion Certificate.

(2) For the purpose of this section, any payment received on an account, including payments on a judgment predicated thereon, shall be applied to the earliest unpaid installment, and whenever any installment is six months in arrears claim shall be made within 31 days.

(3) In the case of yearly installment notes, whenever an installment is twelve months in arrears claim must be made within 31 days thereafter.

(4) Upon presentation to him of the facts of a particular case within the allowable claim period prescribed in this section, the Administrator may, in his discretion, extend the time within which claim must be made.

(c) Subject to section 501.17 claim may be made only for loss sustained by the insured institution itself, and may include:

(1) Net unpaid amount of advance actually made or the actual purchase price of the note, whichever is the lesser;

(2) Uncollected earned interest (after default interest is not to be claimed at a rate to exceed 4% per annum and will be calculated to the date the claim is approved for payment);

(3) Uncollected court costs, including fees paid for issuing, serving and filing summons;

(4) Attorney's fees not exceeding 15% of the amount collected by the attorney on the defaulted note;

(5) Handling fee of $5 for each loan, if judgment is secured, plus 5% of amounts collected subsequent to return of unsatisfied property execution;

(6) An insured institution may not waive its claim against the borrower for attorney fees and subsequently call upon the Administrator for payment of such an item.

(d) Claim shall be made on a form provided by the Administrator, filled out completely and executed in duplicate by a duly qualified officer of the insured institution. If the regulations in this part have been complied with, payment of the loss will be made on audit of the claim and upon proper assignment to the United States of America, of the note upon which the loss occurred, together with any security taken to secure payment thereof. Any security or judgment taken must be assigned, and if any claim has been filed in bankruptcy, insolvency or probate proceedings, such claim shall likewise be assigned to the United States of America.

(e) Where a real estate mortgage, deed of trust, or a conditional sales contract, chattel mortgage or any other security device has been used to secure the payment of loans for eligible purposes, the insured institution may not both proceed against such security and also make claim under its Contract of Insurance, but shall elect which method it desires to pursue. If claim is made, such security device shall be assigned, in its entirety, to the United States of America. If the security taken is non-assignable, all rights in such security shall be exhausted by the insured institution or the claim against the Administrator reduced by the full face amount of the security taken before claim will be paid by the Administrator.

(f) The following form of assignment properly dated shall be used in assigning a note, judgment, real estate mortgage, deed of trust, conditional sales contract, chattel mortgage or any other security device in event of claim:

All right, title and interest of the undersigned is hereby assigned (without warranty, except that the note qualifies for insurance) to the United States of America.

§ 501.13 *New dwelling structure loans.* A loan for the purpose of financing the building of a new structure to be used wholly or in part for residential purposes:

(a) Shall not be in excess of $2,500, exclusive of financing charges to the borrower.

(b) Shall not have a maturity in excess of ten years and thirty-two days from the date of the note.

(c) Shall be expended in erecting a new structure on real estate owned by the borrower in fee simple, or held by the borrower under a lease expiring not less than six months after the maturity of the loan.

(d) Shall be secured by collateral security in the form of a duly recorded first mortgage, first deed of trust, or similar instrument which constitutes a first lien upon such fee simple or leasehold interest in the property upon which the new structure is to be built and all buildings, appurtenances and improvements thereon, except that in the case of institutions publicly supervised and prohibited by law or regulation from advancing an amount equal to the full loan insurable under Title I of the National Housing Act, the requirement relative to collateral security may be disregarded and the taking of such security is left to the discretion of the insured institution.

(e) Shall be made to a borrower who has established to the satisfaction of the insured institution that after such mortgage, deed of trust or similar instrument has been recorded, such fee simple or leasehold interest which is covered thereby will be free and clear of all liens other than such mortgage, deed of trust or security instrument, and that there will not be outstanding any other unpaid obligation contracted in connection with the loan transaction except obligations which are secured by property or collateral owned by the borrower independently of the property upon which the new structure or new structures as provided by these regulations in this part are to be built.

(f) Shall be protected by fire insurance coverage which shall be obtained and kept in force by the insured institution in an amount at least equal to the unpaid principal of the loan, naming the lending institution as beneficiary. In event of loss or damage, the proceeds of such insurance shall be payable to the lending institution and shall either be applied to the reduction of the unpaid balance of the loan or, if the borrower desires to obtain the use of such proceeds for the purpose of repairing or reconstructing the damaged structure, the lending institution may release such proceeds to the borrower for such purposes. In areas where it is impossible to obtain full fire insurance coverage, the maximum allowed in that area will be acceptable.

(g) The insured institution may rely upon the statements made by the borrower on his signed Certificate of Conformity with respect to the collateral security requirements of paragraphs (c), (d), and (e) of this section.

§ 501.14 *New dwelling structure requirements.* A new structure which is to be used in whole or in part for residential purposes shall conform with the following conditions:

(a) Such new structure shall be erected in conformity with all applicable laws, ordinances and regulations, including codes, zoning ordinances, and health regulations.

(b) *Property requirements*—(1) *Minimum land area for any one dwelling.* (i) Where public water supply and public sewer are available the minimum land area for any one dwelling shall be 4,000 square feet, except in those areas wherein there is seasonal occupancy (examples of such areas are summer camps, resort properties, and those properties not generally used as year-round residences), or wherein the existing lots have been platted prior to February 3, 1938, with smaller land areas, in which cases there is no minimum land area.

(ii) Where public water supply is available and private sewage disposal system (cesspool or septic tank) is used, or where public water supply is not available but a public sewer is available, the minimum land area shall be 7,500 square feet. This area may be reduced when the installation of the proposed private sewage disposal system is in conformity with state regulations, and the written approval or acceptance is received from the local health officer, but, in no event, shall such land area be less than 4,000 square feet.

(iii) Where neither a public sewer nor a public water supply is available the minimum land area shall be 20,000 square feet. This area may be reduced when the private water supply and the proposed private sanitary facilities (cesspool, septic tank or outdoor toilet) are in conformity with state regulations and written approval or acceptance is received from the local health officer, but in no event shall such land area be less than 4,000 square feet.

(c) *Structural requirements*—(1) *Foundations.* (i) All foundations shall be of masonry and shall be pier, wall or slab construction.

(ii) Foundations other than slab foundation shall be carried below the frost line prevailing in the neighborhood.

(iii) No wood construction shall be less than 18 inches from the ground in unexcavated portions, and 8 inches from the ground on the exterior, except where masonry slab foundation is employed, in which case exterior wood construction shall be at least 8 inches above the finished grade.

(2) *Minimum Floor Area* of the dwelling shall be 360 square feet. In the case of seasonal occupancy, the requirement with respect to minimum floor area need not apply.

(3) *Windows.* All habitable rooms, including bathrooms, shall be provided with one or more windows to permit adequate natural light and ventilation.

(4) *Water supply.* (i) When public water supply is available, connection shall be made to public water main.

(ii) When public water supply is not available, a private water supply shall be on the mortgaged property and may be a drilled, driven or dug well or a natural spring.

(5) *Sewage disposal.* (i) When a water supply (private or public) and public sewer are available, a bathroom shall be provided and running water shall be piped and connected to all plumbing fixtures and the kitchen sink and connections shall be made to public sewer main.

(ii) When public water supply is available, but a public sewer is not available, a bathroom shall be provided and running water shall be piped and connected to all plumbing fixtures and the kitchen sink *and a cesspool or septic tank shall be installed.*

(iii) When public water supply is not available, the requirements of (2) are not applicable.

(iv) Prior to the start of construction, the borrower shall furnish the insured institution a signed Certificate of Conformity, approved as to form or supplied by the Administrator, clearly stating the necessary information, from which the institution can determine whether there is conformity with the required conditions set forth in this section. The insured institution may rely upon the statements made by the borrower on his signed Certificate of Conformity, with the exception that if the written approval or acceptance of the proposed improvement by the local health officer is required as provided in this section, such written acceptance or approval shall be delivered to the insured institution and retained in its file on the transaction.

(v) The above conditions may be varied under special circumstances and in certain areas upon prior approval of the Administrator.

§ 501.15 *Prior approval; new dwelling structure loans.* (a) A loan for the purpose of financing the building of a new structure, for use in whole or in part for residential purposes, will be eligible for insurance only if prior to the start of construction the lending institution obtains from the local Insuring Office of the Federal Housing Administration a certificate signed by the State or District Director and the Chief Underwriter approving the loan in relation to the provisions in paragraph (b) of this section.

(b) Disapproval shall be given:

(1) If the specific site is acceptable for development with the proceeds of a mortgage insurable under the provisions of Title II of the National Housing Act; except Section 203 (d), or

(2) If the proposed new structure is not substantially similar in type and size to existing typical structures in the neighborhood, or

(3) If, at the time and in the community, such large numbers of new single-family dwellings have been or are being erected as to jeopardize the levels of values and rents in the community or impair the continued marketability of such dwellings.

(c) The approval provided for in paragraph (a) of this section shall not be binding upon the Administrator with respect to compliance with any other provisions of the regulations in this part.

§ 501.16 *Allowable new dwelling structure fees.* (a) In addition to the maximum permissible financing charge which may be paid by the borrower in connection with a loan for the purpose of financing the building of a new structure for use in whole or in part for residential purposes as provided in section 501.5, the following allowable costs or expenses if incurred by the insured institution in connection with the transaction may be collected from the borrower, provided such costs or expenses are not paid from the net proceeds advanced to the borrower:

(1) Recording fees.
(2) Title examination fees.
(3) Fire Insurance Premiums.
(4) Total actual appraisal-inspection fee not in excess of $15.00.

(b) The borrower may pay to the lending institution and the lending institution may accept from the borrower a sum which will be sufficient to pay the ground rents, if any, and the estimated taxes and special assessments for the period beginning on the date to which such ground rents, taxes, and assessments were last paid and ending on their due date. The handling of such funds for the accommodation of the borrower shall not be construed as increasing the maximum permissible financing charge provided in section 501.5.

§ 501.17 *Insurance reserve.* (a) Subject to the limitation that his total liability which may be outstanding at any one time plus the amount of claims paid in respect of all insurance heretofore and hereafter granted shall not exceed $100,000,000, the Administrator, in accordance with section 501.12, will reimburse any insured institution for losses sustained by it up to a total aggregate amount equal to 10% of the total amount advanced by it during the time its Contract of Insurance is in force, on all eligible obligations previously reported for insurance, taken or purchased by it on and after July 1, 1939, and held by it, or on which it remains liable.

(b) If obligations previously reported for insurance under Contracts of Insurance issued pursuant to the National Housing Act, as amended, effective July 1, 1939, are sold to another insured institution endorsed with or without recourse, the buying and selling institutions may agree, with the prior approval of the Administrator, to transfer all or any part of the insurance reserve standing to the credit of the selling institution, to the purchasing institution. Where the parties agree to transfer an insurance reserve in excess of 10% of the actual purchase price of the obligations involved, or in excess of 10% of the net unpaid original advance on the obligations involved, whichever is the lesser, the entire insurance reserve transferred may be used to pay only those claims arising out of defaults occurring in the transferred obligations. When the obligations so transferred have all been fully paid to the purchasing institution, it shall so notify the Administrator, and any insurance reserve remaining unused shall thereupon revert to the institution from which it was originally transferred.

(c) Where the parties agree to transfer an insurance reserve not in excess of 10% of the actual purchase price of the obligations involved, or not in excess of 10% of the net unpaid original advance on the obligations involved, whichever is the lesser, the insurance reserve so transferred will be credited to the general reserve of the purchasing institution in the absence of any agreement to the contrary between the purchasing and selling institutions.

(d) The transfer of insurance reserve in cases of merger or consolidation of two or more insured institutions, or of an insured with an uninsured institution, will be provided for by the Administrator in accordance with the facts of the particular case.

(e) In all cases involving the transfer of insured obligation, the reports required by section 501.11 must be filed and shall indicate the intent of the parties with regard to the transfer of the insurance reserve, and must show that no note to be transferred is delinquent

more than one calendar month at the time of such transfer.

(f) Where the notes are transferred without recourse, guarantee, or repurchase agreement and the reports do not indicate the intent of the parties, the insurance reserve will be transferred to the general reserve of the purchasing institution on the basis of 10% of the actual purchase price of the obligations involved, or 10% of the net unpaid original advance on the obligations involved, whichever is the lesser.

(g) Where the transfer of the obligations is with recourse or under a guarantee or purchase agreement and the required reports do not show the intent of the parties, no insurance reserve will be transferred.

(h) The selling price on the transfer of an insured note between insured institutions will not affect the insurance on the note. The calculation of insured loss will be based on the original transaction of the institution first reporting the loan for insurance.

(i) Where notes reported for insurance by one insured institution are pledged to another insured institution as security for a loan, an assignment of the pledging institution's insurance reserve may be made with the prior consent of the Administrator provided requests for such consent are accompanied by a signed agreement between the two institutions.

(j) Amounts which may be salvaged by the Administrator with respect to a loan in connection with which an institution has been reimbursed under its Contract of Insurance shall not be added to the insurance reserve remaining to the credit of such institution.

§ 501.18 *Insurance charge.* (a) Insured institutions shall pay to the Administrator an insurance charge equal to three-fourths of 1 per centum per annum of the net proceeds of any loan reported for insurance; *Provided, however,* That such insurance charge shall be equal to one-half of 1 per centum per annum of the net proceeds of any loan which is for the purpose of financing the construction of a new structure for use in whole or in part for residential purposes.

(b) The insurance charge so calculated shall be paid by check or draft to the order of the Federal Housing Administrator, within twenty-five days of the date the Administrator acknowledges receipt of the report of any such loan to the insured institution.

(c) When the proceeds of any loan are used to liquidate a loan previously reported for insurance under the regulations in this part, there shall be deducted from the amount of the insurance charge the pro-rata share of the insurance charge paid on the original obligation.

(d) There shall not be refunded any portion of the insurance charge paid by the insured institution with respect to any loan, unless it is subsequently found to have been in whole or in part ineligible for insurance, in which event the insurance charge paid with respect to the ineligible portion of the advance shall be refunded by the Administrator to the insured institution.

(e) The purchaser of an insured obligation shall not be required to pay the insurance charge provided in this section with respect to the insurance of any obligation transferred under the provisions of section 501.17 with respect to which an insurance charge has previously been paid by the seller, and no refund shall be made to the seller as to any part of the insurance charge previously paid with respect to any obligation so transferred. Any adjustments of the insurance charge paid with respect to the insurance of any obligation transferred shall be made between the purchaser and the seller.

(f) No part of the insurance charge paid by the insured institution shall be passed on to the borrower either directly or indirectly nor shall it increase the maximum permissible charge which may be paid by the borrower for interest, discount and fees of all kinds in connection with the transaction as provided in the regulations in this part.

(g) Subject to the other provisions of the regulations in this part, the insurance granted under Title I of the National Housing Act, as amended, shall be effective with respect to any loan from the date of the report thereof to the Administrator provided that the insurance charge with respect to such loan has been paid as required by this section.

§ 501.19 *Administrative reports and examination.* The Administrator, in his discretion, may at any time or from time to time call for a report from any institution on the delinquency status of the obligations held by such institution and reported for insurance, or call for such reports as he may deem to be necessary in connection with the regulations in this part, or he or his authorized representative may inspect the books or accounts of the lending institution as they pertain to the loans reported for insurance.

§ 501.20 *Amendments.* The regulations in this part may be amended by the Administrator at any time and from time to time, in whole or in part, but such amendment shall not affect the insurance with respect to any loan made or obligation purchased prior to the issuance of such amendment.

§ 501.21 *Effective date.* The regulations in this part are effective July 1, 1939 and govern the insurance of property improvement loans under Title I of the National Housing Act, as amended by act of Congress, approved June 3, 1939, and shall have the same force and effect as if included in and made a part of each Contract of Insurance issued on and after their effective date. The regulations in this part supersede all regulations heretofore in effect, including Special Regulations and Questions and Answers governing Section 6 loans.[1]

Issued at Washington, D. C., June 20, 1939.

STEWART MCDONALD,
*Federal Housing Administrator.*

RESTORATION AND REHABILITATION LOANS

REGULATIONS NO LONGER IN EFFECT

This is to certify that due to the repeal of Section 6, Title I of the National Housing Act (49 Stat. 1232, 1233, 50 Stat. 70; 12 U.S.C. Supp. IV 1706a) the Regulations covering restoration and rehabilitation loans,[2] effective April 23, 1937, are no longer in effect.

W. M. BRITTAIN.

## TITLE 26—INTERNAL REVENUE

## BUREAU OF INTERNAL REVENUE

[T. D. 4910]

PARTS 2 AND 465—TAX ON UNJUST ENRICHMENT UNDER THE REVENUE ACT OF 1936

*To Collectors of Internal Revenue and Others Concerned:*

Paragraph (6) under the heading of "Method II" in article 13 of Regulations 95[3] (section 2.13, Method II, paragraph (6), of Title 26, Code of Federal Regulations), and that article as made applicable to the Internal Revenue Code by Treasury Decision 4885[4] (Part 465, Subpart B, of such Title 26), is amended to read as follows:

"The difference between each aggregate selling price computed as provided in paragraph (1), above, and the deductions specified in paragraph (2), above, shall be divided by the total number of units determined as provided in paragraps (4). The resulting amount per unit shall be the margin per unit except that in the case of a taxable year during all of which the Federal excise tax in question was in effect, the following adjustment, made in the return, will ordinarily be allowed pursuant to section 501 (i): A deduction from the amount per unit, computed as provided in the first sentence of this paragraph, of an amount equal to the amount obtained by dividing by the total number of units determined as provided in paragraph (4), the reimbursement to purchasers made as specified in section 501 (f) (3) with respect to the articles expressed in terms of units determined in each case under (A), (B), or (C), respectively, of paragraph (5), and the remainder, if any, in such case shall be the margin per unit."

(This Treasury Decision is prescribed pursuant to the following sections of law: Sections 700 (e) (2), 702 (a) and 62 of the Internal Revenue Code (53 Stat. Part 1); sections 501 (e) (2), 503 (a) and 62 of the Revenue Act of 1936 (49 Stat. 1734, 1738, 1673; 26 U.S.C. Sup. IV, 345 (e) (2), 345b (a), 62).)

[SEAL] HAROLD N. GRAVES,
*Acting Commissioner of Internal Revenue.*

Approved, July 1, 1939.

HERBERT E. GASTON,
*Acting Secretary of the Treasury.*

## TITLE 31—MONEY AND FINANCE: TREASURY

## CHAPTER I—MONETARY OFFICES

[1939—Department Circular No. 1]

PART 129—VALUES OF FOREIGN MONEYS

JULY 1, 1939.

§ 129.2 *Calendar year 1939—(c) Quarter beginning July 1, 1939.* Pursuant to section 522, title IV, of the Tariff Act of 1930, reenacting section 25 of the act of August 27, 1894, as amended, the following estimates by the Director of the Mint of the values of foreign monetary units are hereby proclaimed to be the values of such units in terms of the money of account of the United States that are to be followed in estimating the value of all foreign merchandise exported to the United States during the quarter beginning July 1, 1939, expressed in any such foreign monetary units: *Provided, however,* That if no such value has been proclaimed, or if the value so proclaimed varies by 5 per centum or more from a value measured by the buying rate in the New York market at noon on the day of exportation, conversion shall be made at a value measured by such buying rate, as determined and certified by the Federal Reserve Bank of New York and published by the Secretary of the Treasury pursuant to the provisions of section 522, title IV, of the Tariff Act of 1930.

[SEAL] HERBERT E. GASTON,
*Acting Secretary of the Treasury.*

[1] 3 F.R. 407 DI.
[2] Appear as Part 511, CFR.
[3] 1 F.R. 1082.
[4] 4 F.R. 879 DI.

*Values of Foreign Monetary Units (at Par as Regards Gold Units; Nongold Units Have No Fixed Par With Gold)*

| Country | Monetary unit | Value in terms of U. S. money | Remarks |
|---|---|---|---|
| Argentine Republic | Peso | $1.6335 | Given valuation is of gold peso. Paper nominally convertible at 44% of face value. Conversion suspended Dec. 16, 1929. |
| Australia | Pound | 8.2397 | Control of gold stocks and exports authorized Dec. 17, 1929. |
| Belgium | Belga | .1695 | By decree of Mar. 31, 1936. One belga equals 5 Belgian francs. |
| Bolivia | Boliviano | .6180 | Conversion of notes into gold suspended Sept. 23, 1931. |
| Brazil | Milreis | .0606 | Based upon official rate for milreis in terms of the dollar as announced by the Bank of Brazil. Conversion of Stabilization-Office notes into gold suspended Nov. 22, 1930. |
| British Honduras | Dollar | 1.6631 | Conversion of notes suspended. |
| Bulgaria | Lev | .0122 | Exchange control established Oct. 15, 1931. |
| Canada | Dollar | 1.6631 | Embargo on export of gold, Oct. 19, 1931; redemption of Dominion notes in gold suspended Apr. 10, 1933. |
| Chile | Peso | .2060 | Given valuation is of gold peso. Gold pesos are received for conversion at the rate of 4 paper pesos for one gold peso. Conversion of notes suspended July 30, 1931. |
| China | Yuan | ------ | Silver standard abandoned by decree of Nov. 3, 1935, bank notes made legal tender under Currency Board control; exchange rate for British currency primarily fixed at about 1 s. 2⅛ d., or about 29⅛¢ U. S., per yuan. |
| Hong Kong | Dollar | ------ | Treasury notes and notes of the three banks of issue made legal tender by silver nationalization ordinance of Dec. 5, 1935; exchange fund created to control exchange rate. |
| Colombia | Peso | .5714 | Obligation to sell gold suspended Sept. 24, 1931. New gold content of .56424 grams of gold 9/10 fine established by monetary law of Nov. 19, 1938, effective Nov. 20, 1938. |
| Costa Rica | Colon | .7879 | Conversion of notes into gold suspended Sept. 18, 1914; exchange control established Jan. 16, 1932. |
| Cuba | Peso | 1.0000 | By law of May 25, 1934. |
| Czechoslovakia | Koruna | ------ | |
| Denmark | Krone | .4537 | Conversion of notes into gold suspended Sept. 29 1931. |
| Dominican Republic | Dollar | 1.6631 | U. S. money is principal circulating medium. |
| Ecuador | Sucre | .3386 | Conversion of notes into gold suspended Feb. 9, 1932. |
| Egypt | Pound (100 piasters) | 8.3692 | Conversion of notes into gold suspended Sept. 21, 1931. |
| Estonia | Kroon | .4537 | Conversion of notes into gold suspended June 28, 1933. |
| Finland | Markka | .0426 | Conversion of notes into gold suspended Oct. 12 1931. |
| France | Franc | ------ | Provisions of Monetary law of Oct. 1, 1936, providing for gold content of franc, superseded by decree of June 30, 1937, which stated that the gold content of the franc shall be fixed ultimately b a decree adopted by the Council of Ministers. Until issuance of such decree a stabilization fund shall regulate the relationship between the franc and foreign currencies. |
| Germany | Reichsmark | .4033 | Exchange control established July 13, 1931. |
| Great Britain | Pound Sterling | 8.2397 | Obligation to sell gold at legal monetary par suspended Sept. 21, 1931. |
| Greece | Drachma | .0220 | Conversion of notes into gold suspended Apr. 26, 1932. |
| Guatemala | Quetzal | 1.6631 | Conversion of notes into gold suspended Mar. 6, 1933. |
| Haiti | Gourde | .2000 | National bank notes redeemable on demand in U. S. dollars. |
| Honduras | Lempira | .8466 | Gold exports prohibited Mar. 27, 1931; lempira circulates as equivalent of half of U. S. dollar. |
| Hungary | Pengö | .2961 | Exchange control established July 17, 1931. |
| India (British) | Rupee | .6180 | Obligation to sell gold at legal monetary par suspended Sept. 21, 1931. |
| Indo-China | Piaster | ------ | Piaster pegged to French franc at the rate of 1 piaster=10 French francs; conversion of notes into gold suspended Oct. 2, 1936. |
| Ireland | Pound | 8.2397 | Conversion of notes into gold suspended Sept. 21, 1931. |
| Italy | Lira | .0526 | New gold content of 46.77 milligrams of fine gold per lira established by monetary law of Oct. 5, 1936. |
| Japan | Yen | .8440 | Embargo on gold exports Dec. 13, 1931. |
| Latvia | Lat | ------ | Currency pegged to sterling Sept. 28, 1936, at 2,522 lati = £100. |
| Liberia | Dollar | 1.6631 | British money is principal circulating medium. |
| Lithuania | Litas | .1693 | Free export of gold suspended Oct. 1, 1935. |
| Mexico | Peso | ------ | Decree of Aug. 28, 1936, left the monetary unit, the peso, to be later defined by law. |
| Netherlands and colonies | Guilder (florin) | .6806 | Suspension of convertibility of notes into gold and restrictions placed on free gold exports—Sept. 26 1936; gold export prohibition repealed by decree June 28, 1938. |
| Newfoundland | Dollar | 1.6631 | Newfoundland and Canadian notes legal tender. |
| New Zealand | Pound | 8.2397 | Conversion of notes into gold suspended and export of gold restricted, Aug. 5, 1914; exchange regulations Dec. 1931. |
| Nicaragua | Cordoba | 1.6633 | Embargo on gold exports Nov. 13, 1931. |
| Norway | Krone | .4537 | Conversion of notes into gold suspended Sept. 29, 1931. |

*Values of Foreign Monetary Units (at Par as Regards Gold Units; Nongold Units Have No Fixed Par With Gold)*—Continued

| Country | Monetary unit | Value in terms of U. S. money | Remarks |
|---|---|---|---|
| Panama | Balboa | $1.0000 | U. S. money is principal circulating medium. |
| Paraguay | Peso (Argentine) | 1.6335 | Paraguayan paper currency is used; exchange control established June 28, 1932. |
| Persia (Iran) | Rial | .0824 | Obligation to pay out gold deferred Mar. 13, 1932; exchange control established Mar. 1, 1936. |
| Peru | Sol | .4740 | Conversion of notes into gold suspended May 18, 1932. |
| Philippine Islands | Peso | .5000 | By act approved Mar 16, 1935. |
| Poland | Zloty | .1899 | Exchange control established Apr. 27, 1936. |
| Portugal | Escudo | .0749 | Gold exchange standard suspended Dec. 31, 1931. |
| Rumania | Leu | .0101 | Exchange control established May 18, 1932. |
| Salvador | Colon | .8466 | Conversion of notes into gold suspended Oct. 7, 1931. |

(Sec. 25, 28 Stat. 552; sec. 403, 42 Stat. 17; sec. 552, 42 Stat. 974; sec. 522, 46 Stat. 739; 31 U.S.C. 372.)

JULY 1, 1939.

## TITLE 46—SHIPPING

## BUREAU OF MARINE INSPECTION AND NAVIGATION

### CUSTOMS PORTS AUTHORIZED TO ISSUE MARINE DOCUMENTS

§ 600.1[1] *Customs ports authorized to issue marine documents* is amended to read as follows:

ATLANTIC AND GULF COASTS

Maine and New Hampshire (1):
- Eastport.
- Calais.
- Jonesport.
- Bar Harbor.
- Bangor.
- Belfast.
- Rockland.
- Bath.
- *Portland.
- Portsmouth.

Massachusetts (4):
- Gloucester.
- Salem.
- *Boston.
- Provincetown.
- New Bedford.
- Fall River.

Rhode Island (5):
- *Providence.
- Newport.

Connecticut (6):
- New London.
- Hartford.
- New Haven.
- *Bridgeport.

New York (10):
- *New York.
- Albany.
- Newark.
- Perth Amboy.

Philadelphia (11):
- *Philadelphia.
- Wilmington.

Maryland (13):
- *Baltimore.
- Annapolis.
- Crisfield.
- Cambridge.
- Washington.

Virginia (14):
- Alexandria.
- Reedville.
- *Newport News.
- *Norfolk.
- Cape Charles.

North Carolina (15):
- Elizabeth City.
- Washington. (See text below.)
- Beaufort.
- *Wilmington.

South Carolina (16):
- Georgetown.
- *Charleston.

Georgia (17):
- *Savannah.
- Brunswick.

Florida (18):
- Fernandina.
- Jacksonville.
- St. Augustine.
- Miami.
- Key West.
- *Tampa.
- Apalachicola.
- Pensacola.

Mobile (19):
- *Mobile.
- Biloxi.
- Gulfport.
- See also Rivers.

New Orleans (20):
- *New Orleans.
- See also Rivers.

Sabine (21):
- *Port Arthur.
- Beaumont.
- Lake Charles, La.

Galveston (22):
- *Galveston.
- Houston.

San Antonio (23):
- *San Antonio.
- Corpus Christi.

Puerto Rico (49):
- *San Juan.

Virgin Islands:
- *St. Thomas.

WESTERN RIVERS

New Orleans (20):
- *New Orleans.
- Baton Rouge.
- See also Gulf.

Tennessee (43):
- *Memphis.
- Nashville.
- Chattanooga.

Mobile (19):
- *Mobile.
- See also Gulf.

Kentucky (42):
- *Louisville.

St. Louis (45):
- *St. Louis.
- Kansas City.
- Omaha (46):
  - *Omaha.

Dakota (34):
- *Pembina.

Montana and Idaho (33):
- *Great Falls.

Iowa (44):
- *Des Moines.

Minnesota (35):
- *Minneapolis.

Duluth and Superior (36):
- *Duluth.
- See also Lakes.

Wisconsin (37):
- *Milwaukee.
- See also Lakes.

Chicago (39):
- *Chicago.
- Peoria.
- See also Lakes.

Indiana (40):
- *Indianapolis.
- Evansville.

Ohio (41):
- Cincinnati.
- See also Lakes.

Pittsburgh (12):
- *Pittsburgh.

NORTHERN LAKES

Vermont (2):
- *St. Albans.
- Burlington.

St. Lawrence (7):
- Rouses Point.
- *Ogdensburg.
- Cape Vincent.

Rochester (8):
- Oswego.
- *Rochester.

Buffalo (9):
- *Buffalo.

Ohio (41):
- Erie.
- *Cleveland.
- Sandusky.
- Toledo.
- See also Rivers.

Michigan (36):
- *Detroit.
- Port Huron.
- Sault Ste. Marie.
- Grand Haven.

Chicago (39):
- *Chicago.
- See also Rivers.

Wisconsin (37):
- *Milwaukee.
- See also Rivers.

Duluth and Superior (36):
- *Duluth.
- See also Rivers.

PACIFIC COAST

San Diego (25):
- *San Diego.

Los Angeles (27):
- *Los Angeles.
- Port San Luis.

San Francisco (28):
- *San Francisco-Oakland.
- Eureka.

Oregon (29):
- Marshfield.
- Astoria.
- *Portland.

Washington (30):
- Tacoma.
- *Seattle.
- Bellingham.
- Port Townsend.
- Port Angeles.
- Aberdeen.

Alaska (31):
- Ketchikan.
- Hyder.
- Wrangell.
- Petersburg.
- Eagle.
- *Juneau.
- Sitka.
- Skagway.
- Cordova.
- Fairbanks.

Hawaii (32):
- *Honolulu.

The grand divisions are printed in capitals, the district names in small capitals, with the numbers enclosed in parentheses, and the ports in roman with asterisks (*) to indicate the headquarters ports. Marine documents are not issued at the headquarters ports of San Antonio, Indianapolis, and St. Albans, nor in the districts of El Paso (24), Arizona (26), Colorado (47), and Utah and Nevada (48).

Marine documents may be issued at the port of Washington, N. C. Washington is a customs station, but not a port of entry.

A duplicate of each marine document issued to a vessel, together with the surrendered original, if there is one, should be sent to the headquarters port for review. All duplicates, surrendered originals, and copies of lost originals must be forwarded from the headquarters port to the Director of the Bureau of Marine Inspection and Navigation at the end of each day.

A license may be renewed by endorsement by the collector at the headquarters port or by any deputy collector within that particular district, but a notice of such renewal, Cat. No. 1302, must be sent to the port at which the license was issued, to the port of last previous renewal, and to the home port.

Additional ports will be designated as ports of documentation when this action is required by the exigencies of the service.

[Section 161 R. S. (5 U.S.C. 22); Sections 2 and 3 of the Act of July 5, 1884 (23 Stat. 118) (46 U.S.C. 2 and 3)]

[SEAL] J. M. JOHNSON,
*Acting Secretary of Commerce.*

JULY 1, 1939.

[F. R. Doc. 39-2334; Filed, July 5, 1939; 12:34 p. m.]

[1] This section number corresponds with that used for this regulation appearing in the codified regulations of the Bureau of Marine Inspection and Navigation, Department of Commerce, filed with the Codification Board, June 30, 1938.

# TITLE 47—TELECOMMUNICATION

## FEDERAL COMMUNICATIONS COMMISSION

## PART 34—UNIFORM SYSTEM OF ACCOUNTS FOR RADIOTELEGRAPH CARRIERS*†

TABLE OF CONTENTS

APPLICABILITY

Sec.
34.01-1 Carriers subject to this system of accounts.
34.01-2 Classification of carriers.
34.01-3 Determination of class.

DEFINITIONS

34.02-1 Restrictive use of certain terms.

INSTRUCTIONS—GENERAL

34.03-1 Classes of records.
34.03-2 Basis of entries in books of account.
34.03-3 Records supporting accounting entries.
34.03-4 Transactions with affiliates.
34.03-5 Summary accounts, subaccounts, additional clearing accounts, and temporary or experimental accounts.
34.03-6 Transferring balances from accounts previously maintained.
34.03-7 Charges to be just and reasonable.
34.03-8 Entries involving telephone, wire-telegraph, or ocean-cable service.
34.03-9 Sequence of accounts not indicative of reports required.
34.03-10 Research and development.
34.03-11 Interpretation of the prescribed accounting.
34.03-12 Interpretation of item lists.
34.03-13 Delayed items.
34.03-14 Unaudited items.
34.03-15 Unusual items.
34.03-16 Transactions involving foreign currency.
34.03-17 Apportioning amounts among accounts.
34.03-18 Transactions involving joint operations.

INSTRUCTIONS—DEPRECIATION ACCOUNTING

34.04-1 Classes of depreciable operated plant.
34.04-2 Computation of depreciation rates.
34.04-3 Depreciation charges.
34.04-4 Plant retired for causes not known to be in current operation.

INSTRUCTIONS FOR CLASS B CARRIERS

34.05-1 Primary operating revenue accounts for class B carriers.
34.05-2 Primary operating expense accounts for class B carriers.

REPORTING REQUIREMENTS

34.06-1 Provisions that require specific approval of the Commission before accounting is performed.
34.06-2 Provisions that require certain special reports to be filed.

BALANCE-SHEET ACCOUNTS

Instructions

34.10-1 Purpose of balance-sheet accounts.
34.10-2 Current assets.
34.10-3 Prepayments.
34.10-4 Deferred charges.
34.10-5 Current liabilities.
34.10-6 Long-term debt.
34.10-7 Book cost of securities owned.
34.10-8 Exchange of securities.
34.10-9 Capital stock.
34.10-10 Surplus.
34.10-11 Provisions for future settlements.
34.10-12 Deferred credits.
34.10-13 Discount, expense, and premium on capital stock.
34.10-14 Discount, expense, and premium on long-term debt.
34.10-15 Irrevocable trusts.
34.10-16 Contingent assets and liabilities.
34.10-17 Nominally issued securities.
34.10-99 Contemplated form of balance sheet.

Prescribed Accounts

NOTE: Number to the right of the decimal point is the account number.

*Communication Plant*

34.1000 Operated plant in carriers service.
34.1100 Operated plant leased to others.
34.1200 Improvements and replacements of operated plant leased from others.
34.1300 Plant under construction.
34.1400 Plant held for future communication use.
34.1510 Plant acquisition adjustments.
34.1515 Allowance for depreciation—Radiotelegraph plant.
34.1520 Allowance for amortization—Radiotelegraph plant.
34.1530 Telephone, wire-telegraph, and ocean-cable plant.
34.1535 Allowance for depreciation and amortization—Telephone, wire-telegraph, and ocean-cable plant.
34.1599 Foreign investment in communication plant.

*Investments and Funds*

34.1610 Miscellaneous physical property.
34.1615 Allowance for depreciation—Miscellaneous physical property.
34.1620 Investments in affiliates.
34.1629 Other investments.
34.1630 Debt-redemption funds.
34.1635 Employees' provident funds.
34.1640 Insurance funds.
34.1645 Miscellaneous funds held by trustees.
34.1659 Other miscellaneous funds.
34.1698 Amortized discount and premium on investment securities.
34.1699 Allowance for doubtful investments.

*Current Assets*

34.1710 Cash.
34.1715 Special cash deposits.
34.1720 Working cash advances.
34.1725 Temporary investments.
34.1730 Operating revenues receivable from users.
34.1742 Traffic settlements receivable from affiliates.
34.1749 Other receivables from affiliates.
34.1751 Notes receivable.
34.1752 Traffic settlements receivable.
34.1753 Matured interest receivable.
34.1754 Declared dividends receivable.
34.1755 Matured rents receivable.
34.1759 Other accounts receivable.
34.1765 Allowance for uncollectible receivables.
34.1770 Unmatured accrued receivables.
34.1775 Subscriptions to capital stock.
34.1780 Deposits on subscriptions to capital stock.
34.1785 Subscriptions to bonds.
34.1790 Deposits on subscriptions to bonds.
34.1795 Material and supplies.
34.1799 Other current assets.

*Prepayments*

34.1810 Prepaid insurance.
34.1815 Prepaid rents.
34.1820 Prepaid taxes.
34.1899 Other prepayments.

*Deferred Charges*

34.1910 Extraordinary maintenance, depreciation, and retirements.
34.1915 Capital stock expense.
34.1920 Long-term debt expense.
34.1925 Discount on capital stock.
34.1930 Unamortized discount on debt.
34.1935 Preliminary survey and investigation charges.
34.1940 Debit balances in clearing accounts.
34.1999 Other deferred charges.

*Long-term Debt*

34.2010 Bonds actually issued.
34.2015 Bonds reacquired.
34.2020 Bonds subscribed—Unissued.
34.2025 Receivers' and trustees' securities.
34.2030 Advances from affiliates.
34.2099 Other long-term debt.

*Current Liabilities*

34.2110 Matured long-term debt.
34.2115 Customers' deposits.
34.2122 Traffic settlements payable to affiliates.
34.2129 Other payables to affiliates.
34.2131 Notes payable.
34.2132 Traffic settlements payable.
34.2133 Matured interest payable.
34.2134 Declared dividends.
34.2135 Matured rents payable.
34.2139 Other accounts payable.
34.2155 Advance billings.
34.2160 Installment-plan receipts on purchase of capital stock.

*Liability Accruals*

34.2165 Interest accruals.
34.2170 Rent accruals.
34.2175 Tax accruals.
34.2180 Other accruals.
34.2199 Other current liabilities.

*Provisions for Future Settlements*

34.2210 Provisions for employees' pensions welfare.
34.2215 Provisions for self-carried insurance.
34.2220 Provisions for equalization of maintenance expenses.
34.2225 Provisions for depreciation and replacement of operated plant leased from others.
34.2230 Leased operated plant retired.
34.2299 Other provisions for future settlements.

*Deferred Credits*

34.2310 Unamortized premium on debt.
34.2315 Advances for construction.
34.2320 Credit balances in clearing accounts.
34.2399 Other deferred credits.

*Capital Stock*

34.2410 Capital stock issued.
34.2415 Capital stock reacquired.
34.2420 Capital stock subscribed—unissued.
34.2425 Obligations for stock conversion.

*Capital Surplus*

34.2510 Premiums and assessments on capital stock.
34.2515 Contributions of plant.
34.2599 Other capital surplus.

*Earned Surplus*

34.2610 Contractual reserves.
34.2615 Reserve against impairment of stated capital.
34.2620 Miscellaneous reserves.
34.2699 Unappropriated earned surplus.

OPERATED PLANT ACCOUNTS

Instructions

34.1-1 Purpose and content of operated plant accounts.
34.1-2 Acounting for plant acquisitions.
34.1-3 Components of construction cost.
34.1-4 Overhead construction costs.
34.1-5 Improvements and replacements of operated plant leased from others.
34.1-6 Operated plant retired.
34.1-7 Transfers of plant.
34.1-8 Continuous property record required.
34.1-99 Contemplated form of plant statement.

Prescribed Accounts

NOTE: Number to the right of the decimal point is the account number.

*Real Estate*

34.11 Land.
34.12 Land improvements.
34.13 Drainage, sewerage, gas, and water systems.
34.14 Buildings.

*Fixed and Land Station Aerial Systems and Lines*

34.21 Towers and masts.
34.22 Antenna systems.
34.26 Control lines.
34.27 Power-supply lines.

*Fixed and Land Station Transmission Equipment*

34.31 Electron-tube transmitter equipment.
34.32 Other transmitter equipment.
34.33 Cooling apparatus.
34.34 Receiver equipment.
34.36 Power supply and distribution equipment.
34.40 Control apparatus.
34.41 Equipment on customers premises.

*Furniture and Office Equipment*

34.51 Furniture and office equipment.

*Mobile Station Equipment*

34.61 Ship station equipment.
34.69 Other mobile station equipment.

*Work Equipment*

34.71 Vehicles and draft animals.
34.72 Shop equipment, tools, and implements.
34.73 Store and warehouse equipment.

*Intangibles*

34.81 Organization.
34.82 Franchises.
34.83 Patent rights.
34.84 Leaseholds.
34.89 Other intangibles.

*Other Plant Accounts*

34.91 Plant acquired — Undistributed charges.
34.92 Plant sold—Undistributed credits.

INCOME AND EARNED SURPLUS ACCOUNTS

Instructions

34.30-1 Purpose of income accounts.
34.30-2 Income from debt-redemption and other funds.
34.30-3 Rents includible in income accounts.
34.30-4 Disposition of balances in income accounts.
34.30-5 Purpose of earned surplus accounts.
34.30-6 Disposition of balances in earned surplus accounts.
34.30-99 Contemplated form of income and earned surplus statement.

Prescribed accounts

NOTE: Number to the right of the decimal point is the account number.

INCOME ACCOUNTS

*Ordinary Income—Communication*

34.3000 Operating revenues.

Operating revenue deductions

34.4000 Operating expenses.
34.4910 Depreciation.
34.4915 Amortization—Intangible operated plant.
34.4920 Amortization of plant acquisition adjustments.
34.4925 Extraordinary plan losses.
34.4931 Social security taxes—Operating.
34.4932 Other taxes—Operating.
34.4935 Uncollectible revenues.
34.4940 Rent for lease of operated plant.
34.4945 Telephone, wire-telegraph, and ocean-cable operating revenue deductions.
34.4950 Revenue-contract payments.
34.4999 Other operating revenue deductions.

*Other Communication Income*

34.5010 Income from operated plant leased to others.
34.5015 Income from telephone, wire-telegraph, and ocean-cable plant leased to others.
34.5020 Profit from general services, licenses, and royalties.
34.5089 Income from foreign operations.
34.5099 Other communication income.

*Ordinary Income—Noncommunication*

34.5110 Income from miscellaneous physical property.
34.5115 Income from merchandising, jobbing, and contracting.
34.5120 Dividend income.
34.5125 Interest income.
34.5135 Income from debt-redemption and other funds.
34.5140 Gain or loss on foreign currency exchange.
34.5199 Other noncommunication income.

*Deductions from Ordinary Income*

34.5210 Interest on long-term debt.
34.5215 Interest on indebtedness to affiliates.
34.5220 Amortization of debt discount.
34.5225 Interest charged to construction—Cr.
34.5230 Amortization of debt premium—Cr.
34.5235 Other interest charges.
34.5240 Taxes assumed on interest.
34.5245 Amortization of debt expense.
34.5250 Miscellaneous taxes.
34.5255 Amortization of plant acquisition adjustments.
34.5260 Revenue-contract payments.
34.5299 Other deductions from ordinary income.

*Extraordinary Income—Credits*

34.6110 Delayed income credits.
34.6199 Other extraordinary income credits.

*Extraordinary Income—Charges*

34.6210 Delayed income charges.
34.6299 Other extraordinary income charges.

*Deductions From Net Income*

34.7010 Taxes on net income.
34.7099 Other deductions from net income.

EARNED SURPLUS ACCOUNTS

*Earned Surplus—Credits*

34.8110 Balance transferred from income accounts.
34.8199 Miscellaneous credits to earned surplus.

*Earned Surplus—Charges*

34.8299 Miscellaneous charges to earned surplus.
34.8310 Contractual appropriations of earned surplus.
34.8315 Earned surplus employed in reacquisition of capital stock.
34.8320 Miscellaneous appropriations of earned surplus.
34.8399 Dividend appropriations of earned surplus.

OPERATING REVENUE ACCOUNTS

Instructions

34.31-1 Purpose of operating revenue accounts.
34.31-2 Basis of credits to operating revenue accounts.
34.31-3 Divisions of operating revenues.
34.31-4 Services furnished without direct charge.
34.31-99 Contemplated form of operating revenue statement.

Prescribed accounts

NOTE: Number to the right of the decimal point is the account number.

*Continental Fixed Radiotelegraph Revenues*

34.3113 Fixed message revenue—Continental.

*Insular Fixed Radiotelegraph Revenues*

34.3213 Fixed message revenue—Continental transmission.
34.3214 Fixed message revenue—Insular transmission.

*Foreign Fixed Radiotelegraph Revenues—Foreign-service Classification*

34.3313 Fixed message revenue—Continental transmission.
34.3315 Fixed message revenue—Foreign transmission.

*Foreign Fixed Radiotelegraph Revenues—Domestic-service Classification*

34.3413 Fixed message revenue—Continental transmission.
34.3416 Fixed message revenue—Foreign transmission.

*Marine Radiotelegraph Revenues*

34.3513 Marine message revenue—Continental transmission.
34.3517:1 Marine message revenue—Land station transmission.
34.3517:2 Marine message revenue—Ship station transmission.

*Other Radiotelegraph Transmission Revenues*

34.3618 Mobile (other than marine) message revenues.
34.3628 Facsimile or photogram service revenues.
34.3638 Broadcast-program service revenues.
34.3648 Telephone service revenues.
34.3698 Miscellaneous transmission revenues.

Foreign Exchange Adjustment

34.3709 Foreign exchange—Revenue differential.

*Nontransmission Revenues*

34.3818 Revenue from furnishing and servicing stations.
34.3828 Frequency-measuring revenue.
34.3838 Code-registration revenue.
34.3848 Other leased plant revenue.
34.3858 Errand-service revenue.
34.3898 Other nontransmission revenue.

*Other Telecommunication Revenues*

34.3918 Telephone revenue—Telephone systems.
34.3928 Wire-telegraph and ocean-cable revenue—Wire systems.

OPERATING EXPENSE ACCOUNTS

Instructions

34.41-1 Purpose of operating expense accounts.
34.41-2 Operating expenses applicable to leased plant.
34.41-3 Direct allocation of operating expenses to stations and city offices.
34.41-4 Expenses of holding or servicing departments.
34.41-5 Maintenance expenses.
34.41-6 Conducting-operations expenses.
34.41-7 Accounting for electron tubes.
34.41-99 Contemplated form of operating expense statement.

Prescribed Accounts

NOTE: Number to the right of the decimal point is the account number.

*Maintenance Expenses*

34.4110 Supervision of maintenance.
34.4115 Maintenance of real estate.
34.4120 Maintenance of fixed and land station aerial systems and lines.
34.4125 Maintenance of fixed and land station transmission equipment.
34.4130 Maintenance of furniture and office equipment.
34.4132 Electron-tube replacements.
34.4135 Maintenance of mobile station equipment.
34.4198 Maintenance-expense equalization.
34.4199 Other maintenance expenses.

---

* Promulgated under the authority contained in Sec. 220, 48 Stat. 1078; 47 U.S.C. 220.

† Adopted by the FCC on June 27, 1939, to become effective Jan. 1, 1940.

*Conducting-operations Expenses*

Sec.
34.4210 Supervision of operations.
34.4215 Operators' wages.
34.4216 Wages of station attendants.
34.4222 Wages of operating-office clerks.
34.4225 Operating power.
34.4230 Traffic damages.
34.4235 Traffic-damage expense.
34.4240 Telephone service—Message transmission.
34.4243 Rent for operating offices.
34.4245 Rent for other facilities.
34.4250 Advertising.
34.4255 Soliciting.
34.4260 Obtaining stock and commercial news.
34.4270 Commissions—Dr.
34.4275 Commissions—Cr.
34.4281 Messengers' wages.
34.4283 Messengers' uniform expense.
34.4289 Other messenger service expense.
34.4290 Other employees' wages.
34.4295 Supplies—Operating offices.
34.4298 Foreign exchange—Expense differential.
34.4299 Other conducting-operations expenses.

*Administrative Expenses*

34.4310 Salaries of general officers and executives.
34.4315 Expenses of general officers and executives.
34.4320 Salaries of general office employees.
34.4325 Expenses of general office employees.
34.4399 Other administrative expenses.

*General Expenses*

34.4410 Legal services.
34.4415 General services, licenses, and royalties—Dr.
34.4420 General services, licenses, and royalties—Cr.
34.4425 Insurance.
34.4430 Injuries and damages.
34.4435 Relief and pensions.
34.4445 Rest and lunch room expenses.
34.4450 Rent for offices.
34.4455 Other rents.
34.4460 Franchise requirements—Dr.
34.4465 Franchise requirements—Cr.
34.4470 Supplies.
34.4475 Training employees.
34.4480 House service.
34.4499 Other general expenses.

CLEARING ACCOUNTS

Instructions

34.90–1 Purpose of clearing accounts.
34.90–2 Disposition of balances in clearing accounts.

Prescribed accounts

NOTE: Number to the right of the decimal point is the account number.

34.9010 Research and development—Undistributed.
34.9015 Vehicle expense—Undistributed.
34.9020 Shop, tool, and implement expense—Undistributed.
34.9025 Plant-supervision expense—Undistributed.
34.9030 Supply expense—Undistributed.
34.9035 House-service expense—Undistributed.

RETIREMENT UNITS

34.1–6–1 List of units to be used in connection with the accounting provided in Sec. 34.1–6.

APPLICABILITY

§ 34.01–1 *Carriers subject to this system of accounts.* This system of accounts applies to carriers engaged primarily in furnishing radiotelegraph service. (See also Sec. 34.03–8.) *†

§ 34.01–2 *Classification of carriers.* (a) For the purpose of applying this system of accounts radiotelegraph carriers are divided into two classes, as follows:

*Class A.* Carriers having average annual operating revenues exceeding $100,000. Such carriers shall keep all of the accounts that are applicable to their affairs.

*Class B.* Carriers having average annual operating revenues exceeding $50,000, but not exceeding $100,000. Such carriers shall keep all of the accounts that are applicable to their affairs, except that their accounts for operating revenues and operating expenses may be kept under the condensed primary classifications provided in Secs. 34.05–1 and 34.05–2.

(b) No uniform system of accounts has been prescribed for carriers having average annual operating revenues not exceeding $50,000. However, such carriers may keep the accounts prescribed in this system of accounts.*†

§ 34.01–3 *Determination of class.* (a) The class to which any carrier belongs shall be determined by the average of its annual operating revenues for the three years immediately preceding the effective date of this system of accounts. If at the close of any subsequent calendar year the average of its annual operating revenues for the latest three years is greater than the amount applicable to the class in which the carrier has been previously includible, the accounts applicable to the higher class shall be adopted.

(b) Carriers not engaged in furnishing radiotelegraph service over the three-year period immediately preceding the effective date of this system of accounts shall estimate the amount of their annual operating revenues and keep the accounts applicable to carriers having actual revenues in the amount estimated.*†

DEFINITIONS

§ 34.02–1 *Restrictive use of certain terms.* When used in this system of accounts, unless otherwise indicated:

"Accounts" or "these accounts" means the accounts prescribed in "this system of accounts."

"Acquisition cost" means the amount of money actually paid (or the then current money value of any consideration other than money given) by the "carrier" for property, including the preliminary expenses incurred in connection with the acquisition.

"Act" or "the Act" means the Communications Act of 1934 as amended.

"Actually issued," as applied to securities issued or assumed by the "carrier," means (1) those securities that have been sold to *bona-fide* purchasers for a valuable consideration (including those issued in exchange for other securities or other property), (2) those that have been issued in accordance with contractual requirements directly to trustees of debt-redemption and other funds, and (3) those that have been issued as payments of dividends on stock.

"Actually outstanding," as applied to securities issued or assumed by the "carrier," means those securities that have been "actually issued" and are neither retired nor held by or for the "carrier"; provided, however, that securities held by trustees of debt-redemption and other funds shall be regarded and treated as actually outstanding.

"Affiliate" means (and "affiliated" relates to) a "person" that, directly or indirectly, through one or more intermediaries, "controls," is "controlled by," or is "under common control with," the "carrier."

"Amortization" means the gradual extinguishment of an amount in an account by prorating such amount over a fixed period.

"Book amount," as applied to securities issued or assumed by the "carrier," means (1) the amount duly authorized for inclusion in account 2410, "Capital stock issued," for stock having no par value, and (2) the "face amount" of all other securities.

"Book cost" means the amount at which property is recorded in an account without the deduction of amounts in related or other accounts.

"Carrier" means the accounting carrier.

"Class," as applied to depreciable plant, means that portion of the total plant that is represented by a single primary plant account.

"Commission" means the Federal Communications Commission.

"Communication" or "communication service" means the "transmission of writing, signs, signals, pictures, and sounds of all kinds, by the aid of wire, cable, or radio, between the points of origin and reception of such "transmission," including all instrumentalities, facilities, apparatus, and services (among other things, the receipt, forwarding, and delivery of communications) incidental to such "transmission."

"Continental communication" means "communication" when both the point of origin and point of destination are located within the "continental United States."

"Continental terminus" means a "fixed station" or a "land station" located within the "continental United States" that is used for direct communication with stations located without the "continental United States."

"Contitnental transmission" means "transmission" of "communication" within the "continental United States."

"Continental United States" means the several states of the United States, the District of Columbia, and the Territory of Alaska.

"Contingent asset" means an item representing a possible source of value to the "carrier" dependent upon the fulfillment of conditions regarded as uncertain.

"Contingent liability" means an item representing a possible source of obligation of the "carrier" dependent upon the fulfillment of conditions regarded as uncertain.

"Control" means (and the terms "controlling," "controlled by," and "under common control with" relate to) the direct or indirect possession of the power (including the veto power) to direct or to cause the direction of the management, important acts, and policies of a "person," whether such power is exercised through one or more intermediary persons, or alone, or in conjunction with, or pursuant to an agreement with, one or more other persons, and whether such power is established through a majority or a minority ownership or voting of securities, common directors, officers, or stockholders, voting trusts, holding trusts, affiliates, contract, or any other direct or indirect means. Control shall not be viewed as altered by a new status of any person that may be occasioned by proceedings in bankruptcy or by any situation of receivership, trusteeship, or fiduciary relationship resulting from proceedings of a like nature.

"Cost," as applied to plant, means the "original cost" of plant acquired from predecessors as substantially complete operating systems or operating units and the "acquisition cost" of all other plant. Except as applied to plant, "cost" means the amount of money actually paid (or the then current money value of any consideration other than money given) by the "carrier" for property or services.

"Cost of removal" means the cost of demolishing, dismantling, tearing down, or otherwise removing plant, including the cost of transportation and handling incidental thereto.

"Date of installation," as applied to plant acquired from predecessors as substantially complete operating systems or operating units, means the date at which such plant was first dedicated to public use. As applied to all other plant, the term means the date at which such plant was placed in "communication service" by the "carrier."

"Date of retirement" means the date at which plant is retired from "communication service."

"Debt expense" means all expenses incurred by or for the "carrier" in connection with the issuance and sale of evidences of debt (exclusive of the sale of reacquired securities), such as fees for drafting mortgages and trust deeds; fees and taxes for issuing or recording evidences of debt; cost of engraving and printing bonds, certificates of indebtedness, and other commercial paper; specific costs of obtaining governmental authority for issuance and filing notices thereunder; fees for legal services; fees and commissions paid underwriters, brokers, and salesmen for marketing such evidences of debt; fees and expenses of listing on exchanges; and other like costs.

"Delayed items" means items relating to transactions that occurred during a prior calendar year and require further accounting treatment for a true statement. It includes adjustments of errors in the operating revenue, operating-expense, and other income accounts for prior years.

"Depreciation," as applied to depreciable "operated plant," means the loss in "service value" not restored by current maintenance, incurred in connection with the consumption or prospective retirement of such plant in the course of service from causes known to be in current operation against which the carrier is not protected by insurance and the effect of which can be forecast with a reasonable approach to accuracy. Among the causes to be given consideration are wear and tear, decay, action of the elements, obsolescence, inadequacy, changes in the art, changes in demand, and requirements of public authorities.

"Discount," as applied to securities issued or assumed by the "carrier," means the excess of (1) the "book amount" of the securities over (2) the then current money value of the consideration received from their sale less the amount included therein as dividends or interest accrued.

"Face amount," as applied to securities issued or assumed by the "carrier," means the amount of principal set forth in the documents themselves.

"Fixed communication" means "communication" when both the point of origin and the point of destination are "fixed stations."

"Fixed communication revenue" means revenue derived from "fixed transmission."

"Fixed station" means a "station" not capable of being moved that is used for communication with one or more other "fixed stations."

"Fixed transmission" means "transmission" of "fixed communication."

"Foreign communication" means "communication" when either the point of origin or the point of destination is located without the "United States."

"Foreign communication revenue" means revenue derived from "foreign transmission."

"Foreign transmission" means "transmission" among foreign stations and between foreign stations and the "continental terminus" of "foreign communication."

"Includible" means properly includible under the provisions of "this system of accounts."

"Insular communication" means "communication" between the insular territories or possessions of the United States (excluding the Philippine Islands and the Canal Zone), and the "continental United States," or among the insular territories or possessions of the United States (excluding the Philippine Islands and the Canal Zone).

"Insular transmission" means "transmission" between insular stations and the "continental terminus" of "insular communication" or among insular stations.

"Investment advances" means advances, represented by notes or book accounts only, which it is mutually agreed or intended between the creditor and the debtor shall be settled by the issuance of capital stock or evidences of long-term debt, or shall not be subject to current settlement. Advances with respect to which amounts have been included in the current accounts for more than one year will be considered not subject to current settlement.

"Land station" means a "station" not capable of being moved that is used for communication with "mobile stations."

"Marine communication" means "communication" when either the point of origin or the point of destination is a "ship station."

"Marine transmission" means "transmission" among "ship stations" or between "ship stations" and "land stations."

"Matured" means due and payable (or receivable) as at a date not later than the first day following the date of the balance sheet.

"Minor items," as applied to plant, means those items of depreciable "operated plant" not designated as "retirement units" in Sec. 34.1–6–1.

"Mobile communication" means "communication" when either the point of origin or the point of destination is a "mobile station."

"Mobile communication revenue" means revenue derived from "mobile transmission."

"Mobile station" means a "station" capable of being moved and which ordinarily does move.

"Mobile transmission" means "transmission" of "mobile communication." It includes transmission of such communication between stations that do not communicate directly with "mobile stations."

"Net book cost," as applied to a specific portion of plant, means the book cost of that portion minus that part of the related depreciation (or amortization) allowance account that is assignable to that portion of the plant.

"Net salvage value" means the "salvage value" of plant retired after deducting the "cost of removal" incidental to its retirement.

"Nominally issued," as applied to securities issued or assumed by the "carrier," means those securities that have been signed, certified, or otherwise executed, and placed with the proper officer for sale and delivery, or pledged or otherwise placed in some special fund of the carrier, but have not been sold or issued directly to trustees of debt-redemption and other funds.

"Nominally outstanding," as applied to securities issued or assumed by the "carrier," means those "actually issued" securities that have been reacquired by or for the "carrier" under circumstances that prohibit considering them retired:

provided, however, that securities held by trustees of debt-redemption and other funds shall be regarded and treated as "actually outstanding."

"Operated plant" means physical plant used in radiotelegraph service together with associated intangible items.

"Original cost," as applied to plant, means the actual money cost of (or the then current money value of any consideration other than money given for) property at the time it was first dedicated to the public use, whether by the "carrier" or by any other "person."

"Person" means an individual, a corporation, a partnership, an association, a joint-stock company, a business trust, or any other organized group, or any receiver or trustee.

"Plant retired" means plant that has been removed, sold, abandoned, destroyed, or for any cause withdrawn from "communication service."

"Premium," as applied to securities issued or assumed by the "carrier," means the excess of (1) the then current money value of the consideration received from their sale, less the amount included therein for dividends or interest accrued, over (2) their "book amount."

"Primary account" means (1) any account the name or title of which appears in the table of contents of "this system of accounts" or (2) any additional clearing account or experimental account optionally maintained pursuant to the provisions of Sec. 34.03–5.

"Radiotelegraph plant" means plant used or useful in furnishing "radiotelegraph service."

"Radiotelegraph service" means "communication service" furnished by means of radio telegraph, including incidental services so intimately related to such service as to make impracticable the determination of the extent to which plant, income, revenue, or expenses are related to such incidental services.

"Replacement" means the construction of installation of plant in place of "plant retired."

"Retirement." (See "Plant retired.")

"Retirement units" means the items of depreciable "operated plant" listed in Sec. 34.1–6–1 of "this system of accounts."

"Salvage value" means the amount received for "plant retired", if sold, less any expenses incurred in connection with such sale or in preparing the property for sale; or, if retained, the amount at which the material recovered is chargeable to account 1795, "Material and supplies," or other appropriate account.

"Service life" means the period between the "date of installation" of plant and the "date of retirement" thereof.

"Service value means the difference between the "cost" of plant and the "net salvage value."

"Ship station" means a "station" located on a ship, vessel, or other water craft (except aircraft) used or capable of being used as a means of transportation on water, whether or not it is actually afloat.

"Station" means a complete transmitting or receiving system or operating unit at a particular location, used in "radiotelegraph service."

"Stock expense" means all expenses incurred by or for the "carrier" in connection with the issuance and sale of capital stock (exclusive of the sale of reacquired capital stock), such as fees and commissions paid to promoters, underwriters, brokers, and salesmen; fees for legal services; cost of soliciting subscriptions for capital stock, including fees, commissions, and advertising; specific costs of obtaining governmental authority for issuance and filing notices thereunder; fees and taxes for issuance of capital stock and listing on exchanges; and the cost of preparing, engraving, printing, issuing, and distributing prospectus and stock certificates.

"Straight-line method," as applied to depreciation accounting, means the plan under which the "service value" of depreciable "operated plant" is charged to depreciation, clearing, and other accounts and credited to the depreciation allowance account through equal charges (as nearly as may be) during its "service life."

"Subclass," as applied to depreciable plant, means that portion of a "class" of plant, preferably corresponding to one or more "subprimary" plant accounts, to the cost of which a specific percentage rate of depreciation is applied in accounting for "depreciation," which percentage rate differs from those that are applied with respect to other subclasses of the same "class" of such plant.

"Subprimary account" means any account, required or permitted by "this system of accounts," the balance in which if combined with the balance in other such accounts, subprimary to the same account, will produce the balance in that "primary account."

"System of accounts" or "this system of accounts" means the rules embodied in this part (Part 34, Title 47, of the Code of Federal Regulations, Telecommunication).

"Transmission" means the movement of "communication." It includes the receiving, forwarding, and delivery of communications.

"United States" means the several States and Territories, the District of Columbia, and the possessions of the United States, but does not include the Philippine Islands or the Canal Zone.*†

INSTRUCTIONS—GENERAL

§ 34.03–1 *Classes of records.* The records to be maintained in accordance with the provisions of this system of accounts are divided into two classes: viz, (1) books of account, containing the primary and subprimary accounts defined in Sec. 34.02–1, and (2) supporting records. (See also Secs. 34.03–2 and 34.03–3.)

NOTE: The periods for which these records are to be retained are set forth in Part 25, "Destruction of records," under Title 47 of the Code of Federal Regulations, Telecommunication.*†

§ 34.03–2 *Basis of entries in books of account.* (a) Amounts entered in the books of account shall be in denominations of United States currency. When subsidiary records are kept in which entries are made in foreign currencies, the conversion to United States currency for entry in the books of account shall be effected as prescribed in Sec. 34.03–16.

(b) The books of account shall be so maintained that when the full information is not recorded therein the entries shall contain sufficient reference to the supporting records to permit ready identification.

(c) Each carrier shall keep its books of account on a calendar-month basis so that for each month all transactions applicable thereto, as nearly as may be ascertained, will be entered in the books. The final entries for any month shall be made not later than sixty days after the last day of the month for which the accounts are stated, except that the period within which the final entries for the month of December shall be made may be extended to such date as will not interfere with the preparation and filing of annual reports as required by Section 219 of the Act.

(d) The books of account shall be maintained independently for each carrier and shall not be combined with those of any other person.*†

§ 34.03–3 *Records supporting accounting entries.* Supporting records shall be maintained in which shall be shown the full details concerning any entry in the books of account for which the details are not shown in the accounts themselves. The supporting records referred to herein include, in addition to accounting records in a limited, technical sense, all records such as minute books, stock books, reports, correspondence, memoranda, and any and all other records that would be useful in developing the history of or the facts regarding any transaction. The detail records shall be so filed as to be readily accessible for examination by representatives of this Commission.*†

§ 34.03–4 *Transactions with affiliates.* Each carrier shall so maintain its accounts and records as to be able to furnish accurately and expeditiously a statement of all transactions with affiliates. This statement shall show the general nature of the transactions, the amounts involved therein, and the amounts included in each account prescribed herein with respect to such transactions.*†

§ 34.03–5 *Summary accounts, subaccounts, additional clearing accounts, and temporary or experimental accounts.* (a) Accounts that are clearly summaries of other accounts or subaccounts provided for herein are not required to be kept in the carrier's books of account. However, such accounts may be opened in the general books for control purposes.

(b) All accounts kept shall conform in number and title to those prescribed herein, except that:

(1) Carriers may subdivide any of the accounts, provided such subdivisions do not impair the integrity of the prescribed accounts. The titles of all such subdivisions shall refer by number or title to the account or accounts of which they are subdivisions.

(2) Clearing accounts (in addition to those prescribed) and temporary or experimental accounts may be kept, provided such additional accounts do not impair the integrity of the prescribed accounts.

(3) Within ninety days from the effective date of this system of accounts, the carrier shall notify this Commission of the nature and purpose of (i) the subdivisions of the prescribed accounts, (ii) the temporary accounts, (iii) experimental accounts, and (iv) additional clearing accounts, opened under authority of this section. The carrier shall continue to keep the Commission informed of all additional accounts (or subaccounts) of these types opened after such effective date.

NOTE: Only one item need be reported for a group of subaccounts that differ from each other only with respect to geographical location or type of material.*†

§ 34.03–6 *Transferring balances from accounts previously maintained.* As at the effective date of this system of accounts, the several accounts prescribed herein shall be opened by transferring thereto the balances carried in the accounts previously maintained by the carrier. The carrier is authorized to make such subdivisions, reclassifications, or consolidations of these balances as are necessary to meet the requirements of this system of accounts. Entries that require the determination of cost by estimates shall be supported by records showing in complete detail the methods used in arriving at or computing the amounts thereof. Copies of journal entries recorded to effect the transfers, and a detailed statement of the methods used in arriving at or computing estimated costs, shall be filed with this Commission within ninety days from the dates of the entries.*†

§ 34.03–7 *Charges to be just and reasonable.* All charges to the accounts prescribed in this system of accounts for plant, operating revenues and operating expenses, and other operating revenue deductions, shall be just and reasonable, and any payments by the carrier in excess of such just and reasonable charges shall be included in account 5299, "Other deductions from ordinary income."*†

§ 34.03–8 *Entries involving telephone, wire-telegraph, or ocean-cable service.* (a) When radiotelegraph carriers are engaged also in furnishing telephone, wire-telegraph, or ocean-cable services through the utilization of distinctive portions of their facilities devoted exclusively or primarily to such services, they shall maintain their accounts for plant, operating revenues, operating expenses, and other items applicable to each such service in conformity with the respective effective rules governing carriers engaged primarily in furnishing such service.

(b) The cost of distinctive telephone, wire-telegraph, or ocean-cable plant shall be reported in account 1530, "Telephone, wire-telegraph, and ocean-cable plant." The amounts in the allowance accounts for depreciation and amortization of such plant shall be reported in account 1535, "Allowance for depreciation and amortization—Telephone, wire-telegraph, and ocean-cable plant." The amount of revenue derived from the operation of such plant shall be reported in account 3918, "Telephone revenue—Telephone systems", or account 3928, "Wire-telegraph and ocean-cable revenue—Wire systems", as appropriate. The amounts of operating revenue deductions applicable to the operation of such plant shall be reported in account 4945, "Telephone, wire-telegraph, and ocean-cable operating revenue deductions."

(c) When the major use of a particular portion of the carrier's plant is in radiotelegraph service, but the same facilities are used also in other types of communication service in a manner preventing the distinction of the physical elements associable with such services, the distribution of the operating revenues, operating expenses, and other deductions from operating revenues among the several classes of communication service where directly applicable shall be accomplished by subdivisions of the prescribed accounts, except that revenues derived from telephone service rendered through the use of such plant shall be included in account 3648, "Telephone service revenues." (See also Sec. 34.03–17.)*†

§ 34.03–9 *Sequence of accounts not indicative of reports required.* The order in which the accounts are presented in this system of accounts is not to be considered as necessarily indicative of the order in which they will be scheduled at all times in reports to this Commission. The sequence contemplated (until further notice) will be as indicated in the respective forms which immediately precede the texts for the several groups of accounts.*†

§ 34.03–10 *Research and development.* (a) The cost of preliminary surveys, plans, and investigations made for the purpose of determining the feasibility of contemplated major projects shall be charged to account 1935, "Preliminary survey and investigation charges," and subsequently cleared therefrom in accordance with the text of that account.

(b) The cost of research and development work such as laboratory expenses and other research items that can not be assigned to specific construction projects shall be charged to account 9010, "Research and development—Undistributed", and subsequently cleared therefrom in accordance with the text of that account.*†

§ 34.03–11 *Interpretation of the prescribed accounting.* Responsible accounting officials of the carrier shall submit all questions involving interpretation of the prescribed accounting to this Commission for consideration and decision.*†

§ 34.03–12 *Interpretation of item lists.* The lists of items following the texts of the several accounts are for the purpose of indicating the application of the prescribed accounting in specific cases. The lists are not to be considered as comprising all the items includible in the several accounts, but merely representative of them. Inasmuch as the same item frequently appears in more than one list, the appearance of an item in a list warrants the inclusion of such item in the account concerned only when the text of the account also indicates its inclusion. The proper entry in each instance must be determined by the text of the account.*†

§ 34.03–13 *Delayed items.* Delayed items shall be charged or credited to the same accounts that would have been charged or credited if the items had not been delayed; provided that, when the amount of a delayed item is relatively so large that its inclusion in the accounts for a single year would seriously distort the accounts for that year, the carrier shall charge or credit the amount to account 6210, "Delayed income charges," or account 6110, "Delayed income credits," as appropriate. Within thirty days from the dates of the entries the carrier shall file with this Commission a statement showing the full particulars concerning each such item, including the accounts and years that would have been affected had the item not been delayed.*†

§ 34.03–14 *Unaudited items.* (a) When, at the end of a calendar year or at such other time as a financial statement may be required by this Commission, it is known that a transaction has occurred which affects these accounts but the amount involved in the transaction and its effect upon the accounts cannot be accurately determined, the amount shall be estimated and such estimated amount included in the appropriate accounts. The carrier is not required to anticipate minor items that would not appreciably affect these accounts.

(b) If, during the interval between the date of initial estimate of the item and the date on which it is audited, a substantial difference from the initial estimate is determined, appropriate adjustment to cover such difference shall be made in the accounts for the month in which the difference is determined.

(c) When the item is audited, the necessary adjustment shall be made in the appropriate account for the month in which the item is audited.

(d) Any substantial difference determined in accordance with paragraph (b) or (c) shall be accounted for as provided in Sec. 34.03–13 or Sec. 34.03–15, as appropriate.*†

§ 34.03–15 *Unusual items.* When the amount of any unusual item includible in an operating revenue, operating ex-

pense, or other income account for a single month is relatively so large that its inclusion in the accounts for that month would seriously distort those accounts, it may be included in account 1999, "Other deferred charges", or account 2399, "Other deferred credits", as appropriate, and distributed in equal amounts to the accounts for the current and remaining months of the calendar year.*†

§ 34.03–16 *Transactions involving foreign currency.* (a) Revenues from transmission when collected, billed, or for other reasons given initial treatment in the accounts in terms of foreign currency shall be stated in the operating revenue accounts (other than account 3709) in terms of United States currency on the basis of a fixed uniform rate of foreign exchange. Concurrently adjustments from such fixed uniform rate to the then current rate of exchange shall be recorded in account 3709, "Foreign exchange—Revenue differential."

(b) Under uniform practices adopted to the satisfaction of the Commission, operating expenses when paid, vouchered, or for other reason given initial treatment in the accounts in terms of foreign currency may be stated in the operating expense accounts (other than account 4298) in terms of United States currency on the basis of a fixed uniform rate of foreign exchange. Concurrently adjustments from such fixed uniform rate of exchange to the then current rate of exchange shall be recorded in account 4298, "Foreign exchange—Expense differential."

(c) Current assets and liabilities or net current assets, recorded in the first instance in terms of foreign currency, shall be recorded in terms of United States currency at the end of each month at the then current rate of exchange. The net difference arising out of such conversion at the beginning and end of the monthly accounting period shall be recorded as a charge or a credit to account 5140, "Gain or loss on foreign currency exchange."

(d) Differences in terms of United States currency between (1) amounts initially recorded in the asset or liability accounts and (2) amounts required for settlement or derived from conversion, by reason of such transactions as the effecting of traffic settlements, the payment of rentals, or the settlement of loans, shall be recorded in account 5140, "Gain or loss on foreign currency exchange."*†

§ 34.03–17 *Apportioning amounts among accounts.* (a) When it is necessary to apportion amounts among accounts, the carrier shall be prepared to describe the basis of such apportionment.

(b) The pay and expenses of officers or employees regularly assigned to specific duties who perform incidental services of a different nature involving small expense shall be included in the expense accounts appropriate for the duties to which such officers or employees are regularly assigned.

(c) The pay and expenses of officers or employees engaged in activities of a varying nature, such as a supervising engineer who may be assigned to construction, maintenance, or operation work, shall be included in the appropriate account upon basis of the actual time engaged in the respective classes of work, except that the pay and expenses of an officer or employee who performs substantially the same variety of duties from day to day may be distributed upon basis of a study of the time actually engaged during a representative period.*†

§ 34.03–18 *Transactions involving joint operations.* (a) In accounting for operating expenses incurred under arrangements for apportionment between persons concerned, the carrier shall distribute its portion of the entire expense to the appropriate operating expense accounts.

(b) Any amounts included in the settlement representing return on investment in the plant used under joint-operation arrangements shall be charged or credited, as the case may be, to the appropriate rent-expense account or to the appropriate rent-revenue account.

(c) The creditor shall show the distribution of the charges in its bills, and such distribution shall be adhered to in the accounts of the debtor.*†

INSTRUCTIONS—DEPRECIATION ACCOUNTING

§ 34.04–1 *Classes of depreciable operated plant.* The classes of depreciable operated plant and the accounts in which the cost of such plant is included are as follows:

Land improvements (account 12).
Drainage, sewerage, gas, and water systems (account 13).
Buildings (account 14).
Towers and masts (account 21).
Antenna systems (account 22).
Control lines (account 26).
Power-supply lines (account 27).
Electron-tube transmitter equipment (account 31).
Other transmitter equipment (account 32).
Cooling apparatus (account 33).
Receiver equipment (account 34).
Power supply and distribution equipment (account 36).
Control apparatus (account 40).
Equipment on customers' premises (account 41).
Furniture and office equipment (account 51).
Ship station equipment (account 61).
Other mobile station equipment (account 69).
Vehicles and draft animals (account 71).
Shop equipment, tools, and implements (account 72).
Store and warehouse equipment (account 73).*†

§ 34.04–2 *Computation of depreciation rates.* (a) Depreciation charges shall be computed by applying with respect to each month's accounts one-twelfth of the annual percentage rate considered applicable to the cost of each class or subclass of depreciable plant or to the cost of that portion of such plant with respect to which the estimated service value has not been completely accounted for through the aggregate of prior current allowances for depreciation. These percentage rates shall be based upon the estimated service values and service lives developed by a study of the carrier's history and experience and such engineering and other information as may be available with respect to prospective future conditions, but shall not include any allowance for loss in service value of property expected to be acquired in the future. These percentage rates shall be such that the loss in service value of plant, except losses excluded under the definition of depreciation, shall be accounted for under the straight-line method of depreciation accounting.

(b) The carrier shall keep such records of plant and plant retirements as will reflect the service life of plant that has been retired or will permit the determination of service-life indications by mortality, turnover, or other appropriate methods and also such records as will reflect the percentage of net salvage value for plant retired from each class of depreciable plant.

(c) When with respect to any class or subclass of plant the factors causing depreciation (and consequently occasioning the amount of the current net book cost and the rate of depreciation previously applied in the accounts) commence at any time (including the accounting period—year or month—immediately preceding retirement) to operate at a new rate, the fact shall be recognized in the accounts by applying (actually or in effect) such a new percentage rate to the cost of that plant or portion thereof as will dispose of the difference between its net book cost and its estimated net salvage value during the period (known or estimated) of its remaining life.*†

§ 34.04–3 *Depreciation charges.* (a) The current depreciation charges applicable to operated plant the cost of which is includible in account 1000, "Operated plant in carrier's service," and account 1200, "Improvements and replacements of operated plant leased from others," shall be recorded monthly in account 4910, "Depreciation," or in the clearing accounts, as appropriate, and corresponding credits shall be recorded in account 1515, "Allowance for depreciation—Radiotelegraph plant." (See also Sec. 34.1–5.)

(b) When, under the terms of a lease, the carrier, as lessor, is required to replace or to restore the condition of operated plant the cost of which is includible in account 1100, "Operated plant leased to others," the current depreciation charges shall be recorded monthly in account 5010, "Income from operated plant leased to others," and corresponding credits shall be recorded in account 1515, "Allowance for depreciation—Radiotelegraph plant." (See also Sec. 34.30–3.)

(c) When, under the terms of a lease, the carrier, as lessee, is required to replace or to restore the condition of operated plant leased from others, depreciation charges with respect to such original leased plant shall be computed and applied as provided in Sec. 34.1–5.

(d) Depreciation charges initially accounted for by the lessor shall be reported to and accounted for by the lessee as provided in paragraph (c) of Sec. 34.30–3.*†

§ 34.04–4 *Plant retired for causes not known to be in current operation.* (a) The accounting for operated plant retired for causes not known to be in current operation shall be as provided in paragraph (a) of Sec. 34.1–6 and account 4925, "Extraordinary plant losses."

(b) If the cause of the retirement is a loss covered by insurance for which provision has been made in account 2215, "Provision for self-carried insurance", the loss shall be charged to that account to the extent of the amount so provided. If the loss is not covered by insurance the carrier may, with the approval of this Commission, credit account 1515, "Allowance for depreciation—Radiotelegraph plant", and charge account 1910, "Extraordinary maintenance, depreciation, and retirements", with the unprovided-for loss in service value, and distribute it from the latter account to account 4925, "Extraordinary plant losses", over such period as this Commission may approve. The carrier's application to this Commission for permission to charge account 1910, shall give full particulars concerning the plant retired, the unprovided-for service loss, and the period over which, in its judgment, such charges should be distributed.*†

INSTRUCTIONS FOR CLASS B CARRIERS

§ 34.05–1 *Primary operating revenue accounts for class B carriers.* Class B carriers shall keep all the operating revenue accounts prescribed for class A carriers that are applicable to their affairs, except that they may keep the following account in lieu of the nontransmission revenue accounts:

3800 *Nontransmission revenues.*

This account shall include the carrier's portion of revenues from radiotelegraph operations other than transmission. It shall include all the operating revenues includible by class A carriers in accounts 3810 to 3899, inclusive.*†

§ 34.05–2 *Primary operating expense accounts for class B carriers.* Class B carriers shall keep all the operating expense accounts prescribed for class A carriers that are applicable to their affairs, except that certain accounts may be combined as follows:

4280 *Messenger service expense.*

This account shall include the amount of all expenses incurred in furnishing messenger service. It includes all expenses includible by class A carriers in accounts 4281 to 4289, inclusive.

4299 *Other conducting-operations expenses.*

This account shall include the amount of expenses incurred in conducting operations not provided for elsewhere. It includes all expenses includible by class A carriers in accounts 4210, 4225, 4235, 4240, 4250, 4255, 4260, 4270, 4275, and 4299.

4300 *Administrative expenses.*

This account shall include the administrative expenses of the carrier. It includes all expenses includible by class A carriers in accounts 4310 to 4399, inclusive.

4400 *General expenses.*

This account shall include the general expenses of the carrier. It includes all expenses includible by class A carriers in accounts 4410 to 4499, inclusive.*†

REPORTING REQUIREMENTS

§ 34.06–1 *Provisions that require specific approval of Commission before accounting is performed.* (a) Specific authority shall be obtained from this Commission before entering charges representing unprovided-for loss in service value in account 1910, "Extraordinary maintenance, depreciation, and retirements." (See paragraph (b) of Sec. 34.04–4.)

(b) A statement indicating the plan of accounting proposed to record the exchange of securities issued or assumed by the carrier shall be submitted to this Commission for consideration and approval prior to the recording of journal entries applicable thereto. (See Sec. 34.10–8.)

(c) A statement indicating the plan of accounting proposed to record the issuance of no-par stock, the appropriation of surplus for transfer to no-par capital stock account, the reduction of capital surplus through the use of the no-par capital stock account, or the reduction of account 2410, "Capital stock issued", through the creation of surplus or the reduction of book value of assets, shall be submitted to this Commission for consideration and approval prior to the recording of journal entries applicable thereto. (See paragraph (c) of Sec. 34.10–9.)

(d) Specific authority shall be obtained from the Commission if, in connection with the refinancing of an issue or series of bonds or other long-term debt, the carrier desires to amortize any of the discount, expense, or premium associated with the issuance or redemption of the prior issue over a period subsequent to the date of its redemption. (See paragraph (f) of Sec. 34.10–14.)

(e) Specific authority shall be obtained from this Commission before disposing of amounts entered in account 1510, "Plant acquisition adjustments." (See paragraph (e) of that account.)

(f) Carriers desiring to use accounts 1599, "Foreign investment in communication plant", and 5089, "Income from foreign operations", shall advise this Commission at least sixty days before the effective date of this system of accounts.

(g) Carriers desiring to change the optional procedure adopted for recording foreign investments and foreign income shall advise this Commission at least ninety days before the proposed date of such change. (See paragraph (d) of accounts 1599 and 5089.)

(h) Specific authority shall be obtained from this Commission before using account 2220, "Provisions for equalization of maintenance expenses", and account 4198, "Maintenance-expense equalization." (See paragraph (a) of each of those accounts.)

(i) Specific authority shall be obtained from this Commission before transferring any amounts credited to account 2515, "Contributions of plant", to another account. (See paragraph (b) of account 2515.)

(j) A statement indicating the plan of accounting proposed to record the acquisition of duplicate and other plant acquired from predecessors which is intended to be retired shall be submitted to this Commission for consideration and approval prior to the recording of journal entries applicable thereto. (See paragraph (d) (3) of Sec. 34.1–2.)

(k) Specific authority shall be obtained from this Commission before including in construction cost any interest covering a period of more than six months from the date of suspension of construction work. (See paragraph (c) (8) of Sec. 34.1–3.)

(l) Amounts included in account 1999, "Other deferred charges", and account 2399, "Other deferred credits", representing settlements with lessees upon termination of leases shall not be disposed of except upon the specific approval or direction of this Commission. (See paragraph (g) of Sec. 34.1–5.)

(m) Amounts included in account 2225, "Provisions for depreciation and replacement of operated plant leased from others", and account 2230, "Leased operated plan retire", with respect to expired leases shall not be disposed of except upon the specific approval or direction of this Commission. (See paragraph (f) of Sec. 34.1–6.)

(n) Specific authority shall be obtained from this Commission before recording amounts in accounts 4950, "Revenue-contract payments," and 5260, "Revenue-contract payments."

(o) Specific authority shall be obtained from this Commission before transferring any amounts charged to account 9010, "Research and development—Undistributed," to any account

other than account 6299, "Other extraordinary income charges." (See note to account 9010.)

(p) Specific authority shall be obtained from this Commission before the elimination of or substitution for retirement units. (See paragraph (b) of Sec. 34.1–6–1.) *†

§ 34.06–2 *Provisions that require certain special reports to be filed.* (a) A statement indicating the nature and purpose of subdivisions of the prescribed accounts, of experimental accounts, of temporary accounts, and of additional clearing accounts that have been opened in the books of account shall be filed with this Commission within ninety days of the effective date of this system of accounts. The carrier shall continue to keep the Commission informed of all additional accounts or subaccounts of these types subsequently opened. (See paragraph (b) (3) of Sec. 34.03–5.)

(b) Copies of journal entries recorded to effect the transfers of balances carried in accounts previously maintained by the carrier, and a detailed statement of the method used in computing estimated cost, shall be submitted to this Commission within ninety days from the dates of the actual entries. (See Sec. 34.03–6.)

(c) A statement showing the full particulars concerning any relatively large delayed item included in account 6110, "Delayed income credits," or account 6210, "Delayed income charges," shall be filed with this Commission within thirty days from the dates of the actual entries. (See Sec. 34.03–13.)

(d) A transcript of the capital surplus accounts, together with a summary statement of the charges and credits, maintained prior to the effective date of this system of accounts shall be filed with this Commission within ninety days of the effective date of this system of accounts. (See paragraph (c) of Sec. 34.10–10.)

(e) A statement showing the details concerning contingent assets and contingent liabilities shall be filed with the annual report to this Commission. (See Sec. 34.10–16 and paragraph (b) of account 1760, "Notes receivable.")

(f) Copies of journal entries recording the acquisition of certain major properties shall be submitted to this Commission within ninety days from the dates of the actual entries. (See paragraph (g) of Sec. 34.1–2.)

(g) Copies of journal entries recording the completion of the prescribed accounting for plant acquisitions shall be submitted to this Commission within ninety days from the date that the clearing entries relating to each acquisition are made. Within ninety days from the date of any entry recording an acquisition, the carrier shall submit to this Commission a statement indicating the approximate date contemplated for the completion of the clearing entries relating thereto. (See particularly paragraph (g) of Sec. 34.1–2 and paragraph (b) of account 91.)

(h) Not later than June 30, 1940, each carrier shall submit to this Commission for consideration and approval its plan for the establishment and maintenance of a continuous property record. (See paragraph (b) of Sec. 34.1–8.)

(i) A semiannual report shall be submitted to the Commission with respect to retirement units in accordance with the provisions of paragraph (d) of Sec. 34.1–6–1.*†

BALANCE-SHEET ACCOUNTS

Instructions

§ 34.10–1 *Purpose of balance-sheet accounts.* The balance-sheet accounts are designed to show the financial position of the carrier as at a given date.*†

§ 34.10–2 *Current assets.* (a) Current assets are cash, those assets that are readily convertible into cash or are held for current use in operations or construction, current claims against others the payment of which is reasonably assured, and amounts accruing to the carrier that are subject to current settlement, except that bonds and other obligations of others classified by the carrier in investment and fund accounts at the time of acquisition shall remain so classified until the date of payment, sale, or other disposition thereof.

(b) There shall not be included in the group of accounts designated as Current Assets any item the collectibility of which is not reasonably assured unless adequate allowance has been made therefore in account 1765, "Allowance for uncollectible receivables." Items of current character but of doubtful value may be reduced in amount and, for record purposes, carried in these accounts at nominal value. The amounts of such reductions, or the amounts provided for by credits to account 1765, shall be charged to account 4935, "Uncollectible revenues," account 5299, "Other deductions from ordinary income," or account 6299, "Other extraordinary income charges," as appropriate.*†

§ 34.10–3 *Prepayments.* (a) Prepayments are amounts paid by the carrier for services to be rendered during a subsequent accounting period.

(b) When advance payments are made, the appropriate account shall be charged with the amount of such payment. As the term expires for which the advance payments were made the prepayment account shall be credited at monthly intervals and the appropriate expense account or other account shall be charged with the amount applicable to the expired term.*†

§ 34.10–4 *Deferred charges.* Deferred charges are amounts representing (1) debit items held in suspense pending determination of their actual status, (2) costs of services that have been rendered to the carrier but are chargeable to future operations, and (3) items which for other reasons are allocable to other appropriate accounts for a succession of future periods.*†

§ 34.10–5 *Current liabilities.* (a) Current liabilities are those obligations that have become matured at the date of the balance sheet or that will become due within 1 year from the date thereof (except bonds, receivers' and trustees' securities, and similar obligations, which shall be classified as long-term debt until the date of maturity); matured taxes, such as income taxes, which shall be classified (in the balance sheet) as current liabilities even though payable more than 1 year from the balance-sheet date; compensation awards, which shall be classified as current liabilities regardless of the date due; and minor amounts payable in installments, which may be classified as current liabilities.

(b) The liability-accrual accounts shall include the amounts of interest, taxes, rents, and other items with respect to which amounts eventually payable have been recorded as deductions from revenue or income but which have not matured. (See also paragraph (a) of Sec. 34.03–17.) *†

§ 34.10–6 *Long-term debt.* (a) When evidences of debt that, according to their terms, do not mature until more than one year from date of issuance are issued or assumed by the carrier or by a receiver or an operating trustee of the carrier, the face amount of such evidences of debt shall be recorded in the appropriate account under the caption "Long-term debt." (See also Sec. 34.10–14.)

(b) If a liability, other than compensation awards or minor amounts payable in installments, is due more than one year from date of issuance or assumption by the carrier, it shall be credited to a long-term debt account appropriate for the transaction, but, for the purpose of classification in the balance sheet, a debt (except bonds, receivers' and trustees' securities, and similar obligations) shall be classified as a current liability if due within one year from the balance-sheet date.*†

§ 34.10–7 *Book cost of securities owned.* (a) Securities of others acquired by the carrier shall be recorded in these accounts at cost. Such cost shall not include any amount paid for dividends or for interest accrued.

(b) The carrier's records shall be so maintained as to show separately the cost of (1) common stock, (2) preferred stock, and (3) long-term debt.

(c) The carrier's records shall be so maintained that in the reports to this Commission the securities, classified as in paragraph (b) of this section, that are pledged as collateral security for any of the carrier's or other persons' long-term debt or short-term loans or to secure the performance of contracts may be shown separately from the securities, similarly classified, that are unpledged.

(d) There shall not be included in the accounts designated as investment and fund accounts any amount the ultimate realization of which is not reasonably assured unless adequate allowance has been made therefor in account 1699, "Allowance for doubtful investments." The book cost of securities includible in such accounts shall be reduced to a nominal amount if there is no reasonable prospect of substantial value, but fluctuations in market value shall not be recorded in the accounts. Amounts by which these securities are thus reduced or amounts provided for by credits to account 1699, shall be charged to account 6299, "Other extraordinary income charges."

(e) When securities authorized by state laws for inclusion in legal reserve funds required by such laws, and in other similar fiduciary funds requiring a qualification for investments thereof, and with a fixed maturity date (other than securities issued or assumed by affiliates), are purchased at a discount (i. e., when the total cost including brokerage fees, taxes, commissions, and similar costs is less than the face amount of the securities), such discount shall be amortized over the remaining life of the securities through periodic charges to account 1698, "Amortized discount and premium on investment securities", and credits to the account in which is recorded the interest from such securities. When such securities are purchased at a premium (i. e., when the total cost including brokerage fees, taxes, commissions, and similar costs is in excess of the face amount of the securities), such premium shall be amortized over the remaining life of the securities through credits to account 1698 and charges to the account in which is recorded the interest from such securities. No amounts shall be entered for amortization of discount or premium on securities with respect to which a reduction in book cost or a provision for doubtful value has been made. Any amounts in account 1698 representing the amortization of discount or premium on securities with respect to which a reduction in book cost or a provision for doubtful value is made shall be cleared by charges or credits, as appropriate, to the account in which is recorded the interest from such securities. (See also Sec. 34.03–13 and Sec. 34.03–15.)

(f) If securities actually issued or assumed by the carrier and reacquired by it are not retired, they shall be entered at book amount in account 2015, "Bonds reacquired," or account 2415, "Capital stock reacquired," as appropriate, unless it is required by contractual provision or by decision of a trustee not subject to control by the carrier that they be retained in debt-redemption or other funds. When so retained they shall be regarded and treated as actually outstanding, but not otherwise.

(g) When entries are made in account 2415, "Capital stock reacquired", recording the reacquisition of such stock, entries shall concurrently be made charging account 8315, "Earned surplus employed in reacquisition of capital stock," and crediting account 2615, "Reserve against impairment of stated capital", with amounts equal to the amount charged to account 2415. Upon the resale or retirement of such stock these latter entries shall be reversed.*†

§ 34.10–8 *Exchange of securities.* Before recording the journal entries that it is proposed to enter in the carrier's books to record the reacquisition of capital stock or other securities issued or assumed by the carrier under a plan for the issuance in exchange therefor of the carrier's securities, a statement indicating the plan of accounting proposed by the carrier shall be submitted to this Commission for consideration and approval. Such statement shall give complete information concerning the plan of exchange, the basis upon which the amounts have been determined, and a copy of the authorization issued by the regulatory body approving the plan.*†

§ 34.10–9 *Capital stock.* (a) All transactions relating to capital stock of the accounting carrier shall be recorded by class of stock. Stocks are of the same class only when they are issued under identical terms as to all of the following: par value, stated value, preferences in distribution of dividends and assets, voting rights, and conditions under which they may be retired. If the stocks of the carrier are of two or more classes, the carrier's records shall be so maintained as to distinguish the amount applicable to each class in each of the following accounts:

| | |
|---|---|
| 1775 | Subscriptions to capital stock. |
| 1780 | Deposits on subscriptions to capital stock. |
| 1915 | Capital stock expense. |
| 1925 | Discount on capital stock. |
| 2160 | Installment-plan receipts on purchase of capital stock. |
| 2410 | Capital stock issued. |
| 2415 | Capital stock reacquired. |
| 2420 | Capital stock subscribed unissued. |
| 2425 | Obligations for stock conversion. |
| 2510 | Premiums and assessments on capital stock. |

(b) When, by compliance with the laws of the state under which it is incorporated, a carrier is authorized to issue shares of capital stock, a memorandum entry in account 2410, "Capital stock issued," shall be made showing the number of shares, the par or the stated value of each share, and the total authorized capitalization.

(c) Before recording the journal entries that it is proposed to enter in the carrier's books to record (1) the issuance of no-par capital stock, (2) the appropriation of surplus for transfer to the no-par capital stock account, (3) the reduction of capital surplus through the use of the no-par capital stock account, or (4) the reduction of account 2410, "Capital stock issued," through the creation of surplus or the reduction of book value of assets, the plan of accounting shall be submitted to this Commission for consideration and approval. Such plan shall be accompanied by a statement giving complete information with respect to the basis upon which the amounts to be recorded have been determined and a copy of the authorization issued by the regulatory body approving the issuance of no-par stock or the change in the capital stock and surplus accounts.*†

§ 34.10–10 *Surplus.* (a) The accounts designated as capital surplus accounts are designed to show (1) paid-in surplus (i. e., proprietary contributions in excess of the stated capital included in the capital stock accounts), (2) donated surplus (i. e., contributions that increase the assets but do not increase the liabilities or the proprietary interests), (3) surplus arising from reacquisition or resale of, or otherwise trading in, the carrier's own capital stock, and (4) surplus due to the reduction of the stated value of capital stock due to such occasions as retirement, reorganization, or recapitalization.

(b) The balance-sheet accounts designated as earned surplus accounts are designed to show the accumulated undistributed surplus derived from the normal operations of the carrier, including the income from all sources other than the capital gains referred to in paragraph (a) of this section.

(c) Within ninety days from the effective date of this system of accounts the carrier shall submit to this Commission a transcript of its capital surplus account or accounts covering the entire period to the effective date of this system of accounts showing in detail the nature and amount of charges and credits, respectively, and the balance that was in the account at the close of each year. The transcript shall be accompanied by a summary statement in which the charges and credits for the entire period covered by the transcript have been classified according to their nature and summarized to show the aggregate amount of each class as well as the aggregate amount of charges and credits, respectively, for the period and the resulting balance in the account at the effective date of this system of accounts.*†

§ 34.10–11 *Provisions for future settlements.* When in anticipation of settlements or similar transactions it is required that certain amounts shall be charged to operating expenses or other accounts without a corresponding reduction in the assets of the carrier, such amounts shall be credited to the appropriate account under the caption, "Provisions for future settlements." The credit balances in these accounts should indicate the estimated amount of future settlements or other extinguishments subsequent to the date of the balance sheet with respect to amounts allocable to periods prior to that date.*†

§ 34.10–12 *Deferred credits.* Deferred credits are amounts representing (1)

credit items held in suspense pending determination of their actual status and (2) obligations (e. g., unamortized premium on debt) that have been incurred but are applicable to future operations or income.*†

§ 34.10–13 *Discount, expense, and premium on capital stock.* (a) An account shall be maintained for each class of capital stock issued by the carrier (separately from the capital stock accounts) and there shall be included in each such account both the discount and premium associated with the issuance and sale (exclusive of the sale of reacquired stock) of or subscription to each such class of stock.

(b) Stock expense shall not be added to discount, or deducted from premium, on capital stock, but shall be included in account 1915, "Capital stock expense."

(c) Only in stating the balance sheet, the total of the debit balances remaining in the discount and premium accounts shall be reported under account 1925, "Discount on capital stock," and the total of the credit balances shall be reported under account 2510, "Premiums and assessments on capital stock." Accounts with debit balances shall not be offset by accounts with credit balances.

(d) General levies or assessments against stockholders shall be credited to the discount and premium account for the particular class of stock assessed.

(e) Expenses on capital stock issued may be charged off to account 6299, "Other extraordinary income charges", in total or in installments or the amounts thereof may be retained in account 1915, "Capital stock expense", until the stock to which the expense applies is reacquired. Discount or premium on capital stock issued shall be retained in the discount and premium account until the stock is reacquired or until otherwise disposed of lawfully, except that inconsequential amounts of discount that would not appreciably affect the accounts may be charged off to account 8299, "Miscellaneous charges to earned surplus."

(f) When capital stock which has been actually issued by the carrier is reacquired, the difference between (1) the amount paid therefor upon reacquisition and (2) the book amount plus the premium or less the discount and expense originally entered in respect thereto and not charged off shall be charged or credited, as appropriate, to account 2599, "Other capital surplus"; provided, however, that such charges shall be made to account 8299, "Miscellaneous charges to earned surplus", if the amounts thereof exceed the balance in account 2599; and provided further, that in no event shall charges in excess of accumulated credits from the reacquisition, resale, or retirement of capital stock of the same class be charged to account 2599.

(g) Discount, expense, or premium on capital stock shall not be included in any account as a part of the cost of constructing or acquiring plant or as a part of the cost of operation.

(h) The carrier's records shall be so maintained that in the reports to this Commission there may be shown the extent to which the surplus accounts have been charged or credited in instances in which there is a possibility of further entry in those accounts in the event of resale of reacquired capital stock.*†

§ 34.10–14 *Discount, expense, and premium on long-term debt.* (a) An account shall be maintained for each issue or series of long-term debt issued or assumed by the carrier (separately from the long-term debt accounts) and there shall be included in each such account both the discount and premium associated with the issuance and sale of (exclusive of the sale of reacquired long-term debt) or subscription to each such issue or series of debt.

(b) Debt expense shall not be added to discount, or deducted from premium, on long-term debt, but shall be included in account 1920, "Long-term debt expense."

(c) Only in stating the balance sheet, the total of the debit balances remaining in the discount and premium accounts shall be reported under account 1930, "Unamortized discount on debt", and the total of the credit balances remaining in those accounts shall be reported under account 2310, "Unamortized premium on debt." Accounts with debit balances shall not be offset by accounts with credit balances.

(d) Discount, expense, and premium with respect to each issue or series of long-term debt shall be amortized under such a plan as will equitably distribute the amounts over the life of the securities. The amortization shall be on a monthly basis and the amounts thereof shall be charged to account 5220, "Amortization of debt discount," or account 5245, "Amortization of debt expense," or credited to account 5230, "Amortization of debt premium—Cr.," as appropriate. The carrier may, however, accelerate the writing off of debt expense and extinguish inconsequential amounts of discount (that it would be burdensome to amortize, and would not appreciably affect the accounts) by charges to account 6299, "Other extraordinary income charges." Where there is a definite plan to retire an issue without refunding prior to its maturity date, amortization may be accelerated to extinguish the balance in the discount and premium account at the date of contemplated retirement.

(e) When any long-term debt is reacquired without being converted into another form of long-term debt and when the transaction is not in connection with a refunding operation, the difference between the amount paid upon reacquirement and the book amount plus the unamortized premium or less the unamortized discount, as the case may be, applicable to the debt reacquired, shall be charged to account 6299, "Other extraordinary income charges," or credited to account 6199, "Other extraordinary income credits," as appropriate.

(f) When the redemption of one issue or series of bonds or other long-term obligations is financed by another issue or series before the date of maturity of the prior issue, any unamortized discount, expense, or premium on the prior issue and any premium paid or discount enjoyed upon reacquirement shall be debited or credited, as appropriate, to account 6299, "Other extraordinary income charges", or account 6199, "Other extraordinary income credits": *Provided, however,* That if the carrier desires to amortize any of the discount, expense, or premium associated with the issuance or redemption of the prior issue over a period subsequent to the date of redemption, the permission of the Commission must be obtained.

(g) Discount, expense or premium on long-term debt shall not be included in the cost of constructing or acquiring plant, except as provided for in Sec. 34.1–3.

(h) The carrier's records shall be so maintained that in the reports to this Commission there may be shown the extent to which the income accounts have been charged or credited in instances in which there is a possibility of further entry in those accounts in the event of resale of reacquired long-term debt.*†

§ 34.10–15 *Irrevocable trusts.* Funds relinquished from the control of the carrier that are irrevocably devoted to the establishment or continuation of any trust or fiduciary fund (such as pension or similar funds) shall not be included as items in the balance sheet, but their existence shall be indicated by an appropriate notation thereon showing the amount of such funds.*†

§ 34.10–16 *Contingent assets and liabilities.* In the carrier's reports to this Commission amounts representing contingent assets and contingent liabilities shall not be included as items in the balance sheet, but their existence shall be indicated by an appropriate notation thereon and the amounts shall be shown in detail in a supplementary statement.*†

§ 34.10–17 *Nominally issued securities.* (a) Each carrier shall maintain, in addition to the capital stock and long-term debt accounts prescribed herein, memorandum debit and credit accounts for securities which have been nominally but not actually issued.

(b) When no-par stock is nominally issued, the number of shares issued shall be shown in the memorandum accounts.

(c) A separate memorandum account, with appropriate title, shall be maintained for each class and issue or series of such securities.*†

BALANCE-SHEET ACCOUNTS

§ 34.10–99 *Contemplated form of balance sheet.* (See Sec. 34.03–9.)

Prescribed Accounts

NOTE: Number to the right of the demical point is the account number.

*Communication Plant*

§ 34.1000 *Operated plant in carrier's service.* This account shall include the total of the balances in the operated plant accounts applicable to plant owned and

1520:04 Allowance for amortization | shall be charged with the amount | each issue or series of long-term debt for

used by the carrier in its radiotelegraph operations, except such plant the cost of which is includible in account 1200, "Improvements and replacements of operated plant leased from others."*†

§ 34.1100 *Operated plant leased to others.* This account shall include the total of the balances in the operated plant accounts applicable to plant owned by the carrier and leased to others as substantially complete operating systems or operating units where the lessee has exclusive possession.

NOTE. When the lessor is given or retains the exclusive privileges to maintain, inspect, and service equipment, to handle and adjust traffic accounts, to perform other similar services, or to designate who may perform such services for the lessee, the lessee will be deemed not to have the exclusive possession of the plant, and its cost shall be included in account 1000, "Operated plant in carrier's service."*†

§ 34.1200 *Improvements and replacements of operated plant leased from others.* This account shall include the total of the balances in the operated plant accounts applicable to improvements and replacements of operated plant leased from others.*†

§ 34.1300 *Plant under construction.* (a) This account shall include the cost of construction of plant not completed ready for service.

(b) When any plant the cost of which is included in this account is completed ready for service, the cost thereof shall be credited to this account and charged to the operated plant accounts, account 1400, "Plant held for future communication use", or other accounts, as appropriate.*†

§ 34.1400 *Plant held for future communication use.* (a) This account shall include the cost of completed plant owned by the carrier and held for future use in communication service under a definite plan.

(b) The amounts included in this account shall be classified in accordance with the titles and texts of the appropriate plant accounts and the account shall be maintained in the same manner and detail as though the plant were in communication service.*†

§ 34.1510 *Plant acquisition adjustments.* (a) This account shall include the difference between (1) the acquisition cost of plant acquired from predecessors as substantially complete operating systems or operating units and (2) the original cost of such plant less the required allowances for depreciation and amortization of the plant at the date of acquisition. (See also Sec. 34.1–2.)

(b) This account shall include, under a separate subdivision, the difference between the original cost and the book cost of radiotelegraph plant at the effective date of this system of accounts, to the extent that such difference is not attributable to acquisitions from predecessors.

(c) This account shall be subdivided according to the character of the amounts included herein for each plant acquisition; and further subdivided to show the amounts applicable to operated plant in carrier's service, operated plant leased to others, and plant held for future communication use.

(d) If the actual original cost is not known, the entries in this account shall be based upon an estimate of such cost.

(e) The amounts recorded in this account shall be disposed of in such manner as this Commission may approve or direct.

NOTE: The provisions of this account shall not be construed as approving or authorizing the recording of appreciation of plant.*†

§ 34.1515 *Allowance for depreciation—Radiotelegraph plant.* (a) This account shall be credited with amounts charged to account 4910, "Depreciation," to account 5010, "Income from operated plant leased to others," to account 5299, "Other deductions from ordinary income," and to clearing accounts for currently accruing depreciation of radiotelegraph plant owned by the carrier; also amounts of depreciation applicable to plant contributed to the carrier, and plant acquired from predecessors as provided in Secs. 34.1–2 and 34.1–5. (See also Secs. 34.04–1, 34.04–2, 34.04–3, 34.04–4, and 34.30–3.)

(b) As at the effective date of this system of accounts, this account shall be credited with such amount as is necessary to create a credit balance herein equal to the estimated sustained depreciation of all depreciable operated plant owned by the carrier at that date. The amount thus credited shall, unless otherwise authorized by this Commission, be charged to account 6299, "Other extraordinary income charges."

(c) This account shall be regarded and treated as a single composite allowance account. For purposes of analysis, however, each carrier shall maintain records in which the balance in the account shall be segregated into component parts corresponding to the operated plant accounts and subdivisions thereof which include the cost of depreciable operated plant.

(d) This account shall be subdivided as follows:

| | |
|---|---|
| 1515:01 | Allowance for depreciation of operated plant owned and used in carrier's service. |
| 1515:02 | Allowance for depreciation of improvements and replacements of plant leased from others. |
| 1515:03 | Allowance for depreciation of operated plant leased to others. |
| 1515:04 | Allowance for depreciation of plant held for future communication use. |

NOTE: When plant is transferred from one class of communication service to another or from communication service to noncarrier operations, the accounting shall be as provided in Sec. 34.1–7.*†

§ 34.1520 *Allowance for amortization—Radiotelegraph plant.* (a) This account shall be credited with amounts charged to account 4915, "Amortization—Intangible operated plant," to account 5010, "Income from operated plant leased to others," and to account 5299, "Other deductions from ordinary income," to provide for the extinguishment of amounts included in accounts 82, "Franchises," 83, "Patent rights," 84, "Leaseholds," and 89, "Other intangibles," also amounts of amortization applicable to plant contributed to the carrier and plant acquired from predecessors as provided in Secs. 34.03–6 and 34.1–2. (See also Sec. 34.30–3.) It shall be credited with amounts charged to account 6299, "Other extraordinary income charges," to provide for the extinguishment of amounts included in account 81, "Organization."

(b) This account shall be credited or charged, as appropriate, with amounts authorized or directed by the Commission to be charged or credited to accounts 4920, "Amortization of plant acquisition, adjustments," and 5255, "Amortization of plant acquisition adjustments," to provide for the extinguishment of amounts included in account 1510, "Plant acquisition adjustments."

(c) As at the effective date of this system of accounts, this account shall be credited with such amount as is necessary to create a credit balance herein equal to the expired service value of intangibles (having a terminable life) the cost of which is includible in accounts 82, "Franchises," 83, "Patent rights," 84, "Leaseholds," and 89, "Other intangibles." The amount thus credited shall, unless otherwise authorized by this Commission, be charged to account 6299, "Other extraordinary income charges."

(d) When any franchise, patent right, leasehold, or other intangible item expires or is sold, relinquished, or otherwise retired from service, the cost thereof shall be credited to the appropriate plant account and this account shall be charged with the amount previously credited hereto with respect to such intangible item. The difference between the foregoing amounts, less the proceeds realized at retirement, shall be charged to account 6299, "Other extraordinary income charges," or credited to account 6199, "Other extraordinary income credits," as appropriate.

(e) The records supporting the entries in this account shall be so maintained as to show the amount applicable to each intangible item under the following subdivisions:

| | |
|---|---|
| 1520:01 | Allowance for amortization of intangibles in carrier's service. |
| 1520:02 | Allowance for amortization of intangibles leased to others. |
| 1520:03 | Allowance for amortization of plant acquisition adjustments. |

| | |
|---|---|
| 1520:04 | Allowance for amortization of intangibles held for future communication use. |

*†

§ 34.1530 *Telephone, wire-telegraph, and ocean-cable plant.* This account shall include the amount of the balances in the plant accounts for telephone, wire-telegraph, and ocean-cable plant in service. (See also Sec. 34.03–8.)*†

§ 34.1535 *Allowance for depreciation and amortization—Telephone, wire-telegraph, and ocean-cable plant.* This account shall include the amount of the balances in the allowance accounts for telephone, wire-telegraph, and ocean-cable plant in service. (See also Sec. 34.03–8.)*†

§ 34.1599 *Foreign investment in communication plant.* (a) This account may include the net amount of the acquisition cost of the carrier's communication plant that is located in foreign countries and the related allowances for depreciation and amortization, when the detailed amounts are required to be stated in terms of foreign currency or in a manner at variance with the requirements of this system of accounts.

(b) A separate subaccount with appropriate title shall be maintained for the plant located in each foreign country.

(c) The records supporting the entries in this account shall be so maintained that, in the reports to this Commission, a complete analysis of the transactions affecting each station may be shown.

(d) Each carrier that elects to use this account shall advise this Commission of the fact at least sixty days before the effective date of this system of accounts. Changes from this elective procedure to the alternative procedure prescribed for domestic plant, or vice versa, shall not be made thereafter without submitting to this Commission for its consideration and approval notice of the change at least ninety days before the proposed effective date of such change.*†

*Investment and Fund Accounts*

§ 34.1610 *Miscellaneous physical property.* This account shall include the carrier's investment in physical property other than that used in communication service, except property the cost of which is includible in account 1400, "Plant held for future communication use." It shall include the amount of all assessments for the construction of public improvements levied against miscellaneous physical property. (See also Sec. 34.1–7.)*†

§ 34.1615 *Allowance for depreciation—Miscellaneous physical property.* (a) This account shall be credited with amounts charged to account 5110, "Income from miscellaneous physical property," for the depreciation of depreciable property the cost of which is includible in account 1610, "Miscellaneous physical property."

(b) When miscellaneous physical property is disposed of, this account shall be charged with the amount previously credited hereto with respect to such property. The difference between the book cost of the property retired and the sum of the amount chargeable to this account and the amount of the salvage recovered (or the proceeds from the sale of the property) shall be charged to account 6299, "Other extraordinary income charges," or credited to account 6199, "Other extraordinary income credits," as appropriate. (See also Sec. 34.1–7.)*†

§ 34.1620 *Investments in affiliates.* (a) This account shall include the book cost of the carrier's investment in securities issued or assumed by affiliates, other than securities of affiliates held in special funds or as temporary investments. It shall include the amount of investment advances to affiliates.

(b) The records supporting the entries in this account shall be so maintained as to show each class of investment in each affiliate under the following subdivisions:

| | |
|---|---|
| 1620:01 | Investments in securities of affiliates. |
| 1620:02 | Investment advances to affiliates. |

NOTE A: The book cost of securities of affiliates owned by the carrier and held in special funds or as temporary investments shall be included in accounts 1630, 1635, 1640, 1645, 1650, or 1725, as appropriate.

NOTE B: Advances to affiliates that are subject to current settlement shall be included in account 1749, "Other receivables from affiliates."*†

§ 34.1629 *Other investments.* (a) This account shall include the book cost of the carrier's investment in securities issued or assumed by nonaffiliates, other than such securities held in special funds or as temporary investments. It shall include the amount of investment advances to nonaffiliates and other investments not provided for elsewhere.

(b) The records supporting the entries in this account shall be so maintained as to show each class of investment in each nonaffiliate under the following subdivisions:

| | |
|---|---|
| 1629:01 | Investments in securities of nonaffiliates. |
| 1629:02 | Investment advances to nonaffiliates. |
| 1629:99 | Other. |

NOTE A: The book cost of securities of nonaffiliates owned by the carrier and held in special funds or as temporary investments, shall be included in accounts 1630, 1635, 1640, 1645, 1650, or 1725, as appropriate.

NOTE B: Advances to nonaffiliates that are subject to current settlement shall be included in account 1751, "Notes receivable," or account 1759, "Other accounts receivable," as appropriate.*†

§ 34.1630 *Debt-redemption funds.* (a) This account shall include the book cost of assets that have been segregated in special funds for the purpose of redeeming outstanding long-term debt of the carrier.

(b) A separate subaccount, with appropriate title, shall be maintained for each issue or series of long-term debt for the redemption of which a special fund is maintained.

NOTE: Nothing contained herein shall be construed as preventing the carrier from transferring applicable debt-redemption funds to account 1715, "Special cash deposits," for the purpose of paying matured long-term debt, or obligations called for redemption but not presented, or the interest thereon.*†

§ 34.1635 *Employees' provident funds.* This account shall include the amount of cash, the book cost of securities of others, and the book amount of nominally issued and nominally outstanding securities issued or assumed by the carrier and other assets held by trustees or managers of employees' pension funds, saving funds, relief, hospital, and other association funds (whether contributed by the carrier, by employees, or by others), when such trustees or managers are acting for the carrier in the administration of such funds. (See also Secs. 34.10–15 and 34.30–2.)*†

§ 34.1640 *Insurance funds.* (a) This account shall include the book cost of assets that have been segregated in special funds for the purpose of liquidating losses from accident, fire, flood, or other casualties.

(b) A separate subaccount, with appropriate title, shall be maintained for each class of funds.*†

§ 34.1645 *Miscellaneous funds held by trustees.* This account shall include the amount of cash and the cost of other assets deposited with trustees to be held until mortgaged property sold, destroyed, or otherwise disposed of is replaced; also cash realized from the sale of the carrier's securities and deposited with trustees to be held until invested in property for the carrier. When the purposes of such deposits are satisfied and the deposits are released, this account shall be credited with the amount released.*†

§ 34.1659 *Other miscellaneous funds.* (a) This account shall include the book cost of assets that have been segregated in special funds for specific purposes not provided for elsewhere.

(b) A separate subaccount, with appropriate title, shall be maintained for each class of funds.*†

§ 34.1698 *Amortized discount and premium on investment securities.* (a) This account shall include the amount of amortized discount and premium charged or credited as interest from securities held as long-term investments, as provided in paragraph (e) of Sec. 34.10–7.

(b) A separate subaccount with appropriate title shall be maintained for each class and issue or series of securities with respect to which amounts are entered herein, with an appropriate reference to the account in which the cost of the securities is recorded.*†

§ 34.1699 *Allowance for doubtful investments.* (a) This account shall be credited with amounts charged to account 6299, "Other extraordinary income charges," to provide for the doubtful value of investments.

(b) When securities are sold or otherwise disposed of, or their book cost is reduced to a nominal value, this account shall be charged with any amounts covered by credits hereto with respect to such securities.*†

*Current Assets*

§ 34.1710 *Cash.* This account shall include the amount of current funds available for use on demand, in the hands of financial officers and agents, or deposited in banks or with trust companies, and funds in transit for which managers and agents have received credit.*†

§ 34.1715 *Special cash deposits.* (a) This account shall include the amount of cash in special deposits, other than in debt-redemption and other funds, for the payment of interest, dividends, and other debts when such payments are due one year or less from the date of deposit; also the amount of cash deposited to insure the performance of contracts to be performed within one year from the date of deposit, and other cash deposits for specific purposes not provided for elsewhere. When the purposes of such deposits are satisfied and the deposits are released, this account shall be credited with the amount released.

(b) This account shall be subdivided as follows:

1715:01 Special deposits—Interest.
1715:02 Special deposits—Dividends.
1715:99 Special deposits—Other.

*†

§ 34.1720 *Working cash advances.* This account shall include the amount of cash advanced to officers, agents, employees, and others as petty cash or working funds.*†

§ 34.1725 *Temporary investments.* (a) This account shall include the book cost of securities acquired for the purpose of temporarily investing cash, such as demand and time loans, bankers' acceptances, United States Treasury certificates, and other similar investments.

(b) This account shall be subdivided as follows:

1725:01 Temporary investments—Affiliates.
1725:99 Temporary investments — Others.

*†

§ 34.1730 *Operating revenues receivable from users.* (a) This account shall include amounts receivable from customers for services rendered or billed and from agents and collectors authorized to make collections from customers.

(b) This account shall be subdivided as follows:

1730:03 Agents and collectors.
1730:99 Others.

(c) The records supporting the entries in this account shall be so maintained as to show separately (1) amounts due for services rendered and (2) amounts due for services to be rendered (see contra account 2155, "Advance billings").

NOTE A: Amounts representing revenues accrued but not due shall be included in account 1770, "Unmatured accrued receivables."

NOTE B: Amounts receivable from other carriers for participation in transmission shall be included in the accounts maintained in accordance with the provisions of paragraph (a) of Sec. 34.31–3.

NOTE C: Amounts due on notes accepted in settlement of customers' accounts shall be included in account 1751, "Notes receivable."*†

§ 34.1742 *Traffic settlements receivable from affiliates.* This account shall include the net amount receivable from affiliated carriers against each of which there is a net debit balance in the accounts maintained for traffic settlements. (See particularly paragraph (a) of Sec. 34.31–3.)*†

§ 34.1749 *Other receivables from affiliates.* (a) This account shall include amounts receivable from affiliates not provided for elsewhere. (See particularly accounts 1730, 1742, 1770, 1775, and 1785.)

(b) This account shall be subdivided as follows:

1749:01 Matured interest receivable.
1749:02 Declared dividends receivable.
1749:03 Matured rents receivable.
1749:04 Current notes receivable. (See also account 1620.)
1749:99 Other accounts receivable.

(c) In stating the balance sheet there may be included in this account the net amount receivable from affiliates against each of which there is a net debit balance between items applicable to a particular subdivision of this account and the comparable subdivision of account 2129, "Other payables to affiliates."*†

§ 34.1751 *Notes receivable.* (a) This account shall include amounts receivable from persons other than affiliates on notes, drafts, acceptances, and other evidences of indebtedness, payable on demand or not more than one year from the date of issuance. (See also account 1629, "Other investments.")

(b) The book amount of items includible herein that are discounted or sold without releasing the carrier from liability thereon, shall be credited to this account and reported as a contingent liability. (See particularly Sec. 34.10–16.)*†

§ 34.1752. *Traffic settlements receivable.* This account shall include the net amount receivable from persons other than affiliates against each of which there is a net debit balance in the accounts maintained for traffic settlements. (See particularly paragraph (a) of Sec. 34.31–3.)*†

§ 34.1753 *Matured interest receivable.* This account shall be charged with amounts credited to account 5125, "Interest income," or account 5135, "Income from debt-redemption and other funds," representing matured interest receivable from persons other than affiliates that is subject to current settlement.

NOTE A: Earned interest receivable that is accrued but unmatured shall be included in account 1770, "Unmatured accrued receivables."

NOTE B: Matured interest receivable that is not subject to current settlement shall be included in the account in which the principal amount is carried.*†

§ 34.1754 *Declared dividends receivable.* This account shall be charged with amounts credited to account 5120, "Dividend income," or to account 5135, "Income from debt-redemption and other funds," representing dividends declared on stocks of persons other than affiliates that become mature not later than the first day following the date of the balance sheet.

NOTE: Declared dividends receivable that do not mature until after the first day following the date of the balance sheet shall be included in account 1770, "Unmatured accrued receivables."

§ 34.1755 *Matured rents receivable.* This account shall be charged with amounts credited to the income accounts representing rentals receivable from persons other than affiliates that are matured and subject to current settlement.

NOTE A: Rentals receivable that are accrued but unmatured shall be included in account 1770, "Unmatured accrued receivables."

NOTE B: Amounts receivable for minor rentals shall be included in account 1730, "Operating revenues receivable from users."*†

§ 34.1759 *Other accounts receivable.* (a) This account shall include the net amount receivable from persons other than affiliates against each of whom there is a net debit balance in accounts maintained for transactions other than those includible in accounts 1730 and 1751 to 1755, inclusive. (See also accounts 1749, "Other receivables from affiliates," 1770, "Unmatured accrued receivables," 1775, "Subscriptions to capital stock," and 1785, "Subscriptions to bonds.")

(b) This account shall be subdivided as follows:

1759:02 Receivable from officers and employees.
1759:99 Receivable from others.

*†

§ 34.1765 *Allowance for uncollectible receivable.* (a) This account shall be credited with amounts charged to account 4935, "Uncollectible revenues," account 5299, "Other deductions from ordinary income," and account 6299, "Other extraordinary income charges," to provide for uncollectible receivables, under a plan consistently followed and adjusted for errors in estimates.

(b) This account shall be charged with any amounts covered herein that are determined to be impracticable of collection and shall be credited with amounts collected that previously were charged herein.

(c) The records supporting the entries in this account shall be so maintained as to show the amount applicable to each class of receivables for which allowances are established; also the account that was charged with each credit in this account.*†

§ 34.1770 *Unmatured accrued receivables.* (a) This account shall include the amount of revenue estimated to have accrued for services not billed but billable or not due under contract and the amount of interest, dividends, rent, and other items accrued to the date for which the balance sheet is made, but not receivable until after the first day following that date.

(b) This account shall be subdivided as follows:

1770:01 Accrued communication revenue.
1770:02 Accrued interest.
1770:03 Declared dividends.
1770:04 Accrued rents.
1770:99 Other accrued receivables.

*†

§ 34.1775 *Subscriptions to capital stock.* (a) The amount of each subscription to capital stock of the carrier shall be charged to this account at the time the subscription is accepted. The book amount of the stock subscribed shall be credited to account 2420, "Capital stock subscribed—Unissued." The difference between the foregoing amounts shall be charged or credited, as appropriate, to the discount and premium account maintained under the provisions of paragraph (a) of Sec. 34.10–13. (See also account 1780, "Deposits on subscriptions to capital stock.")

(b) This account shall be subdivided as follows:

1775:01 Amounts subscribed by affiliates.
1775:02 Amounts subscribed by officers and employees.
1775:04 Amounts subscribed by underwriters.
1775:99 Amounts subscribed by others.

*†

§ 34.1780 *Deposits on subscriptions to capital stock.* (a) This account shall be credited with amounts received as payments on subscriptions to capital stock.

(b) When payment for the total amount of a subscription has been received, this account shall be charged and account 1775, "Subscriptions to capital stock," shall be credited with such total amount.

(c) Any amounts in this account which become the property of the carrier by forfeiture shall be charged hereto and credited to account 2599, "Other capital surplus."

(d) This account shall be subdivided as follows:

1780:01 Deposits received from affiliates.
1780:02 Deposits received from officers and employees.
1780:04 Deposits received from underwriters.
1780:99 Deposits received from others.

*†

§ 34.1785 *Subscriptions to bonds.* (a) The amount of each subscription to bonds of the carrier shall be charged to this account at the time the subscription is accepted. The face amount of the bonds subscribed shall be credited to account 2020, "Bonds subscribed—Unissued." The difference between the foregoing amounts shall be charged or credited, as appropriate, to the discount and premium account maintained under the provisions of paragraph (a) of Sec. 34.10–14. (See also account 1790, "Deposits on subscriptions to bonds.")

(b) This account shall be subdivided as follows:

1785:01 Amounts subscribed by affiliates.
1785:02 Amounts subscribed by officers and employees.
1785:04 Amounts subscribed by underwriters.
1785:99 Amounts subscribed to others.

*†

§ 34.1790 *Deposits on subscriptions to bonds.* (a) This account shall be credited with amounts received as payments on subscription to bonds of the carrier.

(b) When payment for the total amount of a subscription has been received, this account shall be charged and account 1785, "Subscriptions to bonds," shall be credited with such total amount.

(c) Any amounts in this account which becomes the property of the carrier by forfeiture shall be charged hereto and credited to account 6199, "Other extraordinary income credits."

(d) This account shall be subdivided as follows:

1790:01 Deposits received from affiliates.
1790:02 Deposits received from officers and employees.
1790:04 Deposits received from underwriters.
1790:99 Deposits received from others.

*†

§ 34.1795 *Material and supplies.* (a) This account shall include the cost (consideration being given to the adjustments outlined in paragraphs (b), (c), (d), and (e) of this account) of unapplied material and supplies held for use in communication service (including plant supplies, unissued small tools, fuel, stationery, and other supplies) and of material and articles of the carrier in process of manufacture for supply stock.

(b) Cost shall include the purchase price at the point of free delivery, plus customs duties, excise taxes, and other taxes on purchases, insurance, cost of inspection, special tests prior to acceptance, loading and unloading, transportation, and other directly assignable charges. (Transportation and other charges impracticable of inclusion in the cost of the particular material to which they relate shall be charged to account 9030, "Supply expense—Undistributed.")

(c) Cash and other discounts on material shall be deducted from the cost of the particular material to which they relate or credited to the account to which the material is charged. (When impracticable of such treatment they shall be credited to account 9030, "Supply expense—Undistributed.")

(d) Material recovered in connection with construction, maintenance, or retirement of plant shall be included in this account as follows:

(1) Reusable material shall be included in the appropriate subdivision of this account at weighted average prices based upon the estimated reasonable second-hand value thereof.

(2) The cost of repairing reusable material shall be charged to this account. (When impracticable of such treatment, the cost of such repairing shall be charged to account 9030, "Supply expense—Undistributed.")

(3) Scrap and nonusable material shall be included in this account at the estimated net amount realizable therefrom. The differences between the amounts realized for scrap and nonusable material sold and the amount at which the material was included in this account shall be adjusted to the accounts credited when the material was charged to this account. (When impracticable of such treatment, the differences shall be adjusted to account 9030, "Supply expense—Undistributed.")

(e) Inventories of material and supplies shall be taken during each calendar year and the necessary adjustments shall be made to bring the balance in this account into agreement with the actual inventories. In effecting the adjustments, differences that can be assigned to important classes of material shall be equitably adjusted among the accounts to which such classes of material were charged since the previous inventory. Other differences shall be equitably apportioned among the accounts to which material has been charged since the last inventory or included in account 9030, "Supply expense—Undistributed."

(f) This account shall be subdivided as follows:

1795:01 Material held for use in the carrier's communication operations.
1795:02 Material in process of conversion.
1795:03 Merchandise known to be held predominantly for sale or resale, or for use in jobbing or contracting operations.

1795:04 Material and supplies held for other than communication operations.
1795:05 Undistributed supply expense.

NOTE A: This account shall not include amounts representing cost of material or articles the title to which is not vested in the carrier.

NOTE B: Interest on material bills, the payment of which has been delayed, shall be charged to account 5235, "Other interest charges."°†

§ 34.1799 *Other current assets.* (a) This account shall include the amount of current assets not provided for elsewhere.

(b) The records supporting the entries in this account shall be so maintained as to show the nature of each class of assets included herein.°†

*Prepayments*

§ 34.1810 *Prepaid insurance.* This account shall be charged with the amounts of insurance premiums paid in advance. As the term expires for which the insurance premiums were paid, this account shall be credited at monthly intervals and the appropriate accounts charged.°†

§ 34.1815 *Prepaid rents.* This account shall be charged with the amounts of rents paid in advance. As the term expires for which the rents were paid, this account shall be credited at monthly intervals and the appropriate accounts charged.°†

§ 34.1820 *Prepaid taxes.* This account shall be charged with the amounts of taxes paid in advance. As the term expires for which the taxes were paid, this account shall be credited at monthly intervals and the appropriate accounts charged.°†

§ 34.1899 *Other prepayments.* This account shall be charged with the amounts of prepayments not provided for elsewhere. As the term expires for which the payments were made, this account shall be credited at monthly intervals and the appropriate accounts charged.°†

*Deferred Charges*

§ 34.1910 *Extraordinary maintenance, depreciation, and retirements.* This account shall include, when so authorized by this Commission, the unprovided-for loss in service value of plant retired for causes not factors in depreciation. (See also Sec. 34.04–4.) It shall include such other amounts as may be authorized or directed by this Commission.°†

§ 34.1915 *Capital stock expense.* (a) This account shall include the amount of stock expenses that have not been charged to account 6299, "Other extraordinary income charges." (See particularly Sec. 34.10–13.)

(b) A separate subaccount, with appropriate title, shall be maintained for stock expenses applicable to each class of capital stock.

NOTE: Expenses incurred in connection with the reacquisition and resale of capital stock shall be accounted for as provided in Sec. 34.10–13 and account 2415, "Capital stock reacquired."°†

§ 34.1920 *Long-term debt expense.* (a) This account shall include the amount of debt expenses that have not been charged to account 6299, "Other extraordinary income charges." (See particularly Sec. 34.10–14.)

(b) A separate subaccount, with appropriate title, shall be maintained for debt expenses applicable to each issue or series of long-term debt.

NOTE: Expenses incurred in connection with the reacquisition and resale of long-term debt shall be accounted for as provided in Sec. 34.10–14 and the text of account 2015, "Bonds reacquired."°†

§ 34.1925 *Discount on capital stock.* This account shall include the total of the debit balances in the capital stock discount and premium accounts. (See particularly Sec. 34.10–13.)°†

§ 34.1930 *Unamortized discount on debt.* This account shall include the total of the debit balances in the long-term debt discount and premium accounts. (See particularly Sec. 34.10–14.)°†

§ 34.1935 *Preliminary survey and investigation charges.* (a) This account shall be charged with all expenditures for preliminary surveys, plans, investigations, etc., made for the purpose of determining the feasibility of major projects under contemplation. If construction results, this account shall be credited and the appropriate plant account charged. If the work is abandoned, the charge shall be to account 6299, "Other extraordinary income charges", unless otherwise authorized or directed by the Commission.

(b) The records supporting the entries in this account shall be so maintained that the carrier can furnish complete information as to the nature and purpose of the survey, plans or investigations, and the nature and respective amounts of the charges.

NOTE: The amount of preliminary survey and investigation charges transferred to the plant accounts shall not exceed the expenditures which may reasonably be determined to contribute directly and immediately and without duplication to the plant. (See also Sec. 34.03–7.)°†

§ 34.1940 *Debit balances in clearing accounts.* This account shall include the total of the debit balances in all clearing accounts except account 9030, "Supply expense—Undistributed." (See also Sec. 34.90–2)°†

§ 34.1999 *Other deferred charges.* (a) This account shall include the amount of deferred charges not provided for elsewhere. (See also Sec. 34.03–15.)

(b) The records supporting the entries in this account shall be so maintained that the carrier can furnish complete information as to each item included herein.°†

*Long-term Debt*

§ 34.2010 *Bonds actually issued.* (a) This account shall include the face amount of actually issued and unmatured bonds that have not been retired or cancelled; also the face amount of such bonds issued by others the payment of which has been assumed by the carrier. (See particularly Secs. 34.10–7, 34.10–8, and 34.10–17.)

(b) A separate ledger account, with appropriate title, shall be maintained for each issue or series of long-term debt.

NOTE A: Discount, expense, and premium on bonds shall be accounted for as provided in Sec. 34.10–14.

NOTE B: Matured bonds shall be included in account 2110, "Matured long-term debt."°†

§ 34.2015 *Bonds reacquired.* (a) This account shall include the face amount of bonds actually issued or assumed by the carrier and reacquired by it and held under conditions that do not permit the carrier to treat such bonds as retired or cancelled but do permit their resale. It shall not include securities that are held by trustees of debt-redemption and other funds.

(b) When any issue of bonds, or portion thereof, is reacquired, the acquisition cost of the bonds and the amount of unamortized discount, expense, or premium applicable thereto shall be accounted for as provided in Sec. 34.10–14.

(c) When reacquired bonds are sold, the book amount of the bonds shall be credited to this account and the difference between such amount and the amount received from the sale less commissions and expenses incurred in the sale shall be charged to account 6299, "Other extraordinary income charges", or credited to account 6199, "Other extraordinary income credits", as appropriate.

(d) A separate subaccount, with appropriate title, shall be maintained for each issue or series of bonds reacquired.°†

§ 34.2020 *Bonds subscribed — Unissued.* (a) This account shall include the face amount of bonds for which legally enforceable subscriptions have been received but for which evidences of indebtedness have not been issued.

(b) When the amount of each subscription is received and evidences of indebtedness are issued, this account shall be charged and account 2010, "Bonds actually issued", shall be credited with the face amount of such bonds.

(c) Interest that has accrued on the evidences of indebtedness issued to subscribers shall be accounted for through the appropriate interest account.

(d) A separate subaccount, with appropriate title, shall be maintained for subscriptions to each issue or series of bonds.°†

§ 34.2025 *Receivers' and trustees' securities.* (a) This account shall include the book amount of evidences of indebtedness issued by receivers or trustees in possession of the property of the carrier and acting under the orders of a court.

(b) A separate subaccount, with appropriate title, shall be maintained for each class and issue or series of securities includible herein.°†

§ 34.2030 *Advances from affiliates.* (a) This account shall include amounts owed to affiliates on notes maturing more than one year from date of issuance or origin and the amount of open accounts representing investment advances from affiliates.

(b) This account shall be subdivided as follows:

2030:01 Notes payable to affiliates.
2030:02 Investment advances from affiliates.

NOTE: Notes and open accounts representing indebtedness to affiliates that are subject to current settlement shall be included in account 2129, "Other payables to affiliates."°†

§ 34.2099 *Other long-term debt.* (a) This account shall include the amount of all long-term debt not provided for elsewhere.

(b) The records supporting the entries in this account shall be so maintained that the carrier can furnish complete information as to each item included herein.°†

*Current Liabilities*

§ 34.2110 *Matured long-term debt.* This account shall include the amount of long-term debt and receivers' and trustees' securities, including any obligations for premiums, matured and unpaid without specific agreement for extension of maturity. It shall include bonds drawn or called for redemption but not presented.°†

§ 34.2115 *Customers' deposits.* This account shall include amounts deposited with the carrier by customers as security for the payment of bills. (See also account 2315, "Advances for construction.")°†

§ 34.2122 *Traffic settlements payable to affiliates.* This account shall include the net amount payable to affiliated carriers in favor of each of which there is a net credit balance in the accounts maintained for traffic settlements. (See particularly paragraph (a) of Sec. 34.31–3.)°†

§ 34.2129 *Other payables to affiliates.* (a) This account shall include amounts payable to affiliates not provided for elsewhere. (See particularly accounts 2110, 2122, and 2165 to 2180, inclusive.)

(b) This account shall be subdivided as follows:

2129:01 Matured interest payable.
2129:03 Matured rents payable.
2129:04 Current notes payable. (See also account 2099, "Other long-term debt.")
2129:99 Other accounts payable.

(c) In stating the balance sheet there may be included in this account the net amount payable to affiliates in favor of each of which there is a net credit balance between items applicable to a particular subdivision of this account and the comparable subdivision of account 1749, "Other receivables from affiliates."°†

§ 34.2131 *Notes payable.* (a) This account shall include amounts payable to persons other than affiliates on notes, drafts, acceptances, and other evidences of indebtedness payable on demand or not more than one year from the date of issuance. (See also paragraph (b) of account 1751, "Notes receivable," and account 2099, "Other long-term debt.")

(b) This account shall be subdivided as follows:

2131:02 Payable to officers and employees.
2131:99 Payable to others.

°†

§ 34.2132 *Traffic settlements payable.* This account shall include the net amount payable to persons other than affiliates in favor of each of which there is a net credit balance in the accounts maintained for traffic settlements. (See particularly paragraph (a) of Sec. 34.31–3.)°†

§ 34.2133 *Matured interest payable.* (a) This account shall include the amount of interest matured and payable to persons other than affiliates on long-term debt or other obligations of the carrier. (See also account 2165, "Interest accruals.")

(b) The records supporting the entries in this account shall be so maintained as to show separately the rate and amount of interest included herein by reference to the obligation to which the interest relates.

NOTE: Matured interest payable that is not subject to current settlement shall be included in the account in which the principal amount is recorded.°†

§ 34.2134 *Declared dividends.* (a) This account shall include the amount of dividends that have been declared but not paid.

(b) The records supporting the entries in this account shall be so maintained as to show the amount of dividends declared on each class of capital stock.°†

§ 34.2135 *Matured rents payable.* This account shall be credited with amounts charged to the income accounts and amounts of clearances from account 2170, "Rent accruals," representing matured rents payable to persons other than affiliates.°†

§ 34.2139 *Other accounts payable.* This account shall include the amount of unpaid vouchers, pay rolls, and other items including the net amount payable to persons other than affiliates in favor of each of whom there is a net credit balance in the accounts maintained for transactions with such persons other than the transactions includible in accounts 2132 to 2135, inclusive.°†

§ 34.2155 *Advance billings.* (a) This account shall include the amount of bills rendered for communication service to be furnished in future accounting periods. (See also account 2315, "Advances for construction.")

(b) This account shall be charged and the appropriate operating revenue or asset account shall be credited as the services are rendered or as adjustments are approved.°†

§ 34.2160 *Installment-plan receipts on purchase of capital stock.* (a) This account shall include the amount of receipts from employees and others, other than on subscriptions, as partial payment on capital stock of the carrier.

(b) When amounts so received equal the agreed purchase price for capital stock, this account shall be charged and account 2410, "Capital stock issued," or account 2415, "Capital stock reacquired," as appropriate, shall be credited with the book amount of such stock. Any discount or premium on original issues shall be included in the appropriate discount and premium account.

(c) When amounts included herein are forfeited by purchasers, this account shall be charged and account 2599, "Other capital surplus," shall be credited with the amounts so forfeited.

(d) When, for any reason, receipts under this plan are refunded to purchasers, this account shall be charged with the amount of such refunds, to the extent that the refunds represent amounts of principal installment receipts.

(e) Any amounts credited to purchasers as interest on installment receipts shall be charged to account 5235, "Other interest charges." Any amount by which refunds on uncompleted purchases fail to equal the amounts received from purchasers shall be charged to this account and credited to account 2599, "Other capital surplus."

(f) This account shall be subdivided as follows:

2160:02 Receipts from officers and employees.
2160:99 Receipts from others.

°†

*Liability accruals*

§ 34.2165 *Interest accruals.* (a) This account shall be credited monthly with amounts charged to accounts 5210, "Interest on long-term debt," 5215, "Interest on indebtedness to affiliates," and 5235, "Other interest charges," representing proportionate amounts, applicable to the period, of interest liabilities that have not matured.

(b) When any item of interest included herein has matured, the amount thereof shall be cleared by a charge to this account and a credit to account 2133, "Matured interest payable," or other appropriate account.°†

§ 34.2170 *Rent accruals.* (a) This account shall be credited monthly with amounts charged to accounts 4940, "Rent for lease of operated plant," 4243, "Rent for operating offices," 4245, "Rent for other facilities," 4450, "Rent for offices," and 4455, "Other rents," representing proportionate amounts applica-

ble to the period, of rent liabilities that have not matured.

(b) When the obligation with respect to which any item included herein has matured the amount of such item shall be cleared by charges to this account and credits to account 2135, "Matured rents payable," or other appropriate account.*†

§ 34.2175 *Tax accruals.* (a) This account shall be credited monthly with the amount of taxes considered applicable to the period, and corresponding charges shall be made to the appropriate accounts. Such credits may be based upon estimates, but from time to time, as the facts become known, the amounts of the periodic credits shall be adjusted so as to include, as nearly as can be determined in each year, the taxes applicable to that year. Any amounts representing a prepayment of taxes applicable to a subsequent period shall be included in account 1820, "Prepaid taxes."

(b) The records supporting the entries in this account shall be so maintained that the carrier can furnish information as to the amounts by classes of taxes and taxing authorities, the basis for each tax determination, and the accounts to which charged.*†

§ 34.2180 *Other accruals.* (a) This account shall be credited with the amounts of accruals not provided for elsewhere.

(b) When the obligation with respect to which any item included herein has matured the amount of such item shall be cleared by charges to this account and credits to the appropriate account according to the nature of the matured item.*†

§ 34.2199 *Other current liabilities.* (a) This account shall include the amount of current liabilities not provided for elsewhere.

(b) The records supporting the entries in this account shall be so maintained as to show full details concerning each item included herein.*†

*Provisions For Future Settlements*

(See particularly Sec. 34.10–11)

§ 34.2210 *Provisions for employees' pensions and welfare.* (a) This account shall include specific appropriations of income and the amounts contributed by employees or others (whether carried in special trust funds or in the general funds of the carrier) for pensions, accident and death benefits, savings, relief, hospital, and other provident purposes, when administered by trustees or managers acting for the carrier.

(b) This account shall include also the amount accrued for pensions through charges to account 4435, "Relief and pensions." Amounts so credited shall, when actually paid to retired employees or paid into a trust fund irrevocably devoted to the payment of pensions, be charged hereto.*†

§ 34.2215 *Provisions for self-carried insurance.* (a) This account shall include provisions to cover self-carried risks for losses through accident, fire, flood, or other causes, other than provisions made in the allowance for depreciation.

(b) Amounts included in this account shall be computed upon a basis of rates which fairly cover the risks incurred. These rates shall be determined according to the carrier's experience and best estimate as to the hazard covered. A schedule of risks covered by this account shall be maintained giving a description of the property or the character of the risks covered.

(c) If the carrier reinsures with insurance companies risks initially covered in this account, the premiums for such reinsurance shall be charged hereto.

(d) To the extent that losses and damages sustained are covered by this account, an amount equal thereto shall be charged to this account and credited to the accounts appropriate for the losses and damages sustained.

NOTE: All losses and damages sustained, including those covered by commercial insurance or by this account, shall be charged in the first instance to the allowance for depreciation, construction, repair, accidents and damages, or other appropriate account according to the character of the loss. Insurance recovered or amounts chargeable to this account on account of losses and damages sustained shall be credited to the account in which the losses and damages stand charged.*†

§ 34.2220 *Provisions for equalization of maintenance expenses.* (a) This account shall be credited with such amounts as this Commission may authorize or direct to be charged to account 4198, "Maintenance-expense equalization," under a plan to equalize maintenance expenses.

(b) When maintenance work is performed for which provision has been made in this account, the cost of such work shall be charged to the appropriate maintenance accounts. Concurrently this account shall be charged and account 4198, "Maintenance-expense equalization," shall be credited with an amount equal to the provisions for the cost of such maintenance work.

(c) The carrier's application to this Commission for permission to institute an equalization program shall show full details as to the plan of administration of the program, the character of the work to which amounts accrued may subsequently be applied, and the amount of the monthly or annual accruals for equalization purposes.

(d) A separate subaccount, with appropriate title, shall be maintained for each project or program for which provision is made in this account.*†

§ 34.2225 *Provisions for depreciation and replacement of operated plant leased from others.* (a) This account shall be credited with amounts charged to Account 4910, "Depreciation," for currently accruing depreciation of operated plant leased from others when the carrier, as lessee, is required to replace or to restore the condition of such plant and when such amounts are not subject to current reimbursement to the lessor.

(b) This account shall be charged with the cost of leased plant retired and the cost of removal when, under the terms of the lease, the carrier, as lessee, is required to replace or to restore the condition of plant leased from others. It shall be credited with the salvage value and any other amounts recovered from such retired plant. (See also Sec. 34.1–5.)

(c) As at the effective date of this system of accounts, this account shall be credited with such amount as is necessary to record herein the service value of operated plant leased from others that has expired during the periods of effective leasing agreement under which the carrier, as lessee, is required to replace or to restore the condition of such plant, and when such amounts are not subject to current settlement with the lessor. This includes amounts with respect to depreciable operated plant that has been retired during the periods of such agreements and the expired service value of such plant still in the service of the carrier. The amount thus credited shall, unless otherwise authorized by this Commission, be charged to account 6299, "Other extraordinary income charges."

(d) The amount in this account with respect to each leasing agreement shall be cleared at the expiration of the lease as provided in Sec. 34.1–6.

(e) The records supporting the entries in this account shall be so maintained as to show the amount included herein with respect to each leasing agreement.*†

§ 34.2230 *Leased operated plant retired.* (a) This account shall be credited with the cost of leased operated plant retired when the carrier, as lessee, is required to replace or to restore the condition of plant leased from others. (See also Sec. 34.1–5.)

(b) As at the effective date of this system of accounts, this account shall be credited, and account 2225, "Provisions for depreciation and replacement of operated plant leased from others," shall be charged with the original cost of operated plant leased from others that has been retired since the date of each effective leasing agreement under which the carrier, as lessee, is required to replace or to restore the condition of such plant, and when the cost of such replacement or restoration is not subject to current settlement with the lessor.

(c) The amount in this account with respect to each leasing agreement shall be cleared at the expiration of the lease as provided in Sec. 34.1–6.

(d) The records supporting the entries in this account shall be so maintained as to show the amount included herein with respect to each leasing agreement.*†

§ 34.2299 *Other provisions for future settlements.* (a) This account shall include the amount of provisions for future settlements not provided for elsewhere.

(b) The records supporting the entries in this account shall be so maintained as to show complete details concerning each item included herein.*†

*Deferred Credits*

§ 34.2310 *Unamortized premium on debt.* This account shall include the total of the credit balances in the long-term debt discount and premium accounts. (See particularly paragraph (c) of Sec. 34.10–14.)*†

§ 34.2315 *Advances for construction.* (a) This account shall include the amount of such advances for construction as are to be repaid.

(b) When repayment is made of the entire amount to which the person making the advance is entitled, according to the agreement or rule under which the advance is made, the balance, if any, remaining in this account shall be transferred to account 2515, "Contributions of plant."

(c) This account shall be subdivided as follows:

2315:01 Amounts repayable in full.
2315:02 Amounts repayable in part.

*†

§ 34.2320 *Credit balances in clearing accounts.* This account shall include the total of the credit balances in all clearing accounts except account 9030, "Supply expense—Undistributed." (See also Sec. 34.90–2.)*†

§ 34.2399 *Other deferred credits.* (a) This account shall include the amount of deferred credits not provided for elsewhere. (See also Sec. 34.03–15.)

(b) The records supporting the entries in this account shall be so maintained that the carrier can furnish complete information as to each item included herein.*†

*Capital Stock*

§ 34.2410 *Capital stock issued.* (a) This account shall include the book amount of actually issued capital stock. (See particularly Secs. 34.10–7, 34.10–8, 34.10–9, 34.10–13, and 34.10–17.)

(b) When any class of capital stock or portion thereof is retired or cancelled, this account shall be charged with the amount at which such stock is carried herein.

(c) Separate subaccounts shall be maintained to show the book amount of stock with par value and stock with no-par value, classified according to preferences in distribution of dividends or assets, differences in voting rights, and differences in conditions under which they may be retired.

NOTE A: When a levy or assessment (not including a call for payment on subscriptions) is made against holders of capital stock, the amount collected upon such levy or assessment shall be accounted for in accordance with Sec. 34.10–13.

NOTE B: Discount, expense, and premium on capital stock shall be accounted for in accordance with Sec. 34.10–13.*†

§ 34.2415 *Capital stock reacquired.* (a) This account shall include the book amount of capital stock actually issued by the carrier and reacquired by it, except stock which is held by trustees of debt-redemption and other funds. No-par stock shall be included in this account at the proportionate amount at which the particular class of stock is included in account 2410, "Capital stock issued."

(b) When any class of capital stock or portion thereof is reacquired or retired, the acquisition cost of the stock and the amount of unamortized discount, expense, or premium applicable thereto shall be accounted for in accordance with Sec. 34.10–13.

(c) When reacquired capital stock is sold, the book amount of the stock shall be credited to this account and the difference between such amount and the amount received from the sale less commissions and expenses incurred in the sale shall be charged or credited, as appropriate, to account 2599, "Other capital surplus"; provided, however, that charges shall be made to account 8299, "Miscellaneous charges to earned surplus," to the extent that the amounts thereof exceed the balance in account 2599. In no event shall charges in excess of accumulated credits from the reacquisition, resale, or retirement of capital stock of the same class be charged to account 2599.

(d) A separate subaccount, with appropriate title, shall be maintained for each class of capital stock reacquired.*†

§ 34.2420 *Capital stock subscribed—Unissued.* (a) This account shall include the book amount of capital stock for which legally enforceable subscriptions have been received but for which stock certificates have not been issued. (See also account 2160, "Installment-plan receipts on purchase of capital stock.")

(b) When the amount of each subscription is received and stock certificates are issued, this account shall be charged and account 2410, "Capital stock issued," shall be credited with the book amount of such stock.

(c) A separate subaccount, with appropriate title, shall be maintained for each class of capital stock.*†

§ 34.2425 *Obligations for stock conversion.* (a) This account shall include the book amount of capital stock that the carrier has agreed to exchange for the outstanding securities of other companies which have not been surrendered for exchange. (See particularly Sec. 34.10–8.)

(b) When the securities of the other companies have been surrendered, this account shall be charged and account 2410, "Capital stock issued," shall be credited with the book account of the stock given in exchange.

(c) A separate subaccount, with appropriate title, shall be maintained for each class of capital stock.*†

*Capital Surplus*

§ 34.2510 *Premiums and assessments on capital stock.* This account shall include the total of the credit balances in the capital stock discount and premium accounts. (See particularly Sec. 34.10–13.)*†

§ 34.2515 *Contributions of plant.* (a) This account shall include the amounts of money or its equivalent contributed directly or indirectly to the carrier for the construction or acquisition of plant. (See also paragraph (b) of Sec. 34.1–2.)

(b) The amounts credited to this account shall not be transferred to any other account without the approval of this Commission.

(c) The records supporting the entries in this account shall be so maintained as to show complete information with respect to each contribution, including the amount and purpose, the conditions upon which it was made, and the name of donor.*†

§ 34.2599 *Other capital surplus.* (a) This account shall include all surplus not classified as earned surplus, as premiums and assessments on capital stock, or as contributions of plant. It shall include credits from sales by the carrier of its reacquired capital stock; surplus arising from the retirement and cancellation, from a reduction of the stated value, and from donations by stockholders, of the carrier's capital stock; surplus arising from forgiveness of debt of the carrier; and surplus recorded upon reorganization or recapitalization of the carrier. (See particularly Sec. 34.10–13 and account 2415, "Capital stock reacquired.")

(b) The records supporting the entries in this account shall be so maintained as to permit a ready analysis of the charges and credits.*†

*Earned Surplus*

§ 34.2610 *Contractual reserves.* (a) This account shall include the amount of earned surplus reserved or otherwise set aside, in accordance with the terms of mortgages, deeds of trust, orders of courts, contracts, or other agreements. (See also Sec. 34.30–2.)

(b) Separate subaccounts shall be maintained under such titles as will designate the obligation in support of which each reserve recorded hereunder was created.*†

§ 34.2615 *Reserve against impairment of stated capital.* (a) This account shall be credited with amounts charged to account 8315, "Earned surplus employed in reacquisition of capital stock," as provided in paragraph (g) of Sec. 34.10–7.

(b) Upon resale or retirement of such reacquired stock, this account shall be charged and account 8315, "Earned surplus employed in reacquisition of capital stock," shall be credited.*†

§ 34.2620 *Miscellaneous reserves.* (a) This account shall include the amount of reservations of earned surplus not provided for elsewhere.

(b) Separate subaccounts shall be maintained under such titles as will designate the purpose for which each reserve recorded hereunder was created.*†

§ 34.2699 *Unappropriated earned surplus.* This account shall include the

amount of net earned surplus after providing for reservations and appropriations. (See particularly Sec. 34.10–10.) *†

OPERATED PLANT ACCOUNTS

Instructions

§ 34.1–1 *Purpose and content of operated plant accounts.* (a) The operated plant accounts are designed to show the cost of the carrier's plant having a service life of more than one year, whether used by the carrier or others in radiotelegraph service. (Account 1400, "Plant held for future communication use," shall also be classified according to to the titles and texts provided for the several operated plant accounts.) (See also Sec. 34.03–8.)

(b) When operated plant ordinarily having a service life of more than one year is installed for temporary use in radiotelegraph service, it shall be accounted for in the same manner as other plant having a service life of more than one year.

(c) The cost of individual items of work equipment, such as hand and other portable tools that are likely to be lost or stolen, and other items of equipment that have relatively small value ($10.00 or less) or short life, shall be included in the operated plant accounts only when the investment in such property is relatively large and the correctness of the accounting therefor is verified by the current inventory. When not so verified the cost of such items shall be charged to the operating expense (or clearing) account appropriate for the use of such items.

(d) The cost of plant includible in the following balance-sheet accounts shall be classified according to the titles and texts of the several plant accounts in the manner indicated by the chart under Sec. 34.1–99, which also shows the method for combining balance-sheet and plant account numbers when it is desired to indicate both the use and the class of plant:

1000 Operated plant in carrier's service.
1100 Operated plant leased to others.
1200 Improvements and replacements of operated plant leased from others.
1400 Plant held for future communication use.

(e) The records supporting the entries in the operated plant accounts shall be so maintained as to show the cost of plant used at each station or city office.*†

§ 34.1–2 *Accounting for plant acquisitions.* (a) Plant previously in public use contributed to the carrier, or plant constructed by the carrier through expenditures of contributed money or its equivalent, shall be charged to the plant accounts on basis of original cost, and there shall be credited to the allowance for depreciation and allowance for amortization accounts the estimated amounts of depreciation and amortization requirements applicable to the plant at the date of acquisition. Plant not previously in public use contributed to the carrier shall be charged to the plant accounts at its estimated cost new at date of contribution and there shall be credited to the appropriate allowance for depreciation and allowance for amortization accounts the estimated amounts of such requirements applicable to the plant at that date. The difference between the amounts so includible in the plant and the allowance accounts shall be credited to account 2515, "Contributions of plant."

(b) Amounts received for construction which are ultimately to be repaid, wholly or in part, shall be credited to account 2315, "Advances for construction"; when final determination has been made as to the amount to be repaid, any amounts not subject to refund shall be transferred to account 2515, "Contributions of plants."

(c) When property that comprises a substantially complete operating system or operating unit is (or, prior to the effective date of this system of accounts, has been) acquired from predecessors by purchase, merger, consolidation, liquidation, or otherwise, that portion of the acquisition cost applicable to operated plant, plant under construction, and plant held for future communication use shall be charged to account 91, "Plant acquired—Undistributed charges."

(d) The accounting for the acquisition of such plant shall then be completed as follows:

(1) The original cost of such plant shall be charged to the plant accounts and account 1300, "Plant under construction", as appropriate, and credited to account 91, "Plant acquired—Undistributed charges." When the actual original cost cannot be determined and estimates are used, the carrier shall maintain records to show the particulars of such estimates.

(2) The required allowances for depreciation and amortization of such plant at date of acquisition shall be credited to accounts 1515, "Allowance for depreciation — Radiotelegraph plant", and 1520, "Allowance for amortization—Radiotelegraph plant", respectively, and charged to account 91, "Plant acquired—Undistributed charges."

(3) The amount remaining in account 91, "Plant acquired—Undistributed charges", applicable to such plant, upon the completion of the entries provided in the foregoing paragraphs (1) and (2), shall be transferred to account 1510, "Plant acquisition adjustments", except that, when any amount thus transferable to account 1510 applies to duplicate or other plant which is intended to be retired by the carrier in the reconstruction of the acquired plant and its consolidation with previously owned plant, a statement indicating the plan of the accounting proposed for the entire amount applicable to such plant shall be submitted for consideration and approval by this Commission.

(e) The accounting for radiotelegraph plant acquired from predecessors not provided for in paragraphs (c) and (d) hereof shall be upon basis of acquisition cost to the carrier.

(f) A memorandum record shall be kept of the amount of contributions applicable to the plant acquired, as shown by the accounts of the previous owner.

(g) Copies of journal entries recording the acquisition of (1) substantially complete operating systems, (2) substantially complete operating units, or (3) other plant (when the consideration paid for such other plant is $25,000 or more), and of the entries clearing the amounts originally charged to account 91, "Plant acquired—Undistributed charges", shall be submitted within 90 days from the respective dates of such original and clearing entries for consideration and approval by the Commission. The text of such entries shall give a complete description of the plant acquired and the bases upon which the amounts of the entries have been determined.

(h) In connection with the acquisition of substantially complete operating systems or operating units, the carrier shall procure from the grantor (and the grantor shall deliver) all existing records relating to the property acquired, or certified copies thereof.

(i) If the acquisition involves construction by the accounting carrier, the provisions of Sec. 34.1–3 and Sec. 34.1–4 shall be observed.

NOTE: The cost of valuations, inventories, and appraisals taken in connection with the contemplated acquisition of plant shall be charged to account 1935, "Preliminary survey and investigation charges." If the plant is acquired, the preliminary costs shall be accounted for as a part of the cost of acquisition. If the contemplated acquisition is abandoned, such costs including options paid, shall be charged to account 6299, "Other extraordinary income charges."*†

§ 34.1–3 *Components of construction cost.* (a) The cost of construction properly includible in the plant accounts shall include the applicable direct and overhead costs, listed and described in paragraph (c) of this section and in Sec. 34.1–4 and other analogous items in connection with such work.

(b) When a part only of a project is placed in operation or is completed ready for service and the construction work as a whole is incomplete, that part of the plant placed in operation or ready for service shall be accounted for as completed.

(c) The following is a description of the principal components of construction costs:

(1) The pay and the expenses in lieu of wages of employees engaged in construction work, including the pay and expenses of foremen and inspectors in charge thereof.

(2) The purchase price at the point of free delivery of material and supplies, plus customs duties and excise taxes; the cost of inspection and handling; transportation to first point of delivery to the carrier; an equitable portion of supply expense; the total cost of fabricated material from the carrier's shop; the book cost of reusable material; and the cost of tools consumed on a project.

NOTE: In determining the cost of material used, proper allowance shall be made for unused material and supplies, material recovered from temporary arrangements used in performing the work, salvage value of tools released from the project, and cash and other discounts realized in the purchase of material and supplies.

(3) The cost of transporting employees, material and supplies, tools, and work equipment not under its own power. Transportation of material and supplies includes transportation from point of first delivery to point of use. It includes amounts paid to others as well as the cost of operating the carrier's own transportation equipment.

(4) The cost of protecting the carrier's property from five or other casualties and the cost of preventing injury to others and damage to the property of others.

(5) Expenditures or losses on account of injuries to persons and damages to the property of others. (See also accounts 4430, "Injuries and damages," and 4435, "Relief and pensions.")

(6) Payments for and expenses incurred in securing temporary privileges, permits, or rights in connection with construction work, such as for the use of private or public property, streets, or highways.

(7) Taxes on physical property during construction and before the facilities are completed ready for service, assessed separately from taxes on operating property or under conditions which permit separate identification or allocation of the amount chargeable to construction; also the portion applicable to construction costs of taxes imposed under the Social Security Act and similar state statutes.

(8) The net cost of borrowed funds used for construction purposes and a reasonable rate upon the carrier's own funds when so used. Such amounts shall be charged to the individual project upon which the funds are expended and shall be credited to account 5225, "Interest charged to construction—Cr." The period for which interest may be included in the cost of construction shall be limited to the duration of the construction work. In case construction work is suspended, interest covering a period of more than six months from the date of such suspension shall not be included in the cost of construction except when authorized by this Commission. No interest costs for projects that have been abandoned shall be included in these accounts.

(9) Premiums paid or amounts provided as self-insurance for protection against loss and damage by fire and other casualties, injury to or death of employees or others, damage to property of others, defalcation of employees and agents, non-performance of contractual obligations of others, and the cost of workmen's compensation or similar insurance.

(10) The cost of telephone, water, electricity, power, office space, equipment, and analogous items allocable to the construction project; also similar items furnished by the carrier through its regular operating facilities.

(11) The pay and expenses of operators and helpers required for machine operation, material and supplies consumed, depreciation, and other expenses incurred in the maintenance, operation, and use of special machines such as steam shovels, pile drivers, and other labor-saving machines; also expenditures for rental, maintenance, and operation of such machines owned by others. When a particular construction project requires the purchase of special machines, the cost thereof, less the appraised or salvage value at the time of release from the project, shall be included in this component.

(12) The applicable portion of the pay and of the office and other expenses of the carrier's engineers and their staffs responsible primarily for technical features of construction work.

(13) Amounts paid to other companies, firms, or individuals engaged by the carrier to plan, design, prepare estimates, supervise, inspect, or give general advice and assistance in connection with construction work. A copy of the agreement or arrangement under which such services are rendered shall be preserved by the carrier.

(14) An equitable portion of the pay and of the office and other expenses of the general officers and their staffs. Such amounts shall be determined in accordance with Sec. 34.03–17.

(15) Amounts paid for work performed under contract by other persons. Costs incident to the award of such contracts, to the inspection of such work, and to any other work of any character performed by the carrier in connection with a contract-work project shall be included in the component of construction cost appropriate for the character of the service performed or the expense incurred.

(16) Any incidental revenues received or earned during the construction period, less the costs incident to producing the earnings, shall be credited to the cost of construction.*†

§ 34.1–4 *Overhead construction costs.* (a) All overhead construction costs, such as engineering, supervision, general office salaries and expenses, construction, engineering, and supervision by others than the carrier, law expenses, insurance, injuries and damages, relief and pensions, taxes, and interest, shall be charged to particular projects or units on the basis of the amounts of such overheads reasonably applicable thereto, to the end that each project or unit shall bear its equitable portion of such costs and that the entire cost of the unit, both direct and overhead, shall be deducted from the plant accounts at the time the unit of plant is retired.

(b) The records supporting the entries for overhead construction costs shall be so maintained as to show the nature of the expenditures, the individual projects and accounts charged, and the bases of the distribution of such costs.

(c) The instructions contained herein shall not be interpreted as permitting the inclusion in the operated plant accounts of arbitrary amounts to cover assumed overhead costs, but as requiring the assignment to particular projects and accounts of actual and reasonable overhead costs.*†

§ 34.1–5 *Improvements and replacements of operated plant leased from others.* (a) Except as provided in paragraphs (b) and (c) of this section, the cost of initial improvements (including repairs, rearrangements, and additions) to operated plant leased from others, made in the course of preparing the plant for service and the cost of any subsequent additions to and replacements of the leased plant, shall be charged to the operated plant accounts appropriate for the class of plant leased. (See also Sec. 34.1–2.)

(b) When, under the terms of a leasing agreement, the carrier, as lessee, is required to make specific improvements to leased plant, and such improvements revert to the lessor and constitute a part of the consideration paid for use of the plant, the cost of such improvements shall be charged by the lessee to account 1815, "Prepaid rents," and amortized over the life of the lease to the appropriate rent account. Such portion of the cost of the improvements as represents additions to the leased plant shall be charged by the lessor (if a radiotelegraph carrier) to the appropriate plant accounts and credited to an appropriate subaccount under account 2399, "Other deferred credits." Amounts thus credited to account 2399 shall be amortized over the life of the lease to the appropriate rent account.

(c) When improvements to leased plant otherwise chargeable to the plant accounts are of relatively minor cost or short life, or the period of the lease is not more than 1 year, the cost thereof shall be charged to the accounts appropriate for the cost of repairs of such plant.

(d) When, under the terms of a lease, the carrier, as lessee, is required to replace or to restore the condition of plant leased from others, depreciation charges on such original plant shall be computed on the same basis as for owned depreciable plant. Such amounts shall be charged to account 4910, "Depreciation", and (if not subject to current settlement with the lessor) credited to account 2225, "Provisions for depreciation and replacement of operated plant leased from others." (See also Sec. 34.04–3.)

(e) When, under the terms of a lease, the carrier, as lessee, is required to replace or to restore the condition of plant

leased from others, the cost of leased plant retired by the lessee shall be credited to account 2230, "Leased operated plant retired." Such amount, together with the cost of removal, shall be charged, and the salvage value and any other amounts recovered shall be credited to account 2225, "Provisions for depreciation and replacement of operated plant leased from others."

(f) The accounting for the retirement of improvements and replacements of leased plant made by the lessee shall be as provided in Sec. 34.1–6.

(g) Upon termination of a lease and surrender of the plant to the lessor, the accounting by the lessor (if a radio telegraph carrier) for improvements and replacements of the leased plant which were made by the lessee shall be as follows:

The plant accounts shall be so adjusted as to include the original cost of the plant returned at the termination of the lease, including the original cost of improvements and replacements made by the lessee, and (as so adjusted) appropriately classified in conformity with Sec. 34.1–2. Account 1515, "Allowance for depreciation—Radiotelegraph plant", and account 1520, "Allowance for amortization—Radiotelegraph plan", shall be so adjusted as to include the required allowances for depreciation and amortization of such plant. The difference between (1) the net amount of the foregoing adjustments, and (2) the amount of any settlement with the lessee with respect to such plant, shall be charged to account 1999, "Other deferred charges", or credited to account 2399, "Other deferred credits", as appropriate. The amounts recorded in account 1999, or account 2399, with respect to each leasing agreement shall be disposed of in such manner as this Commission may approve or direct.

(h) Each carrier, as lessee, shall maintain memorandum accounts entirely independent of these accounts in which are recorded the cost, and related allowances, of plant placed under its exclusive control by a leasing agreement, and subsequent retirements of such plant while under the control of the carrier. Separate memorandum accounts shall be maintained for each leasing agreement. The records supporting the memorandum accounts shall be maintained in the same manner and detail as for owned operated plant.*†

§ 34.1–6 *Operated plant retired.* (a) To the end that the operated plant accounts shall at all times disclose the cost of plant in service, the cost of retired plant whether replaced or not (except as provided in paragraph (b) (2) of this section), shall be credited to the account or accounts prescribed in this system of accounts to which such cost was charged. Every carrier shall take such measures and establish such procedure as will insure strict compliance with these requirements. When any item of plant is retired from service for any reason, the amount in the plant accounts applicable to that item shall be credited thereto and the retirement entry shall cite the original entry of cost of the item retired, by name and page of, or other definite identification of, book or other record in which maintained; except that when such entry cannot be identified or is not available, that fact shall be stated in the retirement entry. The records supporting retirement entries shall show also the aggregate quantity, in units of measure ordinarily used by the carrier, of each retirement unit retired. (See Sec. 34.1–6–1.)

(b) *Depreciable operated plant.* For the purpose of avoiding undue refinement, the accounting for retirements and replacements of depreciable operated plant shall be as follows:

(1) *Retirement units.* The cost of any unit retired (whether replaced or not) shall be credited to the appropriate plant account. Except as provided in paragraphs (e) and (f) of this section, the entire amount of such cost shall be charged to account 1515, "Allowance for depreciation — Radiotelegraph plant." (See also the text of that account.) The cost of plant installed in place of the plant retired shall be charged to the appropriate plant accounts.

(2) *Minor items.* Any minor item of plant retired and not replaced shall be accounted for as if it were a retirement unit except that, if the cost of a minor item of plant is accounted for through the retirement of a unit, no separate credit to the plant account is required when such an item is retired. If a minor item of plant is retired and replaced apart from the retirement unit of which it forms a part or with which it is associated, no adjustment shall be made in account 1515, "Allowance for depreciation—Radiotelegraph plant." The cost of the replacement shall be charged to the account appropriate for the cost of maintenance of the plant, except that, if the replacement effects a substantial betterment (the primary aim of which is to make the plant affected more useful, of greater durability, of greater capacity, or more economical in operation), the excess cost in place of the item installed over the cost of the item retired shall be charged to the appropriate plant account.

(c) *Land.* The cost of land retired shall be credited to account 11, "Land." If the land is sold, the difference between the cost of the land and the consideration received less commissions and other expenses of making the sale, shall be charged to account 6299, "Other extraordinary income charges", or credited to account 6199, "Other extraordinary income credits", as appropriate. If the land is retained by the carrier, its estimated fair value, not in excess of cost, shall be charged to account 1610, "Miscellaneous physical property." The difference, if any, between the amount credited to the plant account and the amount charged to account 1610 shall be charged to account 6299, "Other extraordinary income charges." (See also Sec. 34.1–7.)

(d) *Intangibles.* The accounting for franchises, patent rights, leaseholds, and other intangibles retired shall be as provided in the text of account 1520, "Allowance for amortization—Radiotelegraph plant."

(e) When operated plant is sold with the associated traffic, the cost of such plant shall be credited to the appropriate plant accounts and the amounts carried with respect thereto in the depreciation and amortization allowance accounts shall be charged to such allowance accounts. The difference between (1) the net of such charges and credits and (2) the consideration received less commissions and other expenses of making the sale shall be charged to account 6299, "Other extraordinary income charges", or credited to account 6199, "Other extraordinary income credits", as appropriate. The accounting for depreciable operated plant sold without the associated traffic shall be as provided in paragraph (b) of this section and account 1515, "Allowance for depreciation—Radiotelegraph plant."

(f) Upon termination of a lease and transfer of the plant to the lessor, the cost of improvements and replacements made by the lessee to plant leased from others shall be credited to the plant accounts of the lessee in which they stand charged. The amounts applicable to such plant in account 1515, "Allowance for depreciation—Radiotelegraph plant" and account 1520, "Allowance for amortization—Radiotelegraph plant," shall be cleared from such allowance accounts. The difference between the amounts of the foregoing charges and credits shall be charged or credited, as appropriate, to account 2225, "Provisions for depreciation and replacement of operated plant leased from others." The amount of any settlement with the lessor with respect to such plant shall be charged or credited, as appropriate, to account 2225. The balances in account 2225, and account 2230, "Leased operated plant retired", with respect to each such expired lease shall, upon completion of the foregoing entries, be disposed of in such manner as this Commission may approve or direct.

(g) If, after performing the accounting provided in the foregoing paragraphs of this section and in Sec. 34.04–3, a credit balance remains, because of underestimating net salvage value or for any other reason, in the portion of any depreciation or amortization allowance account assignable to the plant retired, the portion of such balance applicable to the calendar year in which the plant is retired shall be charged to that allowance account and credited to the operating revenue-deduction or other account originally charged with the estimated amount of current depreciation. The remainder of such balance shall be cleared from the allowance account as provided in Sec. 34.03–13.

NOTE A: The cost of valuations, inventories, and appraisals taken in connection with the contemplated sale of plant shall be charged to account 1935, "Preliminary survey and investigation charges." If the plant is sold, the preliminary costs shall be deducted from the sale price in accounting for the plant sold. If the contemplated sale is abandoned, such costs shall be charged to account 6299, "Other extraordinary income charges."

NOTE B: When the retirement of operated plant consisting of a complete operating unit or system or having a book cost of $25,000 or more is occasioned by a sale, all transactions relating thereto shall be initially recorded in account 92, "Plant sold—Undistributed credits."

*†

§ 34.1–7 *Transfers of plant.* (a) When plant is transferred from one class of communication service to another, the transfer shall be accounted for by transferring the book cost thereof to the appropriate accounts, and likewise any related amounts in the allowance for depreciation and allowance for amortization accounts shall be transferred to the appropriate allowance accounts.

(b) When depreciable operated plant is transferred to noncarrier operations, the transfer shall be accounted for by crediting the appropriate plant accounts and charging account 1515, "Allowance for depreciation — Radiotelegraph plant", with the cost of the plant transferred. Account 1515 shall then be credited and account 1610, "Miscellaneous physical property", shall be charged with the estimated fair value, not in excess of cost, of the plant transferred.*†

§ 34.1–8 *Continuous property record required.* (a) Not later than January 1, 1940, each carrier shall begin the preparation of a continuous property record relating to property of the classes represented in the balance-sheet accounts under the caption "Communication plant", and in account 1610, "Miscellaneous physical property." The record shall be completed not later than June 30, 1942, with respect to property as at December 31, 1939, and with respect to the changes effected therein between the dates of January 1, 1940 and December 31, 1941, provided, however, that such data shall not be used by the carrier in its permanent records until the approval by this Commission of a plan (and list of property units) and other details of a continuous property record procedure submitted in compliance with the provisions of paragraph (b) of this section.

(b) Not later than June 30, 1940, each carrier shall submit to this Commission for consideration and approval a complete plan of the methods to be used in the compilation of the continuous property record, the installation and maintenance of which is prescribed in paragraph (a) of this section. The plan shall include a list of the property units proposed for use, classified to conform with the operated plant accounts prescribed in this system of accounts, and include material lists for assemblies, together with the quantity-unit designation applicable to each property unit and to the integral or associated parts thereof. A narrative statement shall accompany the lists of proposed units, describing in detail the content and method of maintenance of all forms and other records which are designed for use in compiling the continuous property record, to the end that a ready analysis with respect to the sufficiency thereof may be made.

(c) The record shall be arranged in conformity with the operated plant accounts prescribed in this system of accounts. It shall be compiled on basis of original cost and shall contain such detailed description and classification of the property unit as will permit of ready verification.*†

§ 34.1–99 *Contemplated form of plant statement.* (See Sec. 34.03–9.)

*Radiotelegraph Plant*

| Account No. | Particulars | Operated plant | | | Plant held for future communication use | Total |

*†

Prescribed accounts

[NOTE: Number at the right of the decimal point is the account number]

*Real Estate*

§ 34.11 *Land.* (a) This account shall include the cost of land used in radiotelegraph service. (See also account 84, "Leaseholds.")

(b) When improved land is acquired, the cost shall be fairly apportioned among the land, the land improvements, the drainage, sewerage, gas, and water systems, and the buildings and accounted for accordingly. If the plan of acquisition contemplates the removal of any improvements (including buildings), the total cost of the land and the property to be removed shall be accounted for as the cost of the land, and the amount of salvage recovered from the property removed shall be deducted from the cost of the land.

ITEMS (SEE SEC. 34.03–12)

Assessments for the construction of public improvements. (See also note B to this account.)
Clearing or defending title against claim relating to a period prior to the purchase.
Commissions and fees to brokers, agents, and others.
Condemnation proceedings, including court costs and special counsel fees.
Conveyancer and notarial fees.
Examination and registration of titles.
Relocating property of others in the acquisition of such land.
Taxes assumed on land, applicable to a period prior to the date of acquisition.
Voiding leases to secure possession of land acquired.

NOTE A: When land is acquired in excess of that required for radiotelegraph purposes or is acquired without a definite plan for its use in communication service, its cost shall be charged in account 1610, "Miscellaneous physical property."

NOTE B: Installments of assessments for public improvements, including interest, that are deferred without option to the carrier shall be included in this account, only as they become due and payable. Interest on assessments that are not paid when due shall be included in account 5235, "Other interest charges."*†

§ 34.12 *Land improvements.* This account shall include the cost of improvements made or acquired by the carrier on land used in radiotelegraph service. (See also accounts 11, "Land", 13, "Drainage, sewerage, gas, and water systems", and 14, "Buildings.")

ITEMS (SEE SEC. 34.03–12)

Fences.
Hedges.
Lawns.
Retaining walls. (See also account 14, "Buildings.")
Roads.
Sidewalks.
Swimming pools (outdoor).
Tennis courts.
Yard lighting equipment.
*†

§ 34.13 *Drainage, sewerage, gas, and water systems.* (a) This account shall include the cost of drainage, sewerage, gas, and water systems used in radiotelegraph service. (See also account 11, "Land.")

(b) This account shall include also the cost of shelters used only for housing machinery used in connection with the operation of drainage, sewerage, gas, and water systems.

ITEMS (SEE SEC. 34.03–12)

Basins.
Hydrants.
Machinery used only for the operation of these systems.
Manholes and handholes.
Piping.
Reservoirs.
Tanks—septic, water.
Tiling.
Wells.

NOTE: This account shall not include the cost of piping or equipment located within and serving only one building includible in account 14, "Buildings."*†

§ 34.14 *Buildings.* This account shall include the cost of buildings, not specifically includible in other accounts, used in radiotelegraph service, and the cost of permanent fixtures, machinery, appurtenances, and appliances, installed as parts thereof. (See also account 11, "Land.")

ITEMS (SEE SEC. 34.03–12)

Awnings.
Boilers, furnaces, fixtures, and machinery for heating, lighting, and ventilating.
Cable vaults and conduits constructed as part of the building.
Commissions and fees to brokers, agents, architects, and others.
Door checks and door stops.
Drainage and sewerage, inside piping and equipment. (See also account 13, "Drainage, sewerage, gas, and water systems.")
Electric shielding.
Electric wiring.
Elevators.
Fire-extinguisher systems.
Garages, shops, and stables.
General and other office buildings.
Grading, excavating, and preparing grounds for buildings, including clearing of grounds after construction.
Ground systems (installed with buildings).
Improvements to leased buildings. (See particularly Sec. 34.1–5).
Linoleum and similar floor covering, excluding carpets and rugs.
Motors and generators.
Partitions, including movable.
Piers and foundations for machinery constructed as a permanent part of a building.
Platforms, storage or loading.
Refrigeration systems.
Retaining walls (erected in connection with buildings).
Screens, door and window.
Sheds.
Signs—permanent, attached to buildings.
Sprinkling systems.
Storm doors and windows.
Taxes assumed on buildings, applicable to the period prior to the date of acquisition.
Voiding leases to secure possession of buildings acquired.
Water, steam, and gas pipes.
Window shades and ventilators.

NOTE A: This account shall not include the cost of any equipment, apparatus, or wiring for generating or controlling electricity for operation of the communication system.

NOTE B: The cost of shelters used exclusively for housing, drainage, sewerage, gas, and water systems, tuning coils, power supply equipment, or sleet melting installations shall be included in accounts 13, "Drainage, sewerage, gas, and water systems", 22, "Antenna systems", or account 36, "Power supply and distribution equipment", as appropriate.*†

*Fixed and Land Station Aerial Systems and Lines*

§ 34.21 *Towers and masts.* This account shall include the cost of towers and masts (including pole-type masts) and other antenna-supporting structures and special fixtures used in radiotelegraph service; also the cost of beacon lights and their accessories.

ITEMS (SEE SEC. 3403–12)

Anchors.
Bolts, nuts, and braces.
Cost of initial clearing of area prior to construction.
Excavation.
Foundations.
Grading.
Guys.
Halyards—permanent.
Insulated bases.
Permits and privileges for construction. (See particularly paragraph (c) (6) of Sec. 34.1–3.)
Steel plates and angles.
Topmasts.
Tower or mast ground systems for protection against lightning.
Tower lighting systems.*†

§ 34.22 *Antenna systems.* This account shall include the cost of aerial wire and accessory items comprising the antenna systems used in radiotelegraph service, including the associated ground and counterpoise systems, radio-frequency transmission lines, tuning coils, and sleet melting installations.

ITEMS (SEE SEC. 34.03–12)

*Aerial Assemblies or Arrays*

Anchors.
Bridle rings and wire.
Insulators and thimbles.
Permits and privileges for construction. (See particularly paragraph (c) (6) of Sec. 34.1–3.)
Spreaders.
Switches.
Transportation brackets.
Wire and cable (aerial).

*Ground or Counterpoise Systems*

Clamps and rods.
Counterpoise supports.
Insulators and thimbles.
Plates and pipes.
Protectors and arresters.
Tie wires.
Wire and cable (ground).

*Radio Frequency Transmission Lines*

Anchors.
Bolts, nuts, and brackets.
Clearing routes and tree trimming prior to construction.
Guy clamps.
Guy wire or strand.
Harmonic tuning traps.
Insulators.
Lightning arrestors.
Permits and privileges for construction. (See particularly paragraph (c) (6) of Sec. 34.1–3.)
Pins.
Poles.
Wire.

*Tuning and Uncoupling Coils*

Bases.
Busses.
Coils.
Foundations.
Houses or shelters for coils.
Switches.

*Sleet Melting Installations*

Cables, conduits, and wires.
Circuit breakers.
Meters.
Panels.
Power boards.
Power-supply cables.
Shelters, housings, and platforms.
Switches.
Transformers.

NOTE A: The cost of ground systems installed with buildings shall be included in account 14, "Buildings."

NOTE B: The cost of loop or rod antennas which are integral with or essentially a part of receivers, field strength measuring sets, automobiles, or other similar devices or vehicles should not be included in this account.*†

§ 34.26 *Control lines.* This account shall include the cost of wire, cable, conduit, pole lines, and associated equipment used in radiotelegraph service for intercommunicating, dispatching, originating, terminating, tie lines to customers' premises, and other control purposes.

ITEMS (SEE SEC. 34.03–12)

Anchors.
Braces and brackets.
Cables.
Clearing routes and tree trimming, except maintenance of previous clearings.
Conduits.
Crossarms.
Ducts.
Field telephone systems.
Guys.
Insulators.
Manholes and handholes.
Permits and privileges for construction. (See particularly paragraph (c) (6) of Sec. 34.1–3.)
Poles.
Protectors and arresters.
Tie wires.
Wire.

NOTE A: The cost of interior wiring shall be included in the account appropriate for the cost of plant with which it is associated.

NOTE B: The amounts of payments made to other persons for extending their lines to the carrier's station or office, when such facilities remain the property of such other persons, and when the amounts paid are not subject to rebate, shall be included in account 89, "Other intangibles."*†

§ 34.27 *Power-supply lines.* (a) This account shall include the cost of wire, cable, conduit, pole lines, and associated equipment used in the transmission of power for the carrier's radiotelegraph service.

(b) This account shall include the cost of lines from the point of connection with the primary source of power to the point of termination in the main power-supply switchboard, fuse panel, or distribution box.

ITEMS (SEE SEC. 34.03–12)

Anchors.
Braces and brackets.
Cable.
Clearing routes and tree trimming, except maintenance of previous clearings.
Conduits.
Crossarms.
Ducts.
Guys.
Insulators.
Lightning arresters.
Manholes and handholes.
Permits and privileges for construction. (See particularly paragraph (c) (6) of Sec. 34.1–3.)
Poles.
Tie wires.
Wire.

NOTE: The amounts of payments made to other persons for extending their lines to the carrier's station or office, when such facilities remain the property of such other persons, and when the amounts paid are not subject to rebate, shall be included in account 89, "Other intangibles."*†

*Fixed and Land Station Transmission Equipment*

§ 34.31 *Electron-tube transmitter equipment.* This account shall include the cost of electron-tube transmitters and associated transmitter equipment used in radiotelegraph service. (See accounts 22, "Antenna systems," 26, "Control lines," 36, "Power supply and distribution equipment," and 40, "Control apparatus.")

ITEMS (SEE SEC. 34.03–12)

Air ducts and oil coolers.
Amplifiers—power, audio.
Antenna coupling devices (inside).
Circulating pumps and blowers.
Crystal oscillators.
Electron tubes (see Sec. 34.41–7).
Exciters and drivers.
Filament motor generators.
Meters (permanently installed).
Rectifiers (if a part of the transmitter).
Steel mesh partitions.
Transmitter control panels.
Voltage regulators.
*†

§ 34.32 *Other transmitter equipment.* This account shall include the cost of alternators, spark transmitters, arc transmitters, and other transmitters the cost of which is not includible in account 31, "Electron-tube transmitter equipment," and accessory equipment used exclusively in connection with such transmitters in radiotelegraph service.

ITEMS (SEE SEC. 34.03–12)

Amplifiers.
Coils—induction and saturation.
Compressors.
Condensers.
Converters.
Electron tubes (see Sec. 34.41–7).
Foundations.
Meters (permanently installed).
Motor generators.
Motors.
Oil filtering systems.
Panels.
Pumps.
Resistance grids.
Rheostats.
Steel mesh partitions.
Switchboards.
Switches.
Transformers.
Wiring.
*†

§ 34.33 *Cooling apparatus.* This account shall include the cost of cooling towers and ponds and other apparatus for cooling transmitter and power supply equipment used in radiotelegraph service. (See also account 13, "Drainage, sewerage, gas, and water systems.")

ITEMS (SEE SEC. 34.03–12)

Air ducts.
Blowers.
Brine tanks.
Connecting pipes.
Cooling ponds.
Cooling towers.
Fans.
Meters.
Pumps.
Radiators.
Sumps.
Water storage tanks.

NOTE: The cost of cooling apparatus that forms an integral part of transmitter or power-supply equipment shall be included in accounts 31, "Electron-tube transmitter equipment", 32, "Other transmitter equipment", or 36, "Power supply and distribution equipment", as appropriate.*†

§ 34.34 *Receiver equipment.* This account shall include the cost of receivers and associated receiver equipment used in radiotelegraph service.

ITEMS (SEE SEC. 34.03–12)

Amplifiers.
Control units.
Converters.
Diversity and other equipment racks.
Electron tubes (see Sec. 34.41–7).
Filters.
Meters (permanently installed).
Oscillators.
Resistors.
Switch and control panels.
Tables, pedestals, and other supports (permanently attached).
Tone keyers.
Transformers.
Tuners.

*†

§ 34.36 *Power supply and distribution equipment.* (a) This account shall include the cost of all power supply and distribution equipment serving as or associated with the prime source of power used in radiotelegraph service.

(b) This account shall include also the cost of power rectifiers or motor generator installations (not forming an integral part of a transmitter) that are provided as a common source of power for a multiplicity of transmitters or other equipment. (See also account 31, "Electron-tube transmitter equipment", and account 32, "Other transmitter equipment.")

(c) This account shall include also the cost of storage battery equipment used in radiotelegraph service for the purpose of supplying main, emergency, or auxiliary power.

ITEMS (SEE SEC. 34.03–12)

*Other Than Storage Battery Equipment*

Alternators.
Armatures.
Circuit breakers.
Compensators.
Control panels.
Electron tubes (see Sec. 34.41–7).
Fuse panels.
Generators.
Indicators.
Meters.
Motors.
Power factor correction capacitors.
Rectifiers.
Shelters or housing.
Starters.
Switchboards.
Transformers.

*Storage Battery Equipment*

Batteries.
Battery cases and racks.
Battery room connections.
Charging equipment.
Shelters and housings.
Switching equipment used exclusively for storage batteries.
Tanks and tank insulators.

NOTE A: The cost of lines leading from the main power switchboard, fuse panels, or distribution boxes to the power-supply lines, shall be included in account 27, "Power-supply lines."

NOTE B: The cost of dry cells shall be charged to the appropriate operating expense account.*†

§ 34.40 *Control apparatus.* (a) This account shall include the cost of telephone, telegraph, and other control apparatus, and associated interior wiring, in transmitting and receiving stations and in city or control offices, used for intercommunicating, dispatching, originating, terminating, and other control purposes in radiotelegraph service.

(b) This account shall include also the cost of frequency-measuring installations used for control purposes by the carrier or in the rendition of a commercial frequency-measuring service for others.

(c) This account shall include also the cost of photogram, facsimile, television, and similar equipment, not includible in other accounts, used in radiotelegraph service.

ITEMS (SEE SEC. 34.03–12)

*Frequency-Measuring Equipment*

Equipment racks.
Filament and plate supply regulators.
Frequency meters.
Frequency standard check equipment.
Frequency standards.
Harmonic generators and amplifiers.
Multivibrator units.
Oscillator units.
Pedestals and foundations.
Radio receivers.
Special rooms designed for frequency measuring.
Synchronous clocks and amplifiers.
Time signal recorders and comparators.

*Message Transmitting and Receiving Apparatus*

Automatic transmitters.
Desks or tables fitted with apparatus or used as mountings for apparatus.
Error detectors.
Facsimile machines.
Ink recorders and undulators.
Photoradio operating tables, receiving recorders, scanner units, and transmitting and receiving machines.
Printers, keyboard, page, or tape.
Tape pullers and tape perforators.
Time stamps.
Teletypewriters.
Typewriters, traffic.
Water copy wringers or presses.

*Message-Conveyor Equipment*

Conveyor belts.
Metal chutes.
Pneumatic tubes and associated equipment.

*Calling and Order-Dispatching Equipment*

Annunciator systems.
Microphone and loud speaker equipment.
Public address equipment.
Registers and call boxes.
Telautograph equipment.

*Terminal equipment*

Amplifiers and associated equipment.
Control or switching equipment.
Electron tubes. (See Sec. 34.41–7.)
Filters and filter racks.
Fuse, lamp, and mixer panels.
Microphone equipment.
Modulators.
Mountings for line terminal equipment.
Photoradio facsimile and multiplex terminals.
Radio transmitter frequency control equipment.
Relay test panels.
Tone generating equipment.
Volume indicators.

*Monitoring equipment*

Loud speakers.
Monitor receivers and recorders.
Multiple pen recorders.
Telephone head sets, hand sets, and breast sets.

NOTE A: The cost of outside wiring shall be included in account 26, "Control lines."

NOTE B: The amounts of payments made to other persons for extending their lines (such as pneumatic tube lines) to the carrier's station or office, when such facilities remain the property of such other persons, and when the amounts paid are not subject to rebate, shall be included in account 89, "Other intangibles."

NOTE C: The cost of equipment installed on customers' premises shall be included in account 41, "Equipment on customers' premises."*†

§ 34.41 *Equipment on customer's premises.* (a) This account shall include the cost of equipment installed on customers' premises for use in radiotelegraph service.

(b) This account shall be subdivided as follows:

41:01 Printer equipment.
41:02 Call boxes.
41:99 Other equipment.

ITEMS (SEE SEC. 34.03–12)

Call boxes.
Morse sets.
Printer tables.
Printers (keyboard, page or tape).
Telephones.

NOTE: The cost of outside wiring shall be included in account 26, "Control lines."*†

*Furniture and Office Equipment*

§ 34.51 *Furniture and office equipment.* This account shall include the cost of furniture, office equipment, and portable fixtures used in radiotelegraph service in stations, offices, storerooms, shops, and other quarters.

ITEMS (SEE SEC. 34.03–12)

Beds, cots, and couches.
Bins, counters, and shelves.
Bookcases.
Cabinets and filing cases.
Cages, cashiers' (not part of building).
Chairs, carpets, and rugs.
Clocks.
Davenports.
Desks.
Electric heaters.
Equipment in kitchens and in rest, dining, recreation, and medical rooms.
Fans, electric, portable.
Fire-extinguisher equipment, portable.
Floor scrubbing and polishing machines.

Gas and electric fixtures, portable.
Lockers and wardrobes, portable.
Mirrors, portable.
Motion-picture equipment.
Office devices, including addressing, billing, blueprinting, computing, dating, duplicating, mailing, photostat and recording machines, cash registers, check writers, postage-meter machines, typewriters, and similar items.
Pianos and phonographs.
Radio sets.
Racks—magazine, newspaper, umbrella, and clothing.
Refrigerators, portable.
Safes.
Sewing machines.
Signs, portable.
Shoe-shining equipment.
Stoves.
Tables.
Vacuum sweepers.
Water coolers.

NOTE A: The cost of fixtures attached to and constituting a part of buildings shall be charged to account 14, "Buildings."

NOTE B: The cost of traffic typewriters is includible in account 40, "Control apparatus."*†

*Mobile Station Equipment*

§ 34.61 *Ship station equipment.* (a) This account shall include the cost of equipment used in radiotelegraph service at ship stations.

(b) The records supporting the entries in this account shall be so maintained as to indicate the cost of equipment at each ship station.

ITEMS (SEE SEC. 34.03–12)

Antenna systems.
Control panels.
Electron tubes (see Sec. 34.41–7).
Emergency power supply.
Motor generators.
Receivers.
Transmitters.

*†

§ 34.69 *Other mobile station equipment.* (a) This account shall include the cost of equipment used in radiotelegraph service at mobile stations, other than ship stations.

(b) This account shall be subdivided as follows:

69:01 Aircraft station equipment.
69:02 Equipment at mobile stations other than ship or aircraft.

(c) The records supporting the entries in this account shall be so maintained as to indicate the cost of equipment at each such mobile station.

ITEMS (SEE SEC. 34.03–12)

Antenna systems.
Control panels.
Electron tubes (see Sec. 34.41–7).
Emergency power supply.
Motor generators.
Receivers.
Transmitters.

*†

*Work Equipment*

§ 34.71 *Vehicles and draft animals.* This account shall include the cost of transportation equipment such as motor-driven and animal-drawn vehicles, animals, harness, and appurtenances, used in radiotelegraph service.

ITEMS (SEE SEC. 34.03–12)

Automobiles and airplanes.
Bicycles and scooter-bikes.
Boats and barges.
Camp wagons.
Draft animals.
Hand trucks and carts.
Harness.
Motor cycles.
Mounted kitchens.
Saddles.
Trailers.
Trucks and tractors (including those equipped with earth-boring machines, pumps, winches, and similar items).
Wagons.

*†

§ 34.72 *Shop equipment, tools and implements.* This account shall include the cost of machinery, instruments, tools, appliances, and implements, located at stations, city offices, or shops, and used in testing, maintaining, and constructing radiotelegraph plant.

ITEMS (SEE SEC. 34.03–12)

*Testing and Adjusting Equipment*

Crystal testing equipment.
Electron tubes (see Sec. 34.41–7).
Linemen's test sets.
Megger test sets.
Meters.
Oil testing sets.
Oscillographs and oscilloscopes.
Precision gauges.
Relay testers.
Test panels.
Thermocouples.
Vacuum-tube gas-detector.

*Portable Tools and Implements*

Air compressors, mobile.
Back-filling machines.
Blowers, power.
Compressed-air tools.
Concrete mixers and breakers.
Cranes, mobile.
Derricks, mobile.
Drills and hammers, power.
Earth-boring machines (not part of truck or tractor).
Forges, portable.
Fuse tongs.
Hand tools (see particularly paragraph (c) of Sec. 34.1–1).
Hand trucks, carts, and barrows.
Loaders, power.
Tents and tarpaulins.
Torches.
Trenching machines.

*Other Equipment*

Air compressors.
Blowers.
Boring mills.
Compressed-air tools.
Cranes.
Derricks.
Electric ovens.
Engines.
Forges.
Gasoline pumps and tanks.
Generators, electric and gas.
Lathes.
Milling machines.
Motors.
Oil filter presses.
Oil pumps and tanks.
Planers.
Power drills.
Power hammers.
Power loaders.
Presses.
Pumps.
Winches.
Wire-measuring machines.

NOTE A: The cost of chairs, desks, tables, and other items of furniture used in shops shall be included in account 51, "Furniture and office equipment."

NOTE B: Tools carried as supplies unissued shall be charged to account 1795, "Material and supplies," and small hand tools shall be charged to account 9020, "Shop, tool, and implement expense—Undistributed."*†

§ 34.73 *Store and warehouse equipment.* This account shall include the cost of equipment and appurtenances in storerooms, warehouses, and material yards used in storing, handling, and packing material and supplies held for use in radiotelegraph service.

ITEMS (SEE SEC. 34.03–12)

Barrows.
Bins, portable.
Cabinets, movable.
Conveyors.
Counters, movable.
Cranes.
Furniture and office equipment (located in storerooms and warehouses defined in note A under this account, as distinguished from furniture and office equipment located at stations and city offices).
Gasoline pumps.
Gasoline tanks.
Hand trucks and carts.
Hoists.
Oil pumps.
Oil tanks.
Shelving, movable.
Tools.
Wire-measuring machines.

NOTE A: The storerooms and warehouses to which this account relates are those serving as general distribution centers for materials and supplies and which normally are not located at stations or city offices.

NOTE B: The cost of fixtures attached to and constituting a part of buildings shall be included in account 14, "Buildings."*†

*Intangibles*

§ 34.81 *Organization.* This account shall include the cost of organizing and incorporating the carrier.

ITEMS (SEE SEC. 34.03–12)

Cost of obtaining certificates authorizing the carrier to engage in the public communication business.

Fees and expenses of incorporation.

Fees and expenses of mergers or consolidations.

Office expenses incident to organizing the carrier.

NOTE A: This account shall not include any discounts upon securities issued or assumed, costs incident to negotiating loans or selling bonds or other evidences of indebtedness, or expenses in connection with the authorization, issuance, sale, or resale of capital stock.

NOTE B: This account shall not include the cost of preparing and filing papers in connection with the extension of the term of incorporation unless the first organization costs have been written off.

NOTE C: This account shall not include any organization costs of companies retiring as a result of mergers, consolidations, or reorganizations.°†

§ 34.82 *Franchises.* (a) This account shall include the cost of franchises, consents, and certificates, running in perpetuity or for a specified term of more than one year, issued by a national government, a state, or any other political entity.

(b) When any franchise, consent, or certificate expires, is sold, relinquished, or otherwise retired from service, the accounting shall be as provided in account 1520, "Allowance for amortization—Radiotelegraph plant."

(c) This account shall be subdivided as follows:

82:01 Perpetual franchises.
82:02 Limited-term franchises.

ITEMS (SEE SEC. 34.03–12)

Amounts, other than those includible in account 81, "Organization," paid to a national government, a state, or any other political entity as a condition precedent to engaging in communication business, whether or not the right to occupy public property, streets, or highways is obtained in connection therewith. (See particularly paragraph (c) (6) of Sec. 34.1–3.)

Cost of franchises acquired by assignment.

Cost of plant, material, supplies, and equipment given as the initial consideration for franchises.

Election costs assumed by the carrier for government consent.

NOTE A: The cost of franchises running for one year or less after acquisition shall be charged to account 4460, "Franchise requirements—Dr.," or, if such franchises extend beyond the current calendar year, to account 1800, "Other prepayments," to the extent of its proper portion. Franchises acquired at small cost may be charged to account 4460, irrespective of their term of life.

NOTE B: Franchise taxes payable annually or more frequently shall be charged to account 4932, "Other taxes—Operating."°†

§ 34.83 *Patent rights.* (a) This account shall include the cost of patent rights having a life of more than one year from date of acquisition, acquired for use in connection with the carrier's radiotelegraph operations.

(b) When any patent right expires, is sold, or is otherwise retired from service, the accounting shall be as provided in account 1520, "Allowance for amortization—Radiotelegraph plant."

ITEMS (SEE SEC. 34.03–12)

Costs incident to defending title.

Fees of patent attorneys and other legal expenses.

Filing and registration fees.

Research and development expenses directly assignable.

NOTE: The cost of patent rights having an estimated service life of one year or less, or acquired at small cost, shall be included in account 4499, "Other general expenses."°†

§ 34.84 *Leaseholds.* (a) This account shall include the cost of leaseholds, easements, and similar rights in land and other property having a term of more than one year.

(b) When any leasehold expires, is sold, or is otherwise retired from service, the accounting shall be as provided in account 1520, "Allowance for amortization—Radiotelegraph plant."

(c) This account shall be subdivided as follows:

84:01 Rights of way.
84:99 Other leaseholds.

ITEMS (SEE SEC. 34.03–12)

Conveyancer and notarial fees.

Relocating property of others.

Special counsel and other fees and expenses incurred in connection with leaseholds.

Taxes assumed on leased property applicable to the period prior to the date of the lease.

NOTE A: The cost of permits to erect poles and to place conduit when the expected period of occupancy under such permits does not exceed the estimated life of the initial plant installed, also the cost of other permits not includible in this account, such as those to place cable and wire on buildings and fences, and the related pay and expenses of employees and other costs incident to acquiring such permits, shall be included in the account appropriate for the cost of the plant constructed. (See particularly paragraph (c) (6) of Sec. 34.1–3.)

NOTE B: Annual or more frequent payments for leaseholds shall be charged to account 4940, "Rent for lease of operated plant," account 4245, "Rent for other facilities," account 4450, "Rent for offices," or account 4455, "Other rents," as appropriate.°†

§ 34.89 *Other intangibles.* (a) This account shall include the cost of assets of an intangible nature not provided for elsewhere, such as the amounts of payments made to other persons for extending their lines to the carrier's station or office, when such facilities remain the property of such other persons, and when the amounts paid are not subject to rebate.

(b) When any intangible item the cost of which is included in this account expires or is otherwise retired from service, the accounting shall be as provided in account 1520, "Allowance for amortization—Radio-telegraph plant."

(c) The records supporting the entries in this account shall be so maintained that in the reports to this Commission complete information can be furnished with respect to any amounts included herein.°†

*Other Plant Accounts*

§ 34.91 *Plant Acquired — Undistributed charges.* (a) This account shall be charged temporarily with the acquisition cost of plant acquired by the carrier, under any of the circumstances provided for in Sec. 34.1–2, pending distribution thereof to the appropriate accounts.

(b) Within ninety days from the date of any entry herein recording an acquisition, the carrier shall submit to this Commission a statement indicating the approximate date that clearance is contemplated.°†

§ 34.92 *Plant sold — Undistributed credits.* This account shall be credited temporarily with the selling price of plant, pending distribution thereof to the appropriate accounts. (See particularly paragraph (c) of Sec. 34.1–6.)°†

INCOME AND EARNED SURPLUS ACCOUNTS

Instructions

§ 34.30–1 *Purpose of income accounts.* The income accounts are designed to show for each month and each calendar year the amounts of (1) ordinary income, comprising operating revenues, operating revenue deductions, other communication income, noncommunication income, and deductions from ordinary income, (2) extraordinary income charges and credits, and (3) deductions from net income, comprising taxes on net income and other deductions.°†

§ 34.30–2 *Income from debt-redemption and other funds.* (a) Interest, dividends, and other income derived from funds classified in accounts 1630 to 1659, inclusive, shall be credited to account 5135, "Income from debt-redemption and other funds."

(b) When the income is required by contractual or other provisions to be held in the fund from which the income arises, an amount equal to the income shall be included in the fund to which it is applicable.

(c) When income derived from these funds is required to be retained in the fund and the fund is represented by a reserve, amounts equal to such income shall be charged to account 8310, "Contractual appropriations of earned surplus", or account 8320, "Miscellaneous appropriations of earned surplus", as appropriate, and credited to the appropriate reserve account. (See also accounts 2610, "Contractual reserves", and 2620, "Miscellaneous reserves.")°†

§ 34.30–3 *Rents includible in income accounts.* (a) Rents which the carrier receives from others for operated plant the cost of which is includible in account 1100, "Operated plant leased to others," shall be credited to account 5010, "Income from operated plant leased to others."

NOTE: Rents from operated plant the cost of which is includible in account 1000, "Operated plant in carrier's service," or account 1200, "Improvements and replacements of operated plant leased from others," shall be credited to account 3818, "Revenue from furnishing and servicing stations," or account 3848, "Other leased plant revenue," as appropriate.

(b) All taxes, maintenance, depreciation, amortization, uncollectible rents, or other expenses applicable to plant the income from which is includible in account 5010, "Income from operated plant leased to others," shall be charged to that account by the lessor. When it is necessary to apportion any such amounts between plant owned and used and plant leased to others, the carrier shall be prepared to describe the basis of such apportionment.

(c) Rents paid by the carrier for the exclusive use of substantially complete operating systems or operating units leased from others shall be charged to account 4940, "Rent for lease of operated plant." When taxes, depreciation, amortization, or other expenses applicable to the leased plant are initially accounted for by the lessor, such amounts shall be charged to the appropriate tax, depreciation, amortization, or other accounts by the lessee and credited to account 4940. The lessor shall inform the lessee of the appropriate distribution of such charges.

(d) Taxes, maintenance, depreciation, amortization, and other expenses applicable to leased plant, initially accounted for by the lessee, shall be charged by the lessee to the appropriate tax, maintenance, depreciation, amortization, or other accounts. (See also Sec. 34.1–5.)°†

§ 34.30–4 *Disposition of balances in income accounts.* The net balance of the income account (after deductions provided for in accounts 7010 to 7099, inclusive) shall be transferred to account 8110, "Balance transferred from income accounts," at the end of each calendar year.°†

§ 34.30–5 *Purpose of earned surplus accounts.* The earned surplus accounts are designed to show the changes relating to earned surplus, during each calendar year, resulting from (1) the net amount of profit or loss during the period as reflected in the income accounts, (2) accounting adjustments (usually confined to changes in the stated capital of the corporation or to transactions in its own capital stock) not attributable to income under the provisions of this system of accounts, (3) appropriations of earned surplus for specific purposes, and (4) appropriations for dividends.°†

§ 34.30–6 *Disposition of balances in earned surplus accounts.* The net balance of the earned surplus accounts shall be transferred to account 2699, "Unappropriated earned surplus," at the end of each calendar year.°†

§ 34.30–99 *Contemplated form of income and earned surplus statement.* (See particularly Sec. 34.03–9.)

*Income and Earned Surplus Statement*

| Account No. | Particulars | | |
|---|---|---|---|
| | ORDINARY INCOME—COMMUNICATION | | |
| 3000 | Operating revenues | $ | |
| | OPERATING REVENUE DEDUCTIONS | | |
| 4000 | Operating expenses | $ | |
| 4910 | Depreciation | | |

Prescribed Accounts

[NOTE: Number to the right of the decimal point is the account number]

INCOME ACCOUNTS

*Ordinary Income—Communication (See Particularly Sec. 34.03–8)*

§ 34.3000 *Operating revenues.* This account shall include the total operating revenues shown in the operating revenue accounts, derived by the carrier during the accounting period from the furnishing of communication service and services incidental thereto.*†

Operating Revenue Deductions

§ 34.4000 *Operating expenses.* This account shall include the total operating expenses shown in the operating expense accounts, incurred by the carrier during the accounting period for maintenance of its radiotelegraph plant, and for conducting-operations, administrative, and general expenses incurred in furnishing radiotelegraph service and services incidental thereto.*†

§ 34.4910 *Depreciation.* (a) This account shall include the amount of depreciation charges applicable to the accounting period for all classes of operated plant owned by the carrier except such depreciation as is chargeable to clearing accounts, to account 1300, "Plant under construction," and to account 5010, "Income from operated plant leased to others." It shall include also the amount of depreciation charges applicable to the accounting period for all classes of operated plant used but not owned by the carrier, as provided in Sec. 34.30–3. (See also Secs. 34.04–1 to 34.04–3, inclusive, and Sec. 34.1–5.)

(b) This account shall be subdivided as follows:

4910:01 Depreciation—Operated plant owned and used.
4910:02 Depreciation—Operated plant leased from others.

(c) The records supporting the entries in this account shall be so maintained as to show the amounts applicable to (1) transmission service for each station and (2) nontransmission service.*†

§ 34.4915 *Amortization — Intangible operated plant.* (a) This account shall include the amount of amortization charges applicable to the accounting period for intangibles (having a terminable life) the cost of which is includible in operated plant accounts 82, "Franchises," 83, "Patent rights," 84, "Leaseholds," and 89, "Other intangibles," except such amortization as is chargeable to account 5010, "Income from operated plant leased to others." It shall include also the amount of amortization charges applicable to the accounting period for such intangibles used but not owned by the carrier, as provided in Sec. 34.30–3.

(b) The charges to this account shall be such that the cost of each intangible will be amortized, as evenly as may be, over the period of its benefit to the carrier.

(c) This account shall be subdivided as follows:

4915:01 Amortization — Intangibles owned and used.
4915:02 Amortization — Intangibles leased from others.

*†

§ 34.4920 *Amortization of plant acquisition adjustments.* (a) This account shall be charged or credited, as the case may be, with such amounts as this Commission may authorize or direct to be included in operating revenue deductions under a plan to amortize the amounts in account 1510, "Plant acquisition adjustments."

(b) Amounts recorded in this account shall be credited or charged, as the case may be, to account 1520, "Allowance for amortization—Radiotelegraph plant."*†

§ 34.4925 *Extraordinary plant losses.* (a) This account shall be charged and account 1910, "Extraordinary maintenance, depreciation, and retirements", or account 1515, "Allowance for depreciation—Radiotelegraph plant", as appropriate, shall be credited with the unprovided-for loss in service value of plant retired for causes not factors in depreciation. (See also Sec. 34.04–4.)

(b) The records supporting the entries in this account shall be so maintained as to show the amounts applicable to (1) transmission service for each station and (2) nontransmission service.*†

§ 34.4931 *Social security taxes—Operating.* (a) This account shall include the amounts for which the carrier is liable on its own behalf for taxes imposed under the Social Security Act and similar State statutes that are properly chargeable to radiotelegraph operations.

(b) This account shall be charged and account 2175, "Tax accruals", shall be credited each month with the amount of taxes that are applicable to the month. When it is not possible to determine the exact amount of taxes for the month, the amount shall be estimated and adjustments shall be made as the actual tax levies become known.

NOTE: The amounts of such taxes not applicable to radiotelegraph operations shall be equitably apportioned among the operated plant accounts and account 5250, "Miscellaneous taxes."*†

§ 34.4932 *Other taxes—Operating.* (a) This account shall include, other than taxes on net income and taxes imposed under the Social Security Act and similar State statutes, the amounts of all national, State, municipal, and other taxes that are properly chargeable to radiotelegraph operations. (See also account 4931, "Social security taxes—Operating," and account 7010, "Taxes on net income.")

(b) This account shall be charged and account 2175, "Tax accruals," shall be credited each month with the amount of taxes that are applicable to the month. When it is not possible to determine the exact amount of taxes for the month, the amount shall be estimated and adjustments shall be made as the actual tax levies become known.

(c) When it is necessary to apportion taxes to radiotelegraph operations, full details as to the methods of and facts considered in the apportionment shall be recorded.

(d) Taxes on plant leased from others, the rent for which is includible in account 4940, "Rent for lease of operated plant," shall be charged to this account by the lessee. Taxes on plant leased to others, the rent from which is includible in account 5010, "Income from operated plant leased to others," when assumed by the lessor, shall be charged to that account by the lessor. (See particularly Sec. 34.30–3.)

(e) The records supporting the entries in this account shall be so maintained as to show the amount of each kind of tax and the basis upon which each charge is made; also the amount of taxes directly assignable to each station and the aggregate amount of taxes not directly assignable.

NOTE A: Taxes assumed by the carrier on interest shall be charged to account 5240, "Taxes assumed on interest."

NOTE B: Taxes on nonoperating property the income from which is includible in account 5110, "Income from miscellaneous physical property," shall be charged to account 5250, "Miscellaneous taxes." Taxes on property the income from which is includible in account 5115, "Income from merchandising, jobbing, and contracting," shall also be charged to account 5250.

NOTE C: Special assessments for the construction of street and other improvements shall be included in the appropriate plant accounts. Special assessments for maintenance thereof and special benefit taxes, such as water taxes, shall be included in the appropriate operating expense accounts.

NOTE D: Discounts allowed for payment of taxes before due shall be treated as reductions of taxes assessed.

NOTE E: The accounting for taxes on plant under construction shall be as provided in subparagraph (7) of paragraph (c) of Sec. 34.1–3.*†

§ 34.4935 *Uncollectible revenues.* (a) This account shall be charged with amounts due from customers and agents for radiotelegraph services rendered which are considered to be uncollectible.

(b) This account may include, in lieu of the amounts of direct charges prescribed in paragraph (a) of this account, monthly charges based upon estimates to make provision for uncollectible revenues due from customers and agents. Such amounts shall be credited to account 1765, "Allowance for uncollectible receivables." There shall be recorded full details as to the methods used and the facts considered in estimating the amounts so credited.

NOTE: Uncollectible receivables, other than from customers and agents, shall be charged to account 5299, "Other deductions from ordinary income", account 6299, "Other extraordinary income charges," or other appropriate account.*†

§ 34.4940 *Rent for lease of operated plant.* (a) This account shall be charged with the amounts of rents payable for the exclusive possession of operated plant comprising substantially complete operating systems or operating units.

(b) This account shall be credited with the amounts of taxes, depreciation, amortization, and other expenses initially accounted for by the lessor on operated plant the rent for which is chargeable to this account. (See particularly Sec. 34.30–3.)

(c) The records supporting the entries in this account shall be so maintained as to show separately the following items for each station:

(1) Rents.
(2) Items initially accounted for by the lessor:
(i) Taxes.
(ii) Depreciation.
(iii) Amortization.
(iv) Other expenses.

NOTE A: Rent for lease of ducts, conduit, land, pole lines, circuits, conductors, transmitting and receiving equipment, and similar facilities comprising a part only of a system or unit shall be charged to account 4245, "Rent for other facilities."

NOTE B: Rent for lease of an office or a building shall be charged to account 4243, "Rent for operating offices", account 4450, "Rent for offices", or account 4455, "Other rents", as appropriate.*†

§ 34.4945 *Telephone, wire-telegraph, and ocean-cable operating revenue deductions.* This account shall include the amounts of operating expenses, depreciation, amortization, taxes, uncollectible revenue, and rents incidental to the carrier's telephone, wire-telegraph, and ocean-cable operations. (See also Sec. 34.03–8.) *†

§ 34.4950 *Revenue-contract payments.* This account shall include amounts (authorized or directed by this Commission to be included in operating revenue deductions) that represent payments to common carriers or other persons under the terms of contracts or agreements which provide that such common carriers or other persons shall receive amounts measured by the revenue or traffic of the accounting carrier, although such persons do not participate in the revenue service or transmission of such traffic. (See also Sec. 34.31–3.) *†

§ 34.4999 *Other operating revenue deductions.* This account shall include amounts representing operating revenue deductions that are not includible elsewhere.*†

Other Communication Income

§ 34.5010 *Income from operated plant leased to others.* (a) This account shall be credited with the amounts of rentals received from operated plant comprising substantially complete operating systems or operating units leased to others where the lessee has exclusive possession.

(b) This account shall be charged with the amounts of taxes, depreciation, amortization, and other expenses initially accounted for by the lessor on operated plant the rental from which is creditable to this account. (See particularly Sec. 34.30–3.)

(c) The records supporting the entries in this account shall be so maintained as to show separately the following items for each station:

(1) Rentals.
(2) Items initially accounted for by the lessor:
(i) Taxes.
(ii) Depreciation.
(iii) Amortization.
(iv) Other expenses.
(3) Uncollectible rentals.

*†

§ 34.5015 *Income from telephone, wire-telegraph, and ocean-cable plant leased to others.* This account shall be credited with the amounts of rentals received from telephone, wire-telegraph, and ocean-cable plant comprising complete operating systems or operating unit leased to others where the lessee has exclusive possession.*†

§ 34.5020 *Profit from general services, licenses, and royalties.* (a) This account shall include the amounts of profits realized from services rendered others under a license agreement, a general service contract, or other arrangements providing for the furnishing of general accounting, engineering, financial, legal, patent, and other general services. (See also Sec. 34.41–4 and account 4420, "General services, licenses, and royalties—Cr.")

(b) Minor amounts of profits from such arrangements may be included in account 4420, "General services, licenses, and royalties—Cr."*†

§ 34.5089 *Income from foreign operations.* (a) This account may include the net amount of income of the carrier when the detailed amounts are required to be stated in terms of foreign currency or in a manner at variance with the requirements of this system of accounts.

(b) A separate subaccount with appropriate title shall be maintained for the amount of such income from each foreign country.

(c) The records supporting the entries in this account shall be so maintained that, in the reports to this Commission, a complete analysis of the transactions affecting each station may be shown.

(d) Each carrier that elects to use this account shall advise this Commission of the fact at least sixty days before the effective date of this system of accounts. Changes from this elective procedure to the alternative procedure prescribed for domestic income, or vice versa, shall not be made thereafter without submitting to this Commission for its consideration and approval notice of the change at least ninety days before the proposed effective date of such change.*†

§ 34.5099 *Other communication income.* This account shall include the amount of communication income not provided for elsewhere.*†

*Ordinary Income—Noncommunication*

§ 34.5110 *Income from miscellaneous physical property.* (a) This account shall include the amounts received and the expenses incurred in connection with the operation of property the investment in which is includible in account 1610, "Miscellaneous physical property," and the property of others leased by the carrier for other than communication operations.

(b) The expenses shall include every element of cost (except taxes) incurred in such operations, including depreciation, amortization, insurance, assessments against such property for maintenance of public improvements, an equitable portion of administration expenses, uncollectible rentals, and any other costs incident to the operation of miscellaneous physical property.

NOTE: Taxes applicable to miscellaneous physical property and its operation shall be charged to account 5250, "Miscellaneous taxes."*†

§ 34.5115 *Income from merchandising, jobbing, and contracting.* (a) This account shall include the amounts received and the expenses (except taxes) incurred in connection with the sale of merchandise, including any amounts accruing to the carrier on jobbing and contracting work performed by employees.

(b) This account shall be subdivided as follows:

5115:01 Income from merchandising, jobbing, and contracting.
5115:02 Costs and expenses of merchandising, jobbing, and contracting.

(c) This account shall be further subdivided to show amounts of income from and the costs and expenses of merchandising, jobbing, and contracting with respect to:

(1) Fixed and land station equipment.
(2) Ship station equipment.
(3) Other mobile station equipment.
(4) Other radio equipment.
(5) Other merchandising, jobbing, and contracting.

NOTE A: Periodic charges for the use of plant includible in account 1000, "Operated plant in carrier's service" (see particularly the note following account 1100, "Operated plant leased to others"), and for installing, maintaining, inspecting, and servicing such plant, shall be included in account 3818, "Revenue from furnishing and servicing stations."

NOTE B: Taxes applicable to merchandising, jobbing, and contracting shall be charged to account 5250, "Miscellaneous taxes."*†

§ 34.5120 *Dividend income.* This account shall include the amounts of in-

come received from dividends declared on stocks of other persons other than dividends received on securities includible in accounts 1630 to 1650, inclusive.

NOTE A: Dividends on nominally issued and nominally outstanding capital stock shall not be included in these accounts.

NOTE B: No amounts shall be entered in these accounts representing value assigned to stock dividends received by the carrier on stocks of other persons. The proceeds realized from subsequent sale or disposal of the stock received as a dividend, or of the stock with respect to which the dividend was paid, shall be appropriately accounted for, proper credit being given to the investment account for the portion of the book cost assignable to the shares sold or disposed of. Any profit or loss resulting from the transaction shall be credited to account 6199, "Other extraordinary income credits," or charged to account 6299, "Other extraordinary income charges," as appropriate.*†

§ 34.5125 *Interest income.* (a) This account shall include the amounts of interest income on investments in securities of other persons other than interest on securities includible in accounts 1630 to 1659, inclusive. It shall include interest income on investment advances and on other loans, notes, special deposits, and other interest-bearing assets. (See also Sec. 34.10–7.)

(b) This account shall be subdivided as follows:

5125:01 Interest income on securities.
5125:02 Interest income on investment advances.
5125:99 Other interest income.

NOTE A: Interest on nominally issued and nominally outstanding long-term debt shall not be included in these accounts.

NOTE B: Interest that has accrued shall not be credited to this account unless its payment is reasonably assured.*†

§ 34.5135 *Income from debt-redemption and other funds.* (a) This account shall include the amounts of income (whether interest or dividends) accrued on cash, securities issued by other persons, or other assets held in accounts 1630 to 1659, inclusive. (See particularly Secs. 34.10–7 and 34.30–2.)

(b) Expenses, losses, and fees payable by the carrier from such funds or income therefrom, and incurred in connection with the operation of the fund, shall be charged to this account.

(c) The records supporting the entries in this account shall be so maintained as to show separately the income from each fund.*†

§ 34.5140 *Gain or loss on foreign currency exchange.* (a) This account shall be credited or charged, as appropriate, with amounts representing the gain or loss resulting from the actual conversion of United States currency into foreign currency, or vice versa, in accordance with the provisions of paragraph (c) and (d) of Sec. 34.03–16.

(b) The records supporting the entries in this account shall be so maintained as to permit ready analysis of the amount applicable to any transaction.*†

§ 34.5199 *Other noncommunication income.* This account shall include the amount of noncommunication income not provided for elsewhere.*†

*Deductions From Ordinary Income*

§ 34.5210 *Interest on long-term debt.* (a) This account shall include the amounts of interest accrued on outstanding long-term debt issued or assumed by the carrier, the liability for which is included in account 2010, "Bonds actually issued", account 2025, "Receivers' and trustees' securities", and account 2099, "Other long-term debt."

(b) The records supporting the entries in this account shall be so maintained as to show the interest accruals on each issue or series of long-term debt.

NOTE: Interest on nominally issued and nominally outstanding long-term debt shall not be included in these accounts.*†

§ 34.5215 *Interest on indebtedness to affiliates.* (a) This account shall include the amounts of interest accrued on indebtedness to affiliates included in accounts such as account 2030, "Advances from affiliates", and account 2129, "Other payables to affiliates."

(b) The records supporting the entries in this account shall be so maintained as to show to whom the interest is payable, the nature and amount of the principal obligation, and the rate of interest, under the following subdivisions:

5215:01 Interest on advances.
5215:02 Interest on open accounts.

*†

§ 34.5220 *Amortization of debt discount.* (a) This account shall include for each accounting period the portion of unamortized debt discount on outstanding long-term debt that is applicable to the period. Such amounts shall be determined in accordance with Sec. 34.10–14.

(b) Amounts charged to this account shall be credited to account 1930, "Unamortized discount on debt." *†

§ 34.5225 *Interest charged to construction—Cr.* This account shall be credited with amounts charged to account 1300, "Plant under construction", as provided in paragraph (c) (8) of Sec. 34.1–3.*†

§ 34.5230 *Amortization of debt premium—Cr.* (a) This account shall include for each accounting period the portion of unamortized premium on outstanding long-term debt that is applicable to the period. Such amounts shall be determined in accordance with Sec. 34.10–14.

(b) Amounts credited to this account shall be charged to account 2310, "Unamortized premium on debt."*†

§ 34.5235 *Other interest charges.* (a) This account shall include the amount of interest charges not provided for elsewhere. Among the items of indebtedness the interest on which is chargeable to this account are (1) assessments for public improvements—past due, (2) claims and judgments, (3) customers' deposits, (4) notes payable on demand or maturing less than one year from date of issuance, except notes payable to affiliates, (5) open accounts, except with affiliates, and (6) tax assessments—past due.

(b) The records supporting the entries in this account shall be so maintained as to show to whom the interest is payable, the nature and amount of the principal obligation, and the rate of interest.*†

§ 34.5240 *Taxes assumed on interest.* This account shall include amounts paid to holders of bonds (or other evidences of indebtedness of the carrier), and amounts paid to governmental agencies in their behalf, with respect to income and other taxes levied against the income from such debt or levied as a tax on ownership of the debt, when such taxes are assumed by the carrier.*†

§ 34.5245 *Amortization of debt expense.* (a) This account shall include for each accounting period the portion of unamortized debt expense on outstanding long-term debt that is applicable to the period. Such amounts shall be determined in accordance with Sec. 34.10–14.

(b) Amounts charged to this account shall be credited to account 1920, "Long-term debt expense."

NOTE: The carrier may accelerate the writing off of debt expense by charges to account 6299, "Other extraordinary income charges."*†

§ 34.5250 *Miscellaneous taxes.* (a) This account shall include the amounts of taxes not provided for elsewhere. Among the items that shall be charged hereto are taxes applicable to miscellaneous physical property and the operation thereof, and taxes applicable to merchandising, jobbing, and contracting.

(b) Amounts charged to this account prior to payment shall be credited to account 2175, "Tax accruals."*†

§ 34.5255 *Amortization of plant acquisition adjustments.* (a) This account shall be charged or credited, as the case may be, with such amounts as this Commission may authorize or direct to be included in deductions from ordinary income under a plan to amortize amounts in account 1510, "Plant acquisition adjustments."

(b) Amounts recorded in this account shall be credited or charged, as the case may be, to account 1520, "Allowance for amortization—Radiotelegraph plant."*†

§ 34.5260 *Revenue-contract payments.* This account shall include amounts (authorized or directed by this Commission to be included in deductions from ordinary income) that represent payments to common carriers or other persons under the terms of contracts or agreements which provide that such common carriers or other persons shall receive amounts measured by the revenue or traffic of the accounting carrier, although such persons do not participate in the revenue service or transmission of such traffic. (See also Sec. 34.31–3.)*†

§ 34.5299 *Other deductions from ordinary income.* This account shall include deductions from ordinary income not provided for elsewhere. Among the items that shall be charged hereto are contributions for charitable, social, or community-welfare purposes and membership fees and dues in associations other than those of the carrier itself in associations of communication carriers and of employees in professional organizations; also amounts of depreciation and amortization on radiotelegraph plant other than operated plant. (See also Sec. 34.03–7.)*†

*Extraordinary Income-Credits*

§ 34.6110 *Delayed income credits.* This account shall include the amount of extraordinary and nonrecurring delayed items, as provided in Sec. 34.03–13.*†

§ 34.6199 *Other extraordinary income credits.* This account shall include the amount of extraordinary income credits not provided for elsewhere.

ITEMS (SEE SEC. 34.03–12)

Forfeitures of amounts deposited with the carrier under options for the sale or lease of property.

Profits derived from the sale of property the cost of which is includible in account 1610, "Miscellaneous physical property."

Profits derived from the sale of reacquired securities other than capital stock.

Profits derived from the sale of securities of other persons.

Profits from the sale of plant. (See also Sec. 34.1–6.)

Unclaimed customers' deposits.

Unclaimed wages and dividends written off.

*†

*Extraordinary Income—Charges*

§ 34.6210 *Delayed income charges.* This account shall include the amount of extraordinary and nonrecurring delayed items, as provided in Sec. 34.03–13.*†

§ 34.6299 *Other extraordinary income charges.* This account shall include the amount of extraordinary income charges that are not includible in account 6210, "Delayed income charges."

ITEMS (SEE SEC. 34.03–12)

Amounts charged to corporate income to provide for the extinguishment of amounts includible in account 81, "Organization."

Amounts charged to income in recognition of decline in value of current assets and securities owned. (See also Secs. 34.10–2 and 34.10–7.)

Capital stock expense written off. (See also paragraph (e) of Sec. 34.10–13.)

Forfeitures of amounts deposited by the carrier under options for the purchase or lease of property.

Inventory, appraisal, and other costs incident to the acquisition, sale, or lease of property when the projects are abandoned.

Long-term debt expense written off. (See also paragraph (e) of Sec. 34.10–14.)

Losses of funds due to bank failures.

Losses on the sale of plant. (See also Sec. 34.1–6.)

Losses resulting from the sale, destruction, or retirement of property the cost of which is includible in account 1610, "Miscellaneous physical property."

Losses resulting from the sale of reacquired securities other than capital stock.

Losses resulting from the sale of securities of other persons.

*†

*Deductions From Net Income*

§ 34.7010 *Taxes on net income.* (a) This account shall include the amount of national, State, and local government taxes on taxable net income including additional assessments of such taxes.

(b) The records supporting the entries in this account shall be so maintained as to show the amounts included herein with respect to each taxing authority.*†

§ 34.7099 *Other deductions from net income.* This account shall include the amount of deductions from net income not provided for elsewhere.*†

EARNED SURPLUS ACCOUNTS

*Earned Surplus-Credits*

§ 34.8110 *Balance transferred from income accounts.* This account shall include the net balance transferred from the income accounts for the current year. (See particularly Sec. 34.30–4.)*†

§ 34.8199 *Miscellaneous credits to earned surplus.* (a) This account shall include the amount of credits affecting earned surplus not provided for elsewhere. Among the items that shall be credited hereto are increments from the reacquisition and resale of the carrier's capital stock. (See also Sec. 34.10–13.)

(b) The records supporting the entries in this account shall be so maintained that an analysis thereof may be shown in the reports to this Commission.*†

*Earned Surplus-Charges*

§ 34.8299 *Miscellaneous charges to earned surplus.* (a) This account shall include the amount of charges affecting earned surplus not provided for elsewhere. Among the items that shall be charged hereto are discount on capital stock written off and losses from the reacquisition and resale of the carrier's capital stock. (See also Sec. 34.10–13 and account 2415, "Capital stock reacquired.")

(b) The records supporting the entries in this account shall be so maintained that an analysis thereof may be shown in the reports to this Commission.*†

§ 34.8310 *Contractual appropriations of earned surplus.* (a) This account shall include the amount of earned surplus reserved in accordance with the terms of mortgages, deeds of trust, orders of courts, contracts, or other agreements.

(b) Amounts charged to this account shall be credited to account 2610, "Contractual reserves."*†

§ 34.8315 *Earned surplus employed in reacquisition of capital stock.* (a) This account shall be charged and account 2615, "Reserve against impairment of stated capital," shall be credited with the book amount of capital stock reacquired by the carrier and not retired.

(b) Upon resale or retirement of capital stock, this account shall be credited and account 2615, "Reserve against impairment of stated capital," shall be charged with the amounts included herein applicable to such stock.*†

§ 34.8320 *Miscellaneous appropriations of earned surplus.* (a) This account shall include the amount of reservations of earned surplus not provided for elsewhere.

(b) Amounts charged to this account shall be credited to account 2620, "Miscellaneous reserves."*†

§ 34.8399 *Dividend appropriations of earned surplus.* (a) This account shall include the amount of earned surplus appropriated for dividends on the actually outstanding capital stock of the carrier.

(b) The records supporting the entries in this account shall be so maintained as to show the amount of dividends declared on each class of capital stock. If dividends are not payable in cash, the medium of payment shall be described with sufficient particularity to identify it.*†

OPERATING REVENUE ACCOUNTS

Instructions

§ 34.31–1 *Purpose of operating revenue accounts.* The operating revenue accounts are designed to show the carrier's portion of amounts received or receivable for the furnishing of radiotelegraph service. (See also Secs. 34.03–8 and 34.03–17.)*†

§ 34.31–2 *Basis of credits to operating revenue accounts.* (a) Credits to the operating revenue accounts shall be based upon the actual amounts chargeable for services rendered by the carrier.

NOTE A: Corrections of overcharges, overcollections, and collections on behalf of others previously credited to the operating revenue accounts shall be charged to the account or accounts previously credited.

NOTE B: Authorized refunds and adjustments on account of failures in service shall be charged to account 4230, "Traffic damages."

(b) The appropriate operating revenue accounts shall be credited with:

(1) Amounts charged for installations, for restoration and termination of service, for inside and outside moves, for instrument changes, and for similar service requirements.

(2) Amounts of initial nonrecurring charges for special or auxiliary plant or equipment furnished in rendering service to a customer, except that charges for the cost of such plant or equipment the

ownership of which rests with or will revert to the customer shall be credited to the accounts charged with the cost of such plant or equipment.

(3) Amounts of initial nonrecurring charges for installation of special or auxiliary plant or equipment furnished by a customer.

(4) Amounts of service charges for supplemental or auxiliary equipment furnished in rendering service to a customer.

(5) Amounts collected from users as costs of delivery beyond the free delivery zones adjacent to terminals of the carrier. (See also note C under Sec. 34.31–3.)

(c) A separate subaccount shall be maintained for revenue derived from each circuit used in foreign transmission. (For the purpose of compliance with this instruction, all stations in a single foreign country may be viewed as a single terminus of any particular circuits affording transmission with that country.) *†

§ 34.31–3 *Divisions of operating revenues.* (a) An account shall be maintained with each communication carrier with which traffic settlements are made (separately from the accounts maintained for other transactions with such carriers) and there shall be included in each such account both the amounts of revenues receivable from such carriers for the accounting carrier's participation and the amounts payable to such carriers for participation by others in such transmission. In stating the balance sheet the total of the debit balances remaining in such accounts shall be reported in accounts 1742, "Traffic settlements receivable from affiliates," and 1752, "Traffic settlements receivable," as appropriate, and the total of the credit balances remaining in such accounts shall be reported in accounts 2122, "Traffic settlements payable to affiliates," and 2132, "Traffic settlements payable," as appropriate.

(b) Amounts representing the carrier's portion of revenues receivable from other carriers for participation in the transmission of communication shall be credited to the appropriate revenue accounts and charged to the account maintained in accordance with paragraph (a) of this section.

(c) Amounts payable for participation by others in the transmission of communication shall be excluded from (or if previously credited thereto—charged to) the revenue accounts and credited to the account maintained in accordance with paragraph (a) of this section.

NOTE A: Commissions paid to transportation companies, hotels, service stations, or any person other than employees of the carrier for services rendered in originating and terminating messages or for other commercial communication services shall be charged to account 4270, "Commissions—Dr." Commissions paid to employees in lieu of or in addition to salaries or other compensation for similar services rendered shall be charged to the operating expense account appropriate for the salaries of such employees.

NOTE B: Commissions received by the carrier for services rendered in originating or terminating messages or for other commercial communication services shall be credited to account 4275, "Commissions—Cr."

NOTE C: Amounts (other than those representing commissions or participation in transmission) payable to common carriers or other persons under the terms of contracts or agreements which provide that such common carriers or other persons shall receive amounts measured by revenues or traffic of the accounting carrier shall be charged to account 4050, "Revenue-contract payments", or account 5260, "Revenue-contract payments," as appropriate. Amounts payable for services performed for the carrier, such as tolls or rental charges, including those collected from users as costs of delivery beyond the free delivery zones adjacent to the terminals of the carrier shall be charged to the appropriate operating expense accounts.*†

§ 34.31–4 *Services furnished without direct charge.* (a) Amounts representing radiotelegraph services furnished to a national government, a state, or political subdivision thereof without direct compensation, in accordance with franchise requirements, shall be charged to account 4460, "Franchise requirements—Dr.", and credited to account 4465, "Franchise requirements—Cr."

(b) Records shall be maintained to show amounts representing any other radiotelegraph services carried on especially for the needs of a specific service of general interest and not open to public correspondence and for which no direct compensation is received.*†

§ 34.31–99 *Contemplated form of operating revenue statement.* (See Sec. 34.03–9.)

## Prescribed Accounts

[NOTE: Number to the right of the decimal point is the account number]

*Continental Fixed Radiotelegraph Revenues*

§ 34.3113 *Fixed message revenue—Continental.* (a) This account shall include the carrier's portion of revenue from the transmission of continental fixed communication.

(b) A memorandum record supporting the entries in this account shall be prepared by Class A carriers on a monthly basis from statistical records of revenues derived from the several classifications of services as follows:

(1) *General message revenue.* This classification shall include the carrier's portion of revenue from the transmission, at published tariff rates available to the general public, of the following and similar classes of messages:

Full rate messages.
Day letters.
Night letters.

including multiple-address or book messages, and similar services related to the above classes.

(2) *Serial service message revenue.* This classification shall include the carrier's portion of revenue from the transmission, at published tariff rates available to the general public, of messages transmitted at rates established to apply when more than one message or section of a message is sent to the original addressee at the same address within a specified period of relatively short duration.

(3) *Timed service message revenue.* This classification shall include the carrier's portion of revenue from the transmission of messages when the basis of the published tariff rates is the time employed, required, or allowed for such transmission, whether such time is computed on basis of the number of words transmitted converted into equivalent minutes, or on basis of the actual time required for transmission.

(4) *Greetings and other flat-rate message revenue.* (i) This classification shall include the carrier's portion of revenue from the transmission, at flat or fixed published tariff rates (applicable regardless of distance), of classes of fixed-text messages and messages of sender's composition such as holiday-greeting messages, including multiple-address or book messages and similar services related to these classes.

(ii) Allocations to this classification shall reflect due consideration of the effect of the abnormal traffic existing upon special occasions such as holidays.

(5) *Press message revenue.* This classification shall include the carrier's portion of revenue from the transmission, at published tariff rates available only to newspapers, press associations, and persons similarly engaged, that are less than the rates for comparable service to the general public or classes of messages restricted as to text.

(6) *United States government message revenue.* This classification shall include the carrier's portion of revenue from the transmission, at published tariff rates available to the United States government, or any department or agency thereof, of classes of official messages such as the following:

Government full rate messages.
Government day letters.
Government night letters.
Government weather bureau messages.

(7) *Other governments message revenue.* This classification shall include the carrier's portion of revenue from the transmission, at published tariff rates available to governments other than the United States, that are less than the rates for comparable service to the general public, of classes of messages similar to those listed under classification (6), immediately preceding, relating to United States government message revenue.

(99) *Other radiotelegraph revenue.* This classification shall include the carrier's portion of revenue from the transmission includible in this account and not provided for elsewhere.*†

*Insular Fixed Radiotelegraph Revenues*

§ 34.3213 *Fixed message revenue—Continental transmission.* (a) This account shall include the carrier's portion of revenue from the continental transmission of insular fixed communication.

(b) A memorandum record supporting the entries in this account shall be prepared by Class A carriers on a monthly basis from statistical records of revenues derived from the several classifications of services as follows:

(1) *General message revenue.* This classification shall include the carrier's portion of revenue from the transmission, at published tariff rates available to the general public, of the following and similar classes of messages:

Urgent messages.
Urgent CDE messages.
Ordinary messages.
Ordinary CDE messages.
Letter (DLT and NLT) messages.
Deferred (LC) messages.
Radiomail.

including multiple-address or book messages and similar services related to the above classes.

(4) *Greetings and other flat-rate message revenue.* (i) This classification shall include the carrier's portion of revenue from the transmission, at flat or fixed published tariff rates (applicable regardless of distance), of classes of fixed-text messages and messages of sender's composition such as holiday-greeting messages, including multiple-address or book messages, and similar services related to these classes.

(ii) Allocations to this classification shall reflect due consideration of the effect of the abnormal traffic existing upon special occasions such as holidays.

(5) *Press message revenue.* This classification shall include the carrier's portion of revenue from the transmission, at published tariff rates available only to newspapers, press associations, and persons similarly engaged that are less than the rates for comparable service to the general public, of classes of messages restricted as to text.

(6) *United States government message revenue.* This classification shall include the carrier's portion of revenue from the transmission, at published tariff rates available to the United States government, or any department or agency thereof, of classes of official messages such as the following:

Government ordinary messages.
Government CDE messages.
Government full rate messages.
Government day letters.
Government night letters.
Government weather bureau messages.

(7) *Other governments message revenue.* This classification shall include the

carrier's portion of revenue from the transmission, at published tariff rates available to governments other than the United States, that are less than the rates for comparable service to the general public, of classes of messages similar to those listed under classification (6), immediately preceding, relating to United States government message revenue.

(8) *News service revenue.* This classification shall include the carrier's portion of revenue from the transmission of news disseminated by the carrier to its subscribers.

(99) *Other radiotelegraph revenue.* This classification shall include the carrier's portion of revenue from transmission includible in this account and not provided for elsewhere.*†

§ 34.3214 *Fixed message revenue—Insular transmission.* (a) This account shall include the carrier's portion of revenues from the insular transmission of insular fixed communication.

(b) A memorandum record supporting the entries in this account shall be prepared by Class A carriers on a monthly basis from statistical records of revenues derived from the several classifications of services listed under paragraph (b) of account 3213.*†

*Foreign Fixed Radiotelegraph Revenues—Foreign-service Classification*

§ 34.3313 *Fixed message revenue—Continental transmission* (a) This account shall include the carrier's portion of revenue from the continental transmission of foreign fixed communication involving effective service classifications differing in general from those applicable to revenue messages transmitted wholly within the continental United States.

(b) A memorandum record supporting the entries in this account shall be prepared by Class A carriers on a monthly basis from statistical records of revenues derived from the several classifications of services listed under paragraph (b) of account 3213.*†

§ 34.3315 *Fixed message revenue—Foreign transmission.* (a) This account shall include the carrier's portion of revenue from the foreign transmission of foreign fixed communication involving effective service classifications differing in general from those applicable to revenue messages transmitted wholly within the continental United States.

(b) A memorandum record supporting the entries in this account shall be prepared by Class A carriers on a monthly basis from statistical records of revenues derived from the several classifications of services listed under paragraph (b) of account 3213.

NOTE: Paragraph (b) is not applicable to revenues from wholly foreign transmission.*†

*Foreign Fixed Radiotelegraph Revenues—Domestic-service Classification*

§ 34.3413 *Fixed message revenue—Continental transmission.* (a) This account shall include the carrier's portion of revenue from the continental transmission of foreign fixed communication involving effective service classifications also applicable to revenue messages transmitted wholly within the continental United States.

(b) A memorandum record supporting the entries in this account shall be prepared by Class A carriers on a monthly basis from statistical records of revenues derived from the several classifications of services as follows:

(1) *General message revenue.* This classification shall include the carrier's portion of revenue from the transmission, at published tariff rates available to the general public, of the following and similar classes of messages:

Urgent messages.
Urgent CDE messages.
Ordinary messages.
Ordinary CDE messages.
Night radiotelegrams (NRT).
Sea letter telegrams (SLT).
Short cruise radiotelegrams.
Harbor radiotelegrams.

including multiple-address or book messages and similar services related to the above classes.

(4) *Greetings and other flat-rate message revenue.* (i) This classification shall include the carrier's portion of revenue from the transmission, at flat or fixed published tariff rates (applicable regardless of distance), of classes of fixed-text messages and messages of sender's composition such as holiday-greeting messages, including multiple-address or book messages and similar services related to these classes.

(ii) Allocations to this classification shall reflect due consideration of the effect of the abnormal traffic existing upon special occasions such as holidays.

(5) *Press message revenue.* This classification shall include the carrier's portion of revenue from the transmission, at published tariff rates available only to newspapers, press associations, and persons similarly engaged, that are less than the rates for comparable service to the general public, of classes of messages restricted as to text.

(6) *United States government message revenue.* This classification shall include the carrier's portion of revenue from the transmission, at published tariff rates available to the United States government, or any department or agency thereof, of classes of official messages such as the following:

Government ordinary messages.
Government ordinary CDE messages.
Government weather bureau messages.

(8) *News service revenue.* This classification shall include the carrier's portion of revenue from the transmission of news disseminated by the carrier to its subscribers.

(99) *Other radiotelegraph revenue.* This classification shall include the carrier's portion of revenue from transmission includible in this account and not provided for elsewhere.*†

§ 34.3517:1 *Marine message revenue—Land station transmission.* (a) This account shall include the carrier's portion of revenue from the land station transmission of marine communication.

(b) A memorandum record supporting the entries in this account shall be prepared by Class A carriers on a monthly basis from statistical records of revenues derived from the several classifications of services listed under paragraph (b) of account 3513.*†

§ 34.3517:2 *Marine message revenue—Ship station transmission.* (a) This account shall include the carrier's portion of revenue from the ship station transmission of marine communication.

(b) A memorandum record supporting the entries in this account shall be prepared by Class A carriers on a monthly basis from statistical records of revenues derived from the several classifications of services listed under paragraph (b) of account 3513.*†

*Other Radiotelegraph Transmission Revenues*

§ 34.3618 *Mobile (other than marine) message revenues.* This account shall include the carrier's portion of revenue from the mobile transmission (other than marine) of all classes of messages.

NOTE: The revenue derived from transmission between ship stations and other mobile stations shall be included in account 3517.2, "Marine message revenue—Ship station transmission."*†

§ 34.3628 *Facsimile or photogram service revenues.* This account shall include the carrier's portion of revenue from the transmission of any matter involving the use of facsimile or other reproducing equipment.*†

§ 34.3638 *Broadcast-program service revenues.* This account shall include the carrier's portion of revenue from the furnishing of services or facilities utilized in (1) broadcast-program transmission and (2) activities incidentally associated therewith.*†

§ 34.3648 *Telephone service revenues.* This account shall include the carrier's portion of revenue from telephone operations when such operations involve the use of plant primarily devoted to radiotelegraph service. (See also Sec. 34.03–8 and account 3918, "Telephone revenue—Telephone systems.")*†

§ 34.3698 *Miscellaneous transmission revenues.* This account shall include the carrier's portion of revenue from transmission services not provided for elsewhere.*†

Foreign Exchange Adjustment

§ 34.3709 *Foreign exchange—Revenue differential.* (a) This account shall include amounts representing the revenue differential determined in accordance with the provisions of Sec. 34.03–16.

(b) A separate subaccount with appropriate title shall be maintained for amounts applicable to each of the following general classes of revenues:

3709:01 Foreign fixed—Foreign-service classification.
3709:02 Foreign fixed—Domestic-service classification.
3709:03 Marine.
3709:04 Mobile (other than marine) and other transmission.

*†

*Nontransmission Revenues*

§ 34.3818 *Revenue from furnishing and servicing stations.* (a) This account shall include the carrier's portion of periodic charges for equipment furnished radiotelegraph stations and revenue from installing, maintaining, inspecting, and servicing equipment, auditing and adjusting traffic accounts, and other similar services not connected with the transmission of messages or with merchandising, jobbing, or contract work rendered to radiotelegraph stations.

(b) This account shall be subdivided as follows:

3818:01 Fixed and land stations.
3818:02 Ship stations.
3818:03 Other mobile stations.

(c) The records supporting the entries in this account shall be so maintained as to show separately the amounts applicable to the following sources of revenue:

(1) Installation subsequent to initial installation.
(2) Servicing.
(3) Rentals.
(4) Clerical and administrative services.
(5) General service agreements, not specifying the amounts applicable to the foregoing sources.

NOTE: Rental from plant comprising complete operating systems or operating units where the lessee has exclusive possession shall be included in account 5010, "Income from operated plant leased to others." (See also Sec. 34.30–3.)*†

§ 34.3828 *Frequency-measuring revenue.* This account shall include the carrier's portion of revenue from measuring and checking frequencies, adjusting control equipment, and calibrating frequency-measuring equipment for broadcast, police, commercial, and other radio stations.*†

§ 34.3838 *Code-registration revenue.* This account shall include the carrier's portion of revenue from the registration of code names, titles, symbols, and addresses, and other similar code-registration services.*†

§ 34.3848 *Other leased plant revenue.* This account shall include the carrier's portion of revenue from the use by others of leased operated plant not provided for elsewhere. (See also Sec. 34.30–3 and account 3818, "Revenue from furnishing and servicing stations.")*†

§ 34.3858 *Errand-service revenue.* This account shall include the carrier's portion of revenue from the utilization of messengers in services not connected with the transmission of messages.*†

§ 34.3898 *Other nontransmission revenue.* This account shall include the carrier's portion of revenue from nontransmission services not provided for elsewhere.*†

*Other Telecommunication Revenues*

§ 34.3918 *Telephone revenue — Telephone systems.* This account shall include the carrier's revenue from the operation of telephone systems as provided in Sec. 34.03–8. (See also account 3648, "Telephone service revenues.")*†

§ 34.3928 *Wire-telegraph and ocean-cable revenue—Wire systems.* This account shall include the carrier's revenue from the operation of wire-telegraph and ocean-cable systems as provided in Sec. 34.03–8.*†

OPERATING EXPENSE ACCOUNTS

Instructions

§ 34.41–1 *Purpose of operating expense accounts.* The operating expense accounts are designed to show the expenses of maintaining and operating radiotelegraph plant and the other expenses incurred in providing radiotelegraph service. (See also Secs. 34.03–8 and 34.03–17.)*†

§ 34.41–2 *Operating expenses applicable to leased plant.* Operating expenses applicable to leased plant shall be charged by the lessee to the appropriate operating expense accounts, as provided in paragraphs (c) and (d) of Sec. 34.30–3.*†

§ 34.41–3 *Direct allocation of operating expenses to stations and city offices.* The records supporting the entries in the operating expense accounts shall be so maintained as to show the amounts of expenses directly applicable to:

Each fixed station.
Each land station.
Each city office.
Ship stations (collectively).
Other mobile stations (collectively).

*†

§ 34.41–4 *Expenses of holding or servicing departments.* The records supporting such portions of the charges to each operating expense or other account as are incurred or recorded by departments performing holding company activities or furnishing services (other than radiotelegraph services performed at published tariff rates) to other carriers or affiliates under license agreements, general service contracts, or other arrangements providing for the furnishing of general accounting, engineering, financial, legal, patent, or other general services, shall be so maintained that the carrier can report separately the amount of charges included therein applicable to each such carrier or affiliate.*†

§ 34.41–5 *Maintenance expenses.* (a) The cost of maintenance chargeable to the various operating expense accounts and to clearing accounts includes labor, materials, overhead, and other expenses incurred in maintenance work, such as:

(1) Inspecting, testing, and reporting on the condition of plant to determine the need for repairs, replacements, and rearrangements.

(2) Replacing minor items of operated plant, except when such items are replaced through the replacement of retirement units. (See also Sec. 34.1–6.)

(3) Rearranging and changing the location of plant not retired.

(4) Repairing materials for reuse. (See also account 1795, "Material and supplies".)

(5) Restoring the condition of plant damaged by storm, flood, fire, accident, or other casualty. (See also account 2215, "Provisions for self-carried insurance.")

(6) Restoring the condition of plant damaged by wear and tear, decay, or action of the elements.

(7) Training employees for maintenance work. (See also account 4475, "Training employees.")

(8) Inspecting and testing after repairs have been made.

(9) Portion of local plant supervision attributable to maintenance.

(10) Cost of transportation, shop and store expenses, and use of tools and implements.

(11) Cost of installations, equipment changes, and similar services, for which the carrier is reimbursed in whole or in part, or for which a charge is made by the carrier.

(12) Routine work to prevent service interruptions and to obtain the highest possible service efficiency from the operated plant performed by such employees as maintenance engineers, maintenance men, repair men, and their helpers, and by other employees whose duties include the full time or part time performance of analogous maintenance functions.

(b) The cost of maintenance does not include the cost of replacing items of plant designated as "retirement units." (See also Sec. 34. 1–6–1.)

(c) The records supporting the entries in these accounts shall be so maintained that in the reports to this Commission the maintenance expenses may be shown separately for (1) plant owned and operated by the carrier and (2) plant leased from others. When it is necessary to apportion the maintenance expenses between plant owned and used and plant leased, the carrier shall be prepared to describe the basis of such apportionment.

NOTE: Expenses incurred on account of property of others damaged in connection with maintenance work (except for the cost of incidentally repairing the property of others in the course of such work) shall be included in account 4430, "Injuries and damages."*†

§ 34.41–6 *Conducting-operations expenses.* The expenses of conducting radiotelegraph operations shall be charged to the appropriate accounts during the month when such expenses are incurred. When it is impracticable to determine the amount of expenses applicable to a particular account, the amount shall be entered in an appropriate clearing account and the portion considered applicable to conducting operations shall be cleared as at the end of the month by transfer to the appropriate account. (See also Sec. 34.03–17.)*†

§ 34.41–7 *Accounting for electron tubes.* (a) When electron tubes are placed into service, the account that includes the cost of the plant with which the electron tubes are associated shall be charged with the cost of the tubes.

(b) When electron tubes are replaced, without retirement and replacement of any unit of plant of which such tubes form a part, the cost of the new tubes shall be charged to accounts 4132, "Electron-tube replacements," or 4135, "Maintenance of mobile station equipment," as appropriate. Electron tubes shall be considered as minor items for retirement purposes. (See also Sec. 34.03–15.)

(c) If electron tubes are repaired, the cost of such repairs shall be charged to account 4125, "Maintenance of fixed and land station transmission equipment," or account 4135, "Maintenance of mobile station equipment," as appropriate.*†

§ 34.41–99 *Contemplated form of operating expense statement.* (See Sec. 34.03–9.)

*Operating Expenses*

MAINTENANCE EXPENSES

| Account No. (1) | Particulars (2) | Amount (3) |
|---|---|---|
| 4110 | Supervision of maintenance | $ |
| 4115 | Maintenance of real estate | |
| 4120 | Maintenance of fixed and land station aerial systems and lines | |
| 4125 | Maintenance of fixed and land station transmission equipment | |
| 4130 | Maintenance of furniture and office equipment | |
| 4132 | Electron-tube replacements | |
| 4135 | Maintenance of mobile station equipment | |
| 4198 | Maintenance-expense equalization | |
| 4199 | Other maintenance expenses | |
| | Total maintenance expenses | |

CONDUCTING-OPERATIONS EXPENSES

| | | |
|---|---|---|
| 4210 | Supervision of operations | $ |
| 4215 | Operators' wages | |
| 4216 | Wages of station attendants | |
| 4222 | Wages of operating-office clerks | |
| 4225 | Operating power | |
| 4230 | Traffic damages | |
| 4235 | Traffic-damage expense | |
| 4240 | Telephone service—Message transmission | |
| 4243 | Rent for operating offices | |
| 4245 | Rent for other facilities | |
| 4250 | Advertising | |
| 4255 | Soliciting | |
| 4260 | Obtaining stock and commercial news | |
| 4270 | Commissions—Dr. | |
| 4275 | Commissions—Cr. | (Red) |
| 4281 | Messengers' wages | |
| 4283 | Messengers' uniform expense | |
| 4289 | Other messenger service expense | |
| 4290 | Other employees' wages | |
| 4295 | Supplies—Operating offices | |
| 4299 | Other conducting-operations expenses | |
| | Total conducting-operations expenses | |

ADMINISTRATIVE EXPENSES

| | | |
|---|---|---|
| 4310 | Salaries of general officers and executives | $ |
| 4315 | Expenses of general officers and executives | |
| 4320 | Salaries of general office employees | |
| 4325 | Expenses of general office employees | |
| 4390 | Other administrative expenses | |
| | Total administrative expenses | |

GENERAL EXPENSES

| | | |
|---|---|---|
| 4410 | Legal services | $ |
| 4415 | General services, licenses, and royalties—Dr. | |
| 4420 | General services, licenses, and royalties—Cr. | (Red) |
| 4425 | Insurance | |
| 4430 | Injuries and damages | |
| 4435 | Relief and pensions | |
| 4445 | Rest and lunch room expenses | |
| 4450 | Rent for offices | |
| 4455 | Other rents | |
| 4460 | Franchise requirements—Dr. | |
| 4465 | Franchise requirements—Cr. | (Red) |
| 4470 | Supplies | |
| 4475 | Training employees | |
| 4480 | House service | |
| 4499 | Other general expenses | |
| | Total general expenses | |
| | Total operating expenses | |
| 4298 | Foreign exchange—Expense differential | |
| | Total operating expenses including adjustment of foreign expense differential | [1] |

[1] Amount transferred to account 4000, "Operating expenses."

*†

Prescribed Accounts

[NOTE: Number to the right of the decimal point is the account number]

*Maintenance Expenses*

§ 34.4110 *Supervision of maintenance.* (a) This account shall include the salaries and the office and other expenses of officers, superintendents, engineers, architects, special consultants, and field supervisors engaged exclusively in supervising or directing maintenance work; also similar expenses of the office and field forces of such supervisory personnel, including assistants, clerks, stenographers, and other immediate subordinates.

(b) This account shall include the amounts of expenses applicable to maintenance that are transferred from the clearing accounts. (See also Sec. 34.90–2.)

(c) This account shall be subdivided as follows:

4110:01 Salaries and wages.
4110:99 Other expenses.

ITEMS (SEE SEC. 34.03–12)

Automobile service, including charges through clearing account 9015, "Vehicle expense—Undistributed."

Meals, including payments therefor on account of overtime work.

Postage, printing, and stationery.

Salaries and wages.

Supplies.

Travel expenses.

*†

§ 34.4115 *Maintenance of real estate.* (a) This account shall include the amount of expenses incurred in maintaining plant the cost of which is includible in the accounts provided for real estate (accounts 11 to 14, inclusive) and similar operated plant leased from others.

(b) This account shall be subdivided as follows:

4115:01 Salaries and wages.
4115:02 Materials and supplies.
4115:99 Other expenses.

ITEMS (SEE PARTICULARLY SECS. 34.03–12 AND 34.41–5)

*Land*

Maintaining public improvements, including assessments covering such work.

Maintaining soil conservation (anti-erosion) methods and devices.

Minor improvements to land.

Restoring the condition of land damaged in the course of repairs, replacements, additions, or betterments.

Restoring the grade and similar repairs occasioned by floods and other action of the elements.

*Land Improvements*

Maintaining fences and retaining walls.

Maintaining fountains, pools, and ponds.

Maintaining hedges, shrubbery, and trees.

Maintaining lawns, flower plots, and ornamental plants.

Maintaining non-permanently-surfaced paths, walks, or other passageways.

Maintaining ornamental terraces and statuary.

Maintaining roads and sidewalks.

Maintaining tennis courts, outdoor swimming pools, or other recreational equipment on company owned (or maintained) grounds when primarily for the use of company employees.

Maintaining yard lighting equipment.

Maintaining yards and grounds.

*Drainage, Sewerage, Gas, and Water Systems*

Flushing.

Inspecting.

Minor improvements and rearrangements.

Repairing structures, machinery, pipe lines, reservoirs, and similar items.

Restoring condition of drainage, sewerage, gas, and water systems damaged in the course of repairs, replacements, additions, or betterments.

*Buildings*

Changing location of partitions. (See also Notes D and E to this account.)

Minor alterations to buildings and quarters. (See also Note F to this account.)

Repainting and repapering buildings, including redecorating interiors of buildings.

Repairing building machinery, fixtures, appurtenances, and appliances, such as elevators, plumbing, and equipment for heating, lighting, and ventilating.

Repairing rented buildings and quarters, except when the rented property is used in operations the expense of which is chargeable to other accounts. (See also section 34.1–5.)

Replacing and repairing awnings, screens, window shades and ventilators, storm doors, storm windows, movable partitions, and similar movable minor items of buildings. (See also Note E to this account.)

Restoring condition of buildings damaged in the course of repairs, replacements, or additions. (See also Note F to this account.)

NOTE A: The cost of initial improvements in the preparation for service of either leased or purchased land; land improvements; drainage, sewerage, gas, and water systems; and buildings shall be charged to the appropriate operated plant account, except when such improvements are of relatively minor cost or short life or the period of the lease is less than one year. (See also sections 34.1–1, 34.1–2, and 34.1–5.)

NOTE B: The cost of maintenance of land; land improvements; drainage, sewerage, gas, and water systems; and buildings, the investment in which is includible in account 1610, "Miscellaneous physical property", shall be charged to account 5110, "Income from miscellaneous physical property."

NOTE C: The cost of maintenance of land used for right-of-way shall be charged to account 4120, "Maintenance of fixed and land station aerial systems and lines."

NOTE D: Any substantial increase or decrease in partitions resulting from such changes therein shall be accounted for as additions or retirements, as appropriate.

NOTE E: When partitions of a movable type are replaced by partitions of a permanent type or vice versa, the costs involved shall be accounted for through the plant and depreciation allowance accounts.

NOTE F: The cost of minor building alterations incident to the installation of equipment, such as opening and closing holes in ceilings, partitions, walls, and floors to permit installation of equipment, power conduit and wiring, shall be charged to the account appropriate for the class of equipment installed.*†

§ 34.4120 *Maintenance of fixed and land station aerial systems and lines.* (a) This account shall include the amount of expenses incurred in maintaining (1) plant the cost of which is includible in accounts provided for fixed and land station aerial systems and lines (accounts 21 to 27, inclusive), (2) similar operated plant leased from others, and (3) the right of way therefor.

(b) This account shall be subdivided as follows:

4120:01 Salaries and wages.
4120:02 Materials and supplies.
4120:99 Other expenses.

ITEMS (SEE PARTICULARLY SECS. 34.03–12 AND 34.41–5)

Cutting out or cutting in slack in wires.

Moving plant in connection with road and street changes. (See also section 34.1–6.)

Painting and treating towers, masts, poles, foundations, markers, and similar items subsequent to their installation.

Repairs to tuning coil shelters and sleet-melting equipment.

Relocating poles.

Respacing poles and crossarms.

Right-of-way adjustments, cost of, when no additional rights are acquired.

Straightening poles and crossarms.

Tightening anchors, guys, and other appurtenances and raking guy poles.

Transferring wire in connection with replacement of towers, masts, and poles.

Trenching poles.

Trimming trees, cutting underbrush, and other work to maintain previous clearance of right-of-way.

Work on the property of others in connection with maintenance of aerial systems and lines.

*†

§ 34.4125 *Maintenance of fixed and land station transmission equipment.* (a) This account shall include the amount of expenses incurred in maintaining plant the cost of which is includible in the accounts provided for fixed and land station transmission equipment (accounts 31 to 41, inclusive) and similar operated plant leased from others.

(b) This account shall be subdivided as follows:

4125:01 Salaries and wages.
4125:02 Materials and supplies.
4125:99 Other expenses.

ITEMS (SEE PARTICULARLY SECS. 34.03–12 AND 34.41–5)

Adding acid and water to batteries and reading specific gravity, current drain, and voltage of batteries.

Calibrating thermocouples and other instruments.

Cleaning, lubricating, and adjusting the equipment.

Grinding used crystals for reuse.

Inspecting and testing after repairs have been made.

Refinishing and repairing used equipment for reuse.

Relocating and rearranging equipment.

Removing sediment from storage batteries.

Repairing and adjusting meters.

Repairing electron tubes.

Repairing storage batteries, including replacing of minor items.

Replacing fuses, indicating-lights, and cords.

Servicing message-conveyor equipment.

Tools and other individual items of equipment—items of small cost or short life, cost and repairs of.

*†

§ 34.4130 *Maintenance of furniture and office equipment.* (a) This account shall include the amount of expenses incurred in maintaining plant the cost of which is includible in account 51, "Furniture and office equipment," and similar operated plant leased from others.

(b) This account shall be subdivided as follows:

4130:01 Salaries and wages.
4130:02 Materials and supplies.
4130:99 Other expenses.

*†

§ 34.4132 *Electron-tube replacements.* This account shall include the amount of expenses incurred in replacing electron tubes, the initial cost of which is includible in the operated plant accounts provided for fixed and land station transmission equipment. (See also Sec. 34.41–7 and account 4135.)*†

§ 34.4135 *Maintenance of mobile station equipment.* (a) This account shall include the amount of expenses incurred in maintaining plant the cost of which is includible in the accounts provided for mobile station equipment (accounts 61 to 69, inclusive) and similar operated plant leased from others.

(b) This account shall include also the amount of expenses incurred in replacing electron tubes, the initial cost of which is includible in the operated plant accounts provided for mobile station equipment. (See also Sec. 34.41–7.)

(c) This account shall be subdivided as follows:

4135:01 Salaries and wages.
4135:02 Materials and supplies.
4135:99 Other expenses.

ITEMS (SEE PARTICULARLY SECS. 34.03–12 AND 34.41–5)

Lists given under accounts 4125 and 4130 with respect to comparable equipment are applicable to this account.*†

§34.4198 *Maintenance-expense equalization.* (a) This account shall be charged with such amounts as this Commission may authorize or direct to be credited to account 2220, "Provisions for equalization of maintenance expenses", under a plan to equalize maintenance expenses.

(b) When maintenance work for which provision has been made in this account is performed, the cost of such work shall be charged to the appropriate maintenance accounts. Concurrently this account shall be credited and account 2220, "Provisions for equalization of maintenance expenses", shall be charged with an amount equal to the cost of such maintenance work.*†

§ 34.4199 *Other maintenance expenses.* (a) This account shall include the amount of maintenance expenses not provided for elsewhere.

(b) This account shall be subdivided as follows:

4199:01 Salaries and wages.
4199:02 Materials and supplies.
4199:99 Other expenses.

*†

*Conducting-operations Expenses*

§ 34.4210 *Supervision of operations.* This account shall include the salaries of officers, superintendents, engineers, special consultants, and field supervisors engaged exclusively in supervising or directing operations. (See also paragraph (b) of Sec. 34.03–17.) *†

§ 34.4215 *Operators' wages.* This account shall include the salaries and wages of operators (including printer operators) engaged in the transmission of messages; also commissions paid in lieu of or in addition to such salaries or wages.

NOTE: The amount of salaries and wages of traffic employees attending supplemental training or postgraduate operating schools shall be charged to account 4475, "Training employees."*†

§ 34.4216 *Wages of station attendants.* This account shall include the salaries and wages of station attendants, whether designated as attendants, operators, engineers, or electricians, whose principal duties consist of watching and regulating the operation of transmission equipment.*†

§ 34.4222 *Wages of operating-office clerks.* This account shall include the pay of bookkeepers, clerks, and attendants engaged in the receiving and delivering of messages at counters or telephones, quoting rates, collecting charges, keeping accounts, and performing other clerical duties in operating offices.*†

§ 34.4225 *Operating power.* (a) This account shall include the cost of power for transmitting traffic and operating signals. It shall include the cost of electricity purchased, the cost of fuel and other supplies used, and the expenses incurred in the generation, conversion, and storage of current for operating the carrier's transmission equipment, battery-charging machines, and for other operating power requirements; also the salaries, wages, and expenses of engineers, and other attendants and employees engaged in the generation, conversion, and storage of such current.

(b) This account shall be subdivided as follows:

4225:01 Power purchased.
4225:02 Power generated.

NOTE A: Payments for installation of permanent power circuits for emergency use shall be charged to the appropriate plant account.

NOTE B: The cost of power used for house service purposes shall be charged to account 9035, "House-service expense—Undistributed," or other account, as appropriate.*†

§ 34.4230 *Traffic damages.* (a) This account shall include the amount of obligations incurred in settlement of damages arising out of claims of delays and errors in service, including amounts of revenues refunded in partial or complete settlement of such claims.

(b) The records supporting the entries in this account shall be so maintained as to show the amounts of settlements made during the accounting period with respect to delayed-delivery, non-delivery, error, and other causes under the following subdivisions:

4230:01 Amounts with respect to messages.
4230:02 Amounts with respect to money transfers.

(c) There shall be classed as delayed-delivery claims those arising from delays in transmission or delivery; as non-delivery claims, those arising from failure to deliver; as error claims, those arising from error in transmission or delivery, except such as may be classified as delayed-delivery or non-delivery claims; and as other types of claims, those arising from causes not shown above, such as libel, fraud, and similar bases.

NOTE: Payments on account of injuries to persons or damage to property of others shall be charged to account 1300, "Plant under construction," or account 4430, "Injuries and damages," as appropriate.*†

§ 34.4235 *Traffic-damage expense.* This account shall include the amount of expenses incurred in connection with closing claims for traffic damages, including court costs, the pay and expenses of witnesses, and the legal and other expenses or costs incurred in connection with investigating, defending, or settling traffic damage claims.*†

§ 34.4240 *Telephone service—Message transmission.* This account shall include the amount of expenses incurred for telephone service used in the receiving, forwarding, or terminating of radiotelegraph messages. (See also paragraph (a) of Sec. 34.03–17 and account 4222, "Wages of operating-office clerks.")

NOTE: Amounts of expenses relating to telephone service used primarily for other purposes shall be included in the expense account appropriate to the predominant use of such service (with the option of more detailed distribution).*†

§ 34.4243 *Rent for operating offices.* This account shall include the amount of expenses incurred as rents for space used for operating offices. (See also subparagraph (1) of paragraph (b) of Sec. 34.03–5 and accounts 4245, "Rent for other facilities", 4450, "Rent for offices", and 4940, "Rent for lease of operated plant.") *†

§ 34.4245 *Rent for other facilities.* This account shall include the amount of expenses incurred as rents for the use of facilities other than space or leased plant (comprising substantially complete operating systems or operating units held in exclusive possession by the lessee). It shall include rents for such equipment as ducts, conduit, lands, pole lines, circuits, conductors, and transmitting and receiving equipment. (See also accounts 4243, 4450, and 4940.) *†

§ 34.4250 *Advertising.* This account shall include the amount of expenses incurred in connection with commercial advertising for promoting the further use of radiotelegraph service, such as the cost of newspaper advertisements, literature, and similar expenses.

ITEMS (SEE SEC. 34.03–12)

Announcements of rate changes. (See also note A to this account.)
Commercial advertisements in newspapers and magazines. (See also note A to this account.)
Commercial advertising matter, such as posters, bulletins, booklets, and related items. (See also note A to this account.)
Electric current consumed in illuminating signs.
Exhibits in connection with industrial expositions, expenses of.
Lecture and demonstration tours for traffic promotion purposes.
Managers and their office forces in charge of advertising, expense of.
Radio advertising programs.
Window displays.

NOTE A: The cost of newspaper advertisements, literature, and similar expenses other than for commercial advertising purposes, such as advertisements of stock and bond issues, advertising for employees, and notices of dividends declared, shall be charged to the accounts appropriate for such costs.

NOTE B: The cost of flags, bunting, and similar expenses of decorating buildings shall be charged to account 9035, "House-service expense—Undistributed."*†

§ 34.4255 *Soliciting.* (a) This account shall include the salaries, wages, and expenses of solicitors engaged in canvassing for business and interviewing customers for promoting the further use of radiotelegraph service, and shall include also expenses in connection with furnishing copies of tariffs and notices of changes to the public.

(b) This account shall be subdivided as follows:

4255:01 Salaries and wages of solicitors.
4255:99 Other expenses.

ITEMS (SEE SEC. 34.03–12)

Canvassers and solicitors, pay and expenses of.
Managers and their office forces in charge of solicitors, expenses of.
Public distribution of tariffs and notices of changes—expenses of.
Travel expenses.*†

§ 34.4260 *Obtaining stock and commercial news.* This account shall include the amount of expenses incidental to the gathering of information relative to stock and other market quotations, transactions in securities, sporting news, election returns, marine reports, and similar items subsequently disseminated as stock and commercial news to subscribers.*†

§ 34.4270 *Commissions—Dr.* (a) This account shall include the amount of commissions (including flat-rate payments per metropolitan zone for terminal messenger service) paid to communication carriers, transportation carriers, hotels, service stations, or other persons other than employees, for services rendered in originating and terminating radiotelegraph messages or for similar commercial communication services. (See also Sec. 34.31–3.)

(b) This account shall be subdivided as follows:

4270:01 Commissions paid to communication carriers.
4270:02 Commissions paid to transportation carriers.
4270:03 Commissions paid to other types of public utilities.
4270:99 Commissions paid to others.

*†

§ 34.4275 *Commissions—Cr.* This account shall include the amount of commissions (including flat-rate charges per metropolitan zone for terminal messenger service) received from other carriers for services rendered in originating and terminating messages or for similar commercial communication services. (See also Sec. 34.31–3.) *†

§ 34.4281 *Messengers' wages.* This account shall include the wages of messengers and commissions paid to messengers in lieu of or in addition to wages. (See also account 4270, "Commissions—Dr.")

NOTE: The amount of salaries, wages, and expenses of employees attending supplemental training or post-graduate schools shall be charged to account 4475, "Training employees."*†

§ 34.4283 *Messengers' uniform expense.* (a) This account shall include the cost of messenger uniforms purchased for use by the carrier in communication service.

(b) This account shall be charged with the amounts of expenses incurred in altering, repairing, cleaning, and pressing uniforms.*†

§ 34.4289 *Other messenger service expense.* This account shall include the amount of expenses incurred in furnishing messenger service not provided for elsewhere.

ITEMS (SEE SEC. 34.03–12)

Automobile service, including charges through clearing account 9015, "Vehicle expense—Undistributed."
Carfare.
Licenses for bicycles and other vehicles used in messenger service.
Meals, including payments therefor on account of overtime work.
Messengers, expenses of. (See also account 4283.)
Registration fees for vehicles used in messenger service.

*†

§ 34.4290 *Other employees' wages.* This account shall include the wages and the expense for subsistence furnished employees in lieu of wages of employees engaged in any phase of conducting operations not provided for elsewhere.*†

§ 34.4295 *Supplies—Operating offices.* This account shall include the cost of supplies used in conducting operations.

ITEMS (SEE SEC. 34.03–12)

Message blanks.
Postage, stationery, and printing.
Printer tape.

*†

§ 34.4298 *Foreign exchange—Expense differential.* (a) This account shall be charged or credited, as appropriate, with amounts representing the differential applicable to operating expenses as provided in paragraph (b) of Sec. 34.03–16.

(b) A separate subaccount with appropriate title shall be maintained for amounts applicable to each of the following general classes of operating expenses:

4298:01 Maintenance expenses.
4298:02 Conducting-operations.
4298:03 Administrative.
4298:04 General.

(c) The records supporting the entries in this account shall be so maintained as to permit analysis by subdivisions on basis of the amounts applicable to each primary operating expense account.*†

§ 34.4299 *Other conducting-operations expenses.* This account shall include the expenses of operators, station attendants, and operating-office clerks whose wages and salaries are included in accounts 4215, 4216, and 4222, respectively, and the amount of other expenses incurred in conducting operations not provided for elsewhere.*†

*Administrative Expenses*

§ 34.4310 *Salaries of general officers and executives.* This account shall include the compensation (salaries, bonuses, and other consideration for services) of officers and executives of the carrier, properly chargeable to radiotelegraph operations and not chargeable directly to a particular function. (See also Sec. 34.03–17.)

NOTE: Fees and expenses of directors who are also officers or executives shall be charged to account 4499, "Other general expenses."*†

§ 34.4315 *Expenses of general officers and executives.* This account shall include the expenses incurred for the benefit of the carrier in its radiotelegraph operations by officers and executives whose compensation is includible in account 4310, "Salaries of general officers and executives", and which are not chargeable directly to a particular function.

ITEMS (SEE SEC. 34.03–12)

Hotel expenses.
Meals, including payment therefor on account of overtime work.
Travel expenses.

*†

§ 34.4320 *Salaries of general office employees.* This account shall include the compensation (salaries, bonuses, and other consideration for services) of employees engaged in the general offices of the carrier properly chargeable to radiotelegraph operations and not chargeable directly to a particular function. (See also Sec. 34.03–17.) *†

§ 34.4325 *Expenses of general office employees.* This account shall include the expenses incurred for the benefit of the carrier in its radiotelegraph operations by general office employees whose compensation is includible in account 4320, "Salaries of general office employees," and which are not chargeable directly to a particular function.

ITEMS (SEE SEC. 34.03–12)

Hotel expenses.
Meals, including payment therefor on account of overtime work.
Travel expenses.

*†

§ 34.4399 *Other administrative expenses.* This account shall include the amount of expenses incurred in carrying out administrative functions not provided for elsewhere.*†

*General Expenses*

§ 34.4410 *Legal services.* This account shall include amounts payable to persons, other than officers and employees of the carrier, for legal services and related expenses that are not chargeable to other operating expense accounts or to clearing or plant accounts.

NOTE: The pay and expenses of the legal staff of the carrier shall be included in account 4310, "Salaries of general officers and executives," account 4315, "Expenses of general officers and executives," account 4320, "Salaries of general office employees," or account 4325, "Expenses of general office employees," as appropriate.*†

§ 34.4415 *General services, licenses, and royalties—Dr.* (a) This account shall include the amount of expenses incurred for services received under a license agreement, a general service contract, or other arrangement providing for

the furnishing of general management, supervision, purchasing, accounting, engineering, financial, legal, patent, or other general services.

(b) The records supporting the entries in this account shall be so maintained as to show the respective amounts paid to each furnisher of the service with respect to each class of service furnished. If the costs incurred in the first instance by the person furnishing the service are apportioned to several recipients thereof, the records of the carrier served shall indicate the aggregate cost of the furnishing person and the method of apportionment to the recipient carrier.*†

§ 34.4420 *General services, licenses, and royalties—Cr.* (a) This account shall be credited with amounts accruing (other than profits realized) from services rendered others under a license agreement, a general service contract, or other arrangement providing for the furnishing of general management, supervision, purchasing, accounting, engineering, financial, legal, patent, or other general services.

(b) Minor amounts of profits from such arrangements may be included in this account. (See also account 5020, "Profit from general services, licenses, and royalties.")

NOTE: Revenue from the maintaining and servicing of station equipment shall be included in account 3818, "Revenue from furnishing and servicing stations."*†

§ 34.4425 *Insurance.* (a) This account shall include the cost of insurance to protect the carrier against losses and damages to owned or leased property used in its radiotelegraph services, and the amount of insurance premiums paid in compliance with statutes requiring the carrier to provide for workmen's compensation or similar employee protection, except such costs as are includible in the clearing accounts. There shall be included in this account the amounts of premiums payable to insurance companies for other than reinsurance of self-carried insurance, and amounts credited to account 2215, "Provisions for self-carried insurance", for fire, storm, burglary, boiler explosion, lightning, and other insurance; special costs incurred in procuring insurance, such as insurance inspection service; and the pay, travel, and other expenses of officers, clerks, and other employees of an insurance department.

(b) Amounts received from insurance companies as insurance dividends or refunds of premiums shall be credited to this account.

(c) The records supporting the entries in this account shall be so maintained as to show the amount of coverage for each class of insurance carried, the property covered, and the applicable premiums.

(d) This account shall be subdivided as follows:

4425:01 Property insurance premiums.
4425:02 Other insurance premiums.
4425:03 Provisions for self-carried insurance.
4425:99 Other insurance costs.

NOTE A: Recoveries from insurance companies or others shall be accounted for as provided in account 2215, "Provisions for self-carried insurance."

NOTE B: Premiums on life insurance and annuities of officers and employees where the carrier is not the beneficiary shall be included in account 4435, "Relief and pensions."*†

§ 34.4430 *Injuries and damages.* (a) This account shall include losses, not covered by insurance, on account of injuries to or deaths of employees or others, which occur in connection with radiotelegraph operations, and payments and expenses on account of damages to the property of others whether the loss be occasioned by fire, flood, storm, or other cause. This account may be charged monthly with amounts sufficient to meet the probable liability for such losses, concurrent credits being made to account 2215, "Provisions for self-carried insurance", in which case losses sustained shall be charged to that account.

(b) This account shall include (1) the pay and expenses of officers and employees regularly engaged in or specifically assigned to work in connection with injuries to employees or others and damages to property of others, (2) payments to attorneys, investigators, and adjusters, and (3) court costs and similar items, except such items as are provided for in the clearing accounts.

(c) Amounts in reimbursement of payments for injuries and damages charged to this account shall be credited hereto.

NOTE A: Payments to or on behalf of employees, including accident and death benefits, hospital expenses, and medical supplies; also salaries, fees, and expenses of surgeons, doctors, nurses, and similar payments or amounts provided for such payments through a plan for employees' benefits, shall be charged to account 4435, "Relief and pensions."

NOTE B: There shall not be included in this account the amounts of premiums for insurance of the lives of officers and employees or the cost of injuries and damages chargeable directly to the operated plant, clearing, or other accounts.*†

§ 34.4435 *Relief and pensions.* (a) This account shall include pensions or other benefits paid to active and retired employees, their representatives or beneficiaries, and salaries and expenses incurred in conducting relief, benefit, and general medical departments. It shall include payments to or on behalf of employees on account of injuries or accidental death when such payments come within the scope of a carrier's general provision for employees' benefits.

(b) If the carrier has definitely undertaken by contract to pay pensions to employees when regularly retired for superannuation or disability and has established a fund to be held in trust for such pension purposes, the carrier shall charge to this account monthly amounts determined through the application of equitable actuarial factors to the current pay rolls, which together with interest accruals on the trust funds, will as nearly as may be, provide for the payment of such pensions, or for the purchase of annuities corresponding thereto. The amounts so charged shall be concurrently credited to account 2210, "Provisions for employees' pensions and welfare." The amounts accrued in each year shall correspond to the aggregate of the amounts expended directly by the carrier for pensions or annuities during the year and amounts paid into the trust fund. The carrier shall maintain a complete record of the actuarial computations through which the accrual each month of its pension liabilities is established.

(c) Upon the adoption of the accrual plan of accounting, pension payments to employees retired before the adoption of such plan shall be charged to an existing pension reserve or to account 6299, "Other extraordinary income charges." If a carrier pays into its pension trust fund the amount of its existing pension reserve, any such amounts in excess of provision for pensions granted prior to the adoption of the accrual plan may be applied in whole or in part to the adjustment of future accrual charges.

(d) Before adopting the accrual plan of accounting for pensions the carrier shall inform this Commission of the details of its pension plan giving full statement of the facts which in its judgment establish a contractual obligation for pension payments together with the actuarial formula under which it proposes to create its pension trust fund, and also a copy of the declaration of trust under which the fund is established. Each carrier that has adopted the accrual plan of accounting for pensions shall make no change in the accounting therefor or in the method of computing the amounts of the accruals recorded in the accounts under the plan without first submitting full particulars of the proposed changes and a detailed statement of the reasons therefor to this Commission for its consideration and approval.

(e) No charges to this account shall be made in anticipation of discretionary pension payments in the future.

(f) This account shall include also, under a separate subaccount, amounts accrued to provide for the payment of termination allowances or similar benefits to employees of the carrier when such employees are laid off because of lack of work, and to provide necessary and warranted relief to former employees. Charges to this subaccount shall be made only after approval by this Commission of the carrier's plan for administering payments for these purposes and of the amount of the accruals. Amounts charged to this subaccount shall be concurrently credited to account 2210, "Provisions for employees' pensions and welfare."

(g) There shall be credited to this account that portion of each class of relief and pensions assigned to construction and custom work labor.

ITEMS (SEE SEC. 34.03–12)

Accident, sickness, death, and other disability benefits to employees, their representatives or beneficiaries.

Employees of relief, benefit, and general medical departments, pay and expenses of.

Expenses in connection with employees' disability cases, such as hospital, nursing, and medical attendance.

Fees and retainers for medical and similar services incurred by relief, benefit, and general medical departments.

Medical supplies.

Office supplies.

Postage, printing and stationery.

Premiums paid for group insurance for the benefit of employees or their beneficiaries.

Repairs of furniture and equipment, and cost and repairs of individual items of small value or short life.

Travel expenses.*†

§ 34.4445 *Rest and lunch room expenses.* (a) This account shall be charged with the amount of expenses incurred in operating rest and lunch rooms for employees, including the cost of meals provided. This includes the cost of operating such facilities as rest rooms, quiet rooms, reading rooms, medical rooms, locker rooms, check rooms, sleeping rooms, and dormitories.

(b) This account shall be credited with amounts paid to the carrier for meals and other services the expense of which is included in this account.

ITEMS (SEE SECS. 34.03–12 AND 34.03–17)

Bedding.

Dishes.

Electric power for cooking, refrigeration, or operating kitchen equipment.

Food supplies.

Fuel for cooking.

Handling orders and bills for supplies.

Ice for refrigeration.

Laundry.

Linen.

Lunch room managers, cooks, cashiers, waiters, and other employees, pay and expense of.

Medical supplies, including first-aid materials.

Newspapers, magazines, phonograph records, and radio-tube replacements.

Nurses, matrons, and attendants for employees' quarters, pay and expenses of.

Postage, printing, and stationery.

Silverware.

Uniforms.*†

§ 34.4450 *Rent for offices.* This account shall include the amount of expenses incurred as rent for the use of space in buildings occupied by the carrier for general purposes. (See also subparagraph (1) of paragraph (b) of Sec. 34.03–5 and accounts 4243, "Rent for operating offices" 4245, "Rent for other facilities", and 4940, "Rent for lease of operated plant.") *†

§ 34.4455 *Other rents.* This account shall include amounts payable for operating rents not provided for elsewhere.*†

§ 34.4460 *Franchise requirements—Dr.* (a) This account shall include the cost, not provided for in account 82, "Franchises", of services, plant, material and supplies, and similar items furnished to governmental authorities in compliance with franchises, ordinances, or similar requirements and for which no direct compensation is received by the carrier. It shall include the cost of paving and of premiums on indemnity or similar bonds required under the general terms of a franchise or ordinance and not in connection with specific construction or maintenance work.

(b) This account shall include amounts paid for franchises running for 1 year or less after acquisition and may include direct charges for franchises acquired at small cost.

(c) There shall be charged to this account and credited to account 4465, "Franchise requirements—Cr.", an amount equal to the revenues that would be derived at published tariff rates from radiotelegraph services furnished to governmental agencies in compliance with franchises, ordinances, or similar requirements that require that services be furnished without direct compensation.

NOTE A: The cost of plant, supplies, and similar items given as an initial consideration for a franchise running for more than 1 year shall be charged to account 82, "Franchises."

NOTE B: Franchise taxes paid annually or more frequently shall be charged to account 4932, "Other taxes—Operating."

NOTE C: The cost of operated plant furnished to a governmental agency without charge or used by the carrier in rendering services to a governmental agency without charge, shall be included in the appropriate plant accounts and the maintenance expenses incurred in connection with such operated plant shall be charged to the appropriate maintenance accounts.

NOTE D: The cost of reconstructing, or of changing the location of, operated plant to conform with governmental requirements, including such work required under the provisions of a franchise or ordinance, shall be charged to the maintenance-expense, operated plant, and allowance-for-depreciation accounts appropriate for the work performed.*†

§ 34.4465 *Franchise requirements—Cr.* This account shall be credited with amounts charged to account 4460, "Franchise requirements—Dr.", under the provisions of paragraph (c) of that account.*†

§ 34.4470 *Supplies.* This account shall include the cost of supplies used in connection with the general functions of the carrier's radiotelegraph operations. (See account 4295, "Supplies—Operating offices," and subparagraph (1) of paragraph (b) of Sec. 34.03–5.)

ITEMS (SEE SEC. 34.03–12)

Office supplies.

Postage, stationery, and printing.

*†

§ 34.4475 *Training employees.* This account shall include the amount of expenses incurred in the employment and training of employees of the carrier.

ITEMS (SEE SEC. 34.03–12 AND 34.03–17)

Advertising for employees, cost of.

Employees attending supplemental training or post-graduate schools, pay and expenses of.

Instructors, messengers, supervisors, and others employed in training schools, pay and expenses of.

Personnel officers and employees engaged in interviewing applicants and hiring employees, pay and expenses of.

Supplies.

*†

§ 34.4480 *House service.* (a) This account shall include the amount of expenses incurred in the operation of offices and buildings (whether owned or rented) used in connection with the general functions of the carrier's radiotelegraph operations.

(b) This account shall include the amounts of house service expenses applicable to general functions that are transferred from account 9035, "House-service expense—Undistributed." (See also paragraph (b) of Sec. 34.03–5.)*†

§ 34.4499 *Other general expenses.* This account shall include the amount of operating expenses not includible in other accounts.

ITEMS (SEE SEC. 34.03–12)

Commissions paid agents for leasing space to others in buildings partly occupied by the carrier in connection with its communication operations.

Conventions and meetings of the industry, contributions for.

Fees and expenses of directors.

Patents having an estimated service life of 1 year or less and patents acquired at small cost, amounts paid for.

Research and development work, not includible in other accounts, cost of. (See also Sec. 34.03–10.) *†

CLEARING ACCOUNTS

Instructions

§ 34.90–1 *Purpose of clearing accounts.* The clearing accounts are provided as a medium for the distribution of certain amounts which affect more than one account.*†

§ 34.90–2 *Disposition of balances in clearing accounts.* (a) The balances in the clearing accounts shall be distributed to the appropriate supervision or other accounts not later than the close of the calendar year unless amounts included therein appropriately affect the accounting for future periods.

(b) Undistributed balances (other than the balance in account 9030, "Supply expense—Undistributed") shall be included in the balance sheet under account 1940, "Debit balances in clearing accounts," or account 2320, "Credit bal-

ances in clearing accounts," as appropriate.

(c) The carrier's records shall be so maintained that an analysis of undistributed items in clearing accounts at the close of the calendar year may be shown in the reports to this Commission. (Prescribed accounts) *†

NOTE: Number to the right of the decimal point is the account number.

§ 34.9010 *Research and development—Undistributed.* (a) This account shall be charged with the costs incurred in maintaining laboratories and experimental stations for the development of equipment, the costs of research conducted for the purpose of improving operations, and other analogous items. (See also Sec. 34.03–10.)

(b) This account shall be cleared by charging the appropriate accounts with the applicable amounts contained herein.

(c) The records supporting the entries in this account shall be so maintained as to show the amount and nature of each transaction recorded herein.

ITEMS (SEE SEC. 34.03–12)

Depreciation.
Electron tubes.
Heat, light, and power.
Maintenance.
Material and supplies.
Rent.
Repairs.
Royalties.
Salaries, wages, and expenses of employees.
Small tools.

NOTE: Amounts included in this account applicable to projects that have been abandoned shall be cleared by charges to account 6299, "Other extraordinary income charges", unless otherwise authorized or directed by the Commission.*†

§ 34.9015 *Vehicle expense—Undistributed.* (a) This account shall include maintenance, depreciation, and other expenses applicable to vehicles that are not included in other accounts at the time they are incurred.

(b) This account shall be cleared by apportionment to operating-expense, plant, or other accounts benefited on such basis as will equitably distribute the amounts contained herein.

ITEMS (SEE SEC. 34.03–12)

Depreciation.
Heat, light, and power.
Maintenance.
Material and Supplies.
Rent.
Repairs.
Salaries, wages, and expenses of employees.
Small tools.

*†

§ 34.9020 *Shop, tool, and implement expense—Undistributed.* (a) This account shall include maintenance, depreciation, and other expenses applicable to shop equipment, tools, and implements and the cost of material, labor, supplies, and other items incidental to repair work in the carrier's own shops that are not included in other accounts at the time they are incurred. (See also subparagraph (2) of paragraph (c) of Sec. 34.1–3.)

(b) This account shall be cleared by apportionment to operating-expense, plant, or other accounts benefited on such basis as will equitably distribute the amounts contained herein.

ITEMS (SEE SEC. 34.03–12)

Depreciation.
Heat, light, and power.
Maintenance.
Material and supplies.
Rent.
Repairs.
Salaries, wages, and expenses of employees.
Small tools.

*†

§ 34.9025 *Plant-supervision expense—Undistributed.* (a) This account shall be charged initially with the salaries and the office and other expenses of officers, superintendents, engineers, architects, special consultants, and field supervisors engaged exclusively in supervising and directing both maintenance and construction work; also the similar expenses of the office and field forces of such officers and employees.

(b) This account shall be cleared by allocation to the operated plant accounts, to account 4110, "Supervision of maintenance," and to other appropriate accounts, on such basis as will equitably distribute the amounts contained herein.

NOTE: The salaries and the office and other expenses of foremen and inspectors in direct charge of maintenance, construction, or removal work shall not be included in this account but shall be charged direct to the accounts appropriate for the class of work performed.

ITEMS (SEE SEC. 34.03–12)

Books and periodicals.
Plant supervising officers and their staffs, including engineers, office and field forces charged with planning for and superintending maintenance, construction, and plant removal work—pay and expenses of.
Postage, printing, and stationery.
Rent and repairs of offices.
Supplies.
Tools and instruments of small value or short life.*†

§ 34.9030 *Supply expense—Undistributed.* (a) This account shall include the amount of expenses and costs incurred in connection with the purchase, storage, handling, and distribution of material and supplies that are not included in other accounts at the time they are incurred and the amount of depreciation and maintenance applicable to the equipment of storerooms.

(b) Cash and other discounts on material shall be deducted from the cost of the particular material to which they relate or credited to the account to which the material is charged. When impracticable of such treatment they shall be credited to this account.

(c) Transportation charges on material purchased shall be included as a part of the cost of the particular material to which they relate. When impracticable of such treatment they shall be charged to this account. Transportation charges on material recovered from plant retired shall be accounted for as a part of the cost of removal.

(d) This account shall be cleared by adding to the cost of material and supplies a suitable loading charge that will equitably distribute the amounts contained herein.

ITEMS (SEE SEC. 34.03–12)

Books and periodicals.
Customs duties and excise taxes.
Depreciation and maintenance of storeroom equipment.
Insurance against losses and damages to material and supply stock. (See also account 4425, "Insurance.")
Inventory differences in material and supplies that cannot be assigned to specific accounts. (See also account 1795, "Material and supplies.")
Losses due to breakage, leakage, evaporation, and fire and other casualties to supply stock not assigned to specific accounts or distributed through the pricing of material and supplies disbursed.
Postage, printing, and stationery.
Purchasing agents, superintendents and supervisors of supplies, managers of stores, storekeepers, clerks, and laborers—pay and expenses of.
Rent and repairs of storehouses, storerooms, storage yards, and other quarters.
Supplies used.
Transportation charges, undistributed.

*†

§ 34.9035 *House-service expense—Undistributed.* (a) This account shall include the amount of expenses incurred in operating offices and buildings (whether owned or rented) that are not included in other accounts at the time they are incurred.

(b) This account shall be cleared by apportionment to operating-expense or other accounts benefited on such basis as will equitably distribute the amounts contained herein.

ITEMS (SEE SEC. 34.03–12)

Building superintendents and others engaged in supervising house service operations—pay and expenses of.
Cleaning supplies.
Elevator service.
Heat.
Janitor service.
Light.
Postage, printing, and stationery.
Power. (See also account 4225, "Operating power.")
Refrigeration.
Rent and repairs of quarters used in the supervision of general house-service operations other than space used by janitors and similar employees in furnishing house service for a particular building.
Supplies.

*†

RETIREMENT UNITS

§ 34.1–6–1 *List of units to be used in connection with the accounting provided in Sec. 34.1–6.* (a) The following list of retirement units shall not be considered as items determining the classification of plant (see Sec. 34.03–12) or as property units for use in continuous property records (see Sec. 34.1–8) but shall be used in connection with the accounting for operated plant retired (see Sec. 34.1–6).

(b) Elimination of or substitution for retirement units listed herein may not be performed without specific authority by the Commission except that items which are not combinations of the listed retirement units may be added without such authority and carriers may account for listed units as maintenance when of small cost and not complete units of operated plant.

(c) This list shall be expanded by the carrier to include complete units of operated plant not shown herein.

(d) The carrier shall report to the Commission, within forty-five days after June 30 and December 31 of each year, and as at those dates, all additions which have been made to the list under this authority, all items included in the list which have become obsolete, either as to technical titles or use in the communication service, and the items which the experience of the carrier has shown to involve a small cost only. These reports should include such other information concerning the list as the carrier may desire to place before the Commission with requests for appropriate action by the Commission in the matters described.

(e) The article "a," "an," or "the," as appropriate, should be read in connection with each retirement unit listed herein.

*Land Improvements (Account 12)*

Billboard or sign.
Boundary fence, wall, or hedge—continuous length of 50 feet or more.
Branch or spur extending from a main roadway or sidewalk—complete.
Bridge or trestle (foot or road).
Fencing, serving for other than boundary purposes—complete, or continuous length of 50 feet or more.
Gate, ornamental (not associated with fence or wall).
Hard-surface road—complete system, or continuous length of 20 feet or more.
Lawn—complete.
Loading platform.
Railroad spur or siding.
Roadway, curbing, and sidewalk—complete system, or continuous length of 50 feet or more.
Snow barrier or fence.
Store yard—complete.
Swimming pool, tennis court, or similar unit of recreational equipment—complete.

*Drainage, Sewerage, Gas, and Water Systems (Account 13)*

Basin.
Branch or main extending from drain or sewer—complete.
Branch or spur extending from main or secondary water pipe—complete, or continuous length of 20 feet or more.
Cesspool or septic tank.
Drain or spillway.
Dike or levee—section of.
Drainage or sewerage system.
Drain or sewer—continuous length of 20 feet or more.
Engine.
Filtration plant.
Gas supply and distribution system serving more than a single building.
Hydrant.
Hydraulic ram—complete installation.
Lawn sprinkler system.
Manhole or handhole.
Motor (2 or more h.p.).
Piping or other water-conducting system—complete, or continuous length of 20 feet or more.
Reservoir.
Shelter or housing for machinery.
Sub-surface drain bed.
Water or gas main.
Water pump.
Water system.
Water tank, with or without tower or other support.
Well.
Windmill or windmill tower.

*Buildings (Account 14)*

Air-conditioning or ventilating system.
Automatic stoker.
Boiler.
Building.
Coal or ash conveying system.
Elevator—complete, with operating mechanism.
Fire escape.
Floor-covering for one room.
Furnace.
Gas-burner system.
Heating system.
Hot-water heater.
House-lighting or power board.
Metal window—complete, with box, frame, and sash.
Motor (2 or more h. p.), generator, engine, turbine, pump, compressor, ventilating fan, air washer, elevator drum, or similar item of equipment, with or without associated wiring, control equipment, etc.
Oil-burner system.
Oil tank.
Roof—with or without supporting structures. (A building of irregular shape having more than one roof level may have several isolated roofs, each of which shall be considered an entire roof. In the case of buildings to which lateral extensions have been made, even though having but one roof level, that part of the roof covering an entire section built at one time shall be considered an entire roof.)

NOTE: In addition to the foregoing retirement units, material (i. e., portions of buildings, equipment, fixtures, etc.) installed and retired, and the labor and incidental costs involved in connection with work of the following character, shall be handled through the plant and depreciation-allowance accounts:

Changes in the type of operation of elevator systems, e. g., a change from manual to automatic control of cars, from manual to power operation of doors, from low speed to high speed, from direct to alternating current, from hydraulic to electric operation, from one type of signaling or dispatching system to another.

Relocation of toilet rooms, battery rooms, kitchens, terminal rooms, machine rooms, transformer vaults, etc.

Structural changes, such as: Reinforcements of floors, roofs, bearing walls, footings, and foundations; additions or relocations of elevator shafts, stairways, fire exits; and vaults, but excluding switchboard cable holes and slots; and building alterations required for fire protection and other safety measures.

Changes in the type of electric current supply, or of ventilating, air-conditioning, or similar systems.

Building enlargements.

Replacements of plumbing or heating pipes (with or without associated valves), except when necessitated by minor repairs or minor relocations of fixtures.

Replacements of all or substantially all the lighting fixtures (with or without associated wiring and conduit) in one operating or equipment room or, in the case of office space, on one floor of a building.

General replacements (throughout a building or throughout an entire portion erected at one time) of items such as supply, return, or air valves in heating systems; hot or cold water valves or faucets; and plumbing, heating or drainage traps.

*Towers and Masts (Account 21)*

Beacon light, with or without accessories.
Crossarm or bridge.
Guy and anchor—complete.
Halyard, permanent.
Mast, pole-type of A-frame structure.
Topmast.
Tower.
Tower-lighting system.
Triatic system.
Winch, with or without foundation.

*Antenna Systems (Account 22)*

Antennas

Antenna—complete.
Single or multiple antenna wire (with or without associated spacers, supporting insulators, and catenary wires, if integral parts of span)—continuous span.

Single "panel" of antenna wire, with supporting wire and insulators.

Ground or Counterpoise Systems

Counterpoise system.
Ground system.
Overhead transmission line for distribution of the current to the ground, wires, or plates.

Radio Frequency Transmission Lines

Filter assembly.
Inside transmission line system.
Transmission branch line.
Transmission line system.

Tuning and Uncoupling Coils

Long-wave tuning coil or uncoupling coil.
Shelter or housing.

Sleet-Melting Installations

Power board.
Power-supply cable.
Shelter, housing, or platform.
Sleet-melting system.
Transformer or bank of transformers.

*Control Lines (Account 26) and Power-Supply Lines (Account 27)*

Buried cable—a section of 300 feet or more, or a section between manholes, splicing boxes, or pedestals.
Cable, with or without associated suspension strand, clamps, or rings.
Case of equipment, such as loading coils, building-out condensers, carrier-line filters, or auto-transformers.
Field telephone system.
Gas-pressure fault-indicating system.
Manhole.
Pole (i. e., line pole, brace pole, guy pole, or pole forming part of an A or H frame), with or without associated anchors, guys, steps, or other appurtenances.
Special fixtures (i. e., a bridge fixture, a tower, or other special river-crossing or long-span fixture), with or without associated anchors, guys, or other appurtenances.
Underground conduit—a section between a manhole, handhole, or service box and a pole or building.
Underground conduit—a section between two manholes, handholes, or service boxes.
Underground conduit dips between two poles, between a pole and a building, or between two buildings.
Wire, with or without associated insulators or other hardware—two or more continuous spans.

*Electron-Tube Transmitter Equipment (Account 31)*

Air ducts system.
Amplifier unit.
Antenna coupling device.
Blower.
Control panel.
Driver or exciter unit.
Generator.
Modulator unit.
Motor (2 or more h. p.).
Oil cooler.
Oscillator unit.
Radiator.
Rectifier unit.
Transformer (25 or more Kv-a).
Transmitter—complete, with or without associated wiring or conduits.
Water pump.

*Other Transmitter Equipment (Account 32)*

Alternator, radio frequency.
Amplifier, magnetic.
Arc transmitter.
Armature (associated with main machine of 25 or more h. p.).
Compressor.
Condensers, battery of.
Foundation.
Oil tank.
Pump.
Motor (2 or more h. p.).
Motor generator.
Panel or switchboard.
Rotor.
Spark transmitter.
Transformer (25 or more Kv-a).

*Cooling Apparatus (Account 33)*

Air duct.
Blower.
Brine tank.
Cooling pond.
Cooling pond louvre or wind break.
Cooling tower.
Fan, exhaust.
Heat exchanger.
Machine foundation.
Motor (2 or more h. p.).
Pump.
Radiator.
Refrigerating unit.
Spray tower.
Sump.
System of pipes from pump and cooling device to a transmitter or rectifier.
Water Still.
Water storage tank.

*Receiver Equipment (Account 34)*

Amplifier unit.
Antenna combining or coupling unit.
Coil box.
Converter unit.
Demodulator or detector unit.
Oscillator unit.
Power-supply panel or unit.
Receiver rack.
Receiving set—complete.
Rejector coupling unit.
Table or desk used as a mounting.
Tone keyer unit.
Tuner unit.

*Power Supply and Distribution Equipment (Account 36)*

Other than storage battery equipment

Alternator.
Ash or coal conveyor.
Boiler.
Circuit breaker.
Compensator.
Concrete vault.
Control panel.
Feed water condenser.
Generator.
Housing or shelter for pump.
Machine foundation.
Mercury tank.
Motor generator unit.
Motor (2 or more h. p.).
Power plant—complete.
Power substation—complete.
Prime mover.
Pump-fuel oil or feed water.
Rectifier, power.
Switchboard, power.
Starter.
Tank—fuel oil, feed water, or compressed air.
Transformer (25 or more Kv-a).
Voltage regulator.

Storage Battery Equipment

Battery—complete, with or without rack, cabinet, or counter.
Battery plates—complete.
Battery rack or cabinet (storage or dry).
Electric motive cells.
Filter assembly, battery charging.
Group of bus bars, cable, or wiring, with or without conduit, such as between: Battery and fuse panel and Power switchboard and equipment.
Motor generator.
Rectifier, battery charging.
Switchboard, storage battery.
Tanks or jars—complete set.

*Control Apparatus (Account 40)*

Frequency-Measuring Equipment

Amplifier unit.
Comparator.
Equipment rack.
Equipment table.
Frequency standard.
Frequency standard check equipment unit.
Harmonic generator or distortion amplifier unit.
Multi-vibrator unit.
Oscillator unit.
Power supply unit.
Radio receiver or unit.
Recorder, time-signal.
Regulator unit.
Shielded frequency-measuring room or booth (not part of a building).
Synchronous clock.
Temperature controlled box.

Message Transmitting and Receiving Apparatus

Automatic transmitter unit or base.
Desk or table fitted with radiotelegraph or other telegraph apparatus.
Error detector unit.
Facsimile machine (transmitting, receiving, or combination).
Ink recorder or undulator.
Photoradio operating table—complete, with wiring, outlets, compressor, etc.
Photoradio receiving recorder.
Photoradio universal transmitting and receiving machine.
Printer (keyboard, page, or tape).

Table or stand used as a mounting for automatic telegraph apparatus or for keyboard printer.
Tape perforator or reperforator, with or without cover or case.
Tape puller.
Tape puller foot control assembly—integral with operating table.
Teletypewriter.
Time stamp (a. c. or d. c.), or entire time-stamp installation.
Typewriter, traffic.
Water copy wringer or press.

Message Conveyor Equipment

Conveyor belt installation.
Metal chute.
Pneumatic tubing, with or without protective covering—section of.
Tubing blower motor.

Calling and Order-dispatching Equipment

Annunciator system.
Call register.
Microphone and loud-speaker order-dispatching and intercommunicating system.
Microphone—complete, with mounting, connecting cord, etc.
Public-address system.
Telautograph installation.
Telegraph or telephone order-dispatching and intercomunicating system.

Terminal Equipment

Amplifier rectifier unit.
Amplifier unit.
Board-printer-control, relay, amplifier, line-test, or keyer.
Concentrator for radio or wire-line telegraph circuits, printer circuit, or telephones.
Control booth.
Control desk or console.
Control or switching box.
Converter unit.
Desk or table fitted with radiotelegraph or other telegraph apparatus.
Electrically shielded control room.
Filter-rack installation.
Filter unit.
Fuse panel, with or without associated wiring.
Lamp panel, with or without associated wiring.
Microphone—complete, with mounting, connecting cord, etc.
Mixer panel.
Modulator unit.
Mounting for line-terminal equipment—table, desk, or rack.
Multiplex terminal.
Oscillator unit.
Photoradio or facsimile terminal.
Radio transmitter frequency control installation.
Relay test panel, with or without associated wiring.
Remote control board, transmitter or receiver.
Single bay of relay rack or other supporting structure for terminal or other equipment.
Telegraph, telephone, or program control board.
Telegraph test board.
Telephone modulator (portable) or telephone modulator installation.
Tone-generator installation.
Volume-indicator unit.

Monitoring Equipment

Monitor loud speaker, portable.
Monitor receiver, portable.
Monitor recorder, portable.
Multiple pen recorder.
Telephone head set, hand set, or breast set.
Telephone receiver or transmitter, operator's, portable.

*Equipment on Customers' Premises (Account 41)*

Call box.
Morse set.
Printer.
Telephone.

*Furniture and Office Equipment (Account 51)*

Each principal item of equipment, such as: Accounting, adding, addressing, billing, blueprinting, calculating, or listing machine; Bed, cot, couch, davenport, or lounge; Cabinet; Counter installation; Desk; Piano or phonograph; Refrigerator; Safe; Typewriter; Vacuum cleaner; Washing machine; Water cooler.

*Ship Station Equipment (Account 61) and Other Mobile Station Equipment (Account 69)*

Each applicable item of equipment as listed under the preceding captions.

*Vehicles and Draft Animals (Account 71)*

Each principal item of equipment such as: Air compressor, mobile; Aeroplane; Automobile; Boat or barge; Draft animal; Motorcycle; Motortruck body; Motor truck, with or without body; Mounted kitchen; Pole dolly or dinky; Set of harness; Sled; Tractor or trailer; Wagon.

*Shop Equipment, Tools, and Implements (Account 72)*

Testing and Adjusting Equipment

Ammeter.
Bridge (capacity, resistance, inductance, or combination thereof).
Circuit tester or analyzer.
Crystal testing installation.
Decade resistance box.
Decremeter.
Dummy antenna or dummy load.
Field intensity measuring installation.
Harmonic generator or distortion amplifier unit.
Linemen's test set.
Meter—capacity, conductance, field intensity (including antenna), portable flow, or light intensity.
Magneto test set.
Oil testing set.
Oscillator unit, portable.
Oscillograph or oscilloscope.
Portable telephone outfit.
Pyrometer, portable.
Relay test panel, with or without associated wiring.
Stroboscope.
Temperature controlled oven.
Test amplifier unit, portable.
Test meter, with or without associated external thermocouple or multiplier.
Test table.
Thermocouple.
Vacuum-tube gas detector.
Vacuum-tube temperature measuring meter.
Vacuum-tube tester, portable.
Vacuum-tube testing installation—complete.
Volt meter.
Volume or power level indicator, portable.
Wave meter, portable.

Portable Tools and Implements

Each principal item of equipment, such as: Air compressor, mobile; Back-filling machine; Blower, power; Concrete mixer; Compressed air tool; Crane or derrick, mobile; Earth-boring machine (not part of a truck or tractor); Farm implement; Forge; Paint spray outfit; Pole-treating installation; Power drill or hammer; Surveyor's transit; Tower erection cage; Trenching machine; Wire-measuring machine.

Other Equipment

Each principal item of equipment, such as: Acetylene torch outfit; Boring mill; Chain hoist; Lathe; Milling machine; Oil filter press, with associated equipment; Power planer, drill press, grinder, or saw; Shop motor (2 or more h. p.); Welding outfit; Work bench or table.

*Store and Warehouse Equipment (Account 73)*

Each principal item of store and warehouse equipment, such as: Barrel; Cart; Counter, movable; Crane; Gasoline pump or tank; Hand cart or hand truck; Ladder; Oil pump; Oil tank; Tool rack or tool case; Truck; Wire-measuring machine.

## FEDERAL COMMUNICATIONS COMMISSION.

[Docket No. 5672]

INVESTIGATION OF ENLARGEMENT BY SOUTHWESTERN BELL TELEPHONE COMPANY OF KANSAS CITY EXCHANGE AREA

NOTICE OF HEARING

At a session of the Federal Communications Commission, held in its offices at Washington, D. C., on the 27th day of June 1939,

Whereas, the Commission having heretofore entered upon an informal investigation of the enlargement by the Southwestern Bell Telephone Company of the Kansas City Exchange Area and the circumstances connected therewith; and

It appearing, that a formal hearing upon the questions involved in said investigation is desirable; it is

*Ordered*, That the Commission, upon its own motion and without formal pleadings, enter upon a hearing concerning the enlargement by the Southwestern Bell Telephone Company of the Kansas City Exchange Area, and particularly concerning the failure of the Southwestern Bell Telephone Company to have on file with this Commission the Interstate telephone rates, particularly the interstate-interzone message rates, as are applied to the said Kansas City area; and whether said failure to file such rates is in violation of any provisions of the Communications Act of 1934, as amended.

*It is further ordered*, That this order be served upon Southwestern Bell Telephone Company, and that this carrier be, and it hereby is, made respondent to this proceeding, and that notice to the public be given by posting a copy of this order in the office of the Secretary of the Commission.

*It is further ordered*, That this proceeding be, and it hereby is, assigned for hearing on the 18th day of September 1939, at 10:00 a. m., at the offices of the Federal Communications Commission in Washington, D. C.

By the Commission.

[SEAL] T. J. SLOWIE, *Secretary.*

## FEDERAL DEPOSIT INSURANCE CORPORATION.

RESOLUTION AUTHORIZING CALL FOR REPORT OF CONDITION

Pursuant to the provisions of paragraph (3) of subsection (k) of Section 12B of the Federal Reserve Act, as amended, be it resolved that each insured State nonmember bank, except a District bank, be, and hereby is, required to submit to the Federal Deposit Insurance Corporation within ten days after receipt of notice of this resolution a report of its condition as of the close of business Friday, June 30, 1939, on Form No. 64—Call No. 11. Said report of condition shall be prepared in accordance with the booklet entitled "Instructions for the Preparation of Reports of Condition on Form 64."[1]

Adopted by the Board of Directors of the Federal Deposit Insurance Corporation on July 1, 1939.

[SEAL] E. F. DOWNEY, *Secretary.*

[F. R. Doc. 39-2335; Filed July 5, 1939; 3:36 p. m.]

[1] Filed as a part of the original document; copies available upon request to the Federal Deposit Insurance Corporation.

## FEDERAL TRADE COMMISSION.

*United States of America—Before Federal Trade Commission*

At a regular session of the Federal Trade Commission, held at its office in the City of Washington, D. C., on the 1st day of July, A. D. 1939.

Commissioners: Robert E. Freer, Chairman; Garland S. Ferguson, Charles H. March, Ewin L. Davis, William A. Ayres.

[Docket No. 3769]

IN THE MATTER OF S & K SALES, INC., A CORPORATION

ORDER APPOINTING EXAMINER AND FIXING TIME AND PLACE FOR TAKING TESTIMONY

This matter being at issue and ready for the taking of testimony, and pursuant to authority vested in the Federal Trade Commission, under an Act of Congress (38 Stat. 717; 15 U.S.C.A., Section 41),

*It is ordered*, That Miles J. Furnas, an examiner of this Commission, be and he hereby is designated and appointed to take testimony and receive evidence in this proceeding and to perform all other duties authorized by law;

*It is further ordered*, That the taking of testimony in this proceeding begin on Monday, July 10, 1939, at ten o'clock in the forenoon of that day (central standard time) in Room 516, Federal Building, St. Louis, Missouri.

Upon completion of testimony for the Federal Trade Commission, the examiner is directed to proceed immediately to take testimony and evidence on behalf of the respondent. The examiner will then close the case and make his report.

By the Commission.

## RURAL ELECTRIFICATION ADMINISTRATION.

[Administrative Order No. 367]

ALLOCATION OF FUNDS FOR LOANS

JUNE 30, 1939.

By virtue of the authority vested in me by the provisions of Section 4 of the Rural Electrification Act of 1936, as amended, I hereby allocate, from the sums authorized by said Act, funds for loans for the projects and in the amounts as set forth in the following schedule:

| *Project designation* | *Amount* |
|---|---|
| Arkansas R9014C1 A. P. & L. | $200,000 |

JOHN M. CARMODY, *Administrator.*

[F. R. Doc. 39-2337; Filed, July 6, 1939; 9:09 a. m.]

[Administrative Order No. 368]

ALLOCATION OF FUNDS FOR LOANS

JUNE 30, 1939.

By virtue of the authority vested in me by the provisions of Section 5 of the Rural Electrification Act of 1936, as amended, I hereby allocate, from the sums authorized by said Act, funds for loans for the projects and in the amounts as set forth in the following schedule:

| *Project designation* | *Amount* |
|---|---|
| Alabama 0027W1 Conecuh | $10,000 |
| Alabama 0030W1 Autauga | 5,000 |
| California 0018W1 San Diego | 2,000 |
| Idaho 0011W1 Kootenai | 5,000 |
| Idaho 0017W2 Fremont | 10,000 |
| Indiana 0040W1 Knox | 6,000 |
| Indiana 0055W1 Tippecanoe | 6,000 |
| Indiana 0072W1 Clark | 6,000 |
| Iowa 0051W1 Winnebago | 5,000 |
| Kansas 0026W1 Coffey | 3,000 |
| Kansas 0030W1 Nemaha | 10,000 |
| Kansas 0033W1 Pratt | 5,000 |
| Kentucky 0003W1 Jackson | 5,000 |
| Kentucky 0046W2 Harrison | 5,000 |
| Mississippi 0039W1 Jackson | 6,000 |
| Missouri 0038W1 Reynolds | 5,000 |
| New Mexico 0008W1 Roosevelt | 5,000 |
| Pennsylvania 0013W2 Tioga | 5,000 |
| South Carolina 0019W1 Laurens | 7,000 |
| Texas 0011W1 Kaufman | 3,000 |
| Texas 0050W1 Grayson | 5,000 |
| Texas 0085W1 Wise | 4,000 |
| Texas 0101W1 Parker | 4,000 |

## SECURITIES AND EXCHANGE COMMISSION.

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission, held at its office in the City of Washington, D. C., on the 30th day of June, A. D. 1939.

[File Nos. 31-140, 31-390, 31-391]

IN THE MATTER OF THE APPLICATIONS OF NORTHERN NATURAL GAS COMPANY

ORDER DENYING APPLICATIONS

Northern Natural Gas Company, having filed applications under Section 2 (a) (8) of the Public Utility Holding Company Act of 1935 for orders declaring it not to be a subsidiary of Lone Star Gas Corporation, The United Light and Railways Company and The United Light and Power Company, and North American Light & Power Company and The North American Company; a joint hearing on said applications having been duly held;[1] the record in these matters having been duly considered; and the Commission having made appropriate findings;

*It is ordered*, That each of said applications be and hereby is denied.

By the Commission.

[SEAL] FRANCIS P. BRASSOR, *Secretary.*

---

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 6th day of July, A. D. 1939.

[File No. 37-38]

IN THE MATTER OF SUBSIDIARY SERVICE CORPORATION

NOTICE OF AND ORDER FOR HEARING

A declaration pursuant to section 13 of the Public Utility Holding Company Act of 1935, having been duly filed with this Commission by the above-named party;

*It is ordered*, That a hearing on such matter be held on July 24, 1939, at 10:00 o'clock in the forenoon of that day, at the Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C. On such day the hearing-room clerk in room 1102 will advise as to the room where such hearing will be held. At such hearing, if in respect of any declaration, cause shall be shown why such declaration shall become effective.

*It is further ordered*, That Charles S. Moore or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to

[1] 3 F.R. 2912, 2913 DL

preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice to continue or postpone said hearing from time to time.

Notice of such hearing is hereby given to such declarant or applicant and to any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before July 19, 1939.

The matter concerned herewith is in regard to a declaration on Form U–13–1 seeking Commission approval of its conduct of business as a subsidiary service company for certain associate companies in the Midland United Company System.

By the Commission.

[SEAL] FRANCIS P. BRASSOR,
*Secretary.*

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 6th day of July, A. D. 1939.

[File No. 37–3]

IN THE MATTER OF MIDLAND SUBSIDIARY CORPORATION

NOTICE OF AND ORDER FOR HEARING

An amended declaration on Form U–13–1 pursuant to section 13 of the Public Utility Holding Company Act of 1935, having been duly filed with this Commission by the above-named party; and

The Commission having reason to believe that the conditions which led to its order of approval dated July 31, 1936 have changed and that said order should be amended, modified, or rescinded;

*It is ordered*, That a hearing on such matter be held on July 25, 1939, at 10:00 o'clock in the forenoon of that day, at the Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C. On such day the hearing-room clerk in room 1102 will advise as to the room where such hearing will be held. At such hearing, if in respect of any declaration, cause shall be shown why such declaration shall become effective.

*It is further ordered*, That Charles S. Moore or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice to continue or postpone said hearing from time to time.

Notice of such hearing is hereby given to such declarant or applicant and to any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before July 20, 1939.

The matter concerned herewith is in regard to an amended declaration setting forth, and requesting approval of, certain changes effected by Midland Subsidiary Corporation which render its present organization and conduct of business different from its organization and conduct of business as approved by the Commission in its order of approval dated July 31, 1936; and an action by the Commission to determine whether, by reason of the changes in the conditions which led to its order of approval and the changes in organization and conduct of business of Midland Subsidiary Corporation, said order should be amended, modified, or rescinded.

By the Commission.

[File No. 32–133]

IN THE MATTER OF NORTHWESTERN ILLINOIS UTILITIES, AMERICAN UTILITIES SERVICE CORPORATION

ORDER RELATIVE TO ISSUE AND SALE OF NOTES, ETC.

Northwestern Illinois Utilities, a subsidiary of American Utilities Service Corporation, a registered holding company, having filed an amended application pursuant to Section 6 (b) of the Public Utility Holding Company Act of 1935, regarding the issuance to American Utilities Service Corporation, of its 6% unsecured note, or notes, in the principal amount of $500,000, to be dated as of November 1, 1938 and to mature November 1, 1964;

American Utilities Service Corporation having filed an application pursuant to Section 10 for approval of the acquisition by it of the aforesaid note or notes;

American Utilities Service Corporation having also filed an application pursuant to Rule U–12D–1 of the General Rules and Regulations under said Act for approval of the pledge by it of the aforesaid note or notes;

A hearing upon said applications as amended having been held [1] after appropriate notice, and the Commission having considered the record in this matter and having made and filed its findings herein;

*It is ordered*, That the issue and sale of the aforesaid 6% unsecured note or notes in the principal amount of $500,000 by Northwestern Illinois Utilities be, and the same hereby is, exempted from the provisions of Section 6 (a) of the Act;

*It is further ordered*, That the acquisition and pledge of the aforesaid note or notes by American Utilities Service Corporation be, and the same hereby is, approved;

*It is further ordered*, That this Order be subject to the following terms and conditions:

(1) That all acts in connection with said applications as amended shall be performed in all respects as set forth in, and for the purposes represented by, said applications; and

(2) That in the event that the order of the Illinois Commerce Commission authorizing the issuance of the aforesaid note or notes and the delivery of such note or notes to American shall be revoked, rescinded, or otherwise terminated the exemption granted herein shall immediately terminate without further notice or order of this Commission; and

(3) That within ten days after the issuance of the note or notes referred to herein and the acquisition and pledge of such note or notes by American the applicants shall respectively file with this Commission certificates of notification showing that such issuance and sale and acquisition and pledge have been effected in accordance with the terms and conditions of, and for the purposes represented by, said applications.

By the Commission.

[File No. 32–154]

IN THE MATTER OF NEW ENGLAND POWER COMPANY, CONNECTICUT RIVER POWER COMPANY, BELLOWS FALLS HYDRO-ELECTRIC CORP., NEW ENGLAND POWER ASSOCIATION

NOTICE OF AND ORDER FOR HEARING

Applications pursuant to sections 6 (b), 10 and Rule U–12F–1 of the Public

[1] 4 F.R. 1188 DI.

Utility Holding Company Act of 1935, having been duly filed with this Commission by the above-named parties;

*It is ordered*, That a hearing on such matter be held on July 24, 1939, at 10:00 o'clock in the forenoon of that day, at the Securities and Exchange Building, 1778 Pennsylvania Avenue, NW., Washington, D. C. On such day the hearing-room clerk in room 1102 will advise as to the room where such hearing will be held. At such hearing, if in respect of any declaration, cause shall be shown why such declaration shall become effective.

*It is further ordered*, That Raoul Berger or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice to continue or postpone said hearing from time to time.

Notice of such hearing is hereby given to such declarant or applicant and to any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before July 19, 1939.

The matter concerned herewith is in regard to the following applications:

(1) An application by New England Power Company, a Massachusetts corporation and a subsidiary of New England Power Association, a registered holding company, pursuant to Section 6 (b) of said Act concerning the issue and sale of applicant's First Mortgage Bonds, Series B (bearing interest at a rate not exceeding 3½%), due August 15, 1969, in the principal amount of $9,650,000 and not exceeding 112,724 shares of applicant's common capital stock, $25 par value. The bonds will be sold following a published invitation for proposals for purchase made pursuant to Chapter 164, Section 15 of the General Laws of Massachusetts. The net proceeds of the sale of the bonds will be used by said applicant:

(a) as part of the purchase price of the fixed property and franchises of Bellows Falls Hydro-Electric Corporation, a Vermont corporation and a subsidiary of New England Power Association, and

(b) to purchase the portion of the so-called Bellows Falls-Pratts Junction Transmission Line, owned by Connecticut River Power Company, a New Hampshire corporation and also a subsidiary of New England Power Association and located in the state of New Hampshire.

The proposed stock will be issued to Bellows Falls Hydro-Electric Corporation on the basis of $30 a share as the remainder of the purchase price for the property of that company to be acquired.

(2) An application by Bellows Falls Hydro-Electric Corporation pursuant to Rule U–12F–1 under said Act for approval of the sale of its assets to New England Power Company as described above.

(3) An application by Bellows Falls Hydro-Electric Corporation pursuant to Section 10 of said Act for approval of the acquisition by it of the shares of common stock of New England Power Company proposed to be issued.

(4) An application by Connecticut River Power Company pursuant to Rule U–12F–1 under said Act for approval of the sale of certain of its assets to New England Power Company as described above.

(5) Applications by New England Power Association for any orders with respect to it which the Securities and Exchange Commission may deem necessary in connection with the sales by Bellows Falls Hydro-Electric Corporation and Connecticut River Power Company as described above.

By the Commission.

### WHITE-FRINGED BEETLE QUARANTINE RESTRICTIONS MODIFIED

SEC. 301.72A—ADMINISTRATIVE INSTRUCTIONS, REMOVAL OF WHITE-FRINGED BEETLE CERTIFICATION REQUIREMENTS UNTIL FEBRUARY 1, 1940, FOR SPECIFIED ARTICLES CONSIGNED FROM DESIGNATED PORTIONS OF THE REGULATED AREAS

*Approved July 7, 1939; effective July 7, 1939*

Circular B.E.P.Q. 485 revised, issued May 6, 1939,[1] effective May 8, 1939, waived certification requirements until July 1, 1939, for specified articles consigned from certain parts of the areas regulated under quarantine No. 72. The present revision extends the period of exemption from regulation for certain articles from areas hereinafter specified to February 1, 1940.

---

[1] 4 F.R. 1977 DI.

Under authorization provided in Notice of Quarantine No. 72 (Sec. 301.72), all certification requirements are hereby waived during the regulated periods from July 1, 1939, to January 31, 1940, inclusive, of the following articles enumerated in Regulation 3 (*a*) and (*b*), (Sec. 301.72–3) when free from soil, it having been determined that sanitary measures and natural conditions have so reduced the risk of contamination with the egg or adult stage of the white-fringed beetle as to render certification unnecessary during the period indicated:

1. When consigned from the regulated areas in *Alabama*—Mobile County; *Florida*—Escambia County; *Louisiana*—Parish of East Baton Rouge; *Mississippi*—Jackson County, certification requirements are waived on the following articles:

Potatoes and sweetpotatoes.
Sweetpotato vines, draws, and cuttings.
Cordwood, pulpwood, stumpwood, and logs.
Used or unused lumber, timbers, posts, poles, crossties, and other building materials.
Hay, roughage of all kinds, straw, leaves, and leafmold.
Peas, beans, and peanuts in shells, or the shells of any of these products.
Seed cotton, cottonseed, baled cotton lint, and linters.
Used implements and machinery, scrap metal, junk, and utensils or containers coming in contact with the ground.
Brick, tiling, stone, and concrete slabs and blocks.
Nursery stock and other plants, which are free from soil.

2. When consigned from the regulated areas in *Mississippi*—Counties of Hinds and Pearl River, certification requirements are waived on the following articles:

Potatoes and sweetpotatoes.
Sweetpotato vines, draws, and cuttings.
Cordwood, pulpwood, stumpwood, and logs.
Used or unused lumber, timbers, posts, poles, crossties, and other building materials.
Hay, roughage of all kinds, straw, leaves, and leafmold.
Peas, beans, and peanuts in shells, or the shells of any of these products.
Used implements and machinery, scrap metal, junk, and utensils or containers coming in contact with the ground.
Brick, tiling, stone, and concrete slabs and blocks.
Nursery stock and other plants, which are free from soil.

3. When consigned from the regulated areas in *Louisiana*—Parishes of Jefferson, Orleans (including the City of New Orleans), and Plaquemines, certification requirements are waived on the following articles:

Potatoes and sweetpotatoes.
Sweetpotato vines, draws, and cuttings.
Cordwood, pulpwood, stumpwood, and logs.
Unused lumber, timber, posts, poles, and crossties.
Hay, roughage of all kinds, straw, leaves, and leafmold.
Peas, beans, and peanuts in the shells, or the shells of any of these products.
Seed cotton, cottonseed, baled cotton lint, and linters.

All articles, designated in paragraphs (*a*) and (*b*) of Regulation 3 of Quarantine No. 72[1] (Sec. 301.72–3) for which certification requirements are not hereinabove waived, shall remain under the restrictions of the quarantine during the period covered by this document.

(Issued under Sec. 301.72) [B.E.P.Q. 485, Second Revision, July 7, 1939]

[SEAL] AVERY S. HOYT,
*Acting Chief.*

## FEDERAL CROP INSURANCE CORPORATION

[F.C.I.R.—Series 1, No. 1, Supp. 8[1]]

### PART 401—WHEAT CROP INSURANCE REGULATIONS

#### AMENDMENTS

By virtue of the authority vested in the Federal Crop Insurance Corporation by the Federal Crop Insurance Act, approved February 16, 1938, as amended by Public Law No. 691 of the 75th Congress, approved June 22, 1938, the Regulations Relating to Wheat Crop Insurance, as amended, are hereby further amended, as follows:

By amending section 151, Part 15, to read, as follows:

Refund of any premium or portion thereof which has been paid to the Corporation by means of an advance from the Secretary of Agriculture shall be made to the Secretary of Agriculture. The amount of any such refund shall be determined in the manner provided for in Part 9 of these Regulations except that the cash equivalent of the amount of wheat to be refunded shall be determined using the basic market price and price differentials applicable as of the date of the advance from the Secretary of Agriculture; *Provided, however*, That in the case of the refund of a supplemental advance the cash equivalent of the amount of wheat to be refunded shall be determined using the basic market price and price differentials applicable as of the date of such supplemental advance.

Adopted by the Board of Directors on June 2, 1939.

[SEAL] M. L. WILSON,
*Chairman.*

Approved, July 6, 1939.

H. A. WALLACE,
*Secretary of Agriculture.*

[F. R. Doc. 39–2415; Filed, July 7, 1939; 11:58 a. m.]

[2] 3 F.R. 3003 DI.

## TITLE 9—ANIMALS AND ANIMAL PRODUCTS

### BUREAU OF ANIMAL INDUSTRY

PARTS 201, 202, 203 AND 204—AMENDMENT OF RULES AND REGULATIONS UNDER THE PACKERS AND STOCKYARDS ACT

Pursuant to the authority vested in the Secretary of Agriculture by the Packers and Stockyards Act, approved August 15, 1921 (42 Stat. 169; 7 U.S.C. 228), the rules and regulations of the Secretary of Agriculture, B.A.I. order 364,[1] approved February 17, 1938 (Parts 201, 202, 203, and 204 of Title 9 of the Code of Federal Regulations), are hereby amended (1) by striking out the words "Bureau of Animal Industry" wherever they appear in said rules and regulations and inserting in lieu thereof the words "Agricultural Marketing Service"; and (2) by striking out the word "Bureau" wherever it appears in said rules and regulations and inserting in lieu thereof the word "Service."

These rules and regulations shall continue in effect and be administered by the Agricultural Marketing Service.

Done at Washington, D. C., this 6th day of July 1939. Witness my hand and the seal of the Department of Agriculture.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

[F. R. Doc. 39–2383; Filed, July 6, 1939; 12:46 p. m.]

## TITLE 10—ARMY: WAR DEPARTMENT

### CHAPTER IV—MILITARY EDUCATION

PART 45—AVIATION INSTRUCTION AT NON-FEDERAL ESTABLISHMENTS[2]

§ 45.1 *Specific application of these regulations.* These regulations apply specifically to aviation instruction given military personnel in regularly established civil flying schools and in civil technical schools. Training at other educational institutions, industrial plants, or places under the authority of the act of April 3, 1939, will be as prescribed by the Chief of the Air Corps and approved by the Secretary of War. (Sec. 2, Act April 3, 1939) [Par. 2, AR 350–3500, June 15, 1939]

§ 45.2 *Duties of the Chief of the Air Corps.* The Chief of the Air Corps is responsible for coordination of instruction. He will exercise supervision over all military personnel at institutions. He will determine the numbers of officers and enlisted men required for administrative and supervisory duties and the numbers of students that are to be trained, and will recommend the detail or relief of such personnel to the War Department. He is charged with the issuance of necessary instructions not provided for in these regulations. (Sec. 2, Act April 3, 1939) [Par. 3, AR 350–3500, June 15, 1939]

§ 45.3 *Selection of institutions.* The selection of an institution to give instruction to military students will be made by the Secretary of War, upon recommendation of the Chief of the Air Corps.

(a) The primary requirement for selection will be the suitability of an institution to accomplish satisfactorily the training projected by the Air Corps. A prerequisite to the selection of a civil school is the holding of a rating or letter of recognition from the Civil Aeronautics Authority covering pertinent courses and subjects where the Authority takes cognizance of such instruction.

(b) The following factors when applicable will have special importance:

(1) Geographical location as it influences the cost of Government transportation or other expense, and the functioning of the system of supply and repair of Government property.

(2) Capacity for instruction of military personnel insofar as it warrants the maintenance of the requisite governmental supervisory and administrative establishment thereat.

(3) Ability to maintain output of trained military personnel at a uniform rate.

(4) Ability to conduct the desired training without undue hazard to personnel or property.

(5) Conditions affecting health and safety of military personnel, and the preservation and maintenance of Government property.

(6) Availability of suitable housing and messing facilities adjacent to place of instruction.

(7) Adequacy of instructional facilities and methods, and quality of instruction.

(8) Adequacy of facilities for maintenance and preservation of Government property.

(9) Provisions for maintaining the governmental supervisory and administrative establishment. (Sec. 2, Act April 3, 1939) [Par. 4, AR 350–3500, June 15, 1939]

§ 45.4 *Responsibilities of institutions.* In addition to functions provided for elsewhere in these regulations, institutions will be required to agree to the following prior to the assignment of military personnel thereat for instruction:

(a) To provide adequate and satisfactory housing and messing facilities or make arrangements therefor at a reasonable cost to personnel concerned, for all military students assigned for instruction.

(b) To provide adequate and satisfactory office and other space required by Government administrative personnel in the performance of their assigned duties.

(c) To comply with regulations prescribed by proper civil authorities to insure safety and with such supplementary instructions issued by the Chief of the Air Corps, or his representatives, in regard thereto and not in conflict therewith as may be deemed necessary in the premises.

(d) To save the Government harmless from liability for any injury or damage to persons and property, except Government personnel.

(e) To keep in the office of the school registrar and available to the Chief of the Air Corps or his representatives complete records pertaining to the training and progress of each military student. Records should be kept as prescribed by the Chief of the Air Corps.

(f) To give representatives of the Government access to books of account and records at such time as it may be necessary for the Government to determine actual cost of instruction.

(g) To open to inspection by Government representatives at any time all facilities employed for the training of military personnel. (Sec. 2, Act April 3, 1939) [Par. 5, AR 350–3500, June 15, 1939]

§ 45.5 *Agreements with institutions for instruction.* Services of schools will be procured by a contract in writing which will embody the terms and conditions governing the furnishing of the instruction contemplated herein. The cost of tuition for courses of instruction as authorized in these regulations will be established by negotiation (Sec. 2, Act April 3, 1939) [Par. 6, AR 350–3500, June 15, 1939]

§ 45.6 *Military organization*—(a) *Organization*—(1) *Air Corps training detachments.* A military detachment will be formed at institutions operating under the provisions of these regulations. All military personnel on duty at or assigned as students at each such school will be attached to this detachment. Detachments so organized will be designated as Air Corps training detachments. The geographical location will form the last part of the designation of each detachment. The senior Air Corps officer on duty with each detachment will be designated the Air Corps supervisor, and will command the detachment.

(2) *Districts.* For the purpose of properly supervising the training being conducted at schools in accordance with these regulations and properly coordinating activities of training and supply, the Chief of the Air Corps is authorized to divide the schools conducting military training into not to exceed three districts and to appoint a district supervisor in charge of each district. The duties and responsibilities of district supervisors will be as directed by the Chief of the Air Corps.

(b) *Exemption from command.* Detachments formed under the provisions of these regulations will be exempt from corps area supervision and control except for disciplinary matters and routine supply. (Sec. 2, Act April 3, 1939) [Par. 7, AR 350–3500, June 15, 1939]

§ 45.7 *Duties of Air Corps supervisor.* (a) The Air Corps supervisor will be an intermediary in all relations between the War Department and the institution at which he is assigned in matters pertaining to the instruction of military students thereat.

(b) In addition to his duties as commander of his detachment and such other duties as may be assigned by proper authority he will—

(1) Determine the continued adequacy and suitability of contractors' facilities and methods as they apply to the instruction of military students.

(2) Maintain contact with progress of military students and pass upon the eligibility of any student to receive a certificate of graduation.

(3) Determine the proficiency of students in their assignments at any time during the course of instruction.

(4) Be responsible for the discipline of military students at all times.

(5) Suspend the instruction of any military student when such action is necessary.

(6) Insure that no officer or enlisted man is conducting or pursuing any course of instruction at the school without proper authority of the War Department.

(7) Render reports prescribed by the Chief of the Air Corps and by pertinent Army Regulations. A special report will be submitted in writing covering any serious breach of contract or agreement on the part of any school or school representative, concerning which adequate corrective action has not been taken within a reasonable length of time. (Sec. 2, Act April 3, 1939) [Par. 8, AR 350–3500, June 15, 1939]

§ 45.8 *Termination of status as student.* (a) An academic board composed of officers will be appointed as directed by the Chief of the Air Corps at each institution which has been designated to give flying instruction to military personnel. This board will consider all cases that are referred to it by the Air Corps supervisor which involve the fitness of a student to continue instruction for any reason whatsoever and will make appropriate recommendations relating to the disqualification, discharge, or reinstatement of any student. If at any time the board decides that a military student is not qualified to continue the course, the Air Corps supervisor will—

(1) *In case of an officer.* Forward board proceedings in triplicate to the Chief of the Air Corps, who will take final action and will return one copy to the Air Corps supervisor and forward one copy to the Commanding Officer, Air Corps Training Center.

(2) *In case of a flying cadet.* Comply with the provisions of paragraph 18, AR 615–160.[3]

(b) If at any time a student enlisted man, other than a flying cadet, shall be deemed unfitted for any reasons to continue the course, the Air Corps super-

[1] 3 F.R. 499 DI.
[2] Part 45 is supplementary to Title 10, Chapter IV, of the Code of Federal Regulations.
[3] Administrative regulations of the War Department relative to enlistment of flying cadets.

visor will immediately relieve him as a student and report the facts to the Commandant, Air Corps Technical School, for necessary action. (Sec. 2, Act April 3, 1939) [Par. 9, AR 350–3500, June 15, 1939]

§ 45.9 *Property.* All Government owned property required at institutions regardless of the purpose for which intended will be consigned to the commanding officer of the local Air Corps training detachment. Property transactions between the Air Corps supervisor and a school will be governed by paragraph (e) (2) (i), section 45.10. An accountable officer will be designated by the Chief of the Air Corps who will account for all Government property located at each institution. The Chief of the Air Corps will furnish each corps area commander concerned with the name or designation of the accountable officer. (Sec. 2, Act April 3, 1939) [Par. 10, AR 350–3500, June 15, 1939]

§ 45.10 *Loan of Government property*—(a) *General.* Property subject to loan will comprise any Government owned property mentioned and described in section 4, act of April 3, 1939. All loans of Government property will be made subject to return upon call of the Government, and without obligations upon the part of the Government to repair or replace the same in whole or in part unless otherwise specifically provided for by agreement in writing with the institution concerned.

(b) *Accredited aviation schools defined.* The term accredited aviation schools is defined as those flying schools or aviation mechanics schools that have been selected by the Secretary of War in accordance with section 45.3.

(c) *Eligibility for loans.* (1) The institution must be an accredited school within the definition of paragraph (b) above and under contractual obligations with the Government for the training of personnel of the Military Establishment pursuant to section 2, act of April 3, 1939.

(2) The detail of military personnel as students at institutions will not create any obligation on the part of the Government to provide property for the instruction of military students except as set forth in formal agreements that may be entered into by the Government with the institution concerned.

(d) *Administrative provisions.* (1) Loans of Government property, except serviceable aircraft, necessary for proper instruction at accredited aviation schools will be made at the discretion of the Chief of the Air Corps. The quantity and nature of the property, and the conditions under which loans will be made, will be as determined by the Chief of the Air Corps, except as otherwise provided for herein.

(2) The Chief of the Air Corps will secure the approval of the Secretary of War for the loan of all aircraft available for this purpose. The Chief of the Air Corps will make such allocations to institutions of serviceable aircraft approved for loan by the Secretary of War as are deemed necessary for the proper instruction of military personnel.

(3) Administrative details not inconsistent with these regulations respecting the loan of Government property and the maintenance thereof, including the extent to which an institution will be held responsible for replacement, repair, and overhaul, will be matters for determination by the Chief of the Air Corps.

(e) *Procedure*—(1) *Requisitions.* Requests for the issue of Government property will be submitted by the institution to the Air Corps supervisor. When authorized, the issue to the institution will be made by the Air Corps supervisor, or if not on hand will be obtained by him on requisition.

(2) *Loans.* (i) Government property will be loaned to institutions by the Air Corps supervisor on memorandum receipt. Credit memorandum receipt will be furnished the institution by the Air Corps supervisor for property returned to the War Department.

(ii) The responsible head or corresponding executive of the institution will designate in writing a representative who will sign all property papers for the school in the name of the institution.

(iii) Reports concerning the quantity and condition of Government property in its possession will be rendered by the institution as required by the Chief of the Air Corps.

(iv) The institution will make settlement for property held on memorandum receipt as required by the Air Corps supervisor.

(3) *Accounting.* Property will be accounted for as prescribed in section 45.9.

(f) *Transportation.* (1) Property authorized to be loaned under the provisions of paragraph (a) above will be delivered to an institution through the Air Corps supervisor by air, rail, or motor transportation as the interests of the Government may require, at the expense of the Government, except for drayage as provided for in subparagraph (2) below. The return of such property as requires rail or motor transportation, including property in the possession of the Air Corps supervisor, will be accomplished by the institution making delivery f. o. b. cars or motor truck, city of the institution concerned, properly packed, boxed, crated, and prepared for domestic shipment to such destination as may be determined by the Government. The return of airplanes in condition for flight will be accomplished by the institution, set up, serviced, and made ready for flight at the flying field of the institution concerned.

(2) All drayage of Government property to and from air or rail terminal, city of institution concerned, will be furnished by and at the expense of the institutions.

(3) The cost of transportation chargeable to the Government will be paid from funds allocated to the Chief of the Air Corps.

(g) *Lost, damaged, or destroyed property.* (1) Government property which becomes unserviceable through fair wear and tear incident to the proper and authorized use thereof will occasion no liability to the institution. Such property may be returned to the Government for replacement or credit or should be repaired by the institution in accordance with the terms of the written agreement that is entered into with the Government for the instruction of military personnel.

(2) Government property lost, destroyed, or damaged by fire, flood, theft, tornado, aircraft accident, or other similar causes, without fault or neglect on the part of the institution, its servants, or employees, will occasion no liability to the institution. To determine whether such loss, destruction, or damage was without fault or neglect on the part of the institution, its servants, or employees, a survey will be made as provided in paragraphs 6 and 8, AR 35–6640.[2] The surveying officer will be appointed in accordance with instructions issued by the Chief of the Air Corps. Reports of survey for property in the possession of an institution will be prepared by the Air Corps supervisor.

(3) All other loss, damage, or deterioration of Government property for which an institution is responsible will be made good by the institution. The Chief of Finance will take the necessary action to secure reimbursement to the United States for such loss, destruction, damage, or deterioration.

(4) The Air Corps supervisor will report to the authorities of the institution in writing any facts, circumstances, or conditions which he believes to be prejudicial to the proper protection of Government property against loss through fire, flood, theft, tornado, accident, or other similar causes. In the event that proper corrective action is not taken by the institution as the result of such communication, report thereof will be made to the Chief of the Air Corps. Access to all such reports will be afforded to surveying officers appointed under the provisions of subparagraph (2) above.

(5) The relief of institutions from liability in connection with property referred to above will in no way render inoperative any written agreement made by them with the Government for repairs and maintenance.

(h) *Maintenance and repair.* (1) The institution will keep and maintain property loaned to it in good repair and in the same condition as when received by it, usual wear, tear and usage excepted, unless otherwise specifically provided for in a written agreement made with the institution for the instruction of military personnel.

(2) Authorized Government representatives will have free access to all Government property loaned to an institution for the purpose of ascertaining the condition of such property and the manner in which it is being safeguarded, stored, maintained, and repaired.

[2] Administrative regulations of the War Department relative to survey of lost, destroyed, or unserviceable property.

(3) The Chief of the Air Corps may prescribe regulations that will facilitate proper inspection and maintenance of loaned Government property, when such regulations are consistent with the contractual obligations of the institution.

(i) *Care and safekeeping.* (1) None of the property owned by the Government and furnished to an institution under these regulations will be removed by the institution from the continental limits of the United States nor utilized by it for any other purpose than the instruction of military personnel or the performance of formal contracts pertaining to such instruction.

(2) Proper storage facilities will be furnished by the institution for all Government property in its possession and in the possession of the Air Corps supervisor. The place and manner of storage will provide satisfactorily for the care and safekeeping of Government property and will be such as to prevent undue and avoidable deterioration.

(3) Government parts, accessories, and supplies will in no case be stored or mingled with the articles of a like nature that belong to an institution. The manner of storage will permit ready identification of the property that is loaned by the Government and facilitate its inventory when such action is required. (Sec. 4, Act April 3, 1939) [Pars. 11 to 19, AR 350–3500, June 15, 1939]

## TITLE 12—BANKS AND BANKING

### FEDERAL DEPOSIT INSURANCE CORPORATION

#### RESOLUTION APPROVING CERTIFIED STATEMENT FORMS

Paragraph (1) of subsection (h) of Section 12B of the Federal Reserve Act, as amended, provides in part:

> The certified statements required to be filed with the Corporation under paragraphs (2), (3), and (4) of this subsection shall be in such form and set forth such supporting information as the board of directors shall prescribe.

*Resolved,* That pursuant to the provisions of paragraph (1) of subsection (h) of Section 12B of the Federal Reserve Act, as amended, the following described certified statement forms be approved:

(1) Certified Statement—Part One, Based on Deposits for the Six Months Ending June 30, 1939, Form 545H, in quadruplicate.[1]

(2) Recapitulation of the Monthly Totals of Certified Statement—Part Two, for the Six Months Ending June 30, 1939, Form 555H, in triplicate.[1]

[1] Filed as a part of the original document; requests for copies should be addressed to the Federal Deposit Insurance Corporation.

Adopted by the Board of Directors of the Federal Deposit Insurance Corporation on July 1, 1939.

[SEAL] E. F. DOWNEY,
*Secretary.*

## TITLE 16—COMMERCIAL PRACTICES

### FEDERAL TRADE COMMISSION

[Docket No. 3426]

#### IN THE MATTER OF EARL CHROME MANUFACTURING COMPANY

§ 3.99 (b) *Using or selling lottery devices—In merchandising.* Selling, etc., in connection with offer, etc., in commerce, of radios, clocks, cocktail shakers, coffee sets, or any other merchandise, any merchandise so packed and assembled that sales thereof to the general public are to be, or may be, made by means of a lottery, gaming device, or gift enterprise, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, Earl Chrome Manufacturing Company, Docket 3426, June 26, 1939]

§ 3.99 (b) *Using or selling lottery devices—In merchandising.* Supplying, etc., in connection with offer, etc., in commerce, of radios, clocks, cocktail shakers, coffee sets, or any other merchandise, others with any merchandise, together with punchboards, push or pull cards, or any other lottery device, or separately, to enable said persons to sell or distribute said merchandise by the use of said punchboards, etc., prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, Earl Chrome Manufacturing Company, Docket 3426, June 26, 1939]

§ 3.99 (b) *Using or selling lottery devices—In merchandising.* Selling, etc., in connection with offer, etc., in commerce, of radios, clocks, cocktail shakers, coffee sets, or any other merchandise, any merchandise by means of a game of chance, gift enterprise, or lottery scheme, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, Earl Chrome Manufacturing Company, Docket 3426, June 26, 1939]

§ 3.69 (a) (4) *Misrepresenting oneself and goods—Business status, advantages or connections—Dealer as manufacturer:* § 3.96 (b) (5) *Using misleading name—Vendor—Producer or laboratory status of dealer.* Representing, in connection with offer, etc., in commerce, of radios, clocks, cocktail shakers, coffee sets, or any other merchandise, that respondent is the manufacturer of the merchandise which he sells and distributes, unless and until he owns and operates, or directly and absolutely controls, the plant or factory wherein said merchandise is manufactured by him, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, Earl Chrome Manufacturing Company, Docket 3426, June 26, 1939]

*United States of America—Before Federal Trade Commission*

At a regular session of the Federal Trade Commission, held at its office in the City of Washington, D. C., on the 26th day of June, A. D. 1939.

Commissioners: Robert E. Freer, Chairman; Garland S. Ferguson, Charles H. March, Ewin L. Davis, William A. Ayres.

IN THE MATTER OF MORRIS L. RAUER, INDIVIDUALLY, AND TRADING AS EARL CHROME MANUFACTURING COMPANY

ORDER TO CEASE AND DESIST

This proceeding having been heard[1] by the Federal Trade Commission upon the complaint of the Commission, the answer of respondent, testimony and other evidence taken before Charles F. Diggs, an examiner of the Commission theretofore duly designated by it, in support of the allegations of said complaint, brief filed herein by counsel for the Commission (respondent having offered no proof, filed no brief, and oral argument not having been requested), and the Commission having made its findings as to the facts and its conclusion that said respondent has violated the provisions of the Federal Trade Commission Act;

*It is ordered,* That the respondent, Morris L. Rauer, individually, and trading as Earl Chrome Manufacturing Company, or trading under any other name or names, his representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale and distribution of radios, clocks, cocktail shakers, coffee sets, or any other merchandise in commerce, as commerce is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

(1) Selling or distributing any merchandise so packed and assembled that sales of such merchandise to the general public are to be made, or may be made, by means of a lottery, gaming device, or gift enterprise;

(2) Supplying to or placing in the hands of others any merchandise together with punchboards, push or pull cards, or any other lottery device, or separately, for the purpose of enabling said persons to sell or distribute said merchandise by the use of said punchboards, push or pull cards, or any other lottery device;

(3) Selling or otherwise disposing of any merchandise by means of a game of chance, gift enterprise, or lottery scheme;

(4) Representing that respondent is the manufacturer of the merchandise which he sells and distributes unless and until he owns and operates or directly and absolutely controls the plant or fac-

[1] 3 F.R. 2491 DI.

tory wherein said merchandise is manufactured by him.

*It is further ordered*, That the respondent shall, within sixty days after service upon him of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which he has complied with this order.

By the Commission.

[SEAL] OTIS B. JOHNSON,
*Secretary.*

[F. R. Doc. 39-2417; Filed, July 7, 1939; 12:55 p. m.]

---

[Docket No. 3580]

IN THE MATTER OF BOBS CANDY & PECAN COMPANY

§ 3.99 (b) *Using or selling lottery devices—In merchandising.* Selling, etc., in connection with offer, etc., in commerce, of candy and nut confections or any other merchandise, candy, etc., as aforesaid, so packed that sales of such candy, etc., are to be, or may be, made by means of a lottery, gaming device, or gift enterprise, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, Bobs Candy & Pecan Company, Docket 3580, June 26, 1939]

§ 3.99 (b) *Using or selling lottery devices—In merchandising.* Supplying, etc., in connection with offer, etc., in commerce, of candy and nut confections or any other merchandise, others with packages or assortments of candy, etc., as aforesaid, together with a push or pull card, punch board, or other lottery device, which push or pull card, etc., is to be, or may be, used in selling and distributing such candy, etc., to the public, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, Bobs Candy & Pecan Company, Docket 3580, June 26, 1939]

§ 3.99 (b) *Using or selling lottery devices—In merchandising.* Supplying, etc., in connection with offer, etc., in commerce, of candy and nut confections or any other merchandise, others with any lottery device, either with assortments of candy, etc., as aforesaid, or separately, which lottery device is to be, or may be, used in selling or distributing such candy, etc., as aforesaid, to the general public, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, Bobs Candy & Pecan Company, Docket 3580, June 26, 1939]

§ 3.99 (b) *Using or selling lottery devices—In merchandising.* Selling, etc., in connection with offer, etc., in commerce, of candy and nut confections or any other merchandise, any merchandise by means of a game of chance, gift enterprise or lottery scheme, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Cease and desist order, Bobs Candy & Pecan Company, Docket 3580, June 26, 1939]

*United States of America—Before Federal Trade Commission*

At a regular session of the Federal Trade Commission, held at its office in the City of Washington, D. C., on the 26th day of June, A. D. 1939.

Commissioners: Robert E. Freer, Chairman; Garland S. Ferguson, Charles H. March, Ewin L. Davis, William A. Ayres.

ORDER TO CEASE AND DESIST

This proceeding having been heard[1] by the Federal Trade Commission upon the complaint of the Commission and the answer of respondent, in which answer respondent admits all the material allegations of fact set forth in said complaint and states that it waives all intervening procedure and further hearing as to said facts, and the Commission having made its findings as to the facts and conclusion that said respondent has violated the provisions of the Federal Trade Commission Act;

*It is ordered*, That the respondent, Bobs Candy and Pecan Company, its officers, representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale and distribution of candy and nut confections or any other merchandise in commerce, as commerce is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

(1) Selling or distributing candy, nut confections or any other merchandise so packed and assembled that sales of such candy, nut confections or such merchandise, are to be made or may be made by means of a lottery, gaming device or gift enterprise;

(2) Supplying to or placing in the hands of others, packages or assortments of candy; nut confections or other merchandise together with a push or pull card, punch board, or other lottery device, which push or pull card, punch board or other lottery device is to be used or may be used in selling and distributing such candy, nut confections or other merchandise to the public;

(3) Supplying to or placing in the hands of others any lottery device either with assortments of candy, nut confections or other merchandise, or separately, which lottery device is to be used, or may be used in selling or distributing such candy, nut confections or other merchandise to the general public;

(4) Selling or otherwise distributing any merchandise by means of a game of chance, gift enterprise or lottery scheme.

*It is further ordered*, That the respondent shall, within sixty (60) days after service upon it of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which it has complied with this order.

By the Commission.

[SEAL] OTIS B. JOHNSON,
*Secretary.*

## TITLE 19—CUSTOMS DUTIES

### BUREAU OF CUSTOMS

[T. D. 49009]

COUNTERVAILING DUTY, SILK GOODS FROM ITALY

COLLECTORS OF CUSTOMS INSTRUCTED TO SUSPEND LIQUIDATION OF ENTRIES COVERING SILK GOODS FROM ITALY PENDING DECLARATION OF AMOUNT OF COUNTERVAILING DUTY TO BE COLLECTED; DEPOSIT OF ESTIMATED COUNTERVAILING DUTIES REQUIRED

*To Collectors of Customs and Others Concerned:*

Official reports before the Department establish to its satisfaction that bounties or grants are paid or bestowed directly or indirectly in Italy on the export to the United States of silk goods which are dutiable under the provisions of the Tariff Act of 1930.

Notice is hereby given that pursuant to the provisions of section 303 of the Tariff Act of 1930 (U.S.C., title 19, sec. 1303), countervailing duties equal to any bounty or grant found to have been paid or bestowed will be collected on dutiable merchandise composed in whole or in part of silk and imported directly or indirectly from Italy, when entered for consumption or withdrawn from warehouse for consumption after thirty days after publication of this notice in a weekly issue of Treasury Decisions, whether imported in the condition in which exported from Italy or changed in condition by remanufacture or otherwise.

The liquidation of all entries covering merchandise described above and entered for consumption or withdrawn from warehouse for consumption after thirty days after publication of this notice in a weekly issue of Treasury Decisions shall be suspended pending the declaration of the net total amount of the bounty or grant determined or estimated to have been paid or bestowed and the net amount of the countervailing duties to be collected. A deposit of estimated countervailing duties shall be required at the time of entry. The foregoing instructions, however, shall not apply to importations consisting of gifts for the personal use of the donee or of articles purchased at retail for personal use. The amount to be deposited shall be calculated in accordance with the following table and predicated on the net weights of the silk (including schappe and bourrette) contained in the imported products, plus 33⅓% of such weights if the natural gum has been removed from the silk used in the production or manufacture of the imported product:

(a) Raw silk yarns, dyed, simple or twisted of double cocoons; lire 32.8 per kilogram.

(b) Yarns of silk waste (schappe) including sewing thread; lire 49.2 per kilogram.

(c) Yarns of combings (bourrette); lire 8.2 per kilogram.

(d) Raw silk doubled and twisted, drawn, dyed silk, silk sewing thread; lire 84.5 per kilogram.

(e) Woven materials, velvets, ribbons, tulles, crepes, knit goods and stockings, in raw state; lire 87 per kilogram, subject to the following variations:

(1) For every kilogram of double yarn lire 34.8.

(2) For every kilogram of yarn of waste content lire 52.2.

(3) For every kilogram of yarn of bourrette content lire 8.2.

(f) Woven materials, velvets, ribbons, tulles, crepes, knit goods and stockings, exported in the dyed or finished state; lire 89.5 per kilogram of silk content (not weighted), subject to the following variations:

(1) For every kilogram of double yarn content lire 36.8.

(2) For every kilogram of yarn of waste content lire 55.2.

(3) For every kilogram of yarn of bourrette content lire 9.2.

The facts in regard to each importation shall be reported promptly to the Bureau of Customs. The entry and related papers shall accompany the report.

[SEAL] JAMES H. MOYLE,
*Commissioner of Customs.*

Approved, 3:35 p. m., July 5th, 1939.

H. MORGENTHAU, Jr.,
*Secretary of the Treasury.*

[F. R. Doc. 39-2399; Filed, July 6, 1939; 3:13 p. m.]

## TITLE 31—MONEY AND FINANCE: TREASURY

### CHAPTER I—MONETARY OFFICES

PART 80—THE NEWLY-MINED DOMESTIC SILVER REGULATIONS OF JULY 6, 1939*

Sec.

80.1 Scope.
80.2 Authority for regulations.
80.3 Definitions.
80.4 Forms.
80.5 Revocation or modification.
80.6 Silver which will be received.
80.7 Affidavits.
80.8 Evidence which may be demanded.
80.9 Settlement for silver delivered.
80.10 Records.
80.11 Reports.
80.12 Agreement relating to records.

*Sections 80.1 to 80.12, inclusive, issued under the authority contained in Section 4 of the Act of July 6, 1939.

§ 80.1 *Scope.* These regulations relate to the receipt and coinage by the United States coinage mints of silver mined in the United States or any place subject to the jurisdiction thereof pursuant to the provisions of section 4 of the Act of July 6, 1939.*

§ 80.2 *Authority for regulations.* These regulations are issued under section 4 of the Act of July 6, 1939.*

§ 80.3 *Definitions.* As used in these regulations—

The term "person" means an individual, partnership, association, or corporation.

The term "United States coinage mints" means the following mints: United States Mint, Philadelphia, Pa.; United States Mint, San Francisco, Calif.; United States Mint, Denver, Colo. And whenever authority is conferred in these regulations upon a "mint" such authority is conferred upon the person locally in charge of the mint, acting in accordance with instructions of the Director of the Mint or the Secretary of the Treasury.*

§ 80.4 *Forms.* Any form, the use of which is prescribed in these regulations, may be obtained at any United States mint or assay office or at the Treasury Department, Washington, D. C.*

§ 80.5 *Revocation or modification.* The provisions of these regulations may be revoked or modified at any time.*

§ 80.6 *Silver which will be received.* The United States coinage mints, under the conditions hereinafter specified, and subject to the appropriate regulations governing the mints, will receive silver which any such mint is satisfied has been mined subsequently to July 1, 1939, from natural deposits in the United States or any place subject to the jurisdiction thereof.

Such mints will also receive silver which forms a part of a mixture of domestic, secondary and/or foreign silver provided such mints are satisfied that the aggregate amount of such mixture so received does not exceed the amount of such mixture which has been mined subsequently to July 1, 1939, from natural deposits in the United States or any place subject to the jurisdiction thereof.*

§ 80.7 *Affidavits.* Every person delivering silver under the provisions of these regulations shall file with each delivery a properly executed affidavit on form TSA–1 and supporting affidavit or affidavits of the miner or miners on form TSA–2 or TSA–2A, whichever is appropriate, containing the information called for in such forms and executed under oath before an officer duly authorized to administer oaths.*

§ 80.8 *Evidence which may be demanded.* Persons delivering silver under the provisions of these regulations shall furnish such further evidence as may from time to time be requested by any United States coinage mint or the Director of the Mint, including affidavits, sworn reports, and sworn abstracts from books of account of any mines or any or all smelters or refineries handling such silver.*

§ 80.9 *Settlement for silver delivered.* The Director of the Mint, pursuant to the consent of the owner as given in the agreement executed on form TSA–1, shall retain of the silver so delivered, 45 per cent as seigniorage for services performed by the Government of the United States, and the balance of such silver so received, that is, 55 per cent thereof, shall be coined into standard silver dollars and the same, or an equal number of other standard silver dollars (or, at the option of the owner of the silver so delivered, silver certificates or any other coin or currency of the United States in an amount in dollars equal to such standard silver dollars), shall be delivered to the owner of such silver. Any fractional part of one dollar due hereunder shall be returned in any legal tender coin of the United States.*

§ 80.10 *Records.* Every person delivering silver under these regulations, and every person owning or operating a smelter or refinery at which silver to be delivered under these regulations is mixed with secondary or foreign silver, or both, shall keep accurate records of all acquisitions, by mining or otherwise, and of all dispositions of silver mined subsequently to July 1, 1939, including, among other things, records of the date when such silver was mined, acquired, and disposed of. Such records shall be preserved for at least 1 year after the last delivery and made available for examination by a representative of the Director of the Mint upon the request of such representative.*

§ 80.11 *Reports.* Every person delivering silver under these regulations shall file with the Director of the Mint, on or before the 25th day of each month after the date the first delivery is made, a report on form TSA–3 covering the preceding calendar month, provided that the first report shall cover the period from July 1, 1939, to the end of the calendar month preceding the date of the report. Such reports shall be executed under oath before an officer duly authorized to administer oaths and shall contain all of the information called for in such form.*

§ 80.12 *Agreement relating to records.* Every person delivering under these regulations, silver which has been mixed with secondary or foreign silver, or both, at a smelter or refinery other than that of the person making the delivery, shall, upon request by any United States coinage mint or the Director of the Mint, also filed with each delivery of such silver an agreement properly executed under oath by a duly authorized officer of such other smelter or refinery, that the records will be kept as provided in these regulations, and that such records will be available for examination by a representative of the Director of the Mint for at least 1 year after the last delivery.*

[SEAL] H. MORGENTHAU, Jr.,
*Secretary of the Treasury.*

[F. R. Doc. 39-2400; Filed, July 6, 1939; 5:21 p. m.]

## TITLE 47—TELECOMMUNICATION

### FEDERAL COMMUNICATIONS COMMISSION

**STANDARDS OF GOOD ENGINEERING PRACTICE CONCERNING STANDARD BROADCAST STATIONS (550–1600 kc)**

APPROVED JUNE 23, 1939; EFFECTIVE AUGUST 1, 1939

*Introduction*

There are presented herein the Standards of Good Engineering Practice giving interpretations and further considerations concerning the Rules and Regulations of the Communications Commission governing standard broadcast stations.[1] While the Rules and Regulations form the basis of good engineering practice, these standards may go beyond the Rules and Regulations and set up engineering principles for consideration of various allocation problems. These standards have been approved by the Commission and thus are considered as reflecting the opinion of the Commission in all matters involved.

The Rules and Regulations contain references to these standards, however, as further standards may be issued after the Rules and Regulations are published, the absence of such references does not relieve the responsibility of meeting the requirements specified herein. The Standards of Good Engineering Practic are collected in this publication for the convenience of all considering broadcast station operation and problems.

The Standards of Good Engineering Practice set forth herein are those deemed necessary for the construction and operation of standard broadcast stations to meet the requirements of technical regulations and for operation in public interest along technical lines not specifically enunciated in the Regulations. These standards are based on the best engineering data available from evidence supplied in formal and informal hearings and extensive surveys conducted in the field by the Commission's personnel. Numerous informal conferences have been held with radio engineers, manufacturers of radio equipment and others for the guidance of the Commission in the formulation of these standards.

These standards are complete in themselves and supersede any previous announcements or policies which may have been enunciated by the Commission on engineering matters concerning standard broadcast stations.

While these standards provide for flexibility and set forth the conditions under which they are applicable, it is not expected that material deviation therefrom as to fundamental principles will be recognized unless full information is submitted as to the reasonableness of such departure and the need therefor.

[1] 4 F.R. 2714 DI.

These Standards of Good Engineering Practice will necessarily change as progress is made in the art and accordingly it will be necessary to make revisions from time to time. The Commission will accumulate and analyze engineering data available as to the progress of the art so that its standards may be kept current with the developments.

CONTENTS

1. Engineering Standards of Allocation.
2. Field Intensity Measurements in Allocation.
3. Data Required with Applications Involving Directional Antenna Systems.
4. Locations of Transmitters of Standard Broadcast Stations.
5. Minimum Antenna Heights or Field Intensity Requirements.
6. Standard Lamps and Paints.
7. Further Requirements for Direct Measurements of Power.
8. Power Rating of Vacuum Tubes.
9. Requirements for the Approval of the Power Rating of Vacuum Tubes.

### 1. ENGINEERING STANDARDS OF ALLOCATION

Section 3.28 requires that individual broadcast station assignments shall be made in accordance with the standards of good engineering practice prescribed and published from time to time by the Commission. These standards for each class of station are set out below.

Sections 3.21 to 3.34, inclusive, govern the allocation of facilities in the standard broadcast band of 550 to 1600 kc., inclusive. Section 3.21 establishes three classes of channels in this band, namely, clear channels for the use of high-powered stations, regional channels for the use of medium-powered stations, and local channels for the use of low-powered stations. The classes and power of standard broadcast stations which will be assigned to the various channels are set forth in Section 3.22. The classification of the standard broadcast stations are as follows:

Class I stations are dominant stations operating on clear channels as follows:

(1) Class I stations operate with powers of not less than 10 or more than 50 kw. These stations are designed to render primary and secondary service over an extended area and at relatively long distances, hence have their primary service areas[2] free from objectionable interference from other stations on the same and adjacent channels and secondary service areas free from objectionable interference from stations on the same channels.[3] [4]

(2) From an engineering point of view Class I stations may be divided into two groups:

(a) The Class I stations in Group 1 are those assigned to the channels allocated by Section 3.25, paragraph (a), on which duplicate nighttime operation is not permitted, that is, no other station is permitted to operate on a channel with a Class I station of this group within the limits of the United States (the Class II stations assigned the channels operate limited time or daytime only) and during daytime the Class I station is protected to the 100 uv/m ground wave contour. Protection is given this class of station to the 500 uv/m ground wave contour from adjacent channel stations for both day and nighttime operation.[5] The power of each Class I station shall not be less than 50 kw.

(b) The Class I stations in Group 2 are those assigned to the channels allocated by Section 3.25, paragraph (b), on which duplicate operation is permitted, that is, other Class I or Class II stations operating unlimited time may be assigned to such channels. During nighttime hours of operation a Class I station of this group is protected to the 500 uv/m 50% sky wave contour and during daytime hours of operation to the 100 uv/m ground wave contour from stations on the same channel. Protection is given to the 500 uv/m ground wave contour from stations on adjacent channels for both day and nighttime operation.[5] The operating powers of Class I stations on these frequencies shall be not less than 10 kw nor more than 50 kw.

[2] See Section 3.31 for the definitions of primary and secondary service areas.

[3] See Tables IV and V.

[4] The secondary service area of a Class I station is not protected from adjacent channel interference. However, in case of placing a station on an adjacent channel (10 kc removed) to a Class I station which would substitute a primary service for the secondary service, the matter of the program service as well as the signal service of the two stations should be given consideration. That is, at the 0.5 mv/m 50% sky wave contour of a Class I station purely for the determination of comparative service, the area bound by 1 mv/m contour of a Class II, Class III or Class IV station 10 kc removed may be taken as the area within which the secondary service of the Class I station is precluded. For higher values of 50% sky wave signal from a Class I station the ratio of the ground wave to sky wave shall be 2 to 1 and considered only within the 0.5 mv/m 50% sky wave contour of the Class I station.

Hereafter, for the purpose of convenience, the two groups of Class I stations will be termed Class Ia or Ib in accordance with the assignment to channels allocated by Section 3.25 (a) or 3.25 (b).

Class II stations are secondary stations which operate on clear channels with powers not less than 0.25 kw. or more than 50 kw. These stations are required to use a directional antenna or other means to avoid causing interference within the normally protected service areas of Class I stations or other Class II stations. These stations normally render primary service only, the area of which depends on the geographical location, power and frequency. This may be relatively large but is limited by and subject to such interference as may be received from Class I stations. However, it is recommended that Class II stations be so located that the interference received from Class I stations will not limit the service area to greater than the 2500 uv/m ground wave contour which is the value for the mutual protection of this class of station with other stations of the same class.[3]

Class III stations operate on regional channels and normally render primary service to the metropolitan district and the rural area contained therein and contiguous thereto and are subdivided into two classes:

(a) Class III–A stations which operate with powers not less than 1 kw. or more than 5 kw. are normally protected to the 2500 uv/m ground wave contour nighttime and the 500 uv/m ground wave contour daytime.[3]

(b) Class III–B stations which operate with powers not less than 0.5 kw. or more than 1 kw. nighttime and 5 kw. daytime are normally protected to the 4000 uv/m ground wave contour nighttime and 500 uv/m ground wave contour daytime.[3]

Class IV stations operate on local channels normally rendering primary service only to a city or town and the suburban and rural areas contiguous thereto with powers not less than 0.1 kw. or more than 0.25 kw. These stations are normally protected to the 4000 uv/m ground wave contour nighttime and 500 uv/m ground wave contour daytime. On local channels the separation required for the daytime protection shall also determine the nighttime separation. Class IV stations may be assigned to regional channels on condition that interference will not be caused to any Class III station in accordance with the above and that the channel is used adequately and properly for Class III stations [5] and that the Class IV station will be subject to such interference as may be received from the Class III stations. That is, the Class IV station assigned to a regional channel shall protect the Class III station to the required contour but the Class III station is under no obligation to protect the Class IV station so assigned. However, it is recommended that the Class IV stations be so located that the interference received will not be greater than to the 4000 uv/m ground wave contour night and 500 uv/m daytime.

[3] See Tables IV and V.

[5] The assignment of a Class IV station to a regional channel normally is not considered as making the best usage of the assignment and will be made only when it is shown among other things that

1. There is no other transmission facilities in the town or towns in the proposed service area.
2. There is no local channel assignment available for that area.
3. Adequate economic support is not available for a Class III station.
4. It is not practical from an engineering point of view to establish a Class III station and it would not prevent the establishment of any Class III station on that channel or an adjacent channel.

The class of any station is determined by the channel assignment, the power, and the field intensity contour to which it renders service free of interference from other stations as determined by these standards. No station will be permitted to change to a class normally protected to a contour of less intensity than the contour to which the station actually renders interference free service. Any station of a class normally protected to a contour of less intensity than that to which the station actually renders interference free service, will be automatically reclassified according to the class normally protected the minimum consistent with its power and channel assignment. Likewise any station to which the interference is reduced so that service is rendered to a contour normally protected for a higher class will be automatically changed to that class if consistent with its power and channel assignment.

When it is shown that primary service is rendered by any of the above classes of stations, beyond the normally protected contour, and when primary service to approximately 90% of the population (population served with adequate signal) of the area between the normally protected contour and the contour to which such station actually serves, is not supplied by any other station or stations carrying the same general program service, the contour to which protection may be afforded in such cases will be determined from the individual merits of the case under consideration.

A Class II, III–B or IV station may be assigned to a channel available for such class, when a need therefor is shown, even though objectionable interference will be received to a field intensity contour greater than that specified as the normally protected contour for its class, provided that no objectionable interference will be caused by it to existing stations, and provided further, that the population residing in the area between the normally protected contour for its class and the contour to which objectionable interference will be received, does not exceed approximately 10% of the population in its actual primary service area.

When a station is already limited by interference from other stations to a contour of higher value than that normally protected for its class, this contour shall be the established standard for such station with respect to interference from all other stations.

Tables IV and V give a complete summary of the protected service contours and permissible interference signals for broadcast stations on the same and adjacent channels, respectively.

The several classes of broadcast stations have in general three service areas;[6] namely, primary, secondary, and intermittent service areas. Class I stations render service to all three service areas. Class II stations render service to a primary area but the secondary and intermittent service areas may be materially limited or destroyed due to interference from other stations depending on the station assignments involved. Class III and IV stations usually have only primary service areas as interference from other stations generally prevents any secondary service and may limit the intermittent[7] service area. However, complete intermittent service may be obtained in many cases depending on the station assignments involved.

The signals necessary to render the different types of service are listed below.

TABLE I.—*Primary Service*

| Area: | *Field intensity ground-wave*[8] |
|---|---|
| City business or factory areas | 10 to 50 mv/m. |
| City residential areas | 2 to 10 mv/m. |
| Rural—all areas during winter or northern areas during summer | 0.1 to 0.5 mv/m. |
| Rural—southern areas during summer | 0.25 to 1.0 mv/m. |

[8] See Appendix I for curves showing distance to various ground wave field intensity contours for different frequencies, ground conductivity, and power.

All these values are based on an absence of objectionable fading either in changing intensity or selective fading, the usual noise level in the areas[7] and an absence of limiting interference from other broadcast stations. The values apply both day and night but generally fading or interference from other stations limits the primary service at night

[6] See Section 3.31 for definitions of these service areas.

[7] See third footnote following.

in all rural areas to higher values of field intensity than the values given.

In determining the population of the primary service area, it may be considered that the following signals are satisfactory to overcome man-made noise in towns of the population given.

TABLE II

| Population: | *Field intensity groundwave* |
|---|---|
| Up to 2,500 | 0.5 mv/m. |
| 2,500 to 10,000 | 2.0 mv/m. |
| 10,000 and up | Values given in Table I. |

These values are subject to wide variations in individual areas and especial attention must be given to interference from other stations. The values are not considered satisfactory in any case for service to the city in which the main studio of the station is located. The values in Table I shall apply except as individual consideration may determine.

All classes of broadcast stations have primary service areas subject to limitation by fading and noise, and interference from other stations to the contours set out for each class of station.

*Secondary Service*

Secondary service is delivered in the areas where the sky wave for 50% or more of the time has a field intensity of 500 uv/m or greater.[5] It is not considered that satisfactory secondary service can be rendered to cities unless the sky wave approaches in value the ground wave required for primary service. The secondary service is necessarily subject to some interference and extensive fading whereas the primary service area of a station is subject to no objectionable interference or fading.[5] Class I stations only are assigned on the basis of rendering secondary service.

*Intermittent Service*

The intermittent service is rendered by the ground wave and begins at the outer boundary of the primary service area and extends to the value of signal where it may be considered as having no further service value. This may be down to only a few microvolts in certain areas and up to several millivolts in other areas of high noise level, interference from other stations, or objectionable fading at night. The intermittent service area may vary widely from day to night and generally varies from time to time as the name implies. Only Class I stations are assigned for protection from interference from other stations into the intermittent service area.

Section 3.23 provides that the several classes of broadcast stations may be licensed to operate unlimited time, limited time, daytime, sharing time and specified hours, with full explanation given in the Section.

Section 3.24 sets out the general requirements for obtaining an increase in facilities of a licensed station and for a new station. Paragraph 2 concerns the matter of interference that may be caused by a new assignment or increase in facilities of an existing assignment.

Objectionable interference from another broadcast station [10] is the degree of interference produced when, at a specified field intensity contour with respect to the desired station, the field intensity of an undesired station (or the root-sum-square value of field intensities of two or more stations on the same frequency) exceeds for ten (10) per cent or more of the time the values set forth in these standards.

With respect to the root-sum-square values of interfering field intensities referred to herein, it shall be understood to apply in determining the interference between existing stations.[11] It is not considered that increased objectionable interference is caused when (in the case where interference is predominantly from a single station) a signal from another station is added which does not have an intensity greater than 70% of the value of the highest signal already causing interference. In case such highest value of signal can not be determined separately, then the maximum value of any signal that can be added without considering that an increase in objectionable interference results, should be determined as follows: For two interfering signals of approximately the same value the signal added should not exceed 85% of the computed value of a single signal from the estimated or measured RSS value. For more than two interfering signals of approximately the same value, the added signal should not exceed the value of a single signal computed from the RSS value. This formula should be used to compute the value of the single signal.

$$E = \sqrt{\frac{F^2}{N}}$$

where $E$ is the value of a single signal,
$F$ is RSS field intensity as measured by the usual field intensity meter.
$N$ is the number of interfering signals of approximately the same value.

Objectionable interference from a station on the same channel shall be considered to exist to a station when, at the field intensity contour specified in Table I with respect to the class to which the station belongs, the field intensity of an interfering station (or the root-sum-square value of the field intensities of two or more interfering stations) operating on the same channel, exceeds for ten (10) percent or more of the time the value of the permissible interfering signal set forth opposite such class in Table IV.

Objectionable interference from a station on an adjacent channel shall be considered to exist to a station when, at the normally protected contour of a desired station, the field intensity of the ground wave of an undesired station operating on an adjacent channel (or the root-sum-square value of the field intensities of two or more such undesired stations operating on the same adjacent channel) exceeds a value specified in Table V.

For the purpose of calculating the presence and the degree of objectionable interference, stations of the several classes shall be assumed, in the absence of actual measurements or data on the design of the antenna system, to produce effective fields, for one kilowatt of input power to the antenna, as follows:

TABLE III

| Class of station: | *Effective field* |
|---|---|
| I | 225 mv/m. |
| II and III | 175 mv/m. |
| IV | 150 mv/m. |

In case a directional antenna is employed, the interfering signal of a broadcasting station will vary in different directions, being greater than the above values in certain directions and less in others, depending upon the design and adjustment of the directional antenna system. To determine the interference in any direction, in the absence of actual interference measurements, the horizontal and vertical field intensity patterns of the directional antenna must be calculated and compared with the appropriate vectors in the horizontal or vertical patterns of a non-directional antenna having the same effective field. Thus the interfering signal toward any other station can be expressed in terms of kilowatts. This rating in kilowatts shall be applied in the use of mileage separation tables or in computing interference from the propagation curves.[12]

The existence or absence of objectionable interference from stations on the same or adjacent channels shall be determined by one of the following methods:

(a) By actual measurements made according to the method hereafter described;

or, in the absence of such measurements:

(b) By reference to the propagation curves in Figures 1 and 2, or

(c) By reference to the distance tables set forth in Tables VI, VII and VIII.

The existence or absence of objectionable interference may be proved by field intensity measurements or recordings made with suitable apparatus, duly calibrated. Such field intensity measurements of sky wave shall be made for a period of time not less than 10 days and an adequate check shall be made on the sky wave signal of other stations to determine the general conditions of propagation while such measurements are taken.[13]

In computing the distance to the 50 per cent sky wave field intensity contour of a Class I Station of a given power, and also in computing the 10 per cent sky wave field intensity of an alleged interfering station, of any class and given power, at a specified distance, use shall be made of the appropriate graphs set forth in Figure 1 entitled "Average Sky-wave Field Intensity" (corresponding to the second hour after sunset at the receiving station). The curves are drawn for an effective field of 100 millivolts per meter at one mile.

The distance to any specified ground wave field intensity contour may be determined from appropriate ground wave curves plotted for the frequency under consideration and the conductivity and dielectric constant of the earth between the station and desired contour. The frequency and the conductivity of the earth must be considered in every case and where the distance is great due allowance must be made for loss due to curvature of the earth. Figure 2 entitled "Groundwave Field Intensity" drawn for a frequency of 1000 kc, conductivity of $10^{-13}$, dielectric constant 15, and an effective field of 100 millivolts per meter at one mile, may be employed when applicable.

Table VI gives the required day separation in miles between broadcast stations on the same channel. Table VII gives the required separation in miles between broadcast stations on adjacent channels during both daytime and nighttime. Table VIII gives the required night separation in miles between broadcast stations operating on the same channel. The assumed conditions of operation are given on the first page of the tables.

The tables are based upon the use of nondirective antennas but, in case a directive antenna is employed at a particular station, it will be necessary to consider the radiation distribution of the directional antenna involved and to modify the mileage separation accordingly.[14] [15]

The night separation tables for stations on the same frequency are computed from the sky wave curve given in Figure 1. These curves are based on extensive measurements of the sky wave produced by broadcasting stations and shall be considered as accurate in all cases unless proof to the contrary is supplied. Such proof must be based on field intensity measurements taken in accordance with requirements set out in Annex III and must show what condition prevails that causes the signal to depart from the average.

The mileage separation tables for the same channel during daytime and for adjacent channels day and night are computed from the ground wave curves in Figure 2. These tables apply only in case the frequency is 1000 kc and the assumed soil conductivity and dielectric constant prevail. Since these values vary in every case the tables for daytime and adjacent channel separation cannot be used except as a general guide. In any case under consideration an estimate of the mileage separation required may be made from the operating frequency and known or assumed soil conditions.[16]

TABLE IV.—*Protected Service Contours and Permissible Interference Signals for Broadcast Stations*

| Class of station | Class of channel used | Permissible power | Signal intensity contour of area protected from objectionable interference [1] | | Permissible interfering signal on same channel [2] | |
|---|---|---|---|---|---|---|
| | | | Day [4] | Night | Day [4] | Night [3] |
| Ia | Clear | 50 kw | SC 100 uv/m.<br>AC 500 uv/m. | Not duplicated | 5 uv/m. | Not duplicated. |
| Ib | Clear | 10 kw to 50 kw | SC 100 uv/m.<br>AC 500 uv/m. | 500 uv/m (50% sky wave). | 5 uv/m. | 25 uv/m. |
| II | Clear | 0.25 kw to 50 kw | 500 uv/m | 2500 uv/m [5] (ground wave). | 25 uv/m. | 125 uv/m.[5] |
| III-A | Regional | 1 kw to 5 kw | 500 uv/m | 2500 uv/m (ground wave). | 25 uv/m. | 125 uv/m. |
| III-B | Regional | 0.5 to 1 kw night and 5 kw day. | 500 uv/m | 4000 uv/m (ground wave). | 25 uv/m. | 200 uv/m. |
| IV | Local [6] | 0.1 kw to 0.25 kw | 500 uv/m | 4000 uv/m (ground wave). | 25 uv/m. | 200 uv/m. |

SC=Same channel.
AC=Adjacent channel.

[1] When it is shown that primary service is rendered by any of the above classes of stations, beyond the normally protected contour, and when primary service to approximately 90% of the population (population served with adequate signal) of the area between the normally protected contour and the contour to which such station actually serves, is not supplied by any other station or stations, the contour to which protection may be afforded in such cases will be determined from the individual merits of the case under consideration. When a station is already limited by interference from other stations to a contour of higher value than that normally protected for its class, this contour shall be the established standard for such station with respect to interference from all other stations.

[2] For adjacent channels see Table II.

[3] Sky wave field intensity for 10% or more of the time.

[4] Ground wave.

[5] These values are with respect to interference from all stations except Class Ib, which stations may cause interference to a field intensity contour of higher value. However, it is recommended that Class II stations be so located that the interference received from Class Ib stations will not exceed these values. If the Class II stations are limited by Class Ib stations to higher values, then such values shall be the established standard with respect to protection from all other stations.

[6] Class IV stations may also be assigned to regional channels according to Section 3.29.

TABLE V.—*Adjacent Channel Interference*

| Channel separation between desired and undesired stations: | *Maximum ground wave field intensity of undesired station* |
|---|---|
| 10 kc | 0.25 mv/m. |
| 20 kc | 5.0 mv/m. |
| 30 kc | 25.0 mv/m. |

The undesired ground wave signal shall be determined at or within the 0.5 mv/m ground wave contour of the desired station. These values apply to all classes of stations both day and night and are based on ground waves which hold for an effective power up to 50 kw. Above this effective power, when an interfering sky wave signal for 10 per cent or more of the time exceeds five times the desired signal 10 kc removed in frequency (or undesired exceeds 25 times the desired signal 20 kc removed in frequency), interference will be produced. This may result from the use of a directional antenna and in such cases the interference shall be determined from the 10% sky wave of an interfering station to the normally protected ground

[7] The secondary service area of a Class Ia station should be considered as having this limit only for determination of service in comparison with other stations.

[8] Standards have not been established for objectionable fading as such standards would necessarily depend on the receiver characteristics which have been changed considerably in this regard during the last several years. Selective fading causing audio distortion and the signal fading below the noise level are the objectionable characteristics of fading on modern design receivers. Th AVC circuits in the better designed modern receivers in general maintain the audio output sufficiently constant to be satisfactory during most fading.

[9] Standards have not been established for interference from atmospherics or man-made electric noise as no uniform method of measuring noise as static has been established. In any individual case objectionable interference from any source, except other broadcast signals, may be determined by comparing the actual noise interference reproduced during reception of a desired broadcast signal to the degree of interference that would be caused by another broadcast signal within 20 cycles of the desired signal and having a carrier ratio of 20 to 1 with both signals modulated 100% on peaks of usual programs. Standards of noise measurements and interference ratio for noise are now being studied.

[10] In computing interference to any station only the RSS value of all signals which are within 70% of the highest signal shall be considered.

[11] See Annex II for further discussion and solution of a typical directional antenna case.

[12] See Annex III for detailed requirements and also Section on "Field Intensity Measurements in Allocation."

[13] See Annex II for method of modification.

[14] The Commission will not authorize a directive antenna for a Class IV Station assigned a local channel.

[15] See Annex I for a determination of interference from ground waves when actual measurements are not available.

wave or to a sky wave of a desired station, on the basis of a ratio of 1 to 5 (or 1 to 25 for 20 kc) for desired signal to the undesired sky wave signal for 10 per cent or more of the time.

The mileages given in Table VII are based on ground waves only and do not apply for night operation where the 10 per cent sky wave of an undesired station exceeds five times (or 25 times for 20 kc) the normally protected field intensity of a desired station.

*Mileage Separation Tables*

The required mileage separations between broadcasting stations as tabulated below are based upon the following conditions:

1. The use of nondirectional antennas in the horizontal plane and the vertical pattern of a 0.311 wavelength antenna.
2. Effective field in mv/m at one mile for one kilowatt.

Class I—225 mv/m.
Class II and III—175 mv/m.
Class IV—150 mv/m.

3. Frequency, 1000 kc.
4. Soil conductivity, $s=10^{-13}$.
5. Soil dielectric constant, $e=15$.
6. Ground wave transmission as shown on chart in Figure 2.
7. Sky wave transmission as shown on chart in Figure 1.
8. Protection to service areas as shown in Table IV.
9. Ratio of desired to undesired signal:

| Channel separation: | *Ratio of desired to undesired* |
|---|---|
| Same frequency | 20:1 ground wave or 10% skywave. |
| Synchronized carriers | 4:1.[1] |

[1] Two stations are considered to be operated synchronously when the carriers are maintained within one-fifth of a cycle per second of each other, either automatically or manually and they transmit the identical program. While observations have been made on several synchronized stations, no definite standards as to ratio of desired carrier to undesired carriers have been established, inasmuch as the methods of operations have not been standardized and results vary appreciably. From the observations it would appear that for most types of synchronous operation a ratio of about four to one between desired and undesired carriers is necessary to avoid distortion. This ratio holds only when the audio modulation is in sufficiently close time phase to avoid echo effects. In computing the interference in the primary service areas between the ground waves of two synchronously operated stations the ratio of four to one should be used. No complete information is available as to the required ratio between skywaves; however, it would appear that a ratio less than four to one can be tolerated without objectionable interference, first because the standard of acceptance of a signal as satisfactory is lower for secondary service and second, because several waves with random relative phases usually make up each skywave and the combination of two such synchronized waves generally causes less distortion. Synchronous operation of two or more stations may enable an extension of the coverage and service on a channel without any material increased interference range beyond that one station would produce.

| Channel separation: | *Ratio of desired to undesired* |
|---|---|
| 10 kc | 2:1 ground wave.[1] |
| | 1:5 sky wave. |
| 20 kc | 1:10 ground wave. |
| | 1:25 sky wave. |
| 30 kc | 1:50. |
| 40 kc and above | No restriction.[2] |

[1] This ratio of desired to undesired signal is not based on the characteristics of the average receiver but upon what the characteristics of an ideal receiver would be which would permit high fidelity reception of a station in the high fidelity primary service area (primary area where no interference would be caused to a receiver responding faithfully to a band 15 kc wide or 7.5 kc audio response). The ratio of desired to undesired (1 to 5 and 1 to 25) for interference from a sky wave 10 and 20 kc removed in frequency respectively is based on the characteristics of most good receivers placed in operation since 1936 and operated as most listeners adjust variable selectivity receivers where the signal is one millivolt or less.

[2] Two stations, one with a frequency twice that of the other, should not be assigned in the same primary service area unless special precautions are taken to avoid interference from the second harmonic of the lower frequency.

10. Service and Interference Radii—Night.

| Class—Power and field at mile | Service radii | | | Interference radii | | |
|---|---|---|---|---|---|---|
| | 2.5 mv/m G.W. | 4.0 mv/m G.W. | 500 uv/m 50% S.W. | 200 uv/m 10% S.W. | 125 uv/m 10% S.W. | 25 uv/m 10% |
| *Class IV* | | | | | | |
| 100 w: 47.5 mv/m | | 8.5 | | G.W. | 190 | |
| 250 w: 75 mv/m | | 11.5 | | G.W. | 370 | |
| *Class III* | | | | | | |
| 500 w: 124 mv/m | | 15 | | 380 | 500 | |
| 1000 w: 175 mv/m | 25 | 20 | | 535 | 710 | |
| 5 kw: 392 mv/m | 39 | | | 840 | 1000 | |
| *Class II* | | | | | | |
| 250 w: 87.5 mv/m | 17 | | | 210 | 440 | 1040 |
| 500 w: 124 mv/m | 21 | | | 330 | 590 | 1170 |
| 1000: 175 | 25 | | | 535 | 710 | 1335 |
| 5 kw: 392 | 39 | | | 840 | 1000 | 1840 |
| 10 kw: 554 | 42 | | | 960 | 1125 | 2120 |
| 25 kw: 875 mv/m | 56 | | | 1120 | 1320 | 2570 |
| 50 kw: 1238 mv/m | 65 | | | 1265 | 1510 | |
| *Class I* | | | | | | |
| 10 kw: 712 mv/m | | | 345 | 1045 | 1225 | 2345 |
| 25 kw: 1125 mv/m | | | 575 | 1225 | 1460 | |
| 50 kw: 1592 mv/m | | | 715 | 1395 | 1685 | |

| 25 kw | 261 | 160 | 136 | 279 | 168 | 144 | 253 | 156 | 134 | 272 | 163 | 139 | 292 | 181 | 157 |
| 50 kw | 281 | 178 | 154 | 297 | 185 | 158 | 273 | 174 | 152 | 292 | 181 | 157 | 310 | 190 | 161 |

TABLE VIII.—*Required Night Separation in Miles Between Broadcast Stations on the Same Channels*

The following tables indicate the mileage protection each class must give all other classes.

TABLE VIII–A

Class Ia should protect Class II stations as shown:

| Class Ia: | *Class II—All Powers* |
|---|---|
| 50 kw | Not duplicated at night. |

TABLE VIII–B

Class Ib should protect other Class Ib stations as shown below.

| Class Ib | Class Ib | | |
|---|---|---|---|
| | 10 kw | 25 kw | 50 kw |
| 10 kw | 2665 | 3010 | |
| 25 kw | 3010 | (1) | (1) |
| 50 kw | | (1) | (1) |

[1] Cannot be duplicated without directional antenna and then this Table does not apply.

TABLE VIII–C

Class II should protect other classes as shown below—non-directional antenna.

| Class II | Class II | | | | | | | Class Ib | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 0.25 kw | 0.5 kw | 1 kw | 5 kw | 10 kw | 25 kw | 50 kw | 10 kw | 25 kw | 50 kw |
| 0.25 kw | 455 | [1] 460 | 465 | 480 | 485 | 495 | 505 | 1,385 | 1,615 | 1,755 |
| 0.5 kw | 605 | 610 | 615 | 630 | 635 | 645 | 655 | 1,515 | 1,745 | 1,885 |
| 1 kw | 725 | 730 | 735 | 750 | 755 | 765 | 775 | 1,670 | 1,900 | 2,040 |
| 5 kw | 1,015 | 1,020 | 1,025 | 1,040 | 1,045 | 1,055 | 1,065 | 2,185 | 2,415 | 2,555 |
| 10 kw | 1,140 | 1,145 | 1,150 | 1,165 | 1,170 | 1,180 | 1,190 | 2,455 | 2,685 | 2,835 |
| 25 kw | 1,335 | 1,340 | 1,345 | 1,360 | 1,365 | 1,375 | 1,385 | 2,915 | 3,145 | |
| 50 kw | 1,525 | 1,530 | 1,535 | 1,550 | 1,555 | 1,565 | 1,575 | | | |

[1] The mileages in the upper right-hand half of this Section of this Table do not provide for protection to the lower power Class II station. Thus, if a 0.25 kw Class II station operated 460 miles from a 0.5 kw Class II station, it would receive interference to greater than the 2.5 mv/m ground wave contour unless the 0.5 kw Class II station used an appropriate directional antenna.

TABLE VIII–D

Class III–A should protect other classes as shown below.

| Class III–A | Class III–A | | Class III–B | |
|---|---|---|---|---|
| | 1 kw | 5 kw | 0.5 kw | 1 kw |
| 1 kw | 735 | 750 | 550 | 555 |
| 5 kw | 1,025 | [1] 1,025 / 1,040 | 855 | 860 |

[1] Where double figures are given, the lower and larger figure is the mileage required to protect the station in the left hand column to its normally protected contour.

TABLE VIII–E

Class III–B should protect other classes as shown below.

| Class III–B | Class III–A | | Class III–B | |
|---|---|---|---|---|
| | 1 kw | 5 kw | 0.5 kw | 1 kw |
| 0.5 kw | 615 | 630 / [1] 855 | 395 | 400 / 550 |
| 1 kw | 735 | 750 / 860 | 550 | 555 |

[1] Where double figures are given, the lower and larger figure is the mileage required to protect the station in the left hand column to its normally protected contour.

TABLE VIII–F

Class IV should protect other classes as shown below.

| Class IV | Class III–A | | Class III–B | | Class IV | |
|---|---|---|---|---|---|---|
| | 1 kw | 5 kw[1] | 0.5 kw | 1 kw | 0.1 kw | 0.25 kw |
| 0.1 kw | [2] 300 | [2] 300 | (3) | (3) | (3) | (3) |
| 0.25 kw | 395 | 410 | (3) | (3) | (3) | (3) |

[1] Where double figures are given, the lower and larger figure is the mileage required to protect the station in the left hand column to its normally protected contour.
[2] The distance based on the minimum practical values.
[3] Daytime separation determines.

TABLE VIII–G

Distance Class II Stations should be from Class Ib Stations to obtain recommended protection to Class II Station (2.5 mv/m ground wave contour).

| Class II[1] | Class Ib | | |
|---|---|---|---|
| | 10 kw. | 25 kw. | 50 kw. |
| 0.25 kw | 1240 | 1475 | 1700 |
| 0.5 kw | 1245 | 1480 | 1705 |
| 1 kw | 1250 | 1485 | 1710 |
| 5 kw | 1265 | 1500 | 1725 |
| 10 kw | 1265 | 1505 | 1730 |
| 25 kw | 1280 | 1515 | 1740 |
| 50 kw | 1290 | 1525 | 1750 |

[1] The Class II Station should use a directional antenna to protect dominant station or stations with these separations.

TABLE VIII–H

Distance Class IV Stations should be from Class III–A and III–B Station to obtain recommended protection to Class

IV Station (4.0 mv/m ground wave contour).

| Class IV—Power | Class III-A or III-B | | |
|---|---|---|---|
| | 0.5 | 1.0 | 5.0 |
| 0.10 | 388 | 543 | 850 |
| 0.25 | 391 | 546 | 852 |

ANNEX I

*Interference From Ground Wave Signals*

Interference that may be caused by a proposed assignment or an existing assignment during daytime should always be determined, when possible, by measurements on the frequency involved or on another frequency over the same terrain and by means of the curves in Figure 4, interpolate for the desired frequency.

In determining the interference from field intensity measurements, two general steps are necessary: First, establish the outer boundary of the protected service area of the desired station in the direction of the station that may cause interference with it. Second, at this boundary, measure the interfering signal from the undesired station. The ratio of the desired to the undesired signal given on the first page of the separation should be applied to the measured signals and if the required ratio is observed, then no interference is contemplated. The effective field of the antenna in the pertinent directions of the stations must be established and all measurements must be made in accordance with the section on "Field Intensity Measurements in Allocation."

In all cases where measurements taken in accordance with the requirements are not available,[17] the ground wave intensity must be determined by means of the conductivity of the terrain and the ground wave curves of field intensity vs. distance. The conductivity of a given terrain may be determined by measurements of any broadcast signal traversing the terrain involved or in case such measurements are not available, then conductivity must be taken from the map of ground conductivity in the United States, Figure 3. This map shows the conductivity throughout the entire United States by general areas of reasonably uniform conductivity. In areas of limited size, or over a particular path, the conductivity may vary widely from the values given. This map is to be used only when accurate and acceptable measurements have not been made.

If an interfering signal traverses areas for which more than one conductivity is given by the map, then conductivity for ⅔ the distance should be taken and in case this involves more than one value, then the highest predominating value should be assumed to prevail. Where the conductivity along a given path varies over wide limits the previous method may give erroneous results in which case the signal at any given point for a given value of field intensity at one mile from the antenna in the direction concerned may be determined by determining and adding the attenuation in decibels of each section of the intervening path."

Figure 4 gives the ground wave field intensity curves with field intensity plotted against distance for various values of conductivity and by blocks of frequencies. To cover the standard broadcast band some 20 graphs in all are required and are attached as Appendix II. In all cases the curves are plotted on the basis of 100 mv/m effective field at a mile. An example of determining the interference by this method follows:

It is desired to find the interference that a 5 kw Class III station on 920 kc may cause to a 1 kw Class III station on 930 kc. The stations are separated by 175 miles. It is assumed that both stations use non-directional antennas[18] having such height as to produce an effective field for 1 kw of 175 mv/m.[19] From Figure 3, the conductivity at each station and intervening terrain is determined as $6\times10-14$. The protection to Class III during daytime is to the 500 uv/m contour. The distance to the 500 uv/m ground wave contour of the 1 kw station is determined by the use of the curves in Figure 4 as being 44 miles. Since these curves are plotted for 100 mv/m at a mile to find the distance to the 500 uv/m contour of the 1 kw station, it is necessary to determine the distance on the appropriate curve to the

$$\left(\frac{100\times500}{175}=285\right)$$

285 uv/m contour. Thus, the estimated radius of the service area for the desired station is established as 44 miles. Subtract this distance from the distance between the two stations leaving 131 miles for the interfering signal to travel. Again from the appropriate curve in Figure 4 it is found that the signal from the 5 kw station at this distance would be 96 uv/m. Since the stations are separated by 10 kc the undesired signal at that point can have a value up to 250 uv/m without interference, but if the interference signal had been found to be greater than this value, then interference would have been determined. For other channel separations the appropriate ratio of desired to undesired signal would have been used. This principle holds for all cases except where a sky wave signal 10 per cent or more of the time from the undesired station is in excess of 5 times the desired signal when the frequency separation is 10 kc or 25 times when the frequency separation is 20 kc. In this case the interference must be estimated on the basis of the sky wave interference and the propagation curve in Figure 1 used to determine the interfering signals rather than Figure 4 for the ground wave signals.

ANNEX II

*Computation on Interfering Signal from a Directional Antenna*

In case of an antenna directional in the horizontal plane, the ground wave interference can be readily computed from the calculated horizontal pattern by determining the vectors toward the service area of the station to be protected and apply these values to the ground wave curves set out in Annex I.

In case of determining sky wave interference from an antenna with a vertical pattern different from that on which Figure 1 is predicated (the basis of the night mileage separation tables) it is necessary to compare the appropriate vectors in the vertical plane.

The sky wave curves entitled "Average Sky Wave Field Intensity" (corresponding to the second hour after sunset at the recording station) as shown in Figure 1 are based on antenna systems having height of 0.311 wave length (112°) and producing a vertical pattern as shown at Figure 5. A nondirectional antenna system as well as a directional antenna system having vertical patterns other than essentially the same as shown, must be converted to the pattern of an 0.311 wave length antenna having the same field intensity at the critical angle as does the pattern of the antenna involved. Example:

Figure 6 is a graph entitled "Variation with Distance of Two Important Parameters in the Theory of Sky Wave Propagation." The curve for $\theta$ showing the angle above the horizon at which radiation occurs plotted against distance, must be used for this purpose. For instance, assuming the station with which interference may be expected is located at a distance of 450 miles from a proposed station, the critical angle of radiation as determined from this curve is approximately 15°. Therefore, if the vertical pattern of the proposed station in the direction of the other station is such that at 15° above the horizon the radiation is 1.3 times that from an antenna having a vertical pattern as shown at Figure 5 and producing the same field intensity at one mile in the horizontal plane, the interfering signal would be 1.3 times that determined from Figure 1 for an antenna having the same field intensity in the horizontal plane. That is, if the field intensity in the horizontal plane of the proposed station is 124 mv/m, the interfering field intensity exceeded 10% of the time at the other station would be $140\times1.30\times\frac{124}{100}$ or 225 uv/m and would cause interference to the 4.5 mv/m ground wave contour of the existing station.

When the distance is large, more than one reflection may be involved and due consideration must be given each appropriate vector in the vertical pattern as well as the constants of the earth where reflection takes place between the transmitting station and the service area to which interference may be caused.

ANNEX III

*Interference From Sky Wave Signals*

Set out below is the detailed method of making measurements of the sky wave signals to determine an interfering signal for 10 per cent of the time.

The signal must be received on an approved field intensity meter duly calibrated and recorded on a continuous recording meter of suitable accuracy and sensitivity. Measurements at distances less than 350 miles from the station should be made with a vertical antenna only. At greater distances either a vertical antenna, loop, or other suitable antenna may be used. Two complete recording units are required so that two signals can be recorded simultaneously.

A monitor station on which interference free measurements can be made must be selected for simultaneous recordings. This station should be in the general direction of the principal station to be recorded. Preferably such monitor station should have known antenna characteristics and the conductivity of the surrounding terrain should be known. The transmitters should be located in the same general area and the frequencies of the stations as close as possible. The reception of the two stations should be on the same antenna or on antennas in the same area so that both are influenced by the same surrounding objects.

Recordings may be made on both stations from sundown over the entire path until midnight at the recording station. These records should be analyzed for each night and for the entire period of recording and graphs drawn which show field intensity versus per cent time. The 10 per cent signal determined for the principal station for the entire period must be modified by a propagation factor determined from a comparison of the 10 per cent signal from the monitor station to the value determined from the 10 per cent curve of Figure 1 for the same distance, power, and pertinent antenna characteristic. Thus, if the 10 per cent signal from the Figure 1 10 per cent curve is 500 uv/m and the measured 10 per cent signal on the monitor station 350 uv/m, then the 10 per cent signal from the principal station should be increased by 45 per cent to determine the interfering signal. Recordings for at least 10 nights are required. If it is not practical to follow this procedure, due to interference to the reception of the principal station recorded, the following procedure is required:

Record the monitor station beginning one and one-half hours, to within fifteen minutes, after sundown over the entire path and continue recording for one hour. Then record the monitor station and the principal station during the earliest later hour that the principal station can be recorded. The measurements on the principal station must be for at least one hour each night and preferably not less than two hours each night. In all cases the monitor station must be recorded simultaneously. These measurements must be taken for at least 10 nights. Establish the 10 per cent value of the field during the second hour and also the 10 per cent value of both stations during the period when both are measured. The 10 per cent value of the field for the principal station must be corrected in the following manner:

First: Compare the 10 per cent value of the signal for the monitor station during the second hour after sunset with the 10 per cent value determined from Figure 1 for the same distance and reduce to the same power for comparable radiation at the appropriate angle. This establishes the propagation factor which assume is found to be 30 per cent low for the nights of recordings.

Second: Compare the signal on the monitor station during simultaneous operation with the value during the second hour after sunset and obtain the correction for difference in propagation between the second hour and the actual time of measuring the principal station. Thus, a time factor is established by which the actual value of the field intensity on the principal station is to be further modified. If the propagation factor is 30 per cent low and the time factor 70 per cent high, the actual readings on the principal station would be first decreased by 70 per cent and then the result increased by 30 percent. The value obtained in this way is to be considered the interference value of signals for use in all allocation problems.

When it is claimed that the propagation over the path involved is normally less than the average, measurements must be made on two or more other stations of different paths for at least 30 days and the signals of all stations involved recorded in the above manner to establish that propagation conditions in general were normal and that the path under consideration was low as claimed due to some natural conditions. A full explanation of the theory or practical findings must be made.

In all other cases where the signal is substantially greater or less than the average determined from Figure 1, complete information must be supplied as to why the signal measured has departed from the average. If the reason this condition is based on the location of the antenna, its characteristics, the conductivity of the surrounding area or other natural limitations, a full explanation of the nature and character of such conditions must be supplied and also information as to whether the licensee could by moving its station or by making other changes within its control alter the situation so that the abnormal condition of propagation would no longer exist.

The interference signal determined by the above methods should be used to determine interference to a station in the same manner as the ground wave signals were employed as set out in Annex I. These methods of measurement should be used to determine skywave service signal for 50 per cent of the time.

2. FIELD INTENSITY MEASUREMENTS IN ALLOCATION

*A. Field Intensity Measurements to Establish Effective Field Intensity at One Mile*

Section 3.45 provides that certain minimum field intensities are acceptable in lieu of the required minimum physical vertical heights of the antennas proper. Also in other allocation problems, it is necessary to determine the effective field at one mile. The following requirements shall govern the taking and submission of data on the field intensity produced:

Beginning as near to the antenna as possible without including the induction field and to provide for the fact that a broadcast antenna not being a point source of radiation (not less than one wave-length or five times the vertical height in the case of a single element, i. e. nondirectional antenna or 10 times the spacing between the elements of a directional antenna), measurements shall be made on eight or more radials, at intervals of approximately one-tenth mile up to two miles from the antenna, at intervals of approximately one-half mile from two miles to six miles from the antenna, at intervals of approximately two miles from six miles to 15 or 20 miles from the antenna, and a few additional measurements if needed at greater distances from the antenna. Where the antenna is rurally located and unobstructed measurements can be made, there shall be as many as 18 or 20 measurements on each radial. However, where the antenna is located in a city where unobstructed measurements are difficult to make, measurements shall be made on each radial at as many unobstructed locations as possible even though the intervals are considerably less than stated above, particularly within two miles of the antenna. In cases where it is not possible to obtain accurate measurements at the closer distances (even out to 5 or 6 miles due to the character

[17] The Commission will *not* authorize operation on a proposed assignment for the purpose of making measurements.

[18] For example, assuming three values of conductivity prevail such that for the frequency and distances concerned the signal is attenuated over the given conductivities 6, 8, and 14 db respectively or a total of 28 db over the entire path, then the signal at the point concerned for 100mv/m at one mile would be $\frac{100}{25.119 \text{ (voltage ratio for 28 db)}}$, or 3.98 mv/m.

[19] See Annex II in case of use of directional antennas.

[20] In all cases the effective field should be established from the dimensions of the radiating system. The value assumed here is in accordance with Section 3.45 and the Standards of Good Engineering Practice promulgated pursuant thereto.

of the intervening terrain), the measurements at greater distances should be made at closer intervals.[21]

These data should be plotted for each radial in accordance with either of the two methods set forth below:

1. Using log-log coordinate paper plot field intensities as ordinate and distance as abscissa.

2. Using semi-log coordinate paper plot field intensity times distance as ordinate on the log scale and distance as abscissa on the linear scale.

However, regardless of which of these methods is employed, the proper curve to be drawn through the points plotted shall be determined by comparison with theoretical curves as follows: Plot theoretical curves (see paper by Mr. K. A. Norton, October 1936, Proc. I.R.E.) for several values of conductivities and dielectric constants, approximating the conductivity and dielectric constants indicated by the measurements on another sheet of the same coordinate paper. Place this sheet over the sheet on which the actual points have been plotted, hold to the light if necessary and adjust until the curve most closely matching the points is found. This curve should then be drawn on the sheet on which the points were plotted together with the inverse distance curve corresponding to that curve. The field at one mile for the radial concerned shall be the ordinate on the inverse distance curve at one mile.

When all radials have been analyzed in this manner, a curve shall be plotted on polar coordinate paper from the fields obtained, which gives the inverse distance field pattern at one mile. The radius of a circle, the area of which is equal to the area bounded by this pattern, is the effective field. (See Section 3.16.)

While making the field intensity survey, the output power of the station shall be maintained at the licensed power as determined by the direct method. To do this it is necessary to determine accurately the total antenna resistance (the resistance variation method, the substitution method or bridge method is acceptable) and to measure the antenna current by means of an ammeter of acceptable accuracy.[22]

Complete data taken in conjunction with the field intensity measurements shall be submitted to the Commission in affidavit form including the following:

1. Tabulation by number of each point of measurement to agree with the map required in (2) below and the field intensity meter reading, the attenuation constant, the field intensity (E), the distance from the antenna (D) and the product of the field intensity and distance (ED) (if data for each radial is plotted on semi-logarithmic paper, see above) for each point of measurement.

2. Map showing each point of measurement numbered to agree with tabulation required above.

3. Description of method used to take field intensity measurements.

4. The family of theoretical curves used in determining the curve for each radial properly identified by conductivity and dielectric constants.

5. The curves drawn for each radial and the field intensity pattern (see subsection B 5 a, b and c).

6. Antenna resistance measurement:
a. Antenna resistance at operating frequency.
b. Description of method employed.
c. Tabulation of complete data.
d. Curve showing antenna resistance versus frequency.

7. Antenna current or currents maintained during field intensity measurements.

8. Description, accuracy, date and by whom each instrument was last calibrated.

9. Name, address and qualifications of the engineer making the measurements.

10. Any other pertinent information.

*B. Field Intensity Measurements to Establish Performance of Directional Antennas*

Section 3.33 (b) requires that proof of performance of directional antenna systems be submitted before any operation during the regular broadcast day may be permitted. These data shall be taken upon proper request and authorization therefor during the experimental period and shall show that the pattern obtained is essentially the same as that predicted by the application and required by terms of the authorization and that any specific requirements set out are fully met.

To establish this performance measurements shall be made in accordance with the preceding Section A along sufficient number of radials to establish the effective field from the antenna system. In the case of a relatively simple directional antenna pattern, approximately eight radials in addition to the radials in the directions the field intensity values are specified by the authorization are sufficient. However, when more complicated patterns are involved, that is, patterns having several or sharp lobes or nulls, measurements shall be taken along as many additional radials as necessary to definitely establish the pattern.

In cases where the authorization requires a showing that actual field intensities of specified values be obtained in the various portions of the service area, sufficient measurements throughout these areas shall be made to show that at least the values specified are obtained. (See Paragraph 2d of this section.)

In either of the above cases the following information shall be submitted in triplicate even though such information was submitted with the original application:

1. Complete description of antenna array.

a. Number of elements.
b. Manufacturer's name and type of each element (i. e., guyed or self-supporting, triangular or square, uniform cross-section or tapered, etc.).
c. If top loaded, give details.
d. Height of vertical lead of each element in feet (height above base insulator or base, if grounded).
e. Overall height in feet of each element above ground level.
f. Overall height in feet of each element above mean sea level.
g. Orientation of array with respect to true north and time (specify degrees leading or lagging) and space phasing of elements. (Space phasing should be given in feet as well as in degrees.)
h. Details of ground system for each element (length and number of radials, dimensions of ground screen, if used, and depth buried).
i. Current in each element (at point where antenna ammeter is located) and current and resistance at point of common input to the antenna system.[1]
j. Schematic sketch and description of method of feeding power to elements, including phasing and coupling equipment and locations of antenna ammeters (both regular, point of common input and remote) in the circuits.
k. If not fully described above, give complete details and sketches if needed.
l. Full description of painting and lighting installed on each element.
m. If phase monitor is employed state phase readings (specifying whether leading or lagging) and ratio of current indications for each element.[2]

2. Horizontal field intensity patterns for each power involved showing:

a. Directional Field Intensity at one mile and effective field intensity from the antenna determined from the field intensity measurements as set forth above.
b. Direction true north shall be shown at zero azimuth.
c. Direction of each station or city specified in the instrument of authorization in which direction a limiting field was specified and the actual field intensity obtained in each of such directions (all directions shall be determined by accurate calculation or from Lambert Conformal Conic Projection Map such as U. S. Coast and Geodetic Survey Map No. 3060, a, or map of equal accuracy, and all distances shall be determined by accurate calculation or from U. S. Albers Equal Area Projection Map, Scale $\frac{1}{2{,}500{,}000}$ or map of equal accuracy. These may be obtained from the United States Coast and Geodetic Survey and from the United States Department of Interior, Geological Survey, for the sums of forty cents and one dollar, respectively).
d. Actual field intensity contours for 25, 10 and 5 mv/m and any other contours specified by the instrument of authorization on a map having the largest practical scale. These contours need not be shown for distances over 15 miles from the antenna except that the field intensity contours on the far sides of the business and residential areas of the city in which the main studio is located shall be shown. This does not waive the requirement for measurements at greater distances under A above.

3. Complete tabulation of all data used in plotting the above patterns.

4. Any other pertinent information.

5. Plotting of field intensity patterns:

a. All patterns shall be plotted on standard letter-size polar co-ordinate paper (main engraving approximately 7" x 10").
b. All patterns shall be plotted to the largest scale possible on the paper specified in (a) above using divisions and subdivisions having values of 1, 2, 2.5 or 5 times $10^x$. (No other values shall be used.)
c. All values of field intensity less than 10 percent of the r. m. s. field intensity of the pattern shall be shown on an enlarged scale in accordance with (a & b) above.

As a check on the shape of the field intensity pattern obtained in accordance with the above it is suggested that measurements be taken on each of the radials at approximately one mile from the antenna system for operation, both directional and non-directional and the ratios of these values plotted on polar coordinate paper in accordance with the above specifications.

*C. Measurement of the Field Intensity of Broadcast Stations for Presentation in Support of Applications or Evidence at Hearings Before the Commission*

Section 3.24 requires that among other things an application for a new standard broadcast station or increase in facilities of an existing station make a satisfactory showing that objectionable interference will not be caused to an existing station or stations.

In the determination of such interference in accordance with section 3.28 actual measurements will take precedence over theoretical values provided such measurements are properly taken and presented.

When measurements of either ground wave signal intensity or sky wave signal intensity are presented in evidence, they shall be supported by a field intensity survey of the station observed, which survey should be sufficiently complete in accordance with Sections A and B above to determine the field at one mile in the pertinent directions for that station.

When measurements are made on sky wave signal intensity (either service or interference) they shall be graphic recordings as follows:

1. Recordings shall be made on 10 or more nights for sufficient periods each night to obtain reasonable average values.[23]

2. Observations shall be made on other stations to determine whether sky wave transmission conditions are of propagation.

3. Scales on the graphic paper shall be such as to permit easy reading of both time and field intensity and calibration shall be clearly indicated.

4. Pertinent notes such as predominance of signal of a certain station when recording composite signals shall be made on the recording.

5. Full description shall be given the point where recordings were made (geographically as well as field intensity of the station to which interference is being determined).

6. Full explanation of to what extent signals from other stations on the same channel affected the accuracy of the recordings and what steps, if any, were taken to eliminate or compensate for such signals.

If the observed station is owned or controlled by the party on whose behalf the measurements are made, then, in addition to the above, detail reports on the measurement of the antenna resistance and on the amount of power actually radiated (as determined by the direct method) during the course of the field intensity measurements shall be presented. The applicant (or participant) shall also furnish a complete description of the antenna and ground system in use at the transmitting station during the period of observations and a statement as to whether or not this is the identical equipment regularly used by the station.

When measurements of both the "desired" and "undesired" station are made in one area to determine the point where objectionable interference from ground wave signals occurs, several measurements of each station shall be made within a few miles of the point where the ratio of signals is that selected as the appropriate ratio for the determination of objectionable interference.

All information on the above, including description and accuracy of equipment used, when and by whom last calibrated, and the name and qualifications of the engineer making the measurements, when filed with an application, shall be in affidavit form. At the time of the hearing on applications involving such observations, the applicant should be prepared to present, as sworn testimony, complete data on the above.

3. DATA REQUIRED WITH APPLICATIONS INVOLVING DIRECTIONAL ANTENNA SYSTEMS

Section 3.33 (a) requires that an application for authority to install a directional antenna specify a definite site and that full details of the directional antenna are given with the application. Any application not complete in these details will be returned to the applicant as "defective" under Section 4.02.

In order to comply with the above and to permit proper consideration of any application involving a directional antenna, the following shall be submitted in triplicate, properly verified by the engineer designing the antenna, with each such application:

1. Name, address and qualifications of the engineer.

2. Complete description of the proposed antenna system.

a. Number of elements.
b. Type of each element [i. e., guyed or self-supporting, uniform cross-section or tapered (specify base width), ground or insulated, etc.].
c. If top loaded give details.
d. Height of vertical lead of each element in feet (height above base insulator or base if grounded).
e. Overall height in feet of each element above ground level.
f. Overall height in feet of each element above mean sea level.
g. Orientation of array with respect to true north and time phasing of fields from elements (specify degrees leading or lagging) and space phasing of elements (identifying elements). (Space phasing should be given in feet, as well as in degrees.)
h. Details of ground system for each element (length and number of radials, dimensions of ground screen, if used, and depth buried).
i. Ratio of fields from elements (identifying elements).
j. If not fully described above, give complete details and sketches if needed.

3. Caluclated horizontal field intensity patterns for each power involved showing:

a. Directional field intensity at one mile and effective field.
b. Direction true north shall be shown at zero azimuth.
c. Direction and distance to each existing station with which interference may be involved operating either directional or non-directional (all directions shall be determined by accurate calculation or from Lambert Conformal Conic

[21] It is suggested that "Wave Tilt" measurements may be made to determine and compare locations for taking field intensity measurements, particularly to determine that there are no abrupt changes in ground conductivity or that reflected waves are not causing abnormal intensities.

[22] See Section 3.54 and "Further Requirements for Direct Measurement of Power" and "Indicating Instruments Pursuant to Section 3.58."

[1] See "Further Requirements for Direct Measurement of Power" and "Construction, General Operation and Safety of Life Requirements."

[2] See "Indicating Instruments Pursuant to Section 3.58."

[23] See Annex III in Section "Engineering Standards of Allocation" for detailed requirements.

Projection Map such as U. S. Coast and Geodetic Survey Map No. 3060a, or map of equal accuracy, and all distances shall be determined by accurate calculation or from U. S. Albers Equal Area Projection May, scale $\frac{1}{2,500,000}$, or map of equal accuracy. These may be obtained from the U. S. Coast and Geodetic Survey and the United States Department of Interior, Geological Survey, for the sums of forty cents and one dollar, respectively).

d. Calculated field intensity contours for 250, 25, and 5 mv/m and the population residing within each of such contours in addition to the information required by Section 29 (d) of FCC Form 301, on a map having the largest practical scale.

4. Calculated vertical field intensity patterns (for nighttime power) in the directions of each minimum and the maximum and in the direction of each station with which nighttime interference may be involved, operating either directional or non-directional for angles from 0° to 90° above the ground plane, based on the ground wave field intensity at one mile from the antenna for the direction involved.

5. Data used in computing the above patterns including:

a. Formula used for calculating both horizontal and vertical patterns, and sample calculations. (Derivation of formula if other than standard is used.)

b. All assumptions made and basis therefor, including electrical height, current distribution and efficiency of each element and ground conductivities.

c. Complete tabulation of calculation data used in plotting patterns, including data for determination of r. m. s. value of horizontal and directional patterns.

6. Any other pertinent information.

7. Plotting of field intensity patterns:

a. All patterns shall be plotted on standard letter-size polar co-ordinate paper (main engraving approximately 7"×10").

b. All patterns shall be plotted to the largest scale possible on the paper specified in Section (a) above using scale divisions and sub-divisions having values of 1, 2, 2.5 or 5 times $10^n$. (No other values shall be used.)

c. All values of field intensity less than 10 percent of the effective field intensity of the pattern shall be shown on an enlarged scale in accordance with (a & b) above.

d. In the event actual inverse distance field intensities expected to be determined in practice (that is, the values determined from actual measurements particularly in sharp nulls) are different from the above calculated values, the expected values as well as the calculated values shall be shown on both the full patterns and the enlarged sections.

### 4. LOCATIONS OF TRANSMITTERS OF STANDARD BROADCAST STATIONS

Section 3.24 (e) requires that the location of the transmitter shall comply with the requirements of good engineering practice. There are set out below the general requirements considered appropriate at this time. These standards will change as the art progresses and changes will be made in accordance with the best information available.

All applications for approval of transmitter sites for regular broadcast stations must be submitted on FCC Form 301. In some cases the applicant may be required to submit additional information, including the results of a field intensity survey, particularly where there is any question as to whether the area can be served properly from the proposed location or where the population of the blanket area is too large.

FCC Form 301 requires that triplicate copies of the following be submitted:

(1) Map having scale not less than one inch to a mile clearly showing (by symbols, cross hatching, colored crayons or other means) present location, proposed location, character of surrounding area (retail or wholesale business, manufacturing, residential, or unpopulated), the heights of all tall buildings or other structures, if any, in the vicinity of the antenna indicating the distance and direction thereof from the proposed site and how marked for air navigation; also, density and distribution of population, the 250, 25 and 5 mv/m contours and the population residing within the 250 mv/m contour and the type of soil and terrain and the location of airports, airways, and other radio stations, including receiving stations, except broadcast or amateur.

(2) Aerial photograph or photographs (ordinary snapshots, if clear) taken from the proposed location of the antenna in at least eight directions (every 45°, North, Northeast, East, etc.) such as to clearly show the character of the immediate surrounding area.

Where available, United States Geological Survey Topography Quadrangle Sheets should be submitted. In the event the map submitted does not give the topography, the height above sea level of the proposed location, hills, ridges and other obstructions should be shown. A statement as to whether or not other obstructions in the vicinity are painted and lighted or otherwise marked should always be made. In some cases additional maps, sketches or descriptions may be necessary to clearly show the conditions. Attention is invited to the fact that the submission of complete and accurate information will materially expedite action on a proposed location as well as enable the Commission to reach a correct decision thereon.

Aerial photographs of adequate scale are normally considerably superior to photographs taken from the proposed site. However, if the latter clearly show the character of the surrounding area they are acceptable. Photographs taken from a location lower than the surrounding terrain or where the view is obstructed by immediately surrounding objects are of little value. Taking the photographs from a step ladder or other support will aid materially.

As a guide the Engineering Department has established certain engineering principles based on the extensive experience of the Engineering Department and all data available along this line, including that presented at the informal engineering hearings of October 5, 1936, January 18, 1937, and June 6, 1938.

The four primary objectives to be obtained in the selection of a site for a transmitter of a broadcast station are as follows:

1. To serve adequately the center of population in which the studio is located and to give maximum coverage to adjacent areas.
2. To cause and experience minimum interference to and from other stations.
3. To present a minimum hazard to air navigation consistent with objectives 1 and 2.
4. To fulfill certain other requirements given below.

The following table is offered as a general guide to be used in determining the approximate site of broadcast transmitters:

TABLE A

| Power of station | Population of city or metropolitan area [1] | Approximate radius of blanket area 250 mv/m [2] | Site-distance from center of city to business district or downtown [3] | Maximum percentage of total population in blanket area [1] |
|---|---|---|---|---|
| | | *Miles* | *Miles* | *Per cent* |
| 100 watts | 5,000–50,000 | 0.15 | ½–1 | 1 |
| 100 watts | 50,000 or more | .15 | (?) | |
| 250–500 watts | 5,000–150,000 | .3– .5 | 1–3 | 1 |
| 250–500 watts | 150,000 or more | .3– .5 | (?) | |
| 1 kilowatt | 5,000 to 200,000 | .6– .9 | 2–6 | 1 |
| 1 kilowatt | 200,000 or more | .6– .9 | (?) | |
| 5–10 kilowatts | All | 1.5–2.5 | 5–10 | 1 |
| 25–50 kilowatts | All | 3.0–4.5 | 10–15 | 1 |

[1] The total population is the population of the city sought to be served except in those instances when the station is to be located in an area classified by the Department of Commerce, Bureau of Census, as a metropolitan area, in which case the population of the metropolitan area shall apply, provided, however, that when the power of the station is such that all the metropolitan area cannot be served, the population that will actually be served shall determine. The population figures are those determined by the latest official census and where greater population is claimed, the burden of proof is on the applicant.

[2] In these instances it is usually necessary to locate the station within the city in order to render satisfactory service throughout the city. Such sites shall be in or near the center of the business district and under no circumstances will a site in the residential area be approved.

[3] These radii are only approximate and the actual blanket area (area within the 250 mv/m contour) may be materially different depending on the antenna employed and other factors.

In case the power and the population of the city are such that it should be located at some distance from the center of the city, the approximate distance is given as well as the population of the so-called "blanket area." The "blanket area" of a broadcast station is defined as that area adjacent to the transmitter in which the usual broadcast receiver would be subject to some type of interference to the reception of other stations due to the strong signal from the station. The normal blanket area of a broadcast station is that area lying within the 250 millivolt per meter contour line. The average radii of the blanket areas for broadcast stations of the various powers are given in the above table.

In those cases where it is impossible or impractical to locate a station in accordance with the above specifications, the Commission will give consideration to approving locations where not more than one percent of the population (as above specified) is included within the 500 millivolt per meter contour, provided the applicant submits an affidavit setting forth the reasons why the normal specifications cannot be complied with, and further that the applicant will assume full responsibility for adjustment of any reasonable complaints arising from the excessively strong signals of the applicant's station. Particular attention must be given to avoiding cross modulation.

In this connection, attention is invited to the fact that it has been found very unsatisfactory to locate broadcast stations so that high signal intensities occur in areas with over-head electric power or telephone distribution systems and sections where the wiring and plumbing are old or improperly installed. These areas are usually found in the older or poorer sections of a city. These conditions give rise to cross modulation interference due to the non-linear conductivity characteristics of contacts between wiring, plumbing or other conductors. This type of interference is independent of the selectivity characteristics of the receiver and normally can be eliminated only by correction of the condition causing the interference. Cross modulation tends to increase with frequency and in some areas it has been found impossible to eliminate all sources of cross modulation, resulting in an unsatisfactory condition for both licensee and listeners.

Broadcast station transmitters will not be permitted to be located in these areas even though the population is within the requirements of Table A, unless the licensee assumes full responsibility for and it appears it can adjust all complaints satisfactorily.

If the city under consideration is of irregular shape, the station is of high power, a directional antenna system is employed, or if other unusual conditions obtain, the table may not apply and special consideration must be given. However, the general principles set out will still apply.

In selecting a site in the center of a city it is usually necessary to place the radiating system on the top of a building. This building should be large enough to permit the installation of a satisfactory ground and/or counterpoise system. Great care must be taken to avoid selecting a building surrounded by taller buildings or where any nearby building higher than the antenna is located in the direction which it is desired to serve. Such a building will tend to cast "radio shadows" which may materially reduce the coverage of the station in that direction. Irrespective of the height of surrounding buildings, the building on which the antenna is located should not have height of approximately one quarter wavelength. A study of antenna systems located on buildings tends to indicate that where the building is approximately a quarter wavelength in height, the efficiency of radiation may be materially reduced.

If from Table A it is determined that a site should be selected removed from the city, there are several general conditions to be followed in determining the exact site. The table gives the approximate distance from the center of the city. Three maps should be given consideration if available:

1. Map of the density of population and number of people by sections in the area.
2. Geographical contour map with contour intervals of 20 to 50 feet.
3. Map showing the type, nature and depth of the soil in the area with special reference to the condition of the moisture throughout the year. (See Table B.)

From these maps a site should be selected that is approximately the required distance from the city with a minimum population in the "blanket area" and with a minimum number of intervening hills between it and the center of the city. In general, because of ground conditions, it is better to select a site in a low area rather than on top of a hill, and the only condition under which a site on top of a hill should be selected is that it is only possible by this means to avoid a substantial number of hills, between the site and the center of a city with the resulting radio shadows. If a site is to be selected to serve a city which is on a general sloping area, it is generally better to select a site below the city than above the city.

If a compromise must be made between probable radio shadows from intervening hills and locating the transmitter on top of a hill, it is generally better to compromise in favor of the low area where an efficient radiating system may be installed which will more than compensate for losses due to shadows being caused by the hills if not too numerous or too high. Several transmitters have been located on top of hills, but so far as data has been supplied not a single installation has given superior efficiency of propagation and coverage.

The ideal location of a broadcast transmitter is in a low area of marshy or "crawfishy" soil or area which is damp the maximum percentage of time and from which a clear view over the entire center of population may be had, and the tall buildings in the business section of the city would cast a shadow across the minimum residential area.

The type and condition of the soil or earth immediately around a site is very important. Important, to an equal extent, is the soil or earth between the site and the principal area to be served. Sandy soil is considered the worst type with glacial deposits and mineral ore areas next. Alluvial, marshy areas and salt water bogs have been found to have the least absorption of the signal. One is fortunate to have available such an area and, if not available, the next best condition must be selected.

Table B indicates the values of inductivity and conductivity which it is recommended be used for various types of country in the absence of surveys over the particular area involved. Naturally, values obtained from the use of these figures will be only approximate and should, if possible, be replaced by actual measurements in the area under consideration.

TABLE B

| Type of terrain | Inductivity | Conductivity | Absorption factor at 50 miles, 1000 kc.[1] |
|---|---|---|---|
| Sea water, minimum attenuation. | 81 | $4.64 \times 10^{-11}$ | 1.0 |
| Pastoral, low hills, rich soil, typical of Dallas, Texas, Lincoln, Nebraska and Wolf Point, Montana, areas. | 20 | $3 \times 10^{-13}$ | 0.50 |
| Pastoral, low hills, rich soil, typical of Ohio and Illinois. | 14 | $10^{-13}$ | 0.17 |
| Flat country, marshy, densely wooded, typical of La. near Mississippi River. | 12 | $7.5 \times 10^{-14}$ | 0.13 |
| Pastoral, medium hills, and forestation, typical of Md., Pa., N. Y., exclusive of mountainous territory and sea coasts. | 13 | $6 \times 10^{-14}$ | 0.09 |
| Pastoral, medium hills and forestation, heavy clay soil, typical of central Va. | 13 | $4 \times 10^{-14}$ | 0.05 |
| Rocky soil, steep hills, typical of New England. | 14 | $2 \times 10^{-14}$ | 0.025 |
| Sandy, dry, flat, typical of coastal country. | 10 | $2 \times 10^{-14}$ | 0.024 |
| City, industrial areas, average attenuation. | 5 | $10^{-14}$ | 0.011 |
| City, industrial areas, maximum attenuation. | 3 | $10^{-13}$ | 0.003 |

[1] This figure is stated for comparison purposes in order to indicate at a glance which values of conductivity and inductivity represent the higher absorption. This figure is the ratio between field intensity obtained with the soil constants given and with no absorption.

Careful consideration must be given to selecting a site so that the number of people in the blanket area is a minimum. The last column of Table A gives the per-

centage of the total population of the city or metropolitan area that may be permitted in the blanket area. In general, broadcast transmitters operating with approximately the same power can be grouped in the same approximate area and thereby reduce the interference between them.

If the city is of irregular shape, it is often possible to take advantage of this in selecting a suitable location that will give a maximum coverage and at the same time maintain a minimum of people within the blanket area. The maps giving the density of population will be a key to this. The map giving the elevation by contours will be a key to the obstructing hills between the site and city. The map of the soil conditions will assist in determining the efficiency of the radiating system that may be erected and the absorption of the signal encountered in the surrounding area.

Another factor to be considered is the relation of the site to airports and airways. There are no regulations or laws with respect to distance from airports and airways, but a distance of three miles from each is used as a guide. In case a suitable location is found at less distance than this, it may be satisfactory if the towers are suitably painted and lighted in conformity with the requirements of the Civil Aeronautics Authority, or if the towers are not higher than the surrounding objects. The latter is normally considered poor engineering practice, however, in selecting a site the local aeronautical authorities should always be consulted if there is any question concerning erecting a hazard to aviation, and in case of towers over 200 feet high this should always be done. In passing on a location and antenna installation, the Engineering Department refers each case to the Civil Aeronautics Authority for its recommendation. The action of the Authority will be materially expedited by the District Airline Inspector and local representatives of the airports and airlines forwarding their approval or comments to the Civil Aeronautics Authority, Washington, D. C.

In finally selecting the site, consideration must be given to the required space for erecting an efficient radiating system, including the ground or counterpoise (see Section 3.45). It is the general practice to use direct grounds consisting of a radial buried wire system. If the area is such that it is not possible to get such a ground system in soil that remains moist throughout the year, it probably will be found better to erect a counterpoise. (Such a site should be selected only as a last resort.) It, like the antenna itself, must of course be designed properly for the operating frequency and other local conditions.

While an experienced engineer can sometimes select a satisfactory site for a 100-watt station by inspection, it is necessary for a higher power station to make a field intensity survey to determine that the site selected will be entirely satisfactory. There are several facts that cannot be determined by inspection that make a survey very desirable for all locations removed from the city. Often two or more sites may be selected that appear to be of equal promise. It is only by means of field intensity surveys taken with a transmitter at the different sites or from measurements on the signal of nearby stations traversing the terrain involved that the most desirable site can be determined. There are many factors regarding site efficiency that cannot be determined by any other method.

The site selected should meet the following conditions:

1. A minimum field intensity of 25 to 50 millivolts per meter will be obtained over the business or factory areas of the city.

2. A minimum field intensity of 5 to 10 millivolts per meter will be obtained over the most distant residential section.

3. The absorption of the signal is the minimum for any obtainable sites in the area. As a guide in this respect the absorption of the signals from other stations in that area should be followed as well as the results of tests on other sites.

4. The population within the blanket radius (250 mv/m) does not exceed that specified by Table A.

When making the final selection of a site, the need for a field intensity survey to establish the exact conditions cannot be stressed too strongly. The selection of a proper site for a broadcast station is an important engineering problem and can only be done properly by experienced radio engineers.

### 5. MINIMUM ANTENNA HEIGHTS OR FIELD INTENSITY REQUIREMENTS

Section 3.45 requires that all applicants for new, additional or different broadcast facilities and all licensees requesting authority to move the transmitter of an existing station, shall specify a radiating system, the efficiency of which complies with the requirements of good engineering practice for the class and power of the station.

The specifications deemed necessary to meet the requirements of good engineering practice at the present state of the art are set out in detail below.

The licensee of a standard broadcast station requesting a change in power, time of operation, frequency or transmitter location must also request authority to install a new antenna system or to make changes in the existing antenna system which will meet the minimum height requirements, or submit evidence [24] that the present antenna system meets the minimum requirements with respect to field intensity, before favorable consideration will be given thereto. In the event it is proposed to make substantial changes in an existing antenna system, the changes shall be such as to meet the minimum height requirements or will be permitted subject to the submission of field intensity measurements showing that it meets the minimum requirements with respect to effective field intensity.

These minimum actual physical vertical heights of antennas permitted to be installed are shown by curves A, B, and C of Figure 7 as follows:

A. Class IV stations, 150 feet [25] or a minimum effective field intensity of 150 mv/m for 1 kilowatt. (100 watts 47.5 mv/m and 250 w, 75 mv/m).

B. Class II and III stations, or a minimum effective field intensity of 175 mv/m for 1 kilowatt.

C. Class I stations, or a minimum effective field intensity of 225 mv/m for one kilowatt.

The heights given on the graph for the antenna apply regardless of whether the antenna is located on the ground or on a building. Except for the reduction of shadows locating the antenna on a building does not necessarily increase the efficiency and where the height of the building is in the order of a quarter wave the efficiency may be materially reduced.

To obtain the maximum efficiency of which any antenna is capable a good ground system must be employed (a counterpoise may be substituted under certain conditions).

At the present development of the art, it is considered that where a vertical radiator is employed with its base on the ground, the ground system should consist of buried radial wires at least ¼ wavelength long. There should be as many of these radials evenly spaced as practicable and in no event less than 90. (120 radials of 0.35 to 0.4 of a wavelength in length and spaced 3° is considered an excellent ground system and in case of high base voltage, a base screen of suitable dimensions should be employed).

It should be borne in mind that the above specifications are the minimum and where possible better antenna and ground systems should be installed.

In case it is contended that the required antenna efficiency can be obtained with an antenna of height or ground system less than the minimum specified, a complete field intensity survey [24] must be supplied to the Commission showing that the field intensity at a mile without absorption fulfills the minimum requirements. This field survey must be made by a qualified engineer using equipment of acceptable accuracy.

The main element or elements of a directional antenna system shall meet the above minimum requirements with

[24] See "Field Intensity Measurements in Broadcast Allocation," Section A.

[25] This height applies to a Class IV station on a local channel only. In case a Class IV station is assigned a regional channel curve A shall apply.

[24] See "Field Intensity Measurements in Broadcast Allocation," Section A.

respect to height or effective field intensity. No directional antenna system will be approved which is so designed that the effective field of the array is less than the minimum prescribed for the class of station concerned or in case of a Class I station less than 90 percent of the ground wave field which would be obtained from a perfect antenna of the height specified by Fig. 7 for operation on frequencies below 1000 kilocycles and in the case of a Class II or III station less than 90 percent of the ground wave field which would be obtained from a perfect antenna of the height specified by Fig. 7 for operation on frequencies below 750 kc.

In all cases of new construction where concentric transmission line used between the transmitter and antenna is buried or cannot be readily opened throughout its entire length for immediate repair in case of failure, such line shall be installed in duplicate with adequate switching facilities for immediate connection of the second line in case of failure of the first line or permanently installed auxiliary facilities such as an auxiliary transmitter and antenna system, auxiliary antenna system or other means whereby operation may be continued in the event of failure of the transmission line.

Before any changes are made in the antenna system, it is necessary to submit full details to the Commission for approval. These data may be submitted by letter.

### 6. STANDARD LAMPS AND PAINTS

Section 3.45 (d) requires that the antenna and supporting structure shall be painted and illuminated in accordance with the specifications supplied by the Commission pursuant to Section 303 (q) of the Communications Act of 1934.

These individual specifications are issued for and attached to each authorization for an installation.[27] The details of the specifications depend on the degree of hazard presented by the particular installation. The following standard lamps and paints shall be used for the type of marking specified:

(a) Type A–21, 100-watt traffic signal, clear, medium screw base lamps enclosed in aviation red prismatic obstruction light globes shall be employed in all cases where 100-watt lamps are specified.

(b) Type PS–30, 200-watt general lighting service, clear, mogul prefocus base lamps shall be employed in all cases where code beacons with 200-watt lamps are specified.

(c) Type PS–40, 500-watt general lighting service, clear, mogul prefocus base lamps shall be employed in all cases where code beacons with 500-watt lamps are specified.

(d) Type T–24, 500-watt aviation lighting service, clear, mogul bi-post base lamps shall be employed in all cases where rotating beacons with 500-watt lamps are specified.

(e) Type T–20, 1000-watt aviation lighting service, clear, mogul bi-post base lamps shall be employed in all cases where rotating beacons with 1000-watt lamps are specified.

(f) The tower paint shall be kept in good condition and repainted as often as necessary to maintain this condition. Towers now painted black and yellow shall, when repainting is necessary be painted in accordance with the present standards.[27]

[27] Specifications normally attached to authorization:

(a) *Painting.* Each tower shall be painted throughout its height with alternate horizontal bands of international orange and white, terminating with orange bands at both top and bottom. (Orange yellow No. 5 color card, supplement to U. S. Army Quartermaster Corps Specifications No. 3–1, color chip below.) The width of the orange bands shall be approximately one-seventh of the height of any structure less than 250 feet in height, and between 30 and 40 feet for structures over 250 feet in height. The width of the white bands shall be one-half that of the orange bands.

(b) *Lighting.* (1) Towers, the overall heights of which do not exceed 200 feet, shall be lighted as follows:

SPECIFICATION "A"

At the top of each tower there shall be installed two 100-watt lamps, enclosed in aviation red prismatic obstruction light globes. At least one of these lamps shall burn continuously from sunset to sunrise. When only one lamp is operated, the circuit shall be equipped with a relay for instant automatic switchover to the other lamp in case of lamp failure.

At both the one-third and two-thirds levels of each tower there shall be installed two 100-watt lamps enclosed in aviation red prismatic obstruction light globes, at each level, one each on diagonally opposite corners of the structure.

All 100-watt lamps shall be Type A–21 Clear Bulb Traffic Signal Lamps (2000 hours or equal).

All lamps shall be enclosed in aviation red prismatic obstruction light globes and all lighting shall be exhibited from sunset to sunrise.

* * * * *

Special conditions of terrain and location with respect to airports or airways may require additional lighting of the character hereinafter specified for towers the overall height of which exceeds 200 feet.

* * * * *

(2) Towers, the overall heights of which exceed 200 feet but do not exceed 300 feet, shall be lighted as follows:

SPECIFICATION "B"

At the top of each tower there shall be installed a hazard beacon similar and equal in effectiveness to the standard 300 m/m airways electric lantern. This beacon shall flash and shall be equipped with two 500-watt lamps (both lamps to burn simultaneously) and aviation red color shades. The 300 m/m electric code beacon shall be equipped with a flashing mechanism producing 40 flashes per minute, having a luminous period of one second, and a period of darkness of one-half second.

The one-third and two-thirds levels of the tower shall be marked by 100-watt obstruction lights the same as specified for towers not exceeding 200 feet in height.

* * * * *

Towers over 300 feet in height (and less than 300 feet in height where special conditions obtain) may be required to install additional marking as indicated below.

GENERAL

Under particularly hazardous conditions and in areas of heavy air traffic, it may be necessary to add a 24-inch 500 or 1000-watt red rotating beacon equipped with an automatic lamp changer, to mark the installation. The beacon may be installed on the roof of the transmitter building, provided the point will afford proper visibility, otherwise it may be necessary to install the beacon on a separate tower of proper height or on the radio tower itself. The recommended setting of this rotating beacon is such that the center line of the light beam shall be approximately 3 degrees above horizontal.

Adequate red warning lights shall be placed on the structure or structures during the period of construction and until the specified obstruction lights are installed and in operation.

Under certain conditions it may be required to have the lighting controlled by a light sensitive control device, the adjustment being such that lights will be turned on at a north sky light intensity level of 20-foot candles and turned off at a north sky light intensity level of 40-foot candles.

Under certain conditions it may be required to install and operate a radio obstruction marker of a type to be specified.

Specifications A and B require that at both the one-third and two-thirds levels of the structure there shall be installed two 100-watt lamps enclosed in aviation red prismatic obstruction light globes, at each level, one each on diagonally opposite corners of the structure.

Under certain conditions and in the case of triangular and other towers of unusual design, it may be required to install 100-watt lamps enclosed in aviation red prismatic obstruction light globes at various corners and levels throughout the height of the structure in such a manner so that adequate visibility and definition would be obtained from all angles of approach.

Towers of excessive height or peculiar (unusual) design will be made the subject of special investigation and analysis to determine proper marking and lighting.

In addition to the standard marking and lighting of the main structure, towers using guy wires will be made the subject of special study to determine proper marking and lighting of the guy wires.

The specifications relative to obstruction marking and lighting of radio towers of a certain height are general, and in locations of extreme hazard to air navigation, it may be required to install additional equipment on any height tower, in order to obtain suitable protection.

### 7. FURTHER REQUIREMENTS FOR POWER MEASUREMENTS OF POWER

Section 3.54 states that the antenna input power determined by direct measurement is the square of the antenna current times the antenna resistance at the point where the current is measured and at the operating frequency, and sets forth certain requirements relative to the determination of the resistance and measurement of the antenna current.

The Commission does not specify any particular method of making antenna resistance measurements. Measurements made by any standard method will be accepted provided satisfactory evidence is submitted in accordance with the following as to the procedure used, accuracy of the instruments and qualifications of the engineer conducting the measurements.

The resistance variation method, substitution method and bridge method are acceptable methods for measuring the total antenna resistance and the follow-

ing general instructions are given as a guide.

The apparatus required is as follows:

(a) Radio frequency generator to cover the frequency range necessary, power 50 watts or required power when using bridge method.

(b) Wavemeter for broadcasting frequency, accuracy 0.25%.

(c) Decade resistor having steps of units, tens and hundreds ohms resistance, or equivalent, accuracy 1.0%.

(d) Radio frequency galvanometer or milliammeter of approved type, accuracy 2.0%.

(e) Approved tuning condenser of approximately 0.001 MFD capacity and tuning inductance of approximately 60 MH.

(f) Or suitable bridge if this method is used.

The broadcast transmitter is not usually satisfactory for use as the source of radio frequencies. The maximum power dissipated in the antenna while making measurements should not be over 10% of the power available from the radio frequency generator.

An accurate determination of the antenna resistance can only be made by taking a series of measurements each for a different frequency. From 10 to 12 resistance measurements covering a band 50 to 60 kc wide with the operating frequency near the middle of the band must be made to give data from which accurate results may be obtained. The values measured should be plotted with frequency as abscissa and resistance in ohms as ordinate and a smooth curve drawn. The point on the ordinate where this curve intersects the operating frequency gives the value of the antenna resistance.

In order to comply with the provisions of Rule 33.06 the following data should be submitted in duplicate to the Commission in affidavit form, accompanied by duplicate copies of FCC Form 306 properly executed:

1. Complete data taken.
2. The graph drawn.
3. Description of method used to take readings (include schematic circuit diagrams of the measurement circuit and of the antenna system showing point of measurement and location in circuit of both regular and remote antenna ammeters).
4. Manufacturer's name of each calibrated instrument used and manufacturer's rated accuracy.
5. Accuracy, date and by whom each instrument was last calibrated.
6. Qualifications of engineer making measurements.

Licensees of broadcast stations authorized to employ directional antenna systems desiring to determine the operating power by direct measurement of the antenna power shall determine the resistance by the following method:

Measure the resistance at the point of common radio frequency input to the directional antenna system. The following conditions and procedure shall obtain:

(a) The antenna shall be finally adjusted for the required pattern.

(b) The reactance at the operating frequency and at the point of measurement shall be adjusted to zero or as near thereto as practical.

(c) Suitable radio frequency bridge or other method shall be employed to determine the resistance and reactance at the point of common radio frequency input in the same manner as set forth above for a single antenna.

(d) Resistance and reactance measurements at approximately 5, 10, 15 and 20 kc on each side of the operating frequency shall be made. The values measured shall be plotted and the resistance at the operating frequency determined in the same manner as for a single element antenna.

(e) A permanently installed antenna ammeter shall be placed in each element of the system as well as at the point of measurement of resistance with the remote reading ammeters [2] located in the transmitter room. The application for authority to determine power by the direct method shall specify not only the current at the point of resistance measurement for the authorized input power (TR in accordance with Section 3.54 and (f) below), but also the current of each element of the system when adjusted for the required pattern and for the authorized operating power.

(f) The license for a station of power of 5 kw or under, which employs a directional antenna and determines the power by the direct method, will specify the antenna resistance as 92.5% of that determined at the point of common input in accordance with the above. The resistance specified for stations of a power over 5 kw will be 95% of that determined at the point of common input.

[2] In all cases regular antenna ammeters and remote antenna ammeters shall comply with the requirements of Section 3.58 and "Indicating Instruments Pursuant to Section 3.58."

### 3. POWER RATING OF VACUUM TUBES

Section 3.42 requires that the maximum rated carrier power of a standard broadcast transmitter shall be determined as the sum of the applicable power ratings of the vacuum tubes employed in the last radio stage. The approved power ratings of vacuum tubes for operation in the last radio stages of broadcast transmitters are fixed as set out in the following tables:

TABLE A.[1]—*Power Rating of Vacuum Tubes for High-Level Modulation or Plate Modulation in the Last Radio Stage*

[1] These tables apply only to tube ratings for use in the last radio stage of broadcast transmitters and may not be applicable to any other service.

For an application to the Commission a vacuum tube of a type number and power rating not given in the foregoing tables may be employed in the last radio stage of a broadcast transmitter if the tube has been found to and approved by the Commission the manufacturer's rating of the vacuum tube for the system of modulation or class of service contemplated. These data shall be supplied by the manufacturer. (See section 3.42 and "Requirements for Approval of Power Rating of Vacuum Tubes.")

### 9. REQUIREMENTS FOR APPROVAL OF POWER RATING OF VACUUM TUBES

Section 3.42 (c) requires that only vacuum tubes of approved rating be employed in the last radio stages of standard broadcast transmitters and that such approved ratings will be given only upon submission of the ratings by the manufacturer.

These ratings shall be supplied under oath in the following table form:

TABLE (A B C or D)—*Class of Operation*

[State whether for plate modulation in the last radio stage, low level modulation, or grid modulation in the last radio stage. See Section 3.52]

| Type of tube | Epn | Epmn | Ipn | Ipmn | Rp | Ec | Power rating |
|---|---|---|---|---|---|---|---|
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |

The value of Epn and Ipn are those values that are recommended by the manufacturers for operation at the power rating specified. The values of Epmn and Ipmn are the maximum continuous operating values that the manufacturers will stand by their guarantee on the tube specified when used in the class of service above set out.

The power ratings given above are to apply when the following conditions and limitations as to operation prevail:

1. The vacuum tubes are to be used in the last radio stage of standard broadcast transmitters.

2. On the broadcast frequencies of 550 to 1600 kilocycles, inclusive.

3. The percentage of amplitude distortion or harmonic generation by the entire transmitter (from microphone terminals to antenna outputs) is not to be over 10 percent at 100 percent modulation. The radio harmonics are not to exceed the amount considered in accordance with good engineering practice. (See Section 3.46 and "Construction, General Operation and Safety of Life Requirements to comply with Section 3.46").

4. The ventilation, cooling, general condition of circuits with respect to tuning, impedance match and maintenance are to be that encountered in the average broadcast station and in accordance with good engineering practice. The operation, general maintenance and adjustments are to be those ordinarily encountered in a broadcast station.

5. The regulation of the power supply is to be that which has been found to exist throughout the United States where broadcast stations are located or may be located.

6. Table A should give the power rating for use in transmitter employing plate modulation in last radio stage under the above specified conditions. See Section 3.52, Table A.

7. Table B should give the rating for use in transmitter employing low level modulation under the above specified conditions. See Section 3.52, Table B.

8. Tables C and D should give the power rating for use in transmitter employing grid modulation in the last radio stage under the above specified conditions and plate efficiencies of 22 and 33 percent, respectively. (Request for approval of ratings for grid modulation in the last radio stage should specify whether the operating efficiency is to be 22 percent or 33 percent. No tube will be approved for both efficiencies. See Section 3.52, Table C.)

9. The operating power of the transmitter is to be determined by Sections 3.51, 3.52, 3.53 and 3.54.

10. Due consideration will be given to the general standard of rating so that tubes manufactured by different firms but having practically the same absolute characteristics will have approximately the same power rating.

11. The power rating should be an even power step as recognized by the Commission's plan of allocation (100 watts, 250 watts, 500 watts, 1,000 watts, 5 kw, 10 kw, 25 kw, 50 kw), or other ratings established in "Power Rating of Vacuum Tubes." If any other rating is desired, it will be necessary to support the request with satisfactory reasons therefor.

### 10. PLATE EFFICIENCY OF LAST RADIO STAGE

Section 3.53 requires that in computing the operating power of standard broadcast stations by the indirect method the efficiency factors specified in Section 3.52 shall apply in all cases and no distinction will be recognized due to the operating power being less than the maximum rated carrier power.[20]

In compliance with this rule standard broadcast stations permitted to determine the operating power by the indirect method in accordance with Section 3.51 (b) and to employ greater daytime power than nighttime power shall maintain the same operating efficiency for both daytime and nighttime operation.[20]

To determine whether this condition obtains, the following procedure should be used:

The apparent antenna resistance should be computed from the daytime (highest power) operating constants and then the nighttime power in the antenna determined from the $I^2R$ using the apparent resistance previously determined. If this computed antenna power agrees with the nighttime operating power determined by the indirect method within plus or minus five percent, the station is considered as complying with the requirement of maintaining the same operating efficiency. In case the antenna current is subject to variation due to weather or other conditions, an attempt should be made to arrive at an average value for the purpose of the computations referred to herein.

[20] See Section 3.52, Table A.

[20] When different last radio stages with different systems of modulation are employed for the two powers, the same principle shall apply, that is, the power shall be determined by the plate input times the proper efficiency factor and the antenna current shall change in proportion to the square root of the change in power within 5 percent.

### 11. OPERATING POWER TOLERANCE

Section 3.57 requires that except in case of emergency beyond the control of the licensee, the operating power of each standard broadcast station shall be maintained within the prescribed limits of the licensed power.

Each station shall be operated at all times as near to the authorized power as practicable. However, in order to provide for variations in the power supply or other factors affecting the operating power which would necessitate continual adjustment to keep the operating power exactly the same as the authorized power, the operating power may be permitted to vary from 5 percent above to 10 percent below the authorized power for periods of short duration.

In addition, to maintaining the operating power within the above limitations, broadcast stations employing directional antenna systems shall maintain the ratio of the antenna currents in the elements of the arrangement within 5 percent of that specified by the terms of the license or other instrument of authorization.

### 12. CONSTRUCTION, GENERAL OPERATION AND SAFETY OF LIFE REQUIREMENTS

Section 3.46 requires that the transmitter proper and associated transmitting equipment of each broadcast station shall be designed, constructed and operated in accordance with the standards of good engineering practice in addition to the specific requirements of the Rules and Regulations of the Commission.

The specifications deemed necessary to meet the requirements of the Rules and Regulations and good engineering practice with respect to design, construction and operation of standard broadcast stations are set forth below. These specifications will be changed from time to time as the state of the art and the need arises for modified or additional specifications.

A. *Design.* The general design of standard broadcast transmitting equipment [main studio microphone (including telephone lines if used as to performance only[21]) to antenna output] shall be in accordance with the following specifications. For the points not specifically covered below, the principles set out shall be followed:

The equipment shall be so designed that:

1. The maximum rated carrier power (determined by Section 3.42) is in accordance with the requirements of Section 3.41.

2. The equipment is capable of satisfactory operation at the authorized operating power or the proposed operating power with modulation of at least 85 to 95 percent with no more distortion than given in (3) below.

3. The total audio frequency distortion from microphone terminals, including microphone amplifier, to antenna output does not exceed 5 percent harmonics (voltage measurements of arithmetical sum or r. s. s.) when modulated from 0 to 84 percent, and not over 7.5 percent harmonics (voltage measurements of arithmetical sum or r. s. s.) when modulating 85 percent to 95 percent (distortion shall be measured with modulating frequencies of 50, 100, 400, 1000, 5000 and 7500 cycles up to tenth harmonic or 16000 cycles or any intermediate frequency that readings on these frequencies indicate is desirable).

4. The audio frequency transmitting characteristics of the equipment from the microphone terminals (including microphone amplifier unless microphone frequency correction is included in which event proper allowance shall be made accordingly) to the antenna output does not depart more than 2 decibels from that at 1000 cycles between 100 and 5000 cycles.

5. The carrier shift (current) at any percentage of modulation does not exceed 5 percent.

6. The carrier hum and extraneous noise (exclusive of microphone and studio noises) level (unweighted r. s. s.) is at least 50 decibels below 100 percent modulation for the frequency band of 150 to 5000 cycles and at least 40 decibels down outside this range.

7. The transmitter shall be equipped with suitable indicating instruments in accordance with the requirements of Section 3.58 and any other instruments necessary for the proper adjustment and operation of the equipment.

8. Adequate provision is made for varying the transmitter power output between sufficient limits to compensate for excessive variations in line voltage, or other factors which may affect the power output.

9. The transmitter is equipped with automatic frequency control equipment capable of maintaining the operating frequency within the limit specified by Section 3.59.

a. The maximum temperature variation[22] at the crystal from the normal operating temperature shall not be greater than:

1. Plus or minus 0.1 degree Centigrade when an X or Y cut crystal is employed, or

2. Plus or minus 1.0 degree Centigrade when low temperature coefficient crystal[23] is employed

b. Unless otherwise authorized, a thermometer shall be installed in such manner that the temperature at the crystal can be accurately measured within 0.05 degree Centigrade for X or Y cut crystal or 0.5 degree for low temperature coefficient crystal.

c. It is preferable that the tank circuit of the oscillator tube be installed in the temperature controlled chamber.

10. Means are provided for connection and continuous operation of approved modulation monitor and approved frequency monitor.

a. The radio frequency energy for operation of the approved frequency monitor shall be obtained from a radio frequency stage prior to the modulated stage unless the monitor is of such design as to permit satisfactory operation when otherwise connected and the monitor circuits shall be such that the carrier is not heterodyned thereby.

11. Adequate margin is provided in all component parts to avoid over-heating at the maximum rated power output.

B. *Construction.* In general, the transmitter shall be constructed either on racks and panels or in totally enclosed frames[24] protected as required by Article 810 of the National Electrical Code,[25] and as set forth below:

1. Means shall be provided for making all tuning adjustments, requiring voltages in excess of 350 volts to be applied to the circuit, from the front of the panels with all access doors closed.

2. Proper bleeder resistors or other automatic means shall be installed across all the condenser banks to remove any charge which may remain after the high voltage circuit is opened (in certain instances the plate circuit of the tubes may provide such protection, however,

[21] In cases where telephone lines are not available to give the performance as required in these specifications a relay transmitter may be authorized to supersede the lines.

[22] Explanations of excessive frequency deviations will not be accepted when temperature variations are in excess of the values specified below.

[23] See "Use of Low Temperature Coefficient Crystal."

[24] The final stages of high power transmitters may be assembled in open frames provided the equipment is enclosed by a protective fence.

[25] The pertinent sections of Article 810 of the National Electrical Code read as follows:

8191. *General.* Transmitters shall comply with the following:

a. *Enclosing.* The transmitter shall be enclosed in a metal frame or grille, or separated from the operating space by a barrier or other equivalent means, all metallic parts of which are effectually connected to ground.

b. *Grounding of controls.* All external metallic handles and controls accessible to the operating personnel shall be effectually grounded. No circuit in excess of 150 volts should have any parts exposed to direct contact. A complete dead-front type of switchboard is preferred.

c. *Interlocks on doors.* All access doors shall be provided with interlocks which will disconnect all voltages in excess of 350 volts when any access door is opened.

individual approval of such shall be obtained by the manufacturer in case of standard equipment and the licensee in case of composite equipment).

3. All plate supply and other high voltage equipment, including transformers, filters, rectifiers and motor generators, shall be protected so as to prevent injury to operating personnel.

a. Commutator guards shall be provided on all high voltage rotating machinery (coupling guards on motor generators, although desirable, are not required).

b. Power equipment and control panels of the transmitter shall meet the above requirements (exposed 220 volt AC switching equipment on the front of the power control panels is not recommended, however, is not prohibited).

c. Power equipment located at a broadcast station but not directly associated with the transmitter (not purchased as part of same), such as power distribution panels, control equipment on indoor or outdoor stations and the sub-stations associated therewith, are not under the jurisdiction of the Commission, therefore, Rule 32.06 does not apply.

d. It is not necessary to protect the equipment in the antenna tuning house and the base of the antenna with screens and interlocks, provided the doors to the tuning house and antenna base are fenced and locked at all times with the keys in the possession of the operator on duty at the transmitter. Ungrounded fencing or wires should be effectively grounded either directly or through proper static leaks. Lighting protection for the antenna system is not specifically required but should be installed.

e. The antenna, antenna lead-in, counterpoise (if used), etc., shall be installed so as not to present a hazard. The antenna may be located close by or at a distance from the transmitter building. A properly designed and terminated transmission line should be used between the transmitter and the antenna when located at a distance.[34]

4. Metering Equipment.[35]

a. All instruments having more than 1000 volts potential to ground on the movement shall be protected by a cage or cover in addition to the regular case—(Some instruments are designed by the manufacturer to operate safely with voltages in excess of 1000 volts on the movement. If it can be shown by the manufacturer's rating that the instrument will operate safely at the applied potential, additional protection is not necessary).

b. In case the plate voltmeter is located on the low potential side of the multiplier resistor with one terminal of the instrument at or less than 1000 volts above ground, no protective case is required. However, it is good practice to protect voltmeters subject to more than 5000 volts with suitable over-voltage protective devices across the instrument terminals in case the winding opens.

c. The antenna ammeters (both regular and remote and any other radio frequency instrument which it is necessary for the operator to read) shall be so installed as to be easily and accurately read without the operator having to risk contact with circuits carrying high potential radio frequency energy.

C. *Wiring and shielding.* 1. The transmitter panels or units shall be wired in accordance with standard switchboard practice, either with insulated leads properly cabled and supported or with rigid bus bar properly insulated and protected.

2. Wiring between units of the transmitter, with the exception of circuits carrying radio frequency energy, shall be installed in conduits or approved fiber or metal raceways to protect it from mechanical injury.

3. Circuits carrying low level radio frequency energy between units shall be either concentric tube, two wire balanced lines or properly shielded to prevent the pickup of modulated radio frequency energy from the output circuits.

4. Each stage (including the oscillator) preceding the modulated stage shall be properly shielded and filtered to prevent unintentional feedback from any circuit following the modulated stage (an exception to this requirement may be made in the case of high level modulated transmitters of approved manufacture which have been properly engineered to prevent reaction).

5. The crystal chamber, together with the conductor or conductors to the oscillator circuit, shall be totally shielded.

6. The monitors and the radio frequency lines to the transmitter shall be thoroughly shielded.

D. *Installation.* 1. The installation shall be made in suitable quarters.

2. Since an operator must be on duty during operation, suitable facilities for his welfare and comfort shall be provided.

E. *Spare tubes.* A spare tube of every type employed in the transmitter and frequency and modulation monitors shall be kept on hand. When more than one tube of any type are employed, the following table determines the number of spares of that type required:

| Number of each type employed: | Spares required |
|---|---|
| 1 or 2 | 1 |
| 3 to 5 | 2 |
| 6 to 8 | 3 |
| 9 or more | 4 |

F. *Operation.* In addition to the specific requirements of the rules governing standard broadcast stations, the following operating requirements shall be observed:

1. The maximum percentage of modulation shall be maintained at as high level as practicable without causing undue audio frequency harmonics which shall not be in excess of 10 percent when operating with 85 percent modulation.

2. Spurious emissions, including radio frequency harmonics and audio frequency harmonics, shall be maintained at as low a level as practicable at all times in accordance with good engineering practice.

3. In the event interference is caused to other stations by modulating frequencies in excess of 7500 cycles or spurious emissions, including radio frequency harmonics and audio frequency harmonics outside the band plus or minus 7500 cycles of the authorized carrier frequency, the licensee shall install equipment or make adjustments which limit the emissions to within this band or to such an extent above 7500 cycles as to reduce the interference to where it is no longer objectionable.

4. The operating power shall be maintained within the limits of 5 percent above and 10 percent below the authorized operating power and shall be maintained as near as practicable to the authorized operating power.

5. Licensees of broadcast stations employing directional antenna systems shall maintain the ratio of the currents in the elements of the array within 5 percent of that specified by the terms of the license or other instrument of authorization.

6. In case of excessive shift in operating frequency during warm-up periods, the crystal oscillator shall be operated continuously. The automatic temperature control circuits should be operated continuously under all circumstances.

G. *Studio equipment.* The studio equipment shall be subject to all the above requirements where applicable except as follows:

1. If it is properly covered by an underwriter's certificate, it will be considered as satisfying the safety requirements.

2. Section 8191 of Article 810 of the National Electrical Code shall apply for voltages only when in excess of 500 volts.

No specific requirements are made relative to the design and acoustical treatment. However, the studios and particularly the main studio should be in accordance with the standard practice for the class of station concerned, keeping the noise level as low as reasonably possible.

13. INDICATING INSTRUMENTS PURSUANT TO SECTION 3.58

Section 3.58 requires that each standard broadcast station shall be equipped with suitable indicating instruments of accepted accuracy to measure the antenna current, direct plate circuit voltage, and the direct plate circuit current of the last radio stage.

The following requirements and specifications shall apply to indicating instruments used by standard broadcast stations in compliance with this rule:

A. Instruments indicating the plate current or plate voltage of the last radio stage, (linear scale instruments) shall meet the following specifications:

1. Length of scale shall be not less than 2⅗ inches.

2. Accuracy shall be at least two percent of the full scale reading.

3. The maximum rating of the meter shall be such that it does not read off scale during modulation.

4. Scale shall have at least 40 divisions.

5. Full scale reading shall not be greater than five times the minimum normal indication.

B. Instruments indicating the antenna current shall meet the following specifications:

1. Instruments having logarithmic or square law scales.

(a) Shall meet same requirements as 1, 2 and 3 above for linear scale instruments.

(b) Full scale reading shall not be greater than three times the minimum normal indication.

(c) No scale division above one-third full scale reading (in amperes) shall be greater than 1/30 of the full scale reading. (Example: An ammeter meeting requirement (a) above having full scale reading of six amperes is acceptable for reading currents from two to six amperes provided no scale division between two and six amperes is greater than 1/30 of six amperes, 0.2 ampere.)

2. Radio frequency instruments having expanded scales.

(a) Shall meet same requirements as 1, 2 and 3 for linear scale instruments.

(b) Full scale reading shall not be greater than five times the minimum normal indication.

(c) No scale division above 1/5 full scale reading (in amperes) shall be greater than 1/50 of the full scale reading. (Example: An ammeter meeting the requirement (a) above is acceptable for indicating currents from one to five amperes provided no division between one and five amperes is greater than 1/50 of five amperes, 0.1 ampere.)

(d) Manufacturers of instruments of the expanded scale type must submit data to the Commission showing that these instruments have acceptable expanded scales, and the type number of these instruments must include suitable designation.

3. Remote reading antenna ammeters may be employed and the indications logged as the antenna current in accordance with the following:

(a) Remote reading antenna ammeters may be provided by:

1. Inserting second thermocouple directly in the antenna circuit with remote leads to the indicating instrument.

2. Inductive coupling to thermocouple or other device for providing direct current to indicating instrument.

3. Capacity coupling to thermocouple or other device for providing direct current to indicating instrument.

4. Current transformer connected to second thermocouple or other device for providing direct current to indicating instrument.

5. Using transmission line current meter at transmitter as remote reading ammeter. See paragraph (h) below.

6. Using indications of phase monitor for determining the ratio of antenna currents in the case of directional antennas provided the indicating instruments in the unit are connected directly in the current sampling circuits with no other shunt circuits of any nature.

(b) A thermocouple type ammeter meeting the above requirements shall be permanently installed in the antenna circuit. (This thermocouple ammeter may be so connected that it is short circuited or open circuited when not actually being read. If open circuited a make before break switch must be employed.)

(c) The remote ammeter shall be connected at the same point in the antenna circuit as the thermocouple ammeter or shall be so connected and calibrated as to read in amperes within two percent of this meter over the entire range above one-third or one-fifth full scale. See Sections B 1 (c) and B 2 (c) above respectively.

(d) The regular antenna ammeter shall be above the coupling to the remote meter in the antenna circuit so it does not read the current to ground through the remote meter.

(e) All remote meters shall meet the same requirements as the regular antenna ammeter with respect to scale accuracy etc.

(f) Calibration shall be checked against the regular meter at least once a week.

(g) All remote meters shall be provided with shielding or filters as necessary to prevent any feed-back from the antenna to the transmitter.

(h) In the case of shunt excited antennas, the transmission line current meter at the transmitter may be considered as the remote antenna ammeter provided the transmission line is terminated directly into the excitation circuit feed line which shall employ series tuning only (no shunt circuits of any type shall be employed) and insofar as practicable, the type and scale of the transmission line meter should be the same as those of the excitation circuit feed line meter (meter in slant wire feed line or equivalent).

(i) Remote reading antenna ammeters employing vacuum tube rectifier are acceptable provided:

1. The indicating instruments shall meet all the above requirements for linear scale instruments.

2. Data are submitted under oath showing the unit has an overall accuracy of at least 2 percent of the full scale reading.

3. The installation, calibration and checking are in accordance with the above requirements.

(j) In the event there is any question as to the method of providing or the accuracy of the remote meter, the burden of proof of satisfactory performance shall be upon the licensee and the manufacturer of the equipment.

C. Stations determining power by the indirect method may log the transmission line current in lieu of the antenna current provided the instrument meets the above requirements for antenna ammeters, and further provided that the ratio between the transmission line current and the antenna current is entered each time in the log. In case the station is authorized for the same operating power for both day and nighttime operation this ratio shall be checked at least once daily. Stations which are authorized to operate with nighttime power different from the daytime power shall check the ratio for each power at least once daily.

D. No instrument indicating the plate current or plate voltage of the last radio stage, the antenna current or the transmission line current when logged in lieu of the antenna current shall be changed or replaced without written authority of the Commission, except by instruments of the same make, type, maximum scale reading and accuracy. Requests for authority to change an instrument may be made by letter or telegram giving the manufacturer's name, type number, serial number and full scale reading of the proposed instrument and the values of current or voltage the instrument will be employed to indicate. Requests for temporary authority to operate without an instrument or with a substitute instrument may be made by letter or telegram stating the necessity therefor and the period involved.

E. No instrument, the seal of which has been broken, or the accuracy of which is questionable, shall be employed. Any instrument which was not originally sealed by the manufacturer that has been opened shall not be used until it has been recalibrated and sealed in accordance with the following: Repairs and recalibration of instruments shall be made by the manufacturer, by an authorized instrument repair service of the manufacturer or by some other properly

[34] In all cases of new construction where a concentric transmission line used between the transmitter and antenna is buried or cannot be readily opened throughout its entire length for immediate repair in case of failure, such line shall be installed in duplicate with adequate switching facilities for immediate connection of the second line in case of failure of the first line or permanently installed auxiliary facilities such as an auxiliary transmitter and antenna system, auxiliary antenna system or other means whereby operation may be continued in the event of failure of the transmission line. It is also recommended that spare antenna and transmission line ammeters identical with those installed be kept on hand.

[35] In addition to the following requirements, instruments shall meet the requirements of Section 3.58 and "Indicating Instruments Pursuant to Section 3.58."

qualified and equipped instrument repair service. In either case the instrument must be resealed with the symbol or trade mark of the repair service and a certificate of calibration supplied therewith.

F. Since it is usually impractical to measure the actual antenna current of a shunt excited antenna system, the current measured at the input of the excitation circuit feed line is accepted as the antenna current.

G. Recording instruments may be employed in addition to the indicating instruments to record the antenna current and the direct plate current and direct plate voltage of the last radio stage provided that they do not affect the operation of the circuits or accuracy of the indicating instruments. If the records are to be used in any proceedings before the Commission as representation of operation with respect to plate or antenna current and plate voltage only, the accuracy must be the equivalent of the indicating instruments and the calibration shall be checked at such intervals as to insure the retention of the accuracy.

H. The function of each instrument shall be clearly and permanently shown on the instrument itself or on the panel immediately adjacent thereto.

### 14. REQUIREMENTS FOR TYPE APPROVAL OF BROADCAST TRANSMITTERS AND AUTOMATIC FREQUENCY CONTROL EQUIPMENTS

Sections 3.41 to 3.64 govern the design, construction, and technical operation of standard broadcast equipment. In order to facilitate filing of and action on applications for construction permits specifying equipment of standard manufacture, the Commission will approve, as complying with the technical requirements, such equipment by type subject to the following conditions and in accordance with the following procedure:

(a) Approval of equipment by the Commission is only to the effect that insofar as can be determined from the data supplied the equipment complies with the current requirements of good engineering practice and the technical Rules and Regulations of the Commission. The approval may be withdrawn upon subsequent inspection or operation showing the equipment is not as represented or does not comply with the technical Rules and Regulations of the Commission and the requirements of good engineering practice.

(b) Such approval shall not be construed to mean that the equipment will be satisfactory as the state of the art progresses and/or as the Rules and Regulations of the Commission may be changed as deemed advisable.

(c) Applicants specifying equipment of approved manufacture need not submit detailed descriptions and diagrams where the correct type number is specified provided the equipment, including the antenna tuning unit, is identical with that approved.

(d) In passing on equipment, no consideration is given by the Commission to patent rights.

(e) For approval of standard broadcast transmitters, manufacturers shall submit F. C. C. Form 301, completed with respect to all pertinent sections and the data set forth below, both of which shall be verified before a notary public.

1. Photograph or drawings or any other evidence that construction is in accordance with the requirements of good engineering practice.

2. Data and curves showing overall audio frequency response from 30 to 7500 cycles for approximately 25, 50, 85 and 100 (if obtainable) per cent modulation (reference frequency, 1000 cycles).

3. Data on audio frequency harmonics for 25, 50, 85 and 100 per cent modulation for the fundamental frequencies of 50, 100, 400, 1,000, 5,000 and 7,500 cycles (either arithmetical sum or root-sum-square values up to 10th harmonic or 16,000 cycles).

4. Percentage carrier shift (current) for 25, 50, 85 and 100 per cent modulation.

5. Carrier hum and extraneous noise generated within the equipment and measured as the level below 100 per cent modulation throughout audio spectrum or by bands.

6. Percentage of each measurable radio frequency harmonic generated under expected normal operating conditions or in the first installation.

7. How output power is varied to compensate for power supply voltage variations.

8. Data and curves on frequency stability for variations in ambient temperatures over the range encountered in practice.

9. Data and curves on frequency stability for variations in power supply voltage from 85 to 115 per cent normal values.

10. Net sale price.

(f) For approval of automatic frequency control equipment or automatic temperature control chambers, manufacturers shall complete F. C. C. Form 305 with respect to all pertinent sections and the data set forth below, both of which shall be verified before a notary public.

1. Photograph or drawings or any other evidence.

2. Data and curves on frequency stability for variations in ambient temperatures over maximum range encountered in practice.

3. Data and curves on frequency stability for variations in power supply voltage from 85 to 115 per cent normal values.

4. Net sale price.

### 15. REQUIREMENTS FOR APPROVAL OF FREQUENCY MONITORS

Section 3.60 requires that the licensee of each standard broadcast station have in operation at the transmitter a frequency monitor independent of the frequency control of the transmitter. The frequency monitor shall be approved by the Commission and shall have a stability and accuracy at least five parts per million.

*A. General Requirements and Approval*

There are several ways or means by which it can be determined whether the frequency of the omitted carrier wave is within the required limits of the assigned frequency. However, one of the commonest ways is by means of a local piezo oscillator of known frequency producing a beat with the omitted wave used in conjunction with an instrument to indicate the resultant beat frequency. The visual indicator [*] is the only method now in common use by which it is considered that the frequency of the beat may be determined with the required degree of accuracy. Approval of a frequency monitor will be given based upon data taken at the Bureau of Standards. However, the Bureau of Standards does not approve or disapprove the monitor as this is entirely in the hands of the Commission. Any manufacturer desiring to submit a monitor for approval shall supply the Commission with full details. If the specifications appear to meet the requirements, the Commission will request the Bureau of Standards to issue shipping instructions. The cost of tests as well as the shipping charges shall be paid by the manufacturer.

In approving a frequency monitor, based upon the tests at the Bureau of Standards, the Commission merely recognizes that the type of monitor has the inherent capability of functioning in compliance with Section 3.60, if properly constructed, maintained, and operated. The Commission accepts no responsibility beyond this and further realizes that these monitors may have a limited range over which the visual indicator will determine deviations. Accordingly, it is necessary that adjunct quipment be used to determine major deviations."

No change whatsoever will be permitted in the monitors sold under approval number issued by the Commission except when the licensee or the manufacturer is specifically authorized to make such changes.

When it is desired to make any change, either mechanical or electrical, the details shall be submitted to the Commission for its consideration.

Approval is given subject to withdrawal if the unit proves defective in service and can not be relied upon under usual conditions of maintenance and operation encountered in the average standard broadcast station. Withdrawal

[*] In addition to the visual indicator the range of which is necessarily limited in order to obtain the required accuracy, an aural indicator should also be employed to indicate frequency deviations beyond the range of the visual indicator particularly where the visual indicator is so designed that the indication becomes zero when the deviations become considerably greater than the range of the instrument. When it is desired to make any change, either mechanical or electrical, the details shall be submitted to the Commission for its consideration.

of approval means that no further units may be installed by standard broadcast stations for the purpose of complying with Section 3.60, but will not affect units already sold, unless it is found that there has been an unauthorized change in design or construction, or the material or workmanship is defective. All manufacturers of approved frequency monitors shall keep a list of sale numbers of the monitors sold to licensees of standard broadcast stations under the assigned approval number, and shall advise the Commission upon shipment of the monitor to the standard broadcast station.

*B. General Specifications*

The general specifications that frequency monitors shall meet before they will be approved by the Commission are as follows:

1. The unit shall have an accuracy of at least five parts per million under ordinary conditions (temperature, humidity, power supply, and other conditions which may affect its accuracy) encountered in standard broadcast stations throughout the United States.

2. The range of the indicating device shall be at least from fifty cycles below to fifty cycles above the assigned frequency.

3. The scale of the indicating device shall be so calibrated as to be accurately read within at least one cycle.

4. The unit shall be equipped with an automatic temperature control chamber (preferably enclosing the tank circuits of the oscillator) such that the maximum temperature variation at the crystal from the normal operating temperature shall not be greater than,

(a) Plus or minus 0.05° Centigrade when *X* or *Y* cut crystal is employed, or

(b) Plus or minus 0.5° Centigrade when low temperature coefficient crystal is employed.

5. Unless otherwise specifically authorized the instrument shall be equipped with a thermometer such that the temperature can be accurately measured within 0.025° Centigrade for *X* or *Y* cut crystal or 0.25° Centigrade for low temperature coefficient crystal.

6. The monitor circuit shall be such that it may be continuously operated and the omitted carrier of the station is not heterodyned thereby.

7. Means shall be provided for adjustment of the temperature or other means for correction of the indications of the monitor to agree with the external standard.

*C. Tests to be made by the Bureau of Standards*

The tests to be made at the Bureau of Standards will include the determination of the following:

1. *Accuracy.* (a) Oscillator frequency, as received.

(b) Constancy of oscillator frequency, as measured several times in one month.

(c) Accuracy of readings of frequency-difference instrument.

(d) Functioning of frequency adjustment device.

(e) Effects on frequency of changing tubes and of voltage variations.

2. *Temperature control stability.* (a) Effect on frequency of variation of room temperature through a range not to exceed 10° to 35° C.

3. *Sensitivity.* (a) Response of indicating instrument to small changes of frequency.

4. *General construction.* (a) Inspection to determine ability to stand shipment and service.

(b) Special tests to determine quality of construction, such as effect of tilting or tipping on frequency.

5. *Miscellaneous performance.* (a) Various, depending on character of apparatus (e. g., changes after stopping and starting, effect of varying coupling with transmitter, etc.)

The equipment will be operated in a test in the same way and the same conditions under which it will be used in service as specified by the manufacturer. The manufacturer shall supply to the Bureau of Standards all instructions or services which will be supplied to the purchaser of the equipment. The equipment, as submitted, shall be adjusted for operation in connection with broadcast stations operating on 1600 kilocycles.

### 16. REQUIREMENTS FOR APPROVAL OF MODULATION MONITORS

Section 3.55 (b) requires all broadcast stations to have in operation a modulation monitor approved by the Commission and Section 3.55 (d) states that the Commission will from time to time publish the specifications, requirements and list of approved modulation monitors. The specifications and requirements for approval are set out below. For a list of approved modulation monitors, attention is invited to Commission release "List of Approved Modulation Monitors."

Approval will be given based on the test data taken at the Bureau of Standards. However, the Bureau of Standards does not approve or disapprove the monitor as this is entirely in the hands of the Commission. Any manufacturer desiring to submit a monitor for approval shall supply the Commission with full details and if the specifications appear to meet the requirements, the Commission will request the Bureau of Standards to issue shipping instructions. The cost of tests, as well as the shipping charge, shall be paid by the manufacturer.

The specifications that the modulation monitor shall meet before it will be approved by the Commission are as follows:

1. A DC meter for setting the average rectified carrier at a specific value and to indicate changes in carrier intensity during modulation.

2. A peak indicating light or similar device that can be set at any predetermined value from 50 to 120 percent modulation to indicate on positive peaks, and/or from 50 to 100 percent negative modulation.

3. A semi-peak indicator with a meter having the characteristics given below shall be used with a circuit such that peaks of modulation of duration between 40 and 90 milliseconds are indicated to 90 percent of full value and the discharge rate adjusted so that the pointer returns from full reading to 10 percent of zero within 500 to 800 milliseconds. A switch shall be provided so that this meter will read either positive or negative modulation and, if desired, in the center position it may read both in a full-wave circuit.

The characteristics of the indicating meter are as follows:

Speed—The time for one complete oscillation of the pointer shall be 290 to 350 milliseconds. The damping factor shall be between 16 and 200. The useful scale length shall be at least 2.3 inches. The meter shall be calibrated for modulation from 0 to 110 percent and in decibels below 100 percent with 100 percent being 0 DB.

The accuracy of the reading on percentage of modulation shall be ±2 percent for 100 percent modulation, and ±4 percent of full scale reading at any other percentage of modulation.

4. The frequency characteristics curve shall not depart from a straight line more than ±½ DB from 30 to 10,000 cycles. The amplitude distortion or generation of audio harmonics shall be kept to a minimum.

5. The modulation meter shall be equipped with appropriate terminals so that an external peak counter can be readily connected.

6. Modulation will be tested at 115 volts ±5 percent and 60 cycles, and the above accuracies shall be applicable under these conditions.

7. All specifications not already covered above, and the general design, construction, and operation of these units must be in accordance with good engineering practice.

### 17. USE OF LOW TEMPERATURE COEFFICIENT CRYSTALS BY BROADCAST STATIONS

Section 3.62 requires that authority from the Commission shall be obtained before installing new automatic frequency control equipment or making changes in existing automatic frequency control equipment that may affect the precision of the frequency control. Therefore, licensees of standard broadcast stations desiring to install crystals of the low temperature coefficient type must obtain authorization therefor from the Commission. Requests for such authority may be made by letter specifying the manufacturer's name (see list of

manufacturers of approved crystals below) and the guaranteed temperature coefficient and accuracy of calibration.

Use of a properly ground low temperature coefficient crystal normally materially increases the frequency stability, particularly where the equipment is subject to wide variations in ambient temperature. Where a crystal of this type is installed in the automatic frequency control unit but not in the approved frequency monitor, the stability of the control unit becomes considerably better than that of the monitor and unless care is exercised in making frequency adjustments, off frequency operation may occur. Therefore, it is recommended that when the crystal in the frequency control unit is changed to one of the low temperature coefficient type, a crystal of equal or better temperature coefficient and accuracy be installed in the monitor, authority for which may be requested by letter in the same manner as for installation in the automatic frequency control unit.

Manufacturers desiring approval of crystals of the low temperature coefficient type must submit under oath data on several such typical crystals manufactured by them showing that the temperature coefficient is not in excess of three parts per million per degree Centigrade, and further affirming that no crystal of this type having a temperature coefficient in excess of this value will be supplied to any broadcast station and that all crystals so supplied will be ground to within five parts per million of the assigned frequency of the station for the normal operating temperature specified.

*Manufacturers of Low Temperature Coefficient Crystals Which Have Been Accepted by the Commission*

Bellefonte Eng. Labs., Bellefonte, Pa.
Premier Crystal Labs. Inc., 53–63 Park Row, New York City.
RCA Mfg. Co., Camden, New Jersey.
Precision Piezo Service, Baton Rouge, La.
Scientific Research Laboratories, Hyattsville, Md.
Commercial Radio Equipment Co., 216 E. 74th Street, Kansas City, Missouri.
Hollister Crystal Co., Merriam, Kansas.
Piezo Electric Laboratories, New Dorp, New York.
Collins Radio Co., Cedar Rapids, Ia.
Western Electric Co., New York, N. Y.
William W. L. Burnett, San Diego, Calif.
American Piezo Supply Co., Kansas City, Mo.
Bliley Electric Co., Union Station Bldg., Erie, Pennsylvania.
Hipower Crystal Co., 2035 W. Charleston Street, Chicago, Illinois.
Precision Crystal Laboratories, P. O. Box 326, Springfield, Massachusetts.

18. MONEY REQUIRED TO CONSTRUCT AND COMPLETE ELECTRICAL TESTS OF STATIONS OF DIFFERENT CLASSES AND POWERS

Section 3.24 (c) requires that an applicant for a standard broadcast station show that it is financially qualified to construct and operate the proposed station.

It is considered that the money specified below is required to construct and complete electrical tests of a new standard broadcast station of the class and power indicated, in accordance with the requirements of the Rules and Regulations of the Commission and good engineering practice.

| Power and class of station: | Money required |
|---|---|
| 100 Watts, Class IV | $6,500 |
| 250 Watts, Class IV | 8,500 |
| 250 Watts, Class II | 10,000 |
| 500 Watts, Class II or III | 22,500 |
| 1,000 Watts, Class II or III | 25,000 |
| 5 kw, Class II or III | 40,000 |
| 10 kw, Class I or II | 65,000 |
| 25 kw, Class I or II | 175,000 |
| 50 kw, Class I or II | 200,000 |

Attention is invited to the fact that the above figures are considered the minimum required for satisfactory installation, including the transmitter, antenna system, monitoring equipment and equipment for one large and one small studio of average dimensions and equipment including microphones, speech input equipment, and usual acoustical treatment, but exclusive of the cost of land and buildings and organization and development costs in more elaborate installations including directional antenna would increase the cost accordingly.

19. USE OF COMMON ANTENNA BY STANDARD BROADCAST STATIONS OR ANOTHER RADIO STATION

Section 3.45 (e) permits the simultaneous use of the same antenna or antenna structure by two standard broadcast stations or a standard broadcast station and a station of another service or class only when both are licensed to the same licensee.

Such simultaneous use may be authorized to the same licensee provided:

1. Complete verified engineering data are submitted showing that satisfactory operation of each station will be obtained without adversely affecting the operation of the other station.

2. The requirements of Section 3.45 (a) and (b) are met with respect to the minimum antenna height or field intensity for each standard broadcast station concerned.

20. USE OF FREQUENCY AND MODULATION MONITORS AT AUXILIARY BROADCAST TRANSMITTERS

Sections 3.60 and 3.55 (b) require that each standard broadcast station have approved frequency and modulation monitors in operation at the transmitter.

The following shall govern the installation of approved *frequency* and *modulation* monitors at auxiliary transmitters of standard broadcast stations in compliance with these rules:

In case the auxiliary transmitter location is at a site different from that of the main transmitter, an approved *frequency* monitor shall be installed at the auxiliary transmitter except when the frequency of the auxiliary transmitter can be monitored by means of the frequency monitor at the main transmitter.

The licensee will be held strictly responsible for any frequency deviation of the auxiliary transmitter in excess of fifty cycles from the assigned frequency, even though exempted by the above from installing an approved frequency monitor. Furthermore, whenever the auxiliary transmitter is operated without a frequency monitor under this exemption, it shall be monitored by means of the frequency monitor at the main transmitter.

Installation of an approved *modulation* monitor at the location of the auxiliary transmitter, when different from that of the main transmitter, is optional with the licensee. However, when it is necessary to operate the auxiliary transmitter beyond two calendar days, a modulation monitor shall be installed and operated at the auxiliary transmitter. The monitor (if taken from the main transmitter) shall be reinstalled at the main transmitter immediately upon resumption of operation of the *main transmitter*.

In all cases where the auxiliary transmitter and the main transmitter have the same location, the same frequency and modulation monitors may be used for monitoring both transmitters, provided they are so arranged as to be readily switched from one transmitter to the other.

Standard broadcast stations not complying with these requirements cannot be considered as operating in compliance with the rules governing such operation.

21. APPROVED FREQUENCY MONITORS

Section 3.60 requires that each standard broadcast station shall have in operation at the transmitter an approved frequency monitor [*] independent of the frequency control of the transmitter.

The following frequency monitors have been approved as in compliance with the specifications issued pursuant to Section 3.60:

[*] These monitors have a limited range over which the visual indicator will operate and accordingly it is necessary that auxiliary aural means be provided in conjunction with the monitor to indicate deviations, if considerably in excess of 50 cycles, such as may occur because of defective transmitting apparatus or other causes. In approving the monitors the Commission expects that this auxiliary equipment will be used by all broadcast licensees and will not accept as satisfactory explanations of any frequency deviation which may occur simply on the basis that it was not indicated by the monitor.

| Manufacturer's name | Type | Approval No. |
|---|---|---|
| DeForest Radio Company. | A B M – 106, Model A. | 1451 |
| General Radio Company. | Oscillator, Type 475–A or B. | 1452 |
| | Deviation Meter, Type 681. | |
| | Quartz Plate, Type 376–J or L. | |
| Western Electric Company. | 1–A | 1453 |
| | Oscillator, 700–A modified. | |
| RCA Victor Company | EX–4180 | 1454 |
| Doolittle and Falknor, Inc. | FD–1 | 1455 |
| Bremer Broadcasting Corp. | A | 1456 |
| H. O. Boehme, Inc. | 5–M | 1456 |
| International Broadcasting Equipment Company. | Type 60 | 1457 |
| Piezo Electric Laboratories. | PM–125–A | 1458 |
| Pillar of Fire | A | 1459 |
| Hygrade Sylvania Corporation. | Model 30 J | 1460 |

22. APPROVED MODULATION MONITORS AND LOGGING OF INDICATIONS

Section 3.55 (b) requires that each standard broadcast station shall have an approved modulation monitor in operation at the transmitter.

The following modulation monitors have been approved as in compliance with the specifications issued pursuant to Section 3.55 (d):

| Manufacturer's name | Type No. | Approval No. |
|---|---|---|
| General Radio Company | 731–A | 1551 |
| RCA Manufacturing Company | 66–A | 1552 |
| RCA Manufacturing Company | 66–B | 1553 |

23. APPROVED EQUIPMENT

Sections 3.41 to 3.64 govern the design, construction, and technical operation of standard broadcast equipment. There is listed below the equipments which have been approved as in compliance with these rules in accordance with the provisions of "Requirements for Type Approval of Broadcast Transmitters and Automatic Frequency Control Equipment."

American Piezo Supply Company, 40th & Woodland Ave., Kansas City, Mo.:

Type No. C–X–1, Automatic Frequency Control Unit.
Type No. C–X–1–P, Automatic Frequency Control Unit with Power Supply.
Type No. C–X–7–C, Automatic Frequency Control Unit.

American Sales Company, 44 W. 18th St., New York City:

Catalogue No. 601, 50 watt Broadcast Transmitter (includes REL Cat. No. 285 AFCU).

Bliley Electric Company, 203 Union Station Building, Erie, Pa.:

Type No. BC 46, Automatic Temperature Control Unit.

Collins Radio Company, Cedar Rapids, Iowa:

Type No. 10L, Automatic Frequency Control Unit.
Type No. 10S, Automatic Frequency Control Unit.
Type No. 10S–1, Automatic Frequency Control Unit.
Type No. 20A, 500-watt Broadcast Transmitter.
Type No. 20C, 1,000-watt Broadcast Transmitter.
Type No. 20C–1, 1,000-watt Broadcast Transmitter.
Type No. 20C–2, 1,000-watt Broadcast Transmitter.
Type No. 20D, 1,000-watt Broadcast Transmitter.
Type No. 20E, 1,000-watt Broadcast Transmitter.
Type No. 20H, 1,000-watt Broadcast Transmitter.
Type No. 20J, 1,000-watt Broadcast Transmitter.
Type No. 21C, 5,000-watt Broadcast Transmitter.
Type No. 21D, 5,000-watt Broadcast Transmitter.
Type No. 40A, Automatic Frequency Control Unit.
Type No. 40A–1, Automatic Frequency Control Unit.
Type No. 40C, Automatic Frequency Control Unit.
Type No. 40D, Automatic Frequency Control Unit.
Type No. 300B–100w, 100-watt Broadcast Transmitter.
Type No. 300B–250w, 250-watt Broadcast Transmitter.
Type No. 300C, 250-watt Broadcast Transmitter.
Type No. 300C–1, 250-watt Broadcast Transmitter.
Type No. 300D, 100-watt Broadcast Transmitter.
Type No. 300D–1, 100-watt Broadcast Transmitter.
Type No. 300D–2, 100-watt Broadcast Transmitter.
Type No. 300D–3, 100-watt Broadcast Transmitter.
Type No. 300E, 100-watt Broadcast Transmitter.
Type No. 300F, 250-watt Broadcast Transmitter.

Commercial Radio Equipment Company, 7205 Baltimore St., Kansas City, Mo.:

Type No. FC–2, Automatic Frequency Control Unit.

DeForest Radio Company (Now owned by RCA Victor Co., Inc., Camden, N. J.):

Type No. ABM 104, automatic Frequency Control Unit Model B.
Type No. 107–A, 50-watt Broadcast Transmitter Model TBM 104.
Type No. 107–B, 100-watt Broadcast Transmitter Model TBM 105.
Type No. 109–C, 250-watt Broadcast Transmitter.
Type No. 104–A, 500-watt Broadcast Transmitter.
Type No. 116–A, 1,000-watt Broadcast Transmitter.
Type No. 105–B, 5,000-watt Broadcast Transmitter.

Doolittle and Falknor Inc., 1306 W. 74th St., Chicago, Ill.:

Type No. OB–1, Automatic Frequency Control Oscillator and Amplifier Unit (includes Type 1–B ATCC).
Type No. OB–2, Automatic Frequency Control Unit (includes Type 1–B ATCC).
Type No. OB–5, Automatic Frequency Control Unit (includes Type TC–1 ATCU).
Type No. TC–1, Automatic Temperature Control Unit (includes Type 2–A ATCC).
Type No. 100–B, 100-watt Broadcast Transmitter (includes Type OB–2 or OB–5 AFCU).
Type No. 250–B, 250-watt Broadcast Transmitter (includes Type OB–2 or OB–5 AFCU).

Gates American Corp., Quincy, Illinois:

Type No. 25–A, Automatic Frequency Control Unit.
Type No. 100–A, 100-watt Broadcast Transmitter.
Type No. 250–A, 250-watt Broadcast Transmitter.

Hygrade Sylvania Corp., Electronics Dept., Clifton, N. J.:

Type No. 120–A, 100-watt Broadcast Transmitter (only one built for WNRA).
Type No. 121–A, 100-watt Broadcast Transmitter.
Type No. 162–A, 250-watt Broadcast Transmitter.
Type No. 190–A, 500-watt Broadcast Transmitter.
Type No. 210–A, 750-watt Broadcast Transmitter (Rated 500 watt for Broadcast Service).
Type No. 241–A, 1-kw Broadcast Transmitter.
Type No. 260–A, 5-kw Broadcast Transmitter.
Type No. 270–A, 10-kw Broadcast Transmitter.

International Broadcasting Equipment Co., 312 W. 51st Street, Chicago, Illinois:

Type No. 6–B, Automatic Frequency Control Unit (for use WE equipment).
Type No. 52–A, Automatic Frequency Control Unit.
Type No. 52–B, Automatic Frequency Control Unit.
Type No. 100–250–38, 250-watt Broadcast Transmitter.

Kluge Radio Company, 1041 North Bonnie Brae, Los Angeles, Calif. (formerly National Broadcasting Equipment Co., Scottsbluff, Nebr.):

Type No. 4–B, 100-watt Broadcast Transmitter.
Type No. 4–C, 250-watt Broadcast Transmitter.

Type No. 4–D, 100-watt Broadcast Transmitter.

Piezoelectric Laboratories, 612 Rockland Ave., New Dorp, N. Y.:

Type No. TC–210, Automatic Temperature Control Oven and Relay Unit.
Type No. TC–350, Automatic Temperature Control Oven and Relay Unit.
Type No. OB–10, Oscillator and Amplifier Unit (Oscillator and first buffer, no ATCU or crystal).
Type No. OB–20, Amplifier Unit (second buffer).

Precision Piezo Service, 427 Asia St., Baton Rouge, La.:

Type No. 50–M, Automatic Temperature Control Unit.

Premier Crystal Laboratories, Inc., 53–63 Park Row, New York, N. Y.:

Type No. 350–A, Automatic Frequency Control Unit.

RCA Victor Inc., Camden, New Jersey:

Type No. EX–4170, Automatic Frequency Control Unit.
Type No. UL–4252–A, Automatic Frequency Control Unit.
Type No. UL–4252–X, Automatic Frequency Control Unit.
Type No. UL–4292, Automatic Frequency Control Unit.
Type No. OA–1A, Automatic Frequency Control Unit.
Type No. OA–1B, Automatic Frequency Control Unit.
Type No. 100–E, 100-watt Broadcast Transmitter.
Type No. 100–G, 100-watt Broadcast Transmitter.
Type No. 100–H, 100-watt Broadcast Transmitter.
Type No. 100–W, 100-watt Broadcast Transmitter.
Type No. 250–D, 250-watt Broadcast Transmitter.
Type No. 250–E, 250-watt Broadcast Transmitter.
Type No. 250–F, 250-watt Broadcast Exciter Unit.
Type No. 250–G, 250-watt Broadcast Transmitter.
Type No. 250–W, 100/250-watt Broadcast Transmitter.
Type No. ET–4230, 100-watt Broadcast Transmitter.
Type No. ET–4240, 100-watt Broadcast Transmitter.
Type No. ET–4240–A, 100-watt Broadcast Transmitter.
Type No. ET–4250, 250-watt Broadcast Transmitter.
Type No. ET–4250–A, 250-watt Broadcast Transmitter.
Type No. 1001–C, 500/1,000-watt Broadcast Transmitter (NG 250 watts).
Type No. 1001–D (1–D), 500- and 1,000-watt Broadcast Transmitter.
Type No. ET–4251AA, 1-kw. Amplifier Unit.
Type No. AA–4251, 1-kw. Power Amplifier and Modulator Unit (added to Type ET–4250 makes Type 1001–D.)
Type No. 1–D–A, 500-watt Broadcast Transmitter (modified for 500 watts).
Type No. 1–D–A, 1,000-watt Broadcast Transmitter.
Type No. 1–D–B, 1,000-watt Broadcast Transmitter.
Type No. 1–E–A, 1,000-watt Broadcast Transmitter.
Type No. 1–G, 1,000-watt Broadcast Transmitter.
Type No. 1005–B, 5-kw Broadcast Transmitter.
Type No. 1005–C (5–C), 5-kw Broadcast Transmitter.
Type No. 5–C–1, 5-kw Broadcast Transmitter.
Type No. 5–C–B, 5-kw Broadcast Transmitter.
Type No. 5–D, 5-kw Broadcast Transmitter.
Type No. 5–D–1, 5-kw Broadcast Transmitter.
Type No. 5–D–2, 5-kw Broadcast Transmitter.
Type No. 5–DX, 5-kw Broadcast Transmitter.
Type No. A–10–A, 10-kw Power Amplifier.
Type No. 10–C, 10-kw Broadcast Transmitter.
Type No. 10–C–A, 10-kw Broadcast Transmitter.
Type No. 10–C–B, 10-kw Broadcast Transmitter.
Type No. 10–D, 10-kw Broadcast Transmitter.
Type No. 1050–B, 50-kw Broadcast Transmitter.
Type No. 50–C, 50-kw Power Amplifier.
Type No. 50–D, 50-kw Power Amplifier.
Type No. 50–C, 50-kw Broadcast Transmitter.
Type No. 50–D, 50-kw Broadcast Transmitter.
Type No. 500–A, 500-kw Power Amplifier and Modulator Unit.

Radio Engineering Laboratories Inc., 100 Wilbur Ave., Long Island City, N. Y.:

Catalogue No. 285, Automatic Frequency Control Unit.
Catalogue No. 256, 100-watt Broadcast Transmitter.

R. C. Powell & Co. Inc. (No longer in business.)

Type No. 3–K, Automatic Temperature Control Chamber.
Type No. 1–K, Automatic Frequency Control Unit.
Type No. 43–B, 100-watt Broadcast Transmitter.
Type No. 21–K, 250-watt Broadcast Transmitter.
Type No. 8–K, 1,000-watt Broadcast Transmitter.

D. V. Tostenson, Moorhead, Minn.:

Type No. 1–C, Automatic Frequency Control Unit.
Type No. 2–C, Automatic Frequency Control Unit.
Type No. 3–B, Automatic Temperature Control Chamber.
Type No. 101–B, 100-watt Broadcast Transmitter.
Type No. 250–B, 250-watt Broadcast Transmitter.

Western Electric Company, 195 Broadway, New York City:

Type No. 700–A, Automatic Frequency Control Unit.
Type No. 700–B, Automatic Frequency Control Unit.
Type No. 702–A, Automatic Frequency Control Unit.
Type No. D–90684, Automatic Frequency Control Unit.
Type No. 20–A, 100/250-watt Broadcast Transmitter.
Type No. 301–A, 100-watt Broadcast Transmitter.
Type No. 12–A, former code number.
Type No. 302–A, 250-watt Broadcast Transmitter.
Type No. 303–A, 500-watt Broadcast Transmitter.
Type No. 304–A, 1-kw. Broadcast Transmitter.
Type No. 301–B, 100-watt Broadcast Transmitter.
Type No. 12–B, former code number.
Type No. 302–B, 250-watt Broadcast Transmitter.
Type No. 303–B, 500-watt Broadcast Transmitter.
Type No. 304–B, 1-kw Broadcast Transmitter.
Type No. 302–C, 250-watt Broadcast Transmitter.
Type No. 303–C, 500-watt Broadcast Transmitter.
Type No. 304–C, 1,000-watt Broadcast Transmitter.
Type No. 306–A, 50-kw Broadcast Transmitter.
Type No. 306–B, 50-kw Broadcast Transmitter.
Type No. 310–A, 100-watt Broadcast Transmitter.
Type No. 310–B, 250-watt Broadcast Transmitter.
Type No. 310–C, 500-watt Broadcast Transmitter.
Type No. 310–D, 1,000-watt Broadcast Transmitter.
Type No. 350C–1, 100-watt Broadcast Transmitter.
Type No. 351E–1, 250-watt Broadcast Transmitter.
Type No. 352E–1, 500-watt Broadcast Transmitter.
Type No. 353A–1, 1-kw Broadcast Transmitter.
Type No. 353B–1, 1-kw Broadcast Transmitter.
Type No. 353C–1, 1-kw Broadcast Transmitter.
Type No. 353D–1, 1-kw Broadcast Transmitter.
Type No. 353E–1, 1-kw Broadcast Transmitter.
Type No. 355B–1, 5-kw Broadcast Transmitter (Type No. 301B transmitter with D–97088 amplifier).
Type No. 355D–1, 5-kw Broadcast Transmitter (Former Type No. 5-kw AC).

Type No. 355E–1, 5-kw Broadcast Transmitter.
Type No. 403A–1, 1-kw Broadcast Transmitter.
Type No. 405A–1, 5-kw Broadcast Transmitter.
Type No. 405B–1, 5-kw Broadcast Transmitter.
Type No. 406A–1, 10-kw Broadcast Transmitter.
Type No. 407–A–1, 50-kw Broadcast Transmitter.
Type No. 407–A–2, 50-kw Broadcast Transmitter.
Type No. 407–A–3, 50-kw Broadcast Transmitter.
Type No. 407–A–4, 50-kw Broadcast Transmitter.
Type No. D94989, 5-kw Broadcast Transmitter.
Type No. D–94990, 5-kw Broadcast Transmitter.
Type No. D–94991, 5-kw Broadcast Transmitter.
Type No. D–94992, 5-kw Broadcast Transmitter.
Type No. D–94993, 1-kw Broadcast Transmitter.
Type No. D–94994, 1-kw Broadcast Transmitter.
Type No. D–94995, 50-kw Broadcast Transmitter.
Type No. D–96020, 1-kw Broadcast Transmitter.
Type No. D–96021, 1-kw Broadcast Transmitter.
Type No. D–97088, 5-kw Power Amplifier (may be used with 301–A or B, 302–A or B, 303–A or B or 304–A or B).
Type No. D–97088, Modified for 2½ kw Broadcast Transmitter.
Type No. D–96847, 5-kw Broadcast Transmitter.
Type No. D–96847, Modified 2½-kw Broadcast Transmitter.

Western Radio Engineering Company Inc., 5th and St. Peter St., St. Paul, Minn.:

Type No. F–100–A, Automatic Frequency Control Unit.

### 24. STANDARD BROADCAST APPLICATION FORMS

The Communications Act of 1934, as amended, and the Rules and Regulations of the Commission require that an application be made to the Commission for various authorizations. In order to be of aid to applicants there is set out below the correct forms to be submitted in making application for various authorizations applicable to standard broadcast stations.

In general, these forms shall be completed in full, answering each specific section. The only exception is in the technical sections when in the case of standard equipment which has been approved by type number by the Commission or when no change in such equipment is involved, in which cases, the manufacturer's name and type number of the approved equipment may be stated, or should be answered "no change" in each section applicable. All applications involving actual operation, such as license to cover construction permit, renewal of license, etc., shall be completed in full, regardless of whether such information has been previously filed with the Commission.

F. C. C. Form 301—Application for Standard Broadcast Station, Construction Permit or Modification Thereof shall be used for all applications for authority:

(1) To erect a new standard broadcast station.
(2) For any change in assignment involving construction as listed in (3) to (9) below:
(3) To install new transmitter.
(4) To make changes in existing equipment with respect to system of modulation.
(5) To change type of vacuum tubes in the last radio stage except to tubes of the same rating in accordance with Release "Power Rating of Vacuum Tubes."
(6) To change number of vacuum tubes in the last radio stage.
(7) To make any other change affecting the maximum-rated carrier power or type number of equipment.
(8) To change location of an existing transmitter or for approval of location previously authorized to be determined subject to Commission approval.
(9) To install directional antenna system.
(10) For modification of any outstanding construction permit which has not been covered by license.

F. C. C. Form 302—Application for Standard Broadcast Station License shall be used for all applications for license:

(1) To cover construction permit.
(2) To use the former main transmitter as the auxiliary transmitter when no new construction is involved.
(3) For regular authorization covering special experimental authorization.

F. C. C. Form 303—Application for Renewal of Standard Broadcast Station License shall be used for all applications for renewal of regular licenses of all standard broadcast stations.

F. C. C. Form 304—Application for Modification of Standard Broadcast Station License shall be used for all applications for modification of any term of an existing regular license of a standard broadcast station where a construction permit is not required:

(1) Change of frequency.
(2) Change of power where the equipment at present installed is capable of satisfactory operation at the proposed power.
(3) Change of time of operation.
(4) Change of location of main studio. (See Rule 31.11.)
(5) Change name of licensee where no change of ownership is involved.

F. C. C. Form 305—Application for Authorization to Install Automatic Frequency Control shall be used in making application for authority:

(1) To install new automatic frequency control equipment.
(2) To install new automatic temperature control chamber.
(3) Any other change affecting the accuracy or stability of the operating frequency of a standard broadcast station where an application for construction permit as above listed is not required.

F. C. C. Form 306—Application to Determine Operating Power of Broadcast Station by Direct Measurement of Antenna Power shall be used in making all applications for authority to determine power by the direct method.

F. C. C. Form 307—Application for Standard Broadcast Station Experimental Authorization or Extension Thereof shall be used in making application for—

(1) Any special experimental authorization under Rule 31.12.
(2) Any extension thereof.

NOTE: Attention is invited to Note 2 of F. C. C. Form 307 which reads: "Give detailed description by completing F. C. C. Forms 301, Sections 17, 18, 19 and 20, or 305, Sections 6 and 7, and any other form if more complete engineering description of proposed equipment can be given thereby."

F. C. C. Form 308—Application for Permit to Locate, Maintain or use Studio Apparatus for Production of Programs to be Transmitted or Delivered to Foreign Radio Stations shall be used in making application for all authorizations under Section 325 (b) of the Communications Act of 1934.

F. C. C. Form 327—Supplemental Statement of Facts Required under Section 308 of the Communications Act of 1934 regarding Station Equipment shall be submitted:

(1) Upon change of frequency authorized by modification of license or special experimental authorization.
(2) With all applications for license to cover construction permits made on F. C. C. Form 302 of issue prior to August 25, 1936.

NOTE: The information required under Sections (e), (f), (g) and (h) shall be obtained from operation during the experimental period and no operation shall occur during the regular broadcast day until the Commission has approved this information, which may be submitted by telegram, provided, F. C. C. Form 327, properly completed and executed, has been deposited in the United States mail and the telegram so states.

F. C. C. Form 701—Application for Additional Time to Construct a Radio Station shall be submitted for all extensions of commencement and/or completion dates of construction permits.

F. C. C. Form 314—Application for Consent to Assignment of Radio Station Construction Permit or License shall be used in all such cases in accordance with Rule 15.14.

F. C. C. Form 315—Application for Consent to Transfer of Control of Corporation Holding Construction Permit or Station License shall be used in all such cases in accordance with Rule 15.14.

F. C. C. Form 316—Inventory of Station Property shall be submitted with and as part of F. C. C. Forms 314 and 315 in accordance with requirements of Rule 15.14.

F. C. C. Form 705—Profit and Loss Statement shall be submitted with F. C. C. Forms 314 and 315 in accordance with the requirements of Rule 15.14.

F. C. C. Form 706—Balance Sheet shall be submitted with applications:

(1) For Construction Permit for a new Broadcast Station.

(2) For substantial changes for Existing Station.

(3) For consent to Assignment of Radio Station Construction Permit or License by

(a) the Assignor and
(b) the Assignee

(4) For Consent to Transfer of Control of a Licensed Corporation by

(a) the Licensed Corporation and
(b) the Transferee

Informal requests (letters or telegrams) may be filed for requests:

(a) To operate additional time.

(b) To discontinue operation or services not covered by Rule 34.01.

(c) To operate with additional power.

(d) To operate with reduced power not covered by Rule 33.10.

(e) To operate for test purposes (to determine site, etc.).

(f) To rebroadcast programs of stations of other classes.

(g) Other special temporary operation beyond terms of existing license.

(h) Temporary operation without specified items of equipment, or with temporary, substitute or auxiliary equipment.

(1) Operation without an approved frequency monitor.

(2) Operation without an approved modulation monitor.

(3) Operation without thermometer in automatic temperature control chamber.

(4) Operation without antenna ammeter, plate voltmeter or plate ammeter.

(5) Operation with substitute ammeter, plate voltmeter or plate ammeter.

(6) Operation with temporary antenna system.

(7) Operation with auxiliary transmitter as main transmitter.

(i) Operation with new or modified equipment pending repair of existing equipment, or pending receipt and action upon a formal application.

(j) Where formal application is not required, application for new or modified equipment or antenna system.

(k) Change of specifications for painting and lighting antenna towers where formal application is not required.

(l) Operation to determine power by direct method during program test period.

(m) Relocation of transmitter in same building.

(n) Operation with reduced power or time under Rules 33.10 and 34.01.

(o) Approval of types of equipment as to compliance with outstanding rules or standards.

(p) All authorizations for equipment and program tests, or extensions thereof, where it appears that compliance has been had with the terms of the construction permit.

(q) Denial of requests for equipment and program tests where specifications of construction permit have not been met.

(r) Withdrawal of authorizations for equipment and program tests where subsequent to the issuance of the original authorizations it appears that the terms of the construction permit have not been met.

(s) Extensions of time within which to comply with technical requirements specified in authorizations, orders and rules or releases of the Commission.

(t) Representations of compliance with technical requirements specified in authorizations, orders, rules or releases (except formal applications).

(u) Operation with licensed, new or modified equipment at a temporary location with a temporary antenna system in case of an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating at the licensed location.

### 25. FIELD OFFICES OF THE COMMISSION

Section 3.57 and other rules of the Commission require that in certain instances, the Inspector in Charge of the district in which the station is located, be advised of the conditions existing at the station. The following is a list of the radio districts giving the address of each field office of the Commission and the territory embraced in each district:

| Radio district | Address of the inspector in charge | Territory within district: States | Territory within district: Counties |
|---|---|---|---|
| 1 | Customhouse, 7th Floor, Boston, Mass. | Connecticut | All counties. |
| | | Maine | Do. |
| | | Massachusetts | Do. |
| | | New Hampshire | Do. |

## TITLE 49—TRANSPORTATION AND RAILROADS

### INTERSTATE COMMERCE COMMISSION

[No. M-17310]

WAIVE TARIFF RULES

AUTOMATIC POSTPONEMENT

[*Corrected Order* [1]]

JUNE 29, 1939.

Permission under Section 217 or 218 of the Motor Carrier Act, 1935, to depart from the requirements of the Commission's tariff regulations.

Present: John L. Rogers, Commissioner, to whom the above entitled matter has been assigned for action thereon.

*Ordered*, That all carriers by motor vehicle, subject to the Motor Carrier Act, 1935, and their duly appointed agents are hereby authorized to publish the following provisions in supplements announcing resuspension of the rates and other tariff provisions:

"If this supplement is not cancelled on or before (here insert date to which resuspended) the effective date of the above-described suspended schedules remaining under suspension on that date is hereby postponed to the date upon which this supplement is cancelled. The rates, charges, classifications, rules, regulations, practices, and other provisions, continued in force by the above-mentioned order of suspension, will apply during the period of this postponement unless changed under authority of special permission or order of the Interstate Commerce Commission."

*Provided*, That any supplement filed under this authority shall not include the announcement of suspension in more than one I. and S. Docket,

*Provided further*, That the authority granted hereby may be used only to postpone the effective date of suspended matter beyond the date of expiration of the second period of suspension,

*And provided further*, That the continuance of this authorization is made subject to the condition, that subject to the decision of the Commission in I. and S. Docket proceedings involved, carriers or their agents shall, with reasonable promptness, file schedules making final disposition of the matter under suspension or postponement.

*It is further ordered*, That supplements filed under this authority must bear the following notation:

"Departure from the Commission's tariff rules is authorized under special permission of the Interstate Commerce Commission No. M-17310 of June 29, 1939."

Dated at Washington, D. C., this 29th day of June 1939.

[1] 4 F.R. 2772 DI.

By the Commission, Commissioner Rogers.

## SECURITIES AND EXCHANGE COMMISSION.

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 5th day of July, A. D. 1939.

[File No. 43-227]

IN THE MATTER OF GENERAL WATER GAS & ELECTRIC COMPANY, INTERNATIONAL UTILITIES CORPORATION

NOTICE OF AND ORDER FOR HEARING

A declaration pursuant to section 7 of the Public Utility Holding Company Act of 1935, having been duly filed with this Commission by General Water Gas & Electric Company; an application pursuant to section 10 of the Public Utility Holding Company Act of 1935, having been duly filed with this Commission by General Water Gas & Electric Company; and an application pursuant to section 10 of the Public Utility Holding Company Act of 1935, having been duly filed with this Commission by International Utilities Corporation;

*It is ordered*, That a hearing on such matters be held on July 24, 1939, at 10:00 o'clock in the forenoon of that day, at the Securities and Exchange Building, 1778 Pennsylvania Avenue, N. W., Washington, D. C. On such day the hearing-room clerk in room 1102 will advise as to the room where such hearing will be held. At such hearing, if in respect of any declaration, cause shall be shown why such declaration shall become effective.

*It is further ordered*, That Edward C. Johnson or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice to continue or postpone said hearing from time to time.

Notice of such hearing is hereby given to such declarant or applicant and to any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before July 19, 1939.

The matter concerned herewith is in regard to—

(a) A declaration pursuant to Section 7 of the Public Utility Holding Company Act of 1935 by General Water Gas & Electric Company, a subsidiary of a registered holding company, with regard to the issue and sale at par of two promissory notes, (1) in the face amount of $1,200,000, with interest at the rate of 3%, to be sold to Chase National Bank, New York City, and (2) in the face amount of $1,000,000, with interest at the rate of 6%, to be sold to International Utilities Corporation, the parent of General Water Gas & Electric Company, such note to be subordinated to the note in the face amount of $1,200,000, which is to be sold to Chase National Bank; and

(b) An application by General Water Gas & Electric Company pursuant to Section 10 of the Public Utility Holding Company Act of 1935, with regard to the acquisition of 24,142 shares of the common stock, of the par value of $100 each, of California Water Service Company from Federal Water Service Corporation, a registered holding company, for a total price of $3,200,000; and

(c) An application by International Utilities Corporation pursuant to Section 10 of the Public Utility Holding Company Act of 1935, with regard to the acquisition by it of a promissory note in the face amount of $1,000,000 issued by General Water Gas & Electric Company to bear interest at the rate of 6% and to be subordinated to a note in the face amount of $1,300,000 to be issued and sold by General Water Gas & Electric Company to Chase National Bank.

By the Commission.

[File No. 58-16]

IN THE MATTER OF NORTHERN INDIANA PUBLIC SERVICE COMPANY

ORDER APPROVING SALE OF STOCK

Northern Indiana Public Service Company, a subsidiary of the Trustees of Midland Utilities Company, a registered holding company, having duly filed with this Commission an application pursuant to Rule U-12F-1 of the General Rules and Regulations under the Public Utility Holding Company Act of 1935 for approval of the sale of the 215,280 shares of the common capital stock of Chicago District Electric Generating Corporation, which it owns, to Commonwealth Edison Company of Chicago, Illinois, for the sum of $2,513,734.73, plus interest at the rate of 5% per annum from January 1, 1939 to the date of payment of the purchase price, plus an amount equal to 18.44% of any excess of the reserve for taxes on the books of Chicago District Electric Generating Corporation as at December 31, 1938 over the actual aggregate liability for taxes for the year 1938, less the amount of any reasonable expenses incurred by Chicago District Electric Generating Corporation in the determination of such liability; the Trustees of Midland Utilities Company having joined in and adopted said application of Northern Indiana Public Service Company;

A public hearing on said application having been held [1] after appropriate notice; the Applicant having waived a Trial Examiner's report, submission to it of proposed findings of fact by the Commission or requested findings of fact by counsel to the Commission, and the right to file briefs and make oral argument before the Commission prior to the making of the Commission's findings and the entry of its order herein; and the Commission having as of the date hereof made and filed its findings herein;

*It is ordered*, That said sale by Northern Indiana Public Service Company of said 215,280 shares of common capital stock of Chicago District Electric Generating Corporation, which it owns, to Commonwealth Edison Company be, and the same is hereby approved, subject, however, to the following conditions:

(1) That said sale shall be effected in accordance with the terms and conditions of, and for the purposes represented by, said application;

(2) That concurrently with said sale of said stock the proposed Electric Service Agreement between Applicant and Chicago District Electric Generating Corporation, marked Applicant's Exhibit #2 in these proceedings, shall be executed and delivered;

(3) That if the express approval and authorization of the sale by the Public Service Commission of the State of Indiana shall be revoked or otherwise terminated, this approval of said sale shall terminate immediately without further order of this Commission; and

(4) That within ten days after the consummation of said sale, Applicant shall file with this Commission a Certificate of Notification showing that said sale has been effected in accordance with the terms and conditions of, and for the purposes represented by, said application, and that said Electric Service Agreement was executed and delivered concurrently with said sale.

By the Commission.

IN THE MATTER OF PEOPLES NATURAL GAS COMPANY

ORDER FOR POSTPONEMENT

It appearing to the Commission that a hearing in the matter of the declaration of Peoples Natural Gas Company, filed pursuant to section 7 of the Public Utility Holding Company Act of 1935, has been set [1] for the 17th day of July, 1939 at 10:00 o'clock in the forenoon, in room 1102 of the offices of the Securities and Exchange Commission in Washington, D. C., and

It further appearing to the Commission that said hearing should be postponed for the reason that it will thus be possible to hold it on the day preceding another hearing to be held with respect to the same holding company system

*It is therefore ordered*, That the hearing in the above mentioned matter be and the same is hereby postponed until the 24th day of July, 1939, at 10:00 o'clock in the A. M. at the offices of the Securities and Exchange Commission, Washington, D. C., before Willis E. Monty, Trial Examiner. On such day the hearing room clerk in room 1102 will advise as to the room where the hearing will be held. All interested parties or persons will govern themselves accordingly and any and all witnesses heretofore subpoenaed in this matter, unless excused, shall appear and be present at said last mentioned time and place without further subpoena.

By the Commission.

[File No. 43-229]

IN THE MATTER OF NORTHERN NATURAL GAS COMPANY

NOTICE OF AND ORDER FOR HEARING

A declaration pursuant to section 7 of the Public Utility Holding Company Act of 1935, having been duly filed with this Commission by the above-named party;

*It is ordered*, That a hearing on such matter be held on July 25, 1939, at ten o'clock in the forenoon of that day, at the Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C. On such day the hearing-room clerk in room 1102 will advise as to the room where such hearing will be held. At such hearing, if in respect of any declaration, cause shall be shown why such declaration shall become effective.

*It is further ordered*, That Willis E. Monty or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice to continue or postpone said hearing from time to time.

Notice of such hearing is hereby given to such declarant or applicant and to any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before July 20, 1939.

The matter concerned herewith is in regard to the proposed issue and sale by declarant, a registered holding company, at private sale, of its First Mortgage and First Lien Bonds, Series A, 3¼% due July 1, 1954, in the amount of $16,000,000; and the issue and sale of its unsecured promissory notes bearing interest at 2½%, in the aggregate amount of $6,000,000, maturing serially in principal amounts of $500,000 on January 1 and July 1, commencing July 1, 1940, the last note maturing on January 1, 1946, to The Chase National Bank of the City of New York. Declarant states that the proceeds of the bonds are to be used for the retirement of all of the declarant's presently outstanding funded debt, and that the proceeds of the notes are to be used for the construction of a transmission line from near Sioux City, Iowa, to a point near Minneapolis, Minnesota, compressor station property, lateral pipe lines and distribution system incidental to the said extension and additions and improvements to declarant's present property, including distribution property of subsidiaries, gasoline manufacturing plant, telephone system, compressor station property, etc.

By the Commission.

JUL 2 1939

# FEDERAL REGISTER

THE NATIONAL ARCHIVES — LITTERA SCRIPTA MANET — 1934 — OF THE UNITED STATES

VOLUME 4 NUMBER 131

*Washington, Tuesday, July 11, 1939*

## *The President*

TO THE PEOPLE OF THE UNITED STATES:

Claude Augustus Swanson, Secretary of the Navy, died at his camp on the Rapidan River in the Shenandoah National Forest on the morning of Friday, July 7, 1939, at six minutes after eight o'clock.

Greatly loved by those who were privileged to know him and widely honored for his many years of faithful public service, this distinguished member of the President's Cabinet will be mourned throughout the nation.

Born and educated in the Old Dominion, he represented Virginia in Congress from 1893 until he resigned to become governor in 1906. Four years later he became a member of the United States Senate where he continued to serve until he was appointed Secretary of the Navy by President Roosevelt in 1933. It was a career which exemplifies the finest traditions of American public life.

As an expression of national mourning, the President directs that the flag of the United States be displayed at half-mast until sunset of the day of interment on all public buildings and at all military posts and naval stations and on all vessels of the United States.

By direction of the President,

[SEAL] CORDELL HULL *Secretary of State*

DEPARTMENT OF STATE,
*Washington, July 7, 1939.*

C.A.A recognizes the priority of the Marine Radiobeacon Service in the band 285–315 kc.
Navy Department use to be coordinated with the Civil Aeronautics Authority system of airway navigational aids.

*333 kc: To be used only as indicated in Section 5, Inter-American Arrangement in Habana, 1937.

*344 kc: War Department priority recognized for use of 343 kc for Fixed, Land and Airport traffic control operations outside the continental U. S.

*353 kc: Navy Department priority recognized for operations on 355 kc.

*355 kc: Available for non-Government stations for assignment to the U. S. Maritime Commission vessels for communication with Government stations.

*356 kc: Navy Department priority recognized for operations on 355 kc.

*360 kc: Subject to agreement with the Civil Aeronautics Authority.

*391 kc: Non-Government priority recognized for operations on 392 and 394 kc.

*396 kc: Non-Government priority recognized for operations on 396 kc.

*425 kc: Government priority recognized for existing maritime services on 394 kc, as regards the A3 operation on 396 kc.

*425 kc: A2 emission will be used only when absolutely necessary.

For those frequencies in the band 126,100 to 127,100 kc, wherever W or N appears after a frequency, it is the understanding that the Civil Aeronautics Authority may use such frequency only on the basis of noninterference to present or future Army and Navy stations which may employ them.

1. Such frequencies as are herein assigned to classes of stations for use in the Canal Zone are approved in conformity with section 305 of the Communications Act of 1934 as amended, or other applicable laws or treaties.

2. The symbols used in this Executive Order have the following meanings:

f. Foreign rights recognized in accordance with international agreements in force.

g. May be authorized for non-Government assignments provided no interference to Government assignments, present or future.

j. May be authorized for both Government and non-Government assignments.

n. May be authorized for Government assignments provided no interference to non-Government assignments, present or future.

s. Used continually for Government navigational aids for protection of life and property.

t. Not to interfere with assignments conforming to international treaties, regulations, or arrangements in force.

3. In this Executive Order the abbreviation "ACS" is used to indicate the Alaska Communication Sytem.

4. In this Executive Order the term "United States" shall be understood to include the forty-eight states, the District of Columbia, the territories and the possessions, except the Canal Zone.

5. In this Executive Order the term "outside the continental limits of the United States" shall be understood to include any United States area, such as Alaska, which is not within the forty-eight states and the District of Columbia.

6. In this Executive Order the term "Day Only" is defined as follows: From two hours after local sunrise until two hours before local sunset.

7. In this Executive Order the word "priority" means "not to cause objectionable interference."

8. In this Executive Order, unless otherwise indicated, when more than one agency is assigned the same frequency, relative priority between agencies, if existing, is indicated by the order of listing the frequency repeated on separate lines. When two or more agencies have equal priority the frequency itself is listed only once.

9. The Classes of Stations used in this Executive Order are defined as follows:

| | *No. of Paragraph of Definition in Cairo Regulations* |
|---|---|
| (1) *Fixed Station:* A station not capable of being moved, and communicating by radio with one or more stations established in the same manner | 26 |
| (2) *Land Station:* A station not capable of being moved, carrying on a mobile service | 27 |
| (3) *Coast Station:* A land station carrying on a service with ship stations. This may be a fixed station assigned also to communication with ship stations; in this case, it shall be considered as a coast station only for the duration of its service with ship stations | 31 |
| (4) *Aeronautical Station:*[1] A land station carrying on a service with aircraft stations. This may be a fixed station assigned also to communication with aircraft stations; in this case it shall be considered as an aeronautical station only for the duration of its service with aircraft stations. (For the purposes of this Order, an aeronautical station may be a mobile or portable station. An aeronautical station may also communicate with other aeronautical stations) | 32 |
| (5) *Mobile Station:*[2] A station capable of being moved and which ordinarily does move | 33 |
| (6) *Ship Station:* A station on board a ship which is not permanently moored. (This is a type of mobile station) | 35 |
| (7) *Aircraft Station:* A station on board any aircraft.[3] (This is a type of mobile station) | 36 |
| (8) *Vehicular Station:* A station on board a land vehicle. (This is a type of mobile station.) | |
| (9) *Portable Station:*[2] A station intended to be conveniently moved, but which is not usually used while in motion | 37 |
| (10) *Radio Direction Finding Station:* A station equipped with special apparatus for determining the direction of emissions of other stations | 39 |
| (11) *Special Station:* A station carrying on a special service. | |
| (12) *Aeronautical Fixed Station:* A fixed station used for the transmission, to one or more stations established in the same manner, of messages relating solely to the actual aviation needs of the operating agency. | |
| (13) *Aeronautical Marker Station:* A special station which is used to mark a definite point to assist in the guidance of aircraft. | |
| (14) *Aeronautical Range and Telephone Station:* A special station which provides radio range courses and radiotelephone information with respect to aircraft operations. | |
| (15) *Airport Traffic Control Station:* An aeronautical station used in connection with the movement of aircraft within the airport control area. | |
| (16) *Instrument Landing Glidepath Station:* A special station which is located at an airport and projects a radio glidepath for the purpose of assisting aircraft to make landings. | |
| (17) *Instrument Landing Localizer Station:* A special station which projects a radio range course across an airport for the purpose of facilitating landing. | |
| (18) *Marine Radiobeacon Station:*[4] A radiobeacon station established primarily for the service of ships. | |
| (19) *Aeronautical Radiobeacon Station:*[4] A radiobeacon station established primarily for the service of aircraft. | |
| (20) *Aerological Sounding Station:* A special station sent aloft for the purpose of obtaining information regarding atmospheric conditions. | |

[1] This definition is the same as contained in paragraph No. 32 of the Cairo Regulations except for the addition given in parentheses.

[2] A mobile station differs from a portable station in that the former ordinarily carries on communication while in motion.

[3] "Aircraft" is a general term including airplanes, dirigibles, free or captive balloons, etc.

[4] One class of radiobeacon station which is defined in paragraph No. 38 of the Cairo Regulations.

10. Unless otherwise specifically indicated, the maximum width of the frequency band of emission shall be as follows:

| Type of Emission | Carrier Frequency | Maximum width of Frequency Band of Emission |
|---|---|---|
| A1 | 10–100 kc | 0.100 kc |
| | 100–1,600 kc | 0.250 " |
| | 1,600–6,000 kc | 0.500 " |
| | 6,000 and above | 1.000 " |
| A2 | 100–6,000 kc | 2.000 kc |
| | 6,000–30,000 kc | 3.000 " |
| | 30,000 and above | 6.000 " |
| A3 | 100–6,000 kc | [1] 6.000 kc |
| | 6,000 and above | 10.000 " |
| A4 and A5 | | To be specified in each case. |

[1] Below 6,000 kc, A3 emission is considered to fall within plus and minus three kilocycles of the carrier frequency assigned.

11. The type of emission shown opposite a frequency is that of the maximum band width authorized. If the type of emission is not shown, A1 emission only is authorized.

12. The following Government experimental radio stations are authorized to use miscellaneous frequencies from time to time provided no interference is caused with other authorized services:

Navy Department: Naval Research Laboratory, Bellevue, D. C.; Annapolis, Md.

War Department: Fort Monmouth, N. J.; Wright Field, Ohio.

Department of Commerce: National Bureau of Standards, Washington, D. C.; Beltsville, Md.; Meadows, Md.

13. A radio station in any class to which a frequency is assigned herein may use such frequency in accordance with the terms of that assignment, only after approval by the Interdepartment Radio Advisory Committee, except that such approval is not required for mobile and portable stations, nor for stations of other classes when the station power is below limits specified for each class by the Interdepartmental Radio Advisory Committee.

14. A Government station may operate, during a period not exceeding two months, on frequencies other than those assigned to it for the purpose of selecting a frequency more suitable for a particular service before requesting authority for a change in frequency, provided that it first gives notice as to such use to the Interdepartment Radio Advisory Committee, and also to the Federal Communications Commission if the frequency is not assigned by Executive Order, and provided further that it will cease operation on notice of interference from the Interdepartment Radio Advisory Committee or the Federal Communications Commission. Such operation may be extended or renewed upon approval by the Interdepartment Radio Advisory Committee.

15. The Interdepartment Radio Advisory Committee may authorize any Government radio station to conduct experimental operations upon a frequency assigned to some other Government station by Executive Order, or upon any frequency in the bands 144,000–156,000 kc, 168,000–180,000 kc, 192,000–204,000 kc, 216,000–224,000 kc, 230,000–234,000 kc, 246,000–258,000 kc, 270,000–282,000 kc, 294,000–300,000 kc, or upon any frequency above 300,000 kc, or to conduct manufacturing tests on any frequency, for such period as the Committee may deem necessary, provided that such station shall cease such operations upon receipt of notice of interference from the Interdepartment Radio Advisory Committee. The Interdepartment Radio Advisory Committee may also authorize interim operation on any frequency, pending issuance of a new Executive Order, with the same proviso.

16. Any frequency authorized by the Federal Communications Commission for ship service may be employed by Government mobile stations when communicating with non-Government stations.

17. Any mobile station may operate on a frequency assigned to a Government station in the mobile service when directed to do so by the latter.

18. No department shall close a station no longer needed by it which is serving other Government departments without first giving due notification to the other Government departments concerned.

This Executive Order supersedes Executive Order No. 7251 of December 19, 1935.

This order shall be published in the FEDERAL REGISTER.

## EXECUTIVE ORDER

### AMENDING THE FOREIGN SERVICE REGULATIONS OF THE UNITED STATES

By virtue of and pursuant to the authority vested in me by section 1752 of the Revised Statutes of the United States (22 U.S.C. § 132), it is ordered that the Foreign Service Regulations of the United States be, and they are hereby, amended by prescribing the following as Chapter IX thereof:

#### CHAPTER IX—RELATIONS WITH OTHER DEPARTMENTS

#### *Attachés*

IX–1. *Assignment and commissioning of attachés.* Attachés shall be assigned by the Secretaries of their respective departments and commissioned by the Secretary of State to reside at the seats of the various missions as the public interests demand. A diplomatic representative shall promptly inform the Foreign Office of the country to which he is accredited of the designation of an attaché to his mission.

IX–2. *Duties of attachés.* The duties of attachés are such as may be assigned to them by the heads of their respective departments, from whom they receive their instructions and to whom they shall report. These duties, while not under the direction or control of the chief of mission, shall be subject to his supervision.

In ceremonial matters, attachés are subject to the direction of the chief of mission, and are responsible to him for their personal conduct. The diplomatic representative shall report to the Department of State any conduct of the attachés which he considers unbecoming or embarrassing to the mission.

#### *Relative Rank*

IX–3. *Relative rank.* The rules of precedence to be observed as between officers of the Department of State, officers of other departments, and other officials of the Government of the United States assigned abroad shall be such as are prescribed by the President.

#### *Navy*

IX–4. *Classification of visits of American naval vessels to foreign ports.* The term "visits of courtesy" shall be used to designate visits of a more or less formal nature of naval vessels to ports in foreign countries in which there is an exchange of official entertainment.

Visits in which formalities are restricted to the usual salutes and customary calls shall be designated "informal visits".

Unless specifically designated as visits of courtesy, all visits of United States naval vessels shall be regarded as informal visits.

IX–5. *Official calls between naval officers and officers of the Foreign Service.*

(a) *Calls between naval officers and diplomatic officers.* Upon the arrival of a naval vessel of the United States in a foreign port where there are diplomatic officers of the United States, the following procedure in regard to official calls shall be observed:

(1) A flag officer will pay the first visit to a diplomatic officer of, or above, the rank of chargé d'affaires.

(2) A commanding officer will pay the first visit to a diplomatic officer of, or above, the rank of chargé d'affaires.

The senior naval officer present shall, if necessary, arrange to furnish a suitable boat to enable a diplomatic representative to pay official visits afloat. Official visits shall be returned within 24 hours.

(b) *Calls between naval officers and consular officers.* When a naval vessel visits a port where there is a consular officer, the procedure in paying official calls shall be as follows:

(1) A flag officer receives the first visit from a consular officer regardless of the latter's rank.

(2) A captain commanding a vessel pays the first call to a consul general and receives the first call from other consular officers.

(3) A commanding officer below the rank of captain pays the first visit to a consular officer in charge of a consulate.

When the consular officer pays the first visit, the commanding officer shall send a boat ashore with an officer on board to call on the consular officer and tender him a passage to the ship at such time as he may select. The consular officer shall accept the invitation to visit the commanding officer within 24 hours, and shall tender to him his official services.

When the commanding officer pays the first visit to a consular officer, the latter shall return the visit within 24 hours.

IX–6. *Services for the Navy.* Foreign Service officers shall cooperate with officers of the United States Navy to the fullest possible extent. However, in matters involving the expenditure of funds

[No. 8193–A]

they shall be governed by the provisions of section V–45.

Consular officers shall extend necessary relief and assistance to personnel of naval vessels left under their care by reason of illness, injury, or for other causes, or who desert or straggle in foreign ports, *provided* that the consular officer has first received such express written authorization from a commanding officer of the Navy or the Navy Department as will enable him to obtain reimbursement from the Navy Department for any outlay made.

IX–7. *Presence of naval force in foreign port not to be requested except in public emergency.* Diplomatic representatives and consular officers shall not request the presence of a naval force in a foreign port unless a public emergency so necessitates. The request may be addressed to the officers in command of the naval force, in which event responsibility of action rests with them, or it may be addressed to the Department of State. In either case, the request should contain detailed reasons for its submission.

*Treasury*

IX–8. *Quarantine laws and regulations.* Consular officers shall familiarize themselves with and shall perform the duties prescribed for them by the provisions of the Quarantine Act of February 15, 1893, as amended (42 U.S.C. §§ 82, 92, 93, 94), and by the regulations promulgated thereunder by the Secretary of the Treasury, appearing in the current edition of the pamphlet entitled "Quarantine Laws and Regulations", as amended, or elsewhere.

IX–9. *Relief extended personnel of Coast Guard stranded in foreign ports.* Consular officers shall extend relief to members of the Coast Guard on active duty (not on leave status) who become stranded in foreign ports as follows:

(a) When a vessel of the Coast Guard is based in a foreign port, relief shall be afforded until the arrival of a Coast Guard cutter in port, when the person concerned shall be delivered to the commanding officer of the vessel.

(b) When a vessel of the Coast Guard has permanently cleared from a foreign port, relief shall be afforded, and the Department of State shall be immediately notified and instructions awaited relative to the disposition to be made of the person concerned.

Expenses incurred for the relief of Coast Guard personnel shall be included as a separate item supported by proper vouchers in the regular accounts of the office extending relief.

*Veterans' Administration*

IX–10. *Duties of consular officers in connection with Veterans' Administration activities abroad.* Consular officers shall perform such duties for and submit such reports through the Department of State to the Veterans' Administration as may from time to time be required of them. They are also charged with the general supervision of Veterans' Administration activities abroad and in connection therewith shall report immediately through the Department of State any information which may assist the Veterans' Administration in the efficient discharge of its responsibilities to its beneficiaries who reside in foreign countries.

*Cancellation of Regulations*

The following provisions of the Foreign Service Regulations of the United States are hereby canceled:

*Part I*

Sections IV–1 to IV–7 inclusive.

*Part II*

Sections IV–76, XV–270, XXII–375, XXII–376, XXII–377, XXII–379, XXII–380, XXIV–441, and XXIV–477.

Chapter VIII.

*Revocation of Executive Orders*

Executive Order No. 724, dated January 3, 1908, and No. 2483, dated November 5, 1916, are hereby revoked.

FRANKLIN D ROOSEVELT

THE WHITE HOUSE,
*July 8, 1939.*

## *Rules, Regulations, Orders*

### TITLE 7—AGRICULTURE

### AGRICULTURAL ADJUSTMENT ADMINISTRATION

[P–5]

PART 741—1939 PRICE ADJUSTMENT PROGRAM REGULATIONS

SUPPLEMENT NO. 4

By virtue of the authority vested in the Secretary of Agriculture by the Price Adjustment Act of 1938, approved June 21, 1938 (Title V of Public Res. No. 122, 75th Congress; 52 Stat. 819), and pursuant to the provisions of Sections 301 and 303 of the Agricultural Adjustment Act of 1938, approved February 16, 1938 (Public Law No. 430, 75th Congress, 3d Session; 52 Stat. 43, 45), and the second paragraph of Section 15 of the Soil Conservation and Domestic Allotment Act, as amended by Section 104 of the Agricultural Adjustment Act of 1938 (Public Law No. 430, 75th Congress, 3d Session; 52 Stat. 35), the 1939 Price Adjustment Program Regulations, as amended,[1] are hereby amended as follows:

Section 741.6 (d)[2] is hereby further amended to read as follows:

"(d) *Payment restricted to effectuation of purposes of the program.* All or any part of any payment which would otherwise be made to any person under the 1939 Price Adjustment Program may be withheld if the county committee finds that (1) he has overplanted or caused the overplanting of the acreage allotment which was or could have been established for a separately-owned tract of land included in a combination farm and refuses to cooperate with other producers having an interest in the farm in making equitable adjustments with respect thereto, or (2) he has adopted any practices which the Secretary determines tend to defeat any of the purposes of the 1939 Price Adjustment Payment Program."

Done at Washington, D. C., this 8th day of July, 1939.[3] Witness my hand and the seal of the Department of Agriculture.

[SEAL] H. A. WALLACE,
*Secretary.*

### SUGAR DIVISION

[G.S.Q.R. Series 6, No. 1, Rev. 1, Supp. 1]

PART 821—SUGAR QUOTAS

PRORATION OF 1939 DEFICIT FOR PHILIPPINE ISLANDS

By virtue of the authority vested in the Secretary of Agriculture by the Sugar Act of 1937, approved September 1, 1937, I, H. A. Wallace, Secretary of Agriculture, in order to carry out the powers vested in me by the said act, do hereby make, prescribe, publish, and give public notice of these regulations (constituting a supplement to General Sugar Quota Regulations, Series 6, No. 1, Revision 1, issued March 31, 1939[1]), which have the force and effect of law and shall remain in force and effect until amended or superseded by orders or regulations hereafter made by the Secretary of Agriculture.

I

Sec. 821.23 of General Sugar Quota Regulations, Series 6, No. 1, Revision 1, is hereby amended by adding the following new paragraph:

(b) *Deficit in quota for Commonwealth of Philippine Islands.* It is hereby determined, pursuant to subsection (a) of section 204 of the said act, that for the calendar year 1939 the Commonwealth of the Philippine Islands will be unable, by an amount of 118,222,000 pounds of sugar, raw value, to market the quota established for that area in paragraph (a) of this section. (Sec. 204, 50 Stat. 905; 7 U.S.C., Sup. IV, 1114)

II

Sec. 821.24 of General Sugar Quota Regulations, Series 6, No. 1, Revision 1, is hereby amended by adding the following new paragraph:

(b) *Additional prorations.* An amount of sugar equal to the deficit determined in paragraph (b) of Sec. 821.23 hereof is hereby prorated, pursuant to subsection (a) of section 204 of the said act, to foreign countries other than Cuba as follows:

| Country: | *Additional prorations (in terms of pounds, raw value)* |
|---|---|
| Argentina | 34,844 |
| Australia | 487 |
| Belgium | 703,533 |
| Brazil | 2,861 |
| British Malaya | 63 |
| Canada | 1,348,706 |
| China & Hongkong | 688,726 |
| Colombia | 639 |
| Costa Rica | 49,238 |
| Czechoslovakia | 629,411 |
| Dominican Republic | 15,940,700 |
| Dutch East Indies | 505,305 |
| Dutch West Indies | 16 |
| France | 418 |
| Germany | 279 |
| Guatemala | 800,567 |
| Haiti, Republic of | 2,203,076 |
| Honduras | 8,205,398 |
| Italy | 4,188 |
| Japan | 9,583 |
| Mexico | 14,418,927 |
| Netherlands | 520,796 |
| Nicaragua | 24,432,846 |
| Peru | 26,567,754 |
| Salvador | 19,622,148 |
| United Kingdom | 838,254 |
| Venezuela | 693,235 |
| Total | 118,222,000 |

(Sec. 204, 50 Stat. 905; 7 U.S.C., Sup. IV, 1114.)

In testimony whereof, I have hereunto set my hand and caused the official seal of the Department of Agriculture to be affixed in the District of Columbia, city of Washington, this 7th day of July 1939.

[SEAL] H. A. WALLACE,
*Secretary.*

[F. R. Doc. 39–2441; Filed, July 8, 1939; 9:17 a. m.]

### TITLE 16—COMMERCIAL PRACTICES

### FEDERAL TRADE COMMISSION

[Docket No. 3202]

IN THE MATTER OF FEE & STEMWEDEL, INC.

§ 3.66 (k) (4) *Misbranding or mislabeling—Source or origin—Place—Imported product or parts as domestic.* Representing, in connection with offer, etc., in commerce, of barometers having movements or mechanisms of foreign origin, or manufacture, whether sold as single instruments or as part of combination instruments, by the use of the term "Made in U. S. A.", or any other term indicative of American manufacture, that such barometers are wholly of American manufacture, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Modified cease and desist order, Fee & Stemwedel, Inc., Docket 3202, July 6, 1939]

§ 3.69 (b) (16) *Misrepresenting oneself and goods—Goods—Source or origin—Place—Imported product or parts as domestic.* Causing, in connection with offer, etc., in commerce, of barometers having movements or mechanisms of foreign origin, or manufacture, whether sold as single instruments or as part of combination instruments, the brands, or marks on imported barometer movements or other parts, or on other similar products, which indicate the foreign origin or manufacture thereof, to be removed, erased or concealed so as to mislead or deceive ultimate purchasers with reference to the foreign origin or manufacture thereof, unless the removal or erasure or concealment of said brands or marks is necessary to the further manufacture or processing of said products, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Modified cease and desist order, Fee & Stemwedel, Inc., Docket 3202, July 6, 1939]

§ 3.66 (g) *Misbranding or mislabeling—Producer status of dealer.* Representing, in connection with offer, etc., in commerce, of barometers having movements or mechanisms of foreign origin, or manufacture, whether sold as single instruments or as part of combination instruments, by the use of the term "Made by", or any other term of similar import or meaning, or in any other manner, that respondent is the manufacturer of said barometers, or is other than the assembler thereof, unless and until it actually manufactures such barometers and the movements or mechanisms thereof, prohibited. (Sec. 5, 38 Stat. 719, as amended by Sec. 3, 52 Stat. 112; 15 U.S.C., Supp. IV, sec. 45b) [Modified cease and desist order, Fee & Stemwedel, Inc., Docket 3202, July 6, 1939]

*United States of America—Before Federal Trade Commission*

At a regular session of the Federal Trade Commission, held at its office in the City of Washington, D. C., on the 6th day of July, A. D. 1939.

Commissioners: Robert E. Freer, Chairman; Garland S. Ferguson, Charles H. March, Ewin L. Davis, William A. Ayres.

MODIFIED ORDER TO CEASE AND DESIST

This matter having been heard by the Federal Trade Commission upon the motion of Frank T. O'Brien, attorney for the respondent, to modify the order to cease and desist issued in this proceeding on May 2, 1939,[1] and the Commission having considered said motion and the record and being now fully advised in the premises:

*It is ordered*, That the order to cease and desist issued herein on May 2, 1939, be modified so as to read as follows:

This proceeding having been heard by the Federal Trade Commission upon the complaint of the Commission, the answer of respondent, testimony and other evidence taken before Arthur F. Thomas and John W. Addison, Examiners of the Commission theretofore duly designated by it, in support of the allegations of said complaint and in opposition thereto, briefs filed herein, and oral arguments by Joseph C. Fehr, Counsel for the Commission, and by Frank T. O'Brien, Counsel for the respondent, and the Commission having made its findings as to the facts and its conclusion that said respondent has violated the provisions of the Federal Trade Commission Act;

*It is ordered*, That the respondent, Fee & Stemwedel, its officers, representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale and distribution of barometers having movements or mechanisms of foreign origin, or manufacture, whether sold as single instruments or as part of combination instruments, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing, by use of the term "Made in U. S. A.", or any other term indicative of American manufacture, that such barometers are wholly of American manufacture;

2. Causing the brands or marks on imported barometer movements or other parts, or on other similar products, which indicate the foreign origin or manufacture thereof to be removed, erased or concealed so as to mislead or deceive ultimate purchasers with reference to the foreign origin or manufacture thereof, unless the removal or erasure or concealment of said brands or marks is necessary to the further manufacture or processing of said products;

3. Representing, by the use of the term "Made by", or any other term of similar import or meaning, or in any other manner, that it is the manufacturer of said barometers, or is other than the assembler thereof, until and unless it actually manufactures such barometers and the movements or mechanisms thereof.

*It is further ordered*, That the respondent shall, within sixty (60) days after service upon it of this order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with this order.

By the Commission.

[SEAL] OTIS B. JOHNSON,
*Secretary.*

## TITLE 30—MINERAL RESOURCES

### OFFICE OF THE SECRETARY OF THE INTERIOR

ADOPTION OF REGULATIONS, ETC., OF THE NATIONAL BITUMINOUS COAL COMMISSION

JULY 1, 1939.

1. All regulations, orders, instructions, forms, and notices heretofore issued, promulgated or adopted by the National Bituminous Coal Commission are hereby adopted, ratified, and continued in effect until further order, as regulations, orders, instructions, forms and notices of the Bituminous Coal Division, Department of the Interior.

2. The term "National Bituminous Coal Commission", wherever used in such regulations, orders, instructions, forms, and notices, shall be deemed to mean the Bituminous Coal Division, Department of the Interior, or the Director of such Division, as may be appropriate.

This Order is issued pursuant to the Reorganization Act of 1939 and to Reorganization Plan No. II issued by the President pursuant to the said Act.

HAROLD L. ICKES,
*Secretary of the Interior.*

[F. R. Doc. 39-2452; Filed, July 10, 1939; 9:49 a. m.]

## TITLE 35—PANAMA CANAL

[Supplement No. 14]

RULES AND REGULATIONS GOVERNING NAVIGATION OF THE PANAMA CANAL AND ADJACENT WATERS

GOVERNOR'S REGULATIONS [1]

*Amending Regulations 12.1 and 106.1, and Adding Regulations 12.2, 13.1, 32.1 and 106.2*

JUNE 13, 1939.

By virtue of and pursuant to the authority vested in me by Rules 9, 12, and 106 of Executive Order No. 4314 of September 25, 1925, the regulations of the Governor of August 1, 1931, establishing regulations governing the navigation of the Panama Canal and adjacent waters, are hereby amended in the following respects:

1. Regulation 12.1 is hereby amended to read as follows:

"Regulation 12.1 *Papers required by boarding party, list of* All documents listed below as being required of a ship should be ready for immediate delivery to the boarding party:

| Documents required | For ships which transit Canal but do not take on or discharge passengers or cargo at Canal ports | For ships taking on or discharging passengers or cargo at Canal ports |
|---|---|---|
| (a) Ship's information sheet (Panama Canal form) | 1 | 1 |
| (b) Clearance from last port | [2] 1 | [2] 1 |
| (c) Bills of health (U. S. Consular bill issued at port of departure and at each port of call enroute, as provided in Regulation 106.2) | [2] 1 | [2] 1 |
| (d) Quarantine declaration (International Standard form) | 3 | 3 |
| (e) All other certificates of a sanitary nature | [2] 1 | [2] 1 |
| (f) Passenger list (on Panama Canal form) | 4 | 4 |
| (g) Chinese descriptive list, passengers and crew | [2] 1 | [2] 2 |
| (h) Crew list | 3 | 3 |
| (i) Store list | [4] 1 | 1 |
| (j) Cargo declaration (Panama Canal form) | 1 | [2] 1 |
| (k) Manifest of local cargo | 0 | 4 |
| (l) Declaration of explosive cargo carried | [2] 1 | [2] 1 |
| (m) Declaration of inflammable or combustible liquids in bulk carried as cargo | [2] 1 | [2] 1 |
| (n) Statement of fuel account (for vessels in ballast only) | 1 | [2] 1 |
| (o) Panama Canal tonnage certificate | 1 | [2] 1 |
| (p) National register | [2] 1 | [2] 1 |
| (q) General arrangement plan of vessel | [2] 1 | [2] 1 |
| (r) Report of structural alterations and of changes in use of tanks or other spaces since last transit | 1 | [2] 1 |

[1] For examination only.
[2] One copy of each required bill.
[3] Not required unless such persons or cargo are carried.
[4] Required if ship during transit is laid up for repairs, regardless of whether passengers or cargo are taken on or discharged.
[5] Not required unless ship transits Canal.
[6] For taking up and subsequent return through agent or otherwise.

NOTE: In case a ship takes on or discharges passengers or cargo at only one Canal Zone port and does not transit the Canal, the documents to the number indicated in the second column are required. In case a ship docks or takes on or discharges passengers or cargo at both Cristobal and Balboa, or at a port other than the port of entry, all documents to the number indicated in the second column will be required at the first port and in addition documents (f), (g), (h), (i), and (k) to the number indicated in the second column will be required at the second port.

2. Regulation 12.2 is hereby added, reading as follows:

"Regulation 12.2. *Incoming passenger list.* The four copies of the incoming passenger list, required by Regulation 12.1, shall be accurate and legible and shall be delivered to the customs officer in the boarding party. In the event that any passengers destined to local ports fail to disembark, or that passengers in transit do disembark at local ports, notice thereof shall be given promptly to the chief of customs and the quarantine officer at the port, and four copies of a supplementary passenger list showing the names of such passengers shall be furnished promptly to the chief of customs."

3. Regulation 13.1 is hereby added, reading as follows:

"Regulation 13.1. *Outgoing passenger list.* Four accurate and legible copies of the outgoing passenger list must be furnished to the chief of customs before clearance will be issued. Four copies of a supplementary passenger list shall be furnished for passengers embarking at the second Canal port after a vessel has sailed from the other port. Notice shall be given promptly to the chief of customs of any outgoing passengers who fail to depart on the vessel, and a list of such passengers shall be furnished in quadruplicate."

4. Regulation 32.1 is hereby added, reading as follows:

"Regulation 32.1. *Discharge, or signing on, of crew members.* As to members of the crew of vessels of United States registry, see Regulation 152.2. No member of the crew of any vessel, other than a vessel of United States registry, shall be discharged in the Canal Zone without the consent of the quarantine officer at the port. Before such consent is given the quarantine officer shall be furnished a memorandum in triplicate showing the name, age, nationality, and rating of the crew member discharged. When crew members are signed on a vessel, other than a vessel of United States registry, at a Canal Zone port, a similar memorandum in triplicate shall be furnished to the chief of customs at the port, at the time when request is made for a bill of health."

5. Regulation 106.1 is hereby amended to read as follows:

"Regulation 106.1. *Assemblage of passengers and crew for inspection.* The master at the time his vessel is boarded shall be prepared to assemble the passengers and crew for immediate inspection by the quarantine officer in case such inspection should be required."

6. Regulation 106.2 is hereby added, reading as follows:

"Regulation 106.2. *Bills of health.* Masters of vessels arriving in the Canal Zone or in the ports of Panama or Colon, Republic of Panama, shall deliver to the quarantine officer of The Panama Canal at the port of entry a bill of health, in the form prescribed by the Secretary of the Treasury for vessels clearing from a foreign port for a port of the United States, issued by the Consul, Vice Consul or other consular officer of the United States, or by the medical officer where such officer has been detailed by the President for that purpose, at the port of departure and at each subsequent port of call before arrival at the Canal Zone; provided, that no such bill of health will be required from a port in the United States, but masters of vessels clearing from ports of the United States for ports of the Canal Zone, for the ports of Panama or Colon, Republic of Panama, or for passing through the Panama Canal, must obtain a port sanitary statement signed by the officer authorized under the laws of the United States to issue such statements, and must present such statement to the quarantine officer of The Panama Canal at the port of entry.

"The term 'port of departure' as used in this section shall be the first port from which a vessel clears or departs on a voyage to the Canal Zone and the term 'port of call' as used in this section shall be any port subsequent to the port of departure at which the vessel officially entered or in any other manner had direct contact with the shore.

"A vessel on a definite voyage from port of departure to foreign countries and return to port of departure shall be required to present an American bill of health as specified herein, from the port of departure and from each port subsequent to its clearance from the port of departure provided the voyage is of thirty days' duration or less; if the voyage is of more than thirty days' duration, a vessel shall present a bill of health from a port at which the vessel calls not less than thirty days previous to intended arrival at the Canal Zone, which port shall be considered the port of departure, and from each subsequent port of call.

"In the case of a vessel touching at a port where there is no Consul or consular agent of the United States, a bill of health issued by the Consul or consular agent of a friendly government at such port, authorized to issue bills of health to vessels departing for ports of the United States, will be accepted, on entry into a port of the Canal Zone, in lieu of an American bill of health.

"Any vessel arriving in the Canal Zone or in the ports of Panama or Colon, Republic of Panama, without the bills of health required by this section, shall be subject to such quarantine measures as may be determined necessary by the Canal authorities, and may be subjected to such delay as may be necessary to determine to the satisfaction of the Canal authorities the sanitary status of the vessel and of the ports of departure and of call. Any expense incident to the failure to submit bills of health as provided herein shall be charged to the vessel."

7. The regulations amended and added, as aforesaid, shall be effective as to all vessels arriving in the Canal Zone on or after August 15, 1939.

C. S. RIDLEY,
*Governor.*

[F. R. Doc. 39-2444; Filed, July 8, 1939; 10:20 a. m.]

[1] These regulations amend and make additions to regulations appearing in Parts 4 and 24 of Title 35, Code of Federal Regulations.

### WAR DEPARTMENT.

[Bulletin No. 8]

RULES AND REGULATIONS FOR THE NATIONAL MATCHES, 1939 [1]

JUNE 28, 1939.

| Secs. | Paragraphs |
|---|---|
| I. Authorization, scope, and date of matches | 1–3 |
| II. Pay, allowances, travel, and subsistence of authorized rifle teams | 4–7 |
| III. Officials of the National Matches and their duties | 8 |
| IV. Small Arms Firing School | 9–12 |
| V. National Rifle Association matches | 13–14 |
| VI. National Trophy matches | 15–57 |
| VII. General regulations applicable to all matches | 58–83 |
| VIII. Rules governing rifle matches | 84–103 |
| IX. Rules governing pistol matches | 104–113 |
| X. Description of arms and ammunition | 114–120 |
| XI. Scorers and their duties | 121–149 |
| XII. Pit personnel and their duties | 150–160 |

SECTION I—AUTHORIZATION, SCOPE, AND DATE OF MATCHES

1. *General conditions.* The rules and regulations for the national matches, except as provided for and published in this bulletin, will be found in the Official Program of the national matches, Basic Field Manual, Volume III, Part One, Chapters 1 and 1A (Rifle Marksmanship), Chapter 2 (Automatic Rifle Marksmanship), Chapter 3 (Automatic Pistol Marksmanship), AR 600–75, AR 740–10, and the Official Rules for Rifle and Pistol Shooting, National Rifle Association (latest revision).

2. *Date and place at which National Matches will be held.* For the year 1939 the national matches will be held at Camp Perry, Ohio, for a period of 21 days beginning Sunday, August 20, 1939, and ending Saturday, September 9, 1939, both dates inclusive. They will include:

a. *Small arms firing school.* The Small Arms Firing School will be held from Sunday, August 20, 1939 to Friday, August 25, 1939 (6 days), both dates inclusive. The period designated above will be devoted primarily to the school. The Small Arms Firing School will include the following:

(1) Caliber .30 rifle training, including musketry.
(2) Pistol training:
(a) Pistol school.
(b) Police school.
(3) Junior rifle school.

[1] See Section 43.4, Title 10, Code of Federal Regulations for composition and duties of National Board for the Promotion of Rifle Practice.

[*] These regulations are promulgated under the authority contained in Section 1, 45 Stat. 786; 32 U.S.C. 181a.

b. *National Rifle Association matches.* The matches for which medals and trophies are awarded by the National Rifle Association will be held from Saturday, August 26 to Friday, September 1 (7 days) both dates inclusive. The National Rifle Association matches will consist of—

(1) Caliber .30 rifle matches.
(2) Small-bore rifle matches.
(3) Pistol and revolver matches.
(4) Junior matches.

c. *National trophy matches.* The matches for which the national trophies, medals, and other badges are awarded by the National Board for the Promotion of Rifle Practice will be held from Saturday, September 2 to Saturday, September 9 (8 days), both dates inclusive. The national trophy matches will consist of the following:

(1) Infantry Match.
(2) National Individual Rifle Match.
(3) Citizens' Military Championship Match.
(4) National Individual Pistol Match.
(5) National Pistol Team Match.
(6) National Rifle Team Match.

3. *Executive officer may change program.* The foregoing dates and periods prescribed for the national matches will govern unless weather conditions interfere to such an extent as to make changes necessary. In that case the executive officer will make the required alterations in the program.

SECTION II—PAY ALLOWANCES, TRAVEL, AND SUBSISTENCE OF AUTHORIZED RIFLE TEAMS

4. *Authorized teams.*

a. *Service teams.* (1) Regular Army, from the Infantry, Cavalry, and Corps of Engineers, 1 each.
(2) United States Navy, 1.
(3) United States Marine Corps, 1.
(4)* United States Coast Guard, 1.

b. *National Guard and Reserve teams.* (1) Federally recognized active National Guard of the several States and Territories, including the District of Columbia, 1 each.
(2) Naval Reserve, 2 teams as designated by the Navy Department.
(3) Marine Corps Reserve, not more than 2 teams as designated by the Navy Department.
(4) Organized Reserves, 1 team.

c. *Civilian teams.* (1) One civilian team from each of the several States and Territories, including the District of Columbia, to be selected by competition.
(2) Reserve Officers' Training Corps, 1 from each corps area.
(3) Citizens' Military Training Camps, 1 from each corps area.
(4) American Legion, 3 teams.

5. *Strength of rifle teams.* The strength of authorized rifle teams participating in the national rifle team match 1939 is fixed as follows:

a. *Service teams.* One team captain, 1 team coach, 10 principals, 2 alternates; total 14.

b. *National Guard teams.* One team captain, 1 team coach, 10 principals, 2 alternates; total 14.

c. *Organized Reserves teams.* One team captain, 1 team coach, 10 principals, 2 alternates; total 14.

d. *Reserve Officers' Training Corps and Citizens' Military Training Camp teams.* One team captain, 10 principals, 2 alternates, 1 coach to be an officer of the Regular Army; total 14.

e. *Civilian teams.* One team captain, 10 principals, 2 alternates; total 13. (See par. 51 (*f*) relating to coaches.)

6. *Pay, allowances, travel, and subsistence.*—a. *Members of rifle teams* as listed in paragraph 4a will be entitled to travel from points of try-out to Camp Perry, Ohio, and from Camp Perry to their home stations upon completion of the matches. Subsistence allowance for enlisted men while traveling will be at the rate of $1.50 per day. While participating in the national matches, enlisted members of these teams will be entitled to subsistence allowances at the rate of $1.20 per day for not to exceed 21 days from August 20, to September 9, 1939.

b. *Members of authorized rifle teams* as listed in paragraph 4b will receive pay, allowances, and travel for the period while attending the national matches. This period will include the time consumed in traveling the shortest usually traveled route from their homes to Camp Perry, Ohio, and return to their homes.

c. The *enlisted members of the rifle teams* listed in paragraph 4b will be entitled to a subsistence allowance of $1.50 per day while traveling from their homes to Camp Perry, Ohio, and return to their homes, and to $1.20 per day while at the national matches for not to exceed 21 days from August 20 to September 9, 1939.

d. The *members of the rifle teams* listed in paragraph 4c will be entitled to travel including subsistence at the rate of 5 cents per mile while en route from their homes to Camp Perry, Ohio, and return. While participating in the national matches, they will be entitled to a subsistence allowance of $1.20 per day for not to exceed 21 days from August 20, 1939, to September 9, 1939. When travel is performed by privately owned conveyance, distances will be computed on the basis of the shortest usually traveled highway distance between the points of travel as shown by standard highway mileage guides, such as the Rand Mc-Nally Standard Highway Mileage Guide, provided that where such distances are in excess of those shown in the Official Mileage Tables or W. D., F. D. Form No. 46 (Request for Official Distance) the latter distance will govern.

7. *Pay, allowances, travel, or subsistence* will not be furnished to any competitor, except as listed in paragraph 6. The executive officer of the matches, however, will furnish tentage and bedding to not more than 1,200 unattached individuals at the 1939 national matches.

SECTION III—OFFICIALS OF THE NATIONAL MATCHES AND THEIR DUTIES

8. The *officials of the national matches* and their assistants are charged with duties as follows:

a. The *executive officer* will have command of the camp and general charge of the national matches.

b. The *assistant executive officers* will perform such duties as the executive officer may direct.

c. The *adjutant* will discharge the duties of adjutant to the executive officer.

d. The *quartermaster* will have charge of rail and motor transportation, the operation of all necessary camp utilities, and the issue of stores and supplies of his own department to officials, troops, and competitors during the matches. He will discharge such other duties as may be assigned to him by the executive officer.

e. The *range director* will have general supervision of the supply, maintenance, and operation of all ranges prior to and during the national matches. He will have charge of all permanent and daily details of range personnel. Previous to the matches, he will establish and conduct such schools for range personnel as the executive officer may deem necessary. He will be assisted by chief range officers, one of whom will have charge of the operation of each of the several rifle, pistol, and small-bore ranges.

f. The *director of the Small Arms Firing School* will be charged with the establishment and operation of the various subdivisions of this school.

g. The *statistical officer* will keep the record of all match firing. He will keep the records of eligibility and assign the competitors to targets and to relays for firing. He will verify the additions of the scores as reported by the scorekeepers when necessary, grade the scores in order of excellence, prepare and publish in official bulletins the results of all matches, and announce the awards of trophies, medals, and other prizes.

h. The *mess officer* will establish and operate the competitors' mess and such other messes as the executive officer may direct.

i. The *surgeon* will have charge of the health and sanitary conditions of the camp and rifle range, conduct necessary physical examinations, and perform such other duties as pertain to his profession.

j. The *ordnance officer*, under the direction of the executive officer, national matches, will establish and maintain the ordnance depot, national matches, from which all issues and sales will be made under existing regulations. He will make timely requisitions for all supplies not previously requisitioned by the executive officer, National Board for the Promotion of Rifle Practice, and will maintain such records of transactions as will permit of rendering timely reports for use in settlement of accounts between the Ordnance Department and the National Board for the Promotion of Rifle Practice.

The ordnance officers assigned as technical advisers will perform such duties as are delegated or assigned by the executive officer, national matches.

k. The *inspector* will inspect the camp, the ranges, and all activities, agencies, and installations connected therewith for police and sanitation, as well as for the safety and comfort of all. In addition, he will perform the usual duties of a division and post inspector and will audit such funds as the executive officer may direct.

l. The *camp director* will prepare and execute plans for the reception and quartering of persons attending the national matches. He will have charge of the registration and billeting of all personnel; supervision of issue and turning in of quartermaster supplies to individuals and competitors; transportation, delivery, and collection of ordnance and quartermaster supplies and personal and team baggage to tent areas; operation of a camp information service; reception of distinguished visitors; administration of the Reserve Officers' Training Corps, Citizens' Military Training Camps, and unattached civilian areas; the striking of camp; and the storage of property. He will keep a directory of all persons in the camp.

m. The *signal officer* will have charge of the electrical equipment of the range and of the property of the Signal Corps and will perform the duties of signal officer for the camp and the range. He will provide adequate signal communication for the national matches.

n. The *provost marshal* will also perform the duties of *police officer* and *fire marshal*. He will maintain good order and provide for the proper police of the camp. He will regulate traffic and post such signs as may be necessary. He will have general supervision and control of all fire-prevention measures and all available fire-fighting equipment at Camp Perry during the period allotted to the national matches.

o. The *finance officer* will have charge of all receipts, disbursements, and accounts, and render the necessary reports and returns, and perform such other duties as the executive officer may direct.

p. The *publicity officer* is charged with the dissemination of information pertaining to the national matches through the newspapers and radio.

q. The *commanding officer of troops* will have command of all Regular Army troops on duty at the national matches. Pursuant to directives from the executive officer, he will assign commissioned and enlisted personnel from his command to various fatigue duties and special duties pertaining to the conduct of the national matches.

r. The *recreation officer* will have charge of all recreational activities in the camp.

SECTION IV—SMALL ARMS FIRING SCHOOL

9. The *missions of the Small Arms Firing School* are to teach correct principles of marksmanship and to present a logical and uniform method of instruction with a view of improving individual and group shooting ability and developing competent instructors. A part of the instruction with the caliber .30 rifle will be devoted to musketry training.

10. *Each person satisfactorily completing the school course* will receive a certificate of proficiency. For requirements as to attendance by members of teams participating in the national rifle team match, see paragraph 51c. The attendance of all other persons not in the Regular services, including those who have previously received certificates of proficiency, is invited but is not required.

11. *During the period of the Small Arms Firing School*, the executive officer may permit competitors who are excused from attending the school to practice on targets which he considers available and in excess of the number required for the school.

12. *During the period of the school*, a musketry problem will be fired. The object of this problem will be to qualify the various military teams attending the school as demonstration units in this type of firing.

SECTION V—NATIONAL RIFLE ASSOCIATION MATCHES

13. The *matches of the National Rifle Association* will consist of the following parts:

a. Caliber .30 rifle matches.
b. Small-bore rifle matches.
c. Pistol and revolver matches.
d. Junior matches.

14. *Detailed information* concerning these matches will be found in the program of the national matches.

SECTION VI—NATIONAL TROPHY MATCHES

*Infantry Match*

15. *When fired.* September 4, 1939.

16. *Open to.* Teams consisting of a squad of 8 men including 7 riflemen and 1 automatic rifleman selected from the members eligible to fire in the National Rifle Team Match of each national match rifle team. One rifleman (designated corporal) will be the leader.

Entry of service, National Guard, and Reserve teams is compulsory; entry of civilian teams and other teams of individual civilian competitors as approved by the executive officer, optional.

The match will involve fire and movement. Team captains of teams entering the match (except National Guard and service teams), will be given authority to draw one automatic rifle per team from the ordnance warehouse.

17. *Entries close.* Saturday, September 2, 1:30 p. m.

18. *A musketry problem*—a. *Course and conditions.* Same as in 1938 as follows: Each team will consist of a rifle squad of eight (8) men, armed with seven (7) service rifles and one automatic rifle. Riflemen, including the leader, will wear cartridge belts and automatic riflemen the magazine belt, autorifle. The leader (designated corporal) will be armed with the rifle and shall command the squad. One rifleman shall be designated substitute automatic rifleman.

Each corporal will report his team to the range officer at the hour and place indicated for the drawing. When the range officer is satisfied by inspection and oral certificate of the corporal that no ammunition is in possession of the team, he will cause 180 rounds of ammunition to be issued to each squad as follows: 20 rounds to each rifleman, and 40 rounds to the automatic rifleman. Ammunition issued to men armed with the rifle may be fired by any other team member, but ammunition issued to the automatic rifleman may be fired only in the automatic rifle.

Teams will be deployed in skirmish line at four (4) paces interval between men in rear of a 600-yard firing point, with slings adjusted and pieces loaded and locked, and move forward upon command of the corporal when the range officer indicates the problem has started. All movement during the match will be at a walk.

Whenever targets are exposed above the parapet, teams must halt and may fire at the discretion of the corporal, who will issue the necessary commands in each case. Teams must remain halted when targets are exposed. They will continue their advance when targets disappear. The first halt will be made near the 600-yard firing point, and subsequent halts near the 500-, 300-, and 200-yard firing points. At the 600- and 500-yard halts, targets hit in the black will be pulled at once. Targets not hit in the black at these ranges will remain exposed 45 seconds. At the 300-yard and the 200-yard halts all targets will be exposed for 45 seconds.

At the end of the problem pieces will be unloaded and inspected and all unfired cartridges turned in to the range personnel. Each squad will then clear the range promptly for the succeeding team.

b. *Targets.* Eight (8) D targets will be exposed at each halt in the regular target frames.

c. *Scoring.* All scoring will be done in the pit. Each hit on the figure shall count two points, and each hit in the next highest scoring space (4 space) shall count one point. No other hits on the targets shall be counted. No adjustments will be made for misfires, disabled pieces, or other failure of material or personnel.

d. *Bonus.* To the total score made by a team at each halt will be added, as a bonus for distribution, the square of the number of figures hit and this sum will constitute the score for that halt.

e. *Deduction.* The total number of hits made on each figure throughout the problem, if less than 15, will be subtracted from 15, and the total of all such differences will be deducted from the aggregate of the scores made at all halts to determine the final score. The team making the highest final score will be the winner. Ties will be decided as prescribed for team matches.

f. *The final score.* As thus computed the final score embodies not only a reward for good distribution throughout the match as to targets hit but a penalty, as well, for those teams whose volume of fire throughout is not both accurate and well distributed. Score cards may be signed and examined at the firing point at the conclusion of the match.

g. *Arm.* The service rifle and an automatic rifle.

h. *Sights.* Service.

i. *Ammunition.* Only that ammunition which is issued at the beginning of the match will be fired.

j. *Drawing targets.* A drawing for zones will take place at a point designated by the range director about one-half hour previous to the time set for firing the match, and after marking details have entered the pits. The team captain or his authorized representative will be present and draw for his team. Care will be taken that no information concerning the assignment of zones is conveyed by telephone or otherwise to the pits during the firing of the match.

k. *Prizes.* To the winning team, the Infantry Trophy. To each member of the highest one-fourth of teams completing the match, a bronze badge.

*Individual Matches*

19. *Open to.* The national individual rifle match and the national individual pistol match are open to any citizen of the United States 16 years of age or over on the date of the match.

20. *Entries.* a. Each team captain in the national rifle team match will see that entries for all members of his team desiring to enter the national individual rifle match and the national individual pistol match are properly made out and delivered to the statistical officer at one time on the special entry form provided for this purpose.

b. Individual competitors not members of regularly accredited teams may make entry in person or by mail addressed to the statistical officer, national matches, Camp Perry, Ohio.

c. Entries will close not later than 48 hours prior to the hour the match is scheduled to start.

*National Individual Rifle Match*

21. *When fired.* September 5 and 6, 1939.

22. *Open to.* Any citizen of the United States 16 years of age or over on the date of the match.

23. *Elimination of competitors.* The executive officer, at his discretion, at any time after the first stage of the match, may eliminate from further participation in the match any number of competitors of lowest standing in excess of 500 competitors.

24. *Course of fire.* The course of fire and rules in regard to arms and ammunition are the same as for the national rifle team match.

25. *Trophies and medals.* The "Daniel Boone" trophy will be awarded to the winner, to be held until the next national matches. A miniature of the "Daniel Boone" trophy will also be awarded to the individual winning the original trophy, this miniature trophy to be the permanent property of the winner. Medal awards will be as follows:

a. *To each of the 15 competitors,* not distinguished marksmen, making the highest aggregate scores, a gold medal.

b. *To each of the 25 competitors,* not distinguished marksmen, making the next highest aggregate scores, a silver medal.

c. *To each of the 100 competitors,* not distinguished marksmen, making the next highest aggregate scores, a bronze medal.

d. *Distinguished marksmen* will be placed according to their respective scores among the foregoing medal winners. Only one medal of each class will be awarded any medal winner, regardless of the year in which won. After one medal of any class (gold, silver, or bronze) has been issued, a medal winner in the same class thereafter will be issued an appropriate bar in lieu of a medal.

e. If the number of competitors starting in the national individual rifle match is less than 1,400, the total number of medals will be 1 for each 10 competitors, disregarding fractions and exclusive of distinguished marksmen; the gold, silver, and bronze medals to be in the ratio given above.

26. *Qualification badges.* An appropriate badge representing qualification in the Regular Army course will be issued to each civilian who qualifies as expert rifleman, sharpshooter, or marksman in the national individual rifle match. The qualifying scores will be expert rifleman, 255; sharpshooter, 230; marksman, 210. In case any competitors are eliminated from firing the 1,000-yard stage, the 1,000-yard stage will not be counted in the computation of qualifying scores for expert rifleman, sharpshooter, and marksman, and the qualifying scores will be expert rifleman, 170; sharpshooter, 154; marksman, 140.

All civilians, including members of the Reserve Officers' Training Corps and Citizens' Military Training Camps, will obtain their qualification badges from the Director of Civilian Marksmanship.

*Citizen's Military Championship Match*

27. *When fired.* This match is fired as a part of the national individual rifle match. Scores made in the national individual rifle match are counted for medals.

28. *Open to.* All citizens of the United States 16 years of age or over on the date of the match, except members of the Regular services.

29. *Course and conditions.* Same as national individual rifle match.

30. *Entry not required.* Entries made in the national individual rifle match count as entries in this match.

31. *Medals.* To the 10 highest competitors, gold medals. To the next highest 15 competitors, silver medals.

*National Individual Pistol Match*

32. *When fired.* September 2, 1939.

33. *Open to.* Any citizen of the United States 16 years of age or over on the date of the match who has demonstrated his ability to fire a score of at least 180 over the national match pistol course by scores of record in National Rifle Association files or in match or qualification firing at Camp Perry in 1939, 1938, 1937, or 1936.

34. *Elimination of competitors.* The executive officer may, in his discretion and by such standards as he may prescribe, eliminate competitors after each stage of the national individual pistol match.

35. *Course of fire.* The course of fire and rules in regard to arms and ammunition are the same as for the national pistol team match.

36. *Trophies and medals.* The "Custer" trophy will be awarded to the winner, to be held until the next national matches.

A *miniature of the "Custer" trophy* will also be awarded to the individual winning the original trophy, this miniature trophy to be the permanent property of the winner. Medal awards will be as follows:

a. *To each of the 12 competitors,* not distinguished pistol shots, making the highest aggregate scores, a gold medal.

b. *To each of the 24 competitors,* not distinguished pistol shots, making the next highest aggregate scores, a silver medal.

c. *To each of the 36 competitors,* not distinguished pistol shots, making the next highest aggregate scores, a bronze medal.

d. *Distinguished pistol shots* will be placed according to their respective scores among the above medal winners. Only one medal of each class will be awarded any medal winner, regardless of the year in which won. After one medal of any class (gold, silver, or bronze) has been issued, a medal winner in the same class thereafter will be issued an appropriate bar in lieu of a medal.

37. *Qualification badges.* An appropriate badge representing qualifications in the Regular Army course will be issued to each civilian and policeman who qualifies as pistol expert, pistol sharpshooter, or pistol marksman in the national individual pistol match. Qualifying scores: Pistol expert, 240; pistol sharpshooter, 225; pistol marksman, 210. Police and civilians, including members of the Reserve Officers' Training Corps and Citizens' Military Training Camps, will obtain their qualification badges from the Director of Civilian Marksmanship.

*National Pistol Team Match*

38. *When fired.* September 4, 1939.

39. *Open to.* Teams consisting of a team captain, 5 principals, and 1 alternate from the following:

a. *Service teams.* (1) Regular Army, from the several arms, 1 each.
(2) United States Navy, 1.
(3) United States Marine Corps, 1.
(4) United States Coast Guard, 1.

b. *National Guard and Reserve teams.* (1) Federally recognized National Guard of the several States and Territories, including the District of Columbia, 1 each.
(2) Federally recognized Naval Militia, 1.
(3) The Naval Reserve, 1.
(4) The Marine Corps Reserve, not more than 2.
(5) Organized Reserves, 1.

c. *Civilian and police teams.* (1) One civilian team from each of the several States and Territories, including the District of Columbia.
(2) Reserve Officers' Training Corps, 1 or more.
(3) Citizens' Military Training Camps, 1 or more.
(4) Any organization composed of veterans of any war or wars in which the United States has been engaged, 1 or more.
(5) Any organized police or constabulary force in the United States, 1.

40. *Eligibility requirements.* a. At least 20 percent of the shooting members of each pistol team will be men who have never before fired as members of any national match pistol team.

b. No pistol team may have as a shooting member or alternate any man who has been a shooting member of any team in three of the four national pistol team matches immediately preceding. (The last four national matches were 1935, 1936, 1937, and 1938.)

c. No team will have as a team captain, or as a shooting member or alternate, anyone who was less than 16 years of age on his last birthday and who is not a male citizen of the United States.

41. *Course of fire—First stage.* Slow fire, 50 yards—Standard American 50-yard target, 2 scores (5 shots each); 1 minute per shot.

*Second stage.* Timed fire, 25 yards—Standard American 50-yard target with only the 9 and 10 rings blacked, known as the "25-yard rapid-fire pistol target," 2 scores (5 shots each); 20 seconds per score.

*Third stage.* Rapid fire, 25 yards—Standard American 50-yard target with only the 9 and 10 rings blacked, known as the "25-yard rapid-fire pistol target," 2 scores (5 shots each); 10 seconds per score.

42. *Positions.* Standing without body or artificial rest; one hand only to be used.

43. *Trophies and medals.* The Gold Cup trophy will be awarded to the winning team to be held until the next national matches. A medal will be awarded to each member of the highest one-third of the competing teams.

A miniature of the "gold cup" trophy will also be awarded to the team winning the original trophy, this miniature trophy to be the permanent property of the winning team.

44. *Allowances for members of pistol teams.* Allowances or reimbursements for transportation and subsistence will not be paid to any member of a pistol team unless he is entitled thereto as a properly certified member of a national match rifle team. All other members of the several national match pistol teams must provide for their own expenses, except that the executive officer is authorized to furnish all such members with tentage and such other equipment as may be available. See paragraphs 6 and 7.

45. *Entries.* Not later than the time mentioned in the match programs, each team captain will submit to the statistical officer at his office on blank score cards, in duplicate, furnished for the purpose, a legible list of the members of his team certifying as to their eligibility, and showing the correct first name, middle initial, last name, grade, and organization of the team. (Team captain, 5 principals, and one alternate.) At the same time he will submit to the statistical officer the team eligibility list on the blank form furnished by the chief statistical officer. The alternate listed, and no other, may be substituted as a principal at any time previous to the beginning of the score of the last principal of the initial stage of the match. Thereafter, substitution may be made only on surgeon's certificate of disability approved by the executive officer. The team captain may serve as a shooting member provided he has been listed as a shooting member or alternate and is otherwise eligible.

*National Rifle Team Match*

46. *When fired.* Friday and Saturday, September 8 and 9, 1939.

47. *Open to.* Authorized teams listed in paragraph 4. All teams present at Federal expense are required to enter.

48. *Strength of rifle teams.* As shown in paragraph 5.

49. *Course of fire—First stage.* Slow fire, 200 yards—target A. Ten shots standing. Time limit, 1 minute per shot. No sighting shots.

*Second stage.* Rapid fire, 200 yards—target A. Ten shots. Kneeling or sitting, from standing. Time limit, 1 minute.

*Third stage.* Rapid fire, 300 yards—target A. Ten shots. Prone from standing. Time limit, 1 minute, 10 seconds.

*Fourth stage.* Slow fire, 600 yards—target B. Ten shots. Prone. No sighting shots. Time limit, 1 minute per shot.

*Fifth stage.* Slow fire, 1,000 yards—target C. Twenty shots. Prone. No sighting shots. Time limit, 1½ minutes per shot.

50. *Team eligibility requirements.* a. At least 50 percent of the shooting members of each team representing the several arms of the Army, Navy, Marine Corps, and Coast Guard will be men who have never before fired as members of any national match rifle team.

b. *Teams other than those* representing the several arms of the Army, Navy, Marine Corps, and Coast Guard will be subject to the following elimination rules:

(1) A team listed in class A after the last national matches in which such team competed will have at least 40 percent of its shooting members composed of men who have never before fired on any national match rifle team.

(2) A team listed in class B after the last national matches in which such team competed will have at least 30 percent of its shooting members composed of men who have never before fired on any national match rifle team.

(3) A team listed in class C after the last national matches in which such team competed will have at least 20 percent of its shooting members composed of men who have never before fired on any national match rifle team.

(4) A team listed as "unclassified" after the last national matches in which such team competed will have at least 10 percent of its shooting members composed of men who have never before fired on any national match rifle team.

c. *Participation as a shooting member* of a Reserve Officers' Training Corps or Citizens' Military Training Camp team will not be considered as previous participation within the above eligibility requirements.

d. No individual may be a member of any of the authorized rifle teams listed in paragraph 4 unless he has been a bona fide member of that particular class from which the team is selected for at least sixty days previous to the opening date of the national matches. This provision shall not change the present operation of paragraph 51h referring to Reserve Officers' Training Corps and Citizens' Military Training Camp teams.

51. *Individual eligibility in national rifle team match.* a. No team may have as a team captain, team coach, shooting member, or alternate, anyone who was less than 16 years of age on his last birthday, or who is not a male citizen of the United States.

b. No rifle team may have as a shooting member or alternate any man who has been a shooting member of any team in three of the four national rifle team matches immediately preceding. (The last four national matches were 1935, 1936, 1937, and 1938.)

c. All team members to be eligible to shoot in the national rifle team match shall have been selected through *open rifle* competition before arrival at the national match camp and will be so certified to the executive officer in proper credentials. *The rifle to be used in the competition will be the service type rifle, caliber .30 with iron sights.* All team members will attend the full course of the Small Arms Firing School unless they have received a certificate of proficiency from it or from a similar service school of the Regular Army, Navy, Marine Corps, or Coast Guard, or can furnish satisfactory evidence of completing such a course.

d. Members of civilian teams must be confined to bona fide citizens of the State which the team represents who have lived in that State for at least one year prior to the opening date of the national matches.

e. *Upon arrival at Camp Perry,* each team captain, exclusive of service teams, will present to the executive officer of the national matches an order in quintuplicate issued by the adjutant general of the State or other proper authority designating the team officials and other members of the team, giving their home addresses and certifying as to their eligibility under these rules and regulations. The list will contain the names of not to exceed 14 eligibles, from among whom the team, including the team captain and team coach, will be finally selected. This order will state by name the members who are graduates of the Small Arms Firing School. In the case of service teams listed under paragraph 4a, a list will be submitted to the executive officer by team captains not later than noon on the opening day of instruction of the Small Arms Firing School, properly certifying to the eligibility of the members of their teams.

f. *Any person, regardless of his classification,* is eligible to act as coach for a civilian team other than Reserve Officers' Training Corps and Citizens' Military Training Camp teams, which teams will be coached by Regular Army officers only. A civilian team reporting at the national matches without a coach may request the executive officer to assign a coach, and upon such request the executive officer will assign a coach from any officers, enlisted men, or civilians available. A coach selected after arrival at Camp Perry will not be entitled to any change in previous status as to pay and allowances from the United States, nor will he be eligible to fire as a member of any team unless he fulfills all other eligibility requirements.

g. Members of the Regular Army, Navy, Marine Corps, Coast Guard, the National Guard, and all Reserve components will shoot only as members of their respective components.

h. *Former members* of the Reserve Officers' Training Corps and of the Citizens' Military Training Camps who have joined

any other component of the Army may compete as members of a Reserve Officers' Training Corps team or Citizens' Military Training Camp team, provided that they were in attendance as trainees at and were selected from 1939 camps.

52. *Entries.* Not later than time mentioned in match program, each rifle team captain will submit to the statistical officer at his office, on blank score cards in duplicate, furnished for the purpose, a legible list of the members of his team, showing the correct first name, middle initial, last name, grade of members, and organization of the team. (Team captain, team coach, principals, and alternates.) Any or all of the alternates listed, and no others, may be substituted as shooting members at any time prior to the beginning of the score of the last pair of the initial stage of the match. Thereafter, substitution may be made only on surgeon's certificate of disability approved by the executive officer.

Each team captain will submit to the statistical officer with the score cards the team eligibility lists on the blank forms furnished by the chief statistical officer.

Either the team captain or the coach or both, if otherwise eligible under the rules, may serve as shooting members provided they have been listed as shooting members or alternates.

53. *Drawing targets.* In the national rifle team match, targets will be drawn for each half day's firing, or whenever the firing has been interrupted and the pits unsealed. This drawing will take place at a point designated by the range director about one-half hour previous to the time set for firing to begin. The team captain or his authorized substitute will be present and draw for his team. A team representative will accompany each team captain to the place designated for the drawing and will report to the range director's assistant for duty in the pits. Thereafter, no person will enter the pits until firing is interrupted and the pits unsealed. Care will be taken that no information concerning the assignment of target is conveyed by telephone or otherwise to the pits while they are sealed. The drawing of targets will not take place until all persons who are to enter the pits have passed out of sight behind the butts.

54. *Team representatives in the pits.* In the national rifle team match, each team will furnish a team representative for duty in the pits from its team personnel or from personnel furnished by the executive officer of the matches upon request. The team representatives will assemble at the times and places ordered. They will be sent to the pits before the drawing for targets is made by team captains. (See par. 53.) They will be assigned to targets without regard to the assignments at the firing points. They will be subject to the orders of the pit officers on duty in the pits and will make with a pencil, before each shot is marked or pasted, a small circle around each shot hole. They will call any irregularity or question of doubt to the attention of a pit officer whose decision will be final.

55. *Classification.* After the national rifle team match the teams will be classified in descending sequence as class A, class B, class C, and "unclassified." In each of the first three classes there will be listed in order of standing 10 teams exclusive of service teams. Service teams will be placed in class A, class B, class C, or "unclassified" according to their total score regardless of the number of teams then resulting in each class.

56. *Medals.* A distinctive medal will be awarded each member of each classified team. Each team officer, principal, and alternate herein provided for will be awarded a medal. No individual will receive more than one medal by reason of having acted in a dual capacity.

57. *Award of trophies.* One trophy will be awarded to the highest team representing the Regular services. One trophy will be awarded to the highest team from the National Guard or State troops of the several States and Territories. One trophy will be awarded to the highest team representing the Organized Reserves, the Naval Reserve, the Marine Corps Reserve, and the American Legion. One trophy will be awarded to the highest team representing the Reserve Officers' Training Corps and the Citizens' Military Training Camps. One trophy will be awarded to the highest civilian team.

Among the above-stated trophy teams, the "National Trophy" will be awarded to the highest team. The "Hilton Trophy" will be awarded to the highest team of National Guard or State troops. The "Soldier of Marathon Trophy" will be awarded to the highest civilian team, exclusive of Reserve Officers' Training Corps, Citizens' Military Training Camps, and American Legion teams. The "Minuteman Trophy" will be awarded to the highest team of the Reserve Officers' Training Corps and Citizens' Military Training Camps. The "Rattlesnake Trophy" will be awarded to the highest team from the Naval Reserve, the Marine Corps Reserve, the Organized Reserves, and the American Legion. In case a team wins two trophies under the foregoing distribution, it will be entitled to the National Trophy only and the other trophy will be awarded to the highest team of the class not otherwise provided for.

To the highest individual competitor in the national rifle team match will be awarded the "Pershing Trophy," to be held until the next national match, and the Pershing Trophy gold medal, to be the permanent property of the winner.

A miniature of each of the above-named trophies will also be awarded in each case where the original trophy is awarded, such miniature trophy to be the permanent property of the team or individual winning the original trophy.

SECTION VII—GENERAL REGULATIONS APPLICABLE TO ALL MATCHES

58. *General.* The executive officer may, in his discretion, in order to operate the range efficiently, change the order of firing the stages of any match.

59. *Firing areas.* The firing areas on each range will be organized into a firing line, a ready line, and an assembly line.

60. *Duties of range officers.* a. The chief range officer of each range will be responsible at all times to the range director for the proper equipment and operation of the range to which he is assigned.

b. *All other officers* assigned to duty as range officers will function directly under the chief range officer on the range to which they are assigned. As assistants on any range their duties will be—

(1) To insure that all competitors comply with range and match regulations.

(2) To supervise scoring.

(3) To verify the scores on the score card with the blackboard and to see that they agree; to verify the totals and certify their correctness.

(4) To make any necessary changes on score cards and to initial them.

(5) To require the competitor, or in case of team matches, the team captain, to sign the score card when firing is finished.

(6) To deliver the completed score cards to the chief scorer.

61. *Duties of pit officers.* The chief pit officer on each range is an assistant to the chief range officer on that range. Other pit officers will function directly under the chief pit officer. During match firing, a pit officer will be assigned from four to eight targets, and will be responsible for the proper operation and marking of all targets to which he is assigned. Only a pit officer will signal misses in slow fire.

62. *Coaching.* Coaching will be permitted in team matches, but not in individual matches. In team matches, any member of the team (captain, coach, principal, or alternate) may function as coach. Officers or enlisted men of the Regular services may act as coaches for teams of their respective services, and for civilian, Reserve Officers' Training Corps, and Citizens' Military Training Camp teams. National Guard teams may be coached only by officers or enlisted men of the National Guard. Upon application of the team captain of a civilian team, the executive officer may assign as coach of that team any available person requested by the team captain. A coach once assigned will not be changed except for cogent reasons.

63. *Station of team captain.* In team matches, the team captain and one assistant may be seated in front of the assembly line but not in advance of a line established three paces in rear of the line of scorers. They may not make any remark from this position loud enough to be heard at the firing point. A team captain may coach, but only if he removes his coach from the line and himself actually occupies the coaching position.

64. *Station of team coach.* In team matches, a coach may take his place on the firing line and between the men of the pair firing. In pistol team matches one coach will be allowed for each target assigned to the team. He cannot shift his position nor shift the position of the men of the pair firing for the purpose of forming a windshield for the firer. He must confine himself to the normal position of a coach and his activities to those normally expected of a coach. The coach will not assist the firer in any manner in loading his piece.

65. *Station of competitors.* Each competitor will remain on or in rear of the assembly line in rear of the firing point until called by the range officer to take his position at the ready line or firing point.

66. *Station of noncompetitors.* No one except the officials of the range, members of the National Board for the Promotion of Rifle Practice, the competitors on the firing points, and scorers and others on duty will be permitted in front of the assembly line without special permission of the officer in charge of the range.

*Instructions to Competitors*

67. *Mass-squadding.* When any range is available for practice firing, competitors reporting to that range will be mass-squadded on the range by the chief range officer or an assistant.

68. *Competitors present punctually.* Competitors will be present at the firing points punctually at the time stated on their squadding tickets. In team matches, the first pair only need be present at the hour set for firing to begin. No application on the part of a competitor for an alteration of his squadding assignment will be entertained, except that in team matches team captains may change the sequence of firing of the members of their teams if they so desire.

69. *Competitors called in advance.* In slow-fire stages of individual matches the competitor next to fire may be called to the ready line when the competitor firing has five remaining shots to fire and called to the firing point when the competitor firing has completed his score. Any competitor will forfeit his right to fire if he appears at the proper target after the time shown on his score card for him to appear unless he presents satisfactory evidence that he is late through no fault of his own. If he does not appear when called, any competitor present and assigned to the target, taken in order, may be called to the firing point.

70. *Time limit.* In individual slow fire, competitors may fire with the deliberation they deem necessary, provided the firing time at that particular range is not exceeded. Competitors will take their places promptly on the firing line. Time will begin when they are ready to fire. However, any time in excess of 3 minutes used for preparation will be deducted from firing time.

71. *Time allowance for teams.* In team matches, a total team time is allotted for each stage. The time is determined by adding the total number of shots at each stage, multiplying by the time as indicated above, and adding three minutes for each change of relays. The time will be taken from the command to "commence firing" to the firing of the last shot required at each range; no time credit will be carried back from one range to another. When the firing of a stage is to be interrupted by an intermission, the executive officer will decide the number of pairs to fire before the intermission and assign the time proportionately.

72. *Extensions of time.* If an accident to the target, difficulty in operating it, or any other reason over which the competitor or team has no control causes delay, such time credit as the range officer may decide will be allowed and immediately entered on the scoreboard and score card, the effect of which will be to extend the time limit by that amount.

73. *Challenges.* If a competitor desires to challenge his shot just fired for alleged incorrect marking, he will pay one dollar to the range officer.

a. *On the rifle range* the range officer will go to the telephone, call the pit officer on the target and say "Re-mark Target No. —, it is challenged." The pit officer will call the nearest available pit officer and both will carefully recheck the target and cause it to be remarked. If the competitor's challenge is sustained and it is shown that the marking is incorrect, the money will be returned to him immediately; otherwise it is forfeited.

b. *On the pistol range* the target will be reexamined. If the competitor's challenge is sustained, the money will be refunded to him.

c. *If for any reason the competitor's target is not re-marked* when challenged, his money will be returned to him immediately, but he will not be allowed to fire over.

d. *If a competitor desires to challenge* the correctness of an official bulletin, he will pay one dollar to the chief statistical officer. If the challenge of the competitor is sustained and it is decided that the bulletin in question is incorrect, the money will be returned to him immediately; otherwise the money will be forfeited.

e. *Repeated challenges* of the same shot, target, or bulletin will not be permitted.

f. *Each chief range officer* will deliver the challenge money collected on his range to the range director at the end of each day's firing.

g. *All challenge money* of every nature will be delivered to the executive officer for use in the improvement of the recreational program of the camp.

74. *Competitors to sign score cards.* Competitors will check and sign the score card in individual matches, and team captains will check and sign the score cards in team matches.

75. *Safety precautions.* No arms will be loaded except at the firing point. During and after loading, the pistol will be kept at raised pistol until unloaded except when aimed at the target for firing. Pistols will have their magazines withdrawn and the sides pulled back except when the competitor is at the firing point in the act of firing or ready to fire. During and after loading, the muzzle of the rifle will be kept pointed in the direction of the target until unloaded. Rifles will be carried at all times with bolts open except when the competitor is at the firing point in the act of firing or ready to fire.

76. *Ammunition, unauthorized.* Any competitors having any ammunition in his belt or about his person when he takes his place at the firing line, other than that authorized, will be immediately disqualified.

77. *Firing, unauthorized.* No firing except at the targets in prescribed competition or practice will be allowed. Any violation of this rule will disqualify the offending competitor for the period of the matches.

78. *Piece, unserviceable.* An unserviceable or disabled piece is a rifle or pistol which is pronounced by a range officer as unsuitable for match competition.

79. *Cartridge, defective.* A defective rifle cartridge is one which bears the mark of the firing pin on the primer and which, when tried *once* under the direction of a range officer in the same rifle, still remains unfired. A defective pistol cartridge is one which clearly shows the imprint of the firing pin on the primer. No retest of a pistol cartridge will be made.

80. *Competitors may be required to score, mark targets, or act as range officers.* Any competitor who is detailed to perform any of these duties and fails to do so in a manner satisfactory to the range director will forfeit his right to compete in that match and, in the discretion of the executive officer, may be disqualified during the remainder of the matches from further participation in any match or any practice. In team matches, teams may be required to furnish scorers for teams firing on adjacent targets. Members of a team may perform this duty in turn.

81. *Protests.* Protests and appeals may not be submitted directly to the executive officer, but will be submitted to the range officer of the firing point concerned. In case a competitor considers the decision of the latter unwarranted by the facts presented, he may appeal orally to the range director through the

chief range officer of that range and then to the executive officer in writing before 9 p. m. of the day of the occurrence. On questions of rules or conditions of National Rifle Association matches, the executive officer will accept the opinion of the executive committee of the National Rifle Association and base his decision thereon. Appeals from the decisions of the executive officer may be made in writing and forwarded through that officer to the appeals board, which will consist of those members of the National Board for the Promotion of Rifle Practice, not less than three in number, who are present at the national matches at the time of the protest. The decisions of this appeals board will be final.

82. *Penalties.* a. Any person interfering with a competitor on the firing point or annoying him in any way will be warned to desist, and if he repeats the offense, he will be ordered off the range at once.

b. Any competitor who shall—

(1) Fire under a name other than that under which he entered, or who shall fire twice for the same prize, or

(2) Be guilty of any conduct considered by the executive officer to be discreditable, or

(3) Be guilty of falsifying his score or being accessory thereto, or

(4) Offer a bribe of any kind to any official or other person, or

(5) Be detected in an evasion of the conditions prescribed for the conducting of any match, or

(6) Refuse to obey any instructions of the executive officer or a range officer, or

(7) Be guilty of disorderly conduct

may, upon the offense being proved to the satisfaction of the executive officer, be disqualified from competing further in the matches and may be denied any prize won by him during the current matches. He may be barred from Camp Perry.

83. *Awards by the National Board for the Promotion of Rifle Practice.* Distribution of medals and trophies won in the national trophy matches will be made at the office of the National Board for the Promotion of Rifle Practice at the national matches during the time such office is open at Camp Perry, Ohio, and thereafter at the office of that board in Washington, D. C. All correspondence concerning such medals and other badges will be conducted with the Washington office. Qualification insignia will be issued from the Washington office of the National Board after the close of the matches.

SECTION VIII—RULES GOVERNING RIFLE MATCHES

84. *Status of competitors.* a. A rifle competitor can have but a single status with respect to rifle competition: Regular service, National Guard, Reserve, or civilian.

b. Members of the Regular services may compete only in such status and in the arm or service to which they actually belong. Individuals of the Regular services holding Reserve appointments will be eligible to shoot in their Regular status only. Retired officers and retired enlisted men of the Regular services are classified as "service" individuals.

c. A civilian competitor is one who is without any Regular service, National Guard, or Reserve affiliation whatsoever. Members of the Reserve Officers' Training Corps and trainees of the Citizens' Military Training Camp teams are classified as civilians. However, advanced course students in the Reserve Officers' Training Corps are not eligible for membership on State civilian teams.

d. Any competitor entering or firing in any match in any but his proper status may be disqualified, and a team will be disqualified in which any of its members or alternates have entered in a false status.

85. *Two competitors on the firing point.* In team competition, two competitors will occupy a firing point and fire alternately at the target, the competitor on the right firing first. A shot fired out of turn will be scored a miss. When in his opinion it is necessary, a range officer may require a left-handed firer to be on the left of a pair.

86. *Drawing targets.* In all team matches, except the national rifle team match, targets will be assigned by lot in advance by the statistical officer. These assignments may be obtained from the statistical officer after 6 p. m. of the day before the match is scheduled.

87. *Changing arms.* No two competitors will fire in the national trophy matches with the same rifle. In National Rifle Association matches in which more than one competitor is permitted to fire the same rifle, the program will definitely so state. No competitor will change his rifle during any competition unless his first piece has become unserviceable through accident. Such contingency will be verified by a range officer. Violation of this rule will be cause for disqualification.

88. *Competitors on firing point in individual competitions.* In individual competitions, one competitor may be required to complete his score before the next competitor begins to fire, or two competitors may be required to occupy a single firing point and fire alternately, the competitor on the right firing first.

89. *Time allowance on firing point.* In the absence of specific protest to the range officer by the competitor prior to the completion of his score, and in ample time to enable the range officer to check the time used by the competitor and by the target operator, it will be assumed that the target is being satisfactorily operated. If protest is made by the competitor, the range officer will check the time used by the competitor and by the target operator and make such adjustment as in his judgment is warranted. A competitor may appeal verbally from the decision of the range officer through the chief range officer to the range director, whose decision will be final, except on written appeal to the executive officer.

90. *Time allowance calculations.* The time allowance for slow-fire rifle competitions is at the rate of one minute per shot at ranges up to and including 600 yards. At ranges over 600 yards, the time allowance is at the rate of one and a half minutes per shot.

In rapid fire the time limit at 200 yards is one minute for ten shots, the competitor to be in a standing position when the target starts to appear.

At 300 yards the time limit is one minute ten seconds for ten shots, the competitor to be in a standing position when the target starts to appear.

91. *Shots fired after expiration of time scored misses.* All shots fired after expiration of the time limit will be recorded as marked, but circles will be drawn around any such shots, and notation will be made on the score card of such shots as may be fired after the expiration of the time limit. Such shots will be considered as having been misses and will not be added to the score.

92. *Changing value of shot.* The record value of any shot will not be changed after the following shot has been fired, unless some special message with reference to it is received from one of the pit officers.

93. *Competitors pay attention to score.* Competitors will pay attention to the score as announced and recorded, so that any error may be promptly investigated.

94. *Field glasses and telescopes.* Competitors may use field glasses or telescopes on the firing point. They may also use a watch, a micrometer, a rifle fork, small individual score book, blacking lamp, pencil, and shooting bag or box. During rapid fire stages in individual rifle matches, the use of telescopes by any individual on the ready line, on the assembly line, or in the vicinity thereof is forbidden.

95. *Wind flags.* For purposes of instruction in practice and in the matches, two streamers will be put up over each target pit, except on range A. The executive officer of the matches is authorized to lower these flags during the infantry match.

96. *Challenges.* When the scoring of a shot is challenged, the range officer will receive the dollar, go to the telephone, call the pit officer on the target and say "Re-mark Target No. —, it is challenged."

The pit officer will call the nearest available pit officer and both will carefully recheck the target and cause it to be re-marked. If the competitor's challenge is sustained and it is shown that the original marking was incorrect, the money will be returned to him immediately; otherwise it is forfeited. Repeated challenges of the same shot are not permitted.

97. *Gun sling, pads, and gloves.* a. The *gun sling* may be used at all ranges except 200 yards standing, as an auxiliary to steady the piece in connection with one arm only. No knot will be tied in the sling and the sling itself will not be added to or modified except that an empty cartridge case or small article that does not mutilate the sling in any way may be used between the keepers for the purpose of adjustment. The use of a hook or roll on the sleeve of a shooting coat or shirt to keep the sling in place on the arm is prohibited.

b. *Pads* of moderate size and thickness may be worn on both elbows, on the right or left shoulder, and upper arm. Shoulder pads so designed as to aid materially in retaining the rifle butt in the firing position against the shoulder are prohibited. Pads of such size or thickness as to form artificial support are prohibited.

c. *No gloves may be worn* which in any way form an artificial support.

d. The *making or use of holes* on the firing point is prohibited.

98. *Authorized positions.* The authorized positions are standing, kneeling, sitting, and prone, and are defined as follows:

a. *Standing.* Erect on both feet. No other portion of the body receiving artificial support. The rifle will be supported by both hands and one shoulder only. The forward hand will be extended, so that the arm will be entirely free from touching or resting against the body. The gun sling may not be used and will be adjusted to what is known as the "parade" position. Including the sling within the grasp of the hand will be optional.

b. *Kneeling.* Weight of the body supported on right knee and foot and left foot, or left knee and foot and right foot; no other part of the body to touch the ground. Sitting on the side of the foot instead of the heel will be permitted. The rifle will be supported by both hands and one shoulder only. The elbow supporting the piece will be approximately on or just inside the knee. The elbow of the trigger arm will be free from all support.

c. *Sitting.* Weight of the body supported on buttocks and feet. No other portion of the body to touch the ground. Rifle to be supported by both hands and one shoulder only. The left hand (or in the case of a left-handed shooter, the right hand) must not rest on leg or knee. Elbows resting approximately on or just inside the knee. Legs to be apart or crossed at the option of the firer.

d. *Prone.* Body extended on the ground, head toward the target, rifle supported by both hands and one shoulder only, both elbows on the ground. No portion of the arms below the elbow will rest on the ground or any artificial support. No part of the rifle will touch the ground.

e. The *method of assuming any position* will be optional with the firer.

99. *Ties in the National Individual Rifle Match.* a. Ties will be decided by the highest numerical score at—

(1) 1,000 yards.
(2) 600 yards.
(3) 300 yards rapid fire.
(4) 200 yards rapid fire.
(5) 200 yards slow fire.

b. *In the event the tie is not broken,* the scores at each range in the above order will be ranked by—

(1) The fewest misses.
(2) The fewest hits of the lowest value.
(3) The fewest hits of the next lowest value, etc.
(4) In slow fire, by the inverse order of the hits, counted singly from the last to the first.

c. *If still a tie,* the competitors concerned will fire single shots at the longest range until the tie is broken.

100. *Ties in the National Rifle Team match.* a. Ties will be decided by the highest total numerical team score at—

(1) 1,000 yards.
(2) 600 yards.
(3) 300 yards rapid fire.
(4) 200 yards rapid fire.
(5) 200 yards slow fire.

b. *In the event the tie is not broken,* the score at each range in the above order will be ranked by the—

(1) Fewest misses.
(2) Fewest hits of lowest value.
(3) Fewest hits of the next lowest value, etc.

101. *Ties in the Infantry Match* will be decided—

a. By the highest total numerical team score at the longest range.

b. By the highest total numerical team score at the next longest range, etc.

c. Thereafter, by the fewest hits of lowest value.

102. *Ties in National Rifle Association matches.* Ties in all other rifle matches will be decided as provided for in Official Rules for Rifle and Pistol Shooting, National Rifle Association, latest revision.

103. *In small bore rifle matches,* the rules of the National Rifle Association will govern.

SECTION IX—RULES GOVERNING PISTOL MATCHES

104. *Status of competitors.* a. A *pistol or revolver competitor* can have but a single status with respect to pistol or revolver competition: Regular service, National Guard, Reserve, police, or civilian.

b. *Members of the Regular services* may compete only in such status and in the arm or service to which they actually belong. Individuals of the Regular services holding Reserve appointments will be eligible to shoot in their Regular status only. Retired officers and retired enlisted men of the Regular services are classified as service individuals.

c. A *police competitor* is one who is a bona fide member of a regularly constituted law enforcement agency, including Highway Patrol, Railroad and Bank Guard, Armored Truck, and Express Companies, from which Department or Company he receives full time pay for such work.

d. A *civilian competitor* is one who is without any Regular service, National Guard, Reserve, or police affiliation whatsoever. Members of the Reserve Officers' Training Corps and trainees of the Citizens' Military Training Camp teams are classified as civilians.

e. *Members of the National Guard* or *Reserve* may fire as police, either as individuals or as team members, provided they are bona fide members of organized police or constabulary forces or other law-enforcing agencies, as described in c above.

f. *Any competitor entering or firing in any match in any but his proper status* may be disqualified, and a team will be disqualified in which any of its members or alternates have entered in a false status.

105. *Two or more competitors may use* the same pistol in any competition. However, the application of this rule will not be permitted to interfere with the routine squadding of pistol matches; and no squadding changes will be made to adjust conflicts caused by this practice.

106. *Pistol range procedure.* The procedure for pistol and revolver firing will follow generally that laid down in Rules for Pistol and Revolver Matches published by the National Rifle Association, latest revision and chapter 3, part one, BFM, volume III. Such modification of these rules as may be necessary to provide for the special conditions existing at Camp Perry may be authorized by the executive officer.

107. *Too many hits on a target.* If more than the required number of hits appear on the target, any shots which can be identified as having been fired by some competitor other than the competitor assigned to that target will be disregarded. If more than the required number of hits then remain on the target a complete new score will be fired and the original score will be disregarded, except that if all such hits are of equal value the score will be recorded as the required number of hits of that value.

108. *If a competitor fires less* than the prescribed number of shots through his own fault, and there should be more hits on the target than he fired shots, he will be scored the number of shots of highest value equal to the number he fired and given a miss for each unfired cartridge.

109. *Malfunction.* When a competitor claims inability to complete his score at timed or rapid fire within the time limit because of a defective cartridge or disabled piece, the range officer, if satisfied that conditions are as claimed by the competitor, will permit him to refire a complete string as soon as may be practicable. No competitor will refire any record string more than once because of a defective cartridge or disabled piece. Such shots as may have been fired in the original string will not be marked or scored.

In case of malfunction for any reason whatsoever, the competitor will immediately assume and hold the position of "raise pistol" and call a range officer, whose duty it will be to draw back the slide and investigate the malfunction. The competitor will not clear the malfunction nor draw the slide to the rear.

110. *Misfires.* The imprint of the firing pin on the primer of a pistol cartridge will clearly constitute a misfire without any further test.

111. *Ties in National Individual Pistol Match.* Ties will be decided by the highest numerical score at—

(1) Rapid fire.
(2) Timed fire.
(3) Slow fire.

b. *In the event the tie is still unbroken,* the scores at each stage in the above order will be ranked by the—

(1) Fewest misses.
(2) Fewest hits of lowest value.
(3) Fewest hits of next lowest value, etc.

112. *Ties in the National Pistol Team match.* a. Ties will be decided by the highest total numerical team score at—

(1) Rapid fire.
(2) Timed fire.
(3) Slow fire.

b. *In the event the tie is still unbroken,* the scores at each stage in the above order will be ranked by the—

(1) Fewest misses.
(2) Fewest hits of lowest value.
(3) Fewest hits of next lowest value, etc.

113. *Ties in National Rifle Association matches.* Ties in all other pistol matches will be decided as provided for in Official Rules for Rifle and Pistol Shooting, National Rifle Association, latest revision.

SECTION X—DESCRIPTION OF ARMS AND AMMUNITION

114. *Rifle.*—a. *National Trophy matches.* Rifle, United States, caliber .30, M1903, having not less than 3-pound trigger pull, equipped with either the old service model stock or the pistol grip, type C, modified stock, with the knurled head cocking piece with either regular or reversed safety lock. Modification of the rifle to permit the use of the telescopic sight or receiver sight is permitted.

b. *National Rifle Association matches* as prescribed in the conditions of the match.

c. The *headless cocking piece* will be permitted on service rifles only when used with telescopic sights. It will be permitted in rifles of a commercial manufacture when these rifles are designed for a headless cocking piece.

115. *Rifles available.* National match type rifles, current model, furnished by the Ordnance Department, will be made available upon arrival of teams and individuals participating in the matches, under rules and regulations announced by the executive officer thereof. Such necessary orders and instructions regarding the issue of arms and equipment to, and return thereof by, all teams and individuals attending the national matches as are necessary to provide adequate protection to the United States will be published by the executive officer of the national matches.

116. *Rifle ammunition.* Rifle ammunition furnished at the national matches will be issued by the range personnel to the competitors at the firing points for practice and for match firing. No rifle ammunition other than that issued will be used in the national trophy matches. In those rifle matches of the National Rifle Association in which any ammunition may be used, the program will definitely so state.

117. *Pistols and revolvers.*—a. *National Trophy matches.* Arm: Pistol, U. S., caliber .45, M1911 or M1911A1, having not less than 4-pound trigger pull, issued by the Army Ordnance Department, or the same type and caliber of pistol as manufactured by Colt Patent Fire Arms Co., privately owned, which must be equipped with fixed sights, the front sight, blade type (not undercut), and the rear sight an open U or rectangular notch, and issue or Colt factory standard stocks. Except as above, the parts of the pistol may be specially fitted and include alterations which will improve the functioning and accuracy of the arm, provided such alterations do not interfere with the functioning of the safety devices as manufactured.

b. *National Rifle Association matches.* As prescribed in the conditions of each match.

118. *Pistol ammunition.* Pistol ammunition furnished at the national matches will be issued by the range personnel to competitors at the firing points for practice and for match firing. No pistol ammunition other than that issued will be used in the national trophy matches. In those revolver or pistol matches of the National Rifle Association in which any ammunition may be used, the program will definitely so state.

119. *Changing arms.* No competitor will change his pistol during any competition unless his first piece has become unserviceable through accident. Such contingency will be verified by a range officer. Violation of this rule will be cause for disqualification.

120. *Marking of equipment.* Marking of any equipment in a manner that will deface it is forbidden.

SECTION XI—SCORERS AND THEIR DUTIES

121. *Field glasses.* Scorers at ranges greater than 200 yards will be supplied with field glasses.

122. *Scorers will confine their language strictly to their duties.* Scorers will not enter into disputes with competitors or others. If any question should arise, the scorer will promptly call: "Range officer, number —," stating the number of his target.

123. *In individual matches,* as soon as he receives the score cards, the scorer will enter on the scoreboard the names of all competitors in the order of the relays, placing the number of the relay before each name and leaving blank spaces on the scoreboard when there are vacancies in the relays.

124. *In team matches,* the scorer will enter on the scoreboard the names of the members of the team in the order in which the team captain desires that the competitors fire.

125. *If a competitor is not present* when it is his turn to fire, or when his name is called, or in case competitors arrive after their relays are due and have been called, the scorer will report the fact to the range officer.

126. *When a competitor is going to or leaving the firing point,* with the chamber of his rifle closed, the scorer will require him to open the bolt.

127. *If a scorer or a competitor desires a target disked, semaphored, redisked, or re-marked,* the scorer will call the range officer.

128. A *scorer will not be permitted* to make any erasures, corrections, or changes on the score card. If a correction is necessary, it will be made and initialed by the range officer.

129. *Scores on the blackboard will not be erased* without orders from a range officer.

130. *When a target is marked, the scorer will announce the score* in a tone sufficiently loud to be heard by the firer. No alteration will be made in the recorded score after a succeeding shot has been fired except by the range officer on notification from the pit.

131. The *scorer will write upon the scoreboard* the value of each hit as soon as he shall have announced it, and then, unless the shot is challenged, he will enter it upon the score card.

132. *Care will be taken to enter the slow-fire scores* in exactly the order in which the shots are fired.

133. *In slow fire, if more than one hit is found* on a target after a competitor has just fired from the firing point of that target, that competitor will receive the highest value, and no record will be made of the other hits.

134. *In slow fire the score is announced thus.* "(Title, name); first (second, etc.) shot, a 5."

135. *In rapid fire the score will be announced,* for example, thus: "Target number—(title, name) 1 five, 2 fives, 3 fives, 4 fives, 5 fives; 1 four, 2 fours, 1 three, 1 two, 1 miss." The score will be recorded on the blackboard in the same manner as in slow fire.

136. *When the target is improperly operated,* or in case of a misfire, disabled piece, or any other unusual occurrence, the scorer will promptly report the facts to the range officer.

137. *All shots fired count.* All shots fired by a competitor after he has taken his place at the firing point will be considered in his score, even if his piece is not directed toward the target or is accidentally discharged. Exceptions to this rule will not be made for any reason except as provided in paragraph 138. In team firing a shot fired out of turn will be scored a miss. A shot fired by a competitor after taking his place at the firing point and before the order "commence firing" will be scored a miss.

138. *Target withdrawn while firing.* In slow fire, if the target is withdrawn from the firing position just as the shot is fired, the scorer at that firing point will at once report the fact to the range officer, who, if satisfied upon investigation that the case is as represented, will direct that the shot fired be not considered, that the competitor fire another shot, and that credit be given for time lost.

139. *Hits on the wrong target* will be scored as misses.

140. *In rapid fire, any unfired cartridges will count as misses,* except that in case of a defective cartridge or a disabled piece the hits will not be recorded and another score may be fired.

141. *In rapid fire, if a competitor should fire less than the prescribed number* of shots through his own fault, and there should be more hits marked on his target than the number of shots he fired, he will be scored the number of hits of highest value equal to the number he fired and a miss for each unfired cartridge.

142. *In rapid fire, if there are more than ten hits* on a target, the target will not be marked, the hits will not be recorded, and another score will be fired, except that if all the hits are of equal value the competitor assigned to that target will be scored with 10 hits.

143. *In an individual slow-fire match, when a competitor has made a possible score* at all stages, he will continue to fire at the longest range until he has made a hit of less than the highest value. Each extra shot will be scored on the board and on the face of the score card, beginning under the first shot at that range.

144. *Use of the telephone.* a. *Messages on the telephone* will be brief and clear.

b. *"Mark" a target* will mean that the competitor at the firing point has fired and the target has not been pulled.

c. *"Disk," "semaphore," or "redisk"* a target will mean that the target must be disked, semaphored, or redisked without being pulled. It will not be necessary to call the pit officer of the target.

d. The *use of the telephone* will be confined strictly to necessary business. No other conversation or information of any kind whatsoever will be permitted.

145. *When a competitor has fired and the target has not been pulled,* the scorer will call to the telephone, "Mark number —," but must call the range officer when a message to disk, semaphore, redisk, re-mark, or any other message is to be telephoned.

146. *During matches, no communication will be transmitted to the pit* from anyone except range officers or other officers of the match, except that scorers may send messages to mark a target, but not to disk or redisk.

147. *Scorers will direct their attention to the competitor* on their target while he is aiming and firing and will be prepared to state at any time whether competitor has fired, and in rapid fire, now many shots he has fired. They will report all irregularities observed to the range officer.

148. *When a competitor has finished his string,* the scorer will place the total on the scoreboard and announce thus: "(Title, name); total score 92." He will then enter the total on the score card, sign it, and exhibit it to the competitor or team captain who will check and sign the card in the space provided.

149. *Upon the completion of the scores at any range,* score cards will be verified, signed, and collected by the range officers, and by them delivered to the chief scorer at the earliest practicable moment.

SECTION XII—PIT PERSONNEL AND THEIR DUTIES

150. A *shot hole, the leaded edge of which comes in contact* with the outside of bull's-eye or figure or the rings or lines of a target, will receive the higher value as if it had struck inside the line.

151. *Ricochets.*—A hole made by a ricochet bullet will be market and scored as a miss: A bullet that "keyholes" is not necessarily a ricochet. If there is doubt as to whether a hole is caused by a ricochet bullet, the pit officer will be called to make a decision.

152. A *target is at "half-mast"* when the center of the bull's-eye or figure is opposite the top of the parapet. When targets are at half-mast the marker will remain at his station ready to serve the target immediately. No targets will be placed at half-mast until all firing at that range is completed.

153. *"Secure" a target* means that the target is no longer needed for service. It should be pulled down, the spotters removed, and all shot holes pasted.

154. *Use of spotters.* The use of spotters in marking slow fire will be *mandatory.* In marking targets only 3-inch or 5-inch spotters will be used. Competitors may request that a larger or a smaller spotter (within the above limits) be substituted when the target is down for marking, but the target will not be pulled for the sole purpose of changing a spotter except that a spotter will be removed upon request of a competitor made before firing his first shot.

155. *Marker must watch the target attentively.* In slow fire when the target is hit, the marker will pull it down and remove the spotter from the old shot hole and place one in the new shot hole. If the hit is in the bull's-eye the white side of the spotter will be shown. If the hit is elsewhere on the target the black side of the spotter will be shown. The hole from which the spotter has been removed will be pasted and the target raised and disked by placing the center of the disk over the shot hole. In lieu of disks, semaphores may be used for marking.

156. *In slow fire, if more than one hit is found on a target,* spotters will be placed in each hole. The hit of the highest value will be signaled and the pit officer called. He will cause a report to be telephoned to the firing line.

157. *Before a miss is signaled,* the edge of the bull's eye, the rings, the outer boundary lines, and the numbers will be carefully examined by moving the fingers over them. If no hit is found, a pit officer will be called to inspect the target. He will repeat this operation. In slow fire, red flags for signaling misses will not be furnished to markers but to pit officers only, who will personally signal all misses.

158. *Misses in rapid fire* will be signaled by the marker as directed by the pit officer.

159. *No attempt will be made in marking misses* to indicate on which side of the target the miss was made, or whether the shot was high or low. To mark a miss the red flag will be moved once only across the center of the target from right to left and then withdrawn into the pit.

160. *Special instructions in rapid fire procedure.*—a. *For rapid fire,* all targets on a particular range (or subdivision) will be operated as a unit under control of the chief pit officer.

b. The *chief pit officer* will take his post at the center of his group near a telephone and the control key of the bell system.

c. *On receiving a message* from the firing line "Ready on the firing line" the chief pit officer will signal "stand by" on the bell system. All target operators will stand by with their hands on their targets. The red flag in front of the center of the pit will be waved three times and then withdrawn.

d. *Five seconds after the flag has disappeared* below the parapet, the chief pit officer will signal "up" on the bell system.

All targets will be run up together and will be fully exposed above the parapet for the prescribed time.

e. *To expedite the location of all shot holes* after the targets shall have been withdrawn, target operators will watch their respective targets during the firing and count the hits as they come on the target.

f. *Ten seconds before the lapse of the specified time* the chief pit officer will caution by voice, "stand by." At the proper time he will ring the bell to signal "down" and all targets will be pulled down together.

g. *When exactly ten hits are found on the target* it will be run up promptly and the score disked. Fives will be marked first then fours then threes, then twos. Misses will be signaled last. In disking rapid fire scores, the center of the disk will be placed over the shot holes. The scores will be disked slowly. When disking rapid fire scores, the disk will be brought on the target from the right to mark fives and fours and from the left to mark threes and twos. The disk will be withdrawn toward the bottom of the target after marking the last shot of a group of a certain value. A brief time interval will be allowed between marking hits of different value. The red flag will be moved slowly from right to left once across the face of the target for each miss.

h. *If more than ten hits are found on a target*, the pit officer assigned to that target will be called to examine the target while it is still down. The pit officer will call the range officer on the firing line by telephone and inform him that there are more than ten hits on the target. The target will be marked only if all hits are of equal value.

i. *If less than ten hits are found* on a target, the pit officer will verify the misses before they are signaled.

j. *Spotters* will not be used in rapid fire.

k. *After the targets are marked*, they will remain up until the command "paste all targets" is received from the firing line and the signal to paste has been given by the chief pit officer. A target that has been challenged will not be pasted or run up except on message from the firing line. In pasting, a check will be made to insure that all shot holes are pasted, counting the fives, fours, threes, and twos as when disking.

l. *Discovery of errors in the pit.* A target operator who discovers that he has made an error in marking will immediately call it to the attention of a pit officer. A pit officer who shall learn that an error has been made in marking will immediately call by telephone the range officer on the firing point in charge of the target and explain the error.

[SEAL] E. S. ADAMS,
*Major General,*
*The Adjutant General.*

[F. R. Doc. 39-2443; Filed, July 8, 1939; 10:20 a. m.]

## DEPARTMENT OF THE INTERIOR.

### Bituminous Coal Division.

[General Docket No. 15]

IN THE MATTER OF THE ESTABLISHMENT OF MINIMUM PRICES AND MARKETING RULES AND REGULATIONS: IN RE MINIMUM PRICES AS COORDINATED FOR DISTRICTS NOS. 1 TO 15, BOTH INCLUSIVE

AN ORDER RATIFYING AND CONTINUING IN EFFECT ORDERS FOR AND NOTICES OF FINAL HEARINGS IN THE MATTER OF THE ESTABLISHMENT OF MINIMUM PRICES OF THE COALS PRODUCED IN DISTRICTS NOS. 1 TO 15, BOTH INCLUSIVE, DATED JUNE 23, 1939 AND JUNE 28, 1939; TRANSFERRING PLACE OF HEARING; DESIGNATING EXAMINERS TO CONDUCT SAID HEARINGS; AND PROVIDING FOR THE FILING OF PROTESTS

The National Bituminous Coal Commission having, by Orders for and Notices of Final Hearings in the Matter of the Establishment of Minimum Prices for the coals produced in Districts Nos. 1 to 8, inclusive,[1] and Districts Nos. 9 to 15, inclusive,[2] dated June 23, 1939 and June 28, 1939, respectively, noticed final hearings before Examiners to be duly designated, commencing on July 24, 1939 and August 7, 1939, respectively, at the Hearing Room of the Commission, Washington, D. C., for the purpose of receiving evidence to enable the Commission to establish minimum prices f. o. b. transportation facilities at the mines for the kinds, qualities, and sizes of coal produced in each of said Districts, as provided by Section 4 II (b) of the Bituminous Coal Act of 1937;

*It is ordered*, That the aforesaid Orders for and Notices of Hearings be, and the same are, hereby adopted, ratified and continued in effect as the Orders for and Notices of Hearings of the Bituminous Coal Division. Any party dissatisfied with any proposed minimum price or prices as published and made a part of the aforesaid notices of hearings, and desiring to be heard thereon, shall file with the Bituminous Coal Division of the Department of the Interior at its offices, 734 15th St., NW., Washington, D. C., on or before the date of hearing, a protest setting forth the interest of the protestant and a concise statement of the matter or matters complained of, and

*It is further ordered*, That said hearings shall be held at the Auditorium, North Interior Building, 18th and F Streets, NW., Washington, D. C., before Thurlow G. Lewis, Presiding Examiner, and Examiners Chas O. Fowler and Samuel Jaffee, who are hereby designated to conduct said hearings, to administer oaths and affirmations, to examine witnesses, receive evidence, subpoena witnesses, require the production of records by subpoena duces tecum, to continue said hearings from time to time, and to prepare and submit to the Director proposed findings of fact and conclusions and the recommendation of appropriate orders in the premises, and to perform such other duties as may be necessary in the proper conduct of such hearings.

Dated this 8th day of July 1939.

H. A. GRAY,
*Director.*

[2] To appear in the FEDERAL REGISTER in the issues for Thursday, Friday, and Saturday, July 13-15, inclusive.

## DEPARTMENT OF COMMERCE.

### Office of the Secretary.

### INLAND WATERWAYS CORPORATION

DELEGATION OF AUTHORITY TO ASSISTANT SECRETARY OF COMMERCE

*Ordered*, Pursuant to the authority vested in the Secretary of Commerce by the Act of May 20, 1926 (Sec. 8, 44 Stat. 573; 5 U.S.C. 592a), and Section 9, Executive Order No. 6166, dated June 10, 1933, it is hereby ordered and directed that John Monroe Johnson, Assistant Secretary of Commerce, shall perform all duties and exercise all powers and functions now vested in the Secretary of Commerce in the administration of the affairs of the Inland Waterways Corporation.

In the exercise of the above duties, powers and functions the Assistant Secretary shall be governed by the precedents which have been established by the Secretary of Commerce in the determination of similar matters, together with such modifications as the Secretary may now or hereafter find proper to indicate. Any matters which require the application of new principles or departure from old ones are to be brought to the attention of the Secretary for final determination. Likewise any change or modification in existing regulations or the promulgation of new regulations should be brought to the Secretary's attention for approval.

[SEAL] HARRY L. HOPKINS,
*Secretary of Commerce.*

Approved July 1, 1939.

[F. R. Doc. 39-2447; Filed, July 8, 1939; 12:07 p. m.]

## DEPARTMENT OF LABOR.

### Wage and Hour Division.

NOTICE OF ISSUANCE OF SPECIAL CERTIFICATES FOR THE EMPLOYMENT OF LEARNERS

Notice is hereby given that Special Certificates for the employment of learners at wages lower than the minimum wage applicable under Section 6 of the Fair Labor Standards Act of 1938 are issued to the following employers, subject to the following terms:

| Name of firm | Number of learners | Occupation | Period | Beginning | Percent of minimum wage |
|---|---|---|---|---|---|
| Westmoreland Garment Corp., Norvelt, Westmoreland Co., Pa. | 40 | Stitching | 8 weeks | July 11, 1939 | 80 |
| Metro Pants Company, Harrisonburg, Virginia | 6 | Stitching | 8 weeks | July 11, 1939 | 75 |
| Julius Leventhal & Bros., Lykens, Pennsylvania | 20 | Stitching | 8 weeks | July 11, 1939 | 75 |
| Dunhill Shirt Company, 9th & Franklin Streets, Lexington, Missouri. | 62 | Stitching | 8 weeks | July 11, 1939 | 75 |
| Southern Waistband Co., Midland Avenue, Winder, Georgia. | 1 | Stitching | 8 weeks | July 11, 1939 | 75 |

These Special Certificates are issued ex parte under section 14 of the said Act and Section 522.5 (b)[1] of Regulations Part 522, as amended. For fifteen days following the publication of this notice the Administrator will receive detailed written objections to any of these Special Certificates and requests for hearing from interested persons. Upon due consideration of such objections as provided for in said Section 522.5 (b) such Special Certificates, or any of them, may be cancelled as of the date of their issuance and if so cancelled, reimbursement of all persons employed under such certificates must be made in an amount equal to the difference between the applicable statutory minimum wage and any lesser wage paid such persons.

Signed at Washington, D. C., this 10th day of July 1939.

MERLE D. VINCENT,
*Chief of Hearings and Exemptions Section.*

## CIVIL AERONAUTICS AUTHORITY.

[Docket No. 43-402 (C)-1]

IN THE MATTER OF THE APPLICATION OF IMPERIAL AIRWAYS (BERMUDA), LTD., FOR CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY UNDER SECTION 402 (C) OF THE CIVIL AERONAUTICS ACT OF 1938

NOTICE OF HEARING

The above-entitled proceeding is assigned for public hearing on July 19, 1939, 10 o'clock a. m. (Eastern Standard Time) in Room 5044, Department of Commerce Building, Washington, D. C., before the Authority.

Dated Washington, D. C., July 8, 1939.

By the Authority.

[SEAL] PAUL J. FRIZZELL,
*Secretary.*

[F. R. Doc. 39-2458; Filed, July 10, 1939; 12:48 p. m.]

## FEDERAL COMMUNICATIONS COMMISSION.

[Docket No. 5354]

IN RE APPLICATION OF CHARLES LEO LINTZENICH (KLCN)

*Dated July 22, 1938, for renewal of license; class of service—Broadcast; class of station—Broadcast; location—Blytheville, Ark.; operating assignment specified—Frequency, 1290 kc; power, 100 watts day; hours of operation, daytime.*

[File No. B3-R-711]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine whether, particularly on, to wit, February 21, 1937, August 22, 1937, February 21, 1938, and August 17, 1938, the transmitter proper and associated transmitting equipment of the station was designed, constructed, maintained and operated in accordance with the provisions of Rule 132 and interpretations of good engineering practice issued pursuant thereto.

2. To determine whether on, to wit, August 17, 1938, transmitting apparatus of the station was capable of delivering satisfactorily the authorized power with a modulation of at least 85 per cent, in accordance with the requirements of Rule 139 (a).

3. To determine whether the station was operated subsequent to December 10, 1936, and particularly on, to wit, February 21, 1937, without having in operation a modulation monitor approved by the Commission, in violation of the provisions of Rule 139 (b).

4. To determine whether on, to wit, August 17, 1938, the station was equipped with suitable indicating instruments of accepted accuracy to measure the final amplifier plate voltage in accordance with the requirements of Rule 143.

5. To determine whether on, to wit, August 22, 1937 and February 21, 1938, the antenna ammeter associated with the transmitting apparatus of the station was replaced without authority from the Commission, in violation of the provisions of Rule 143.

6. To determine whether the station has been so operated that the frequency has been maintained between the limits of 50 cycles per second above to 50 cycles per second below the assigned frequency, particularly on, to wit, August 14, 1937, October 13, 1937, May 14, 1938 and June 13, 1938, in accordance with the requirements of Rule 144.

7. To determine whether the station remained silent during the period, to wit, November 12, 1936, to November 18, 1936, without previously securing authority therefor from the Commission, as contemplated by the provisions of Rule 151.

8. To determine whether during the period, to wit, from August 13, 1934, to October 8, 1934, a licensed operator of appropriate class was on duty during all periods of actual operation of the transmitting apparatus of the station, at the place where the transmitting equipment was located, in accordance with the requirements of Rule 170.

9. To determine whether during the period, to wit, from August 13, 1934, to October 8, 1934, the transmitting apparatus of the station was operated by any person not then holding a valid operator's license of appropriate class, in violation of the provisions of Section 318 of the Communications Act of 1934.

10. To determine whether on or about, to wit, June 10, 1936, February 21, 1937, February 21, 1938, and August 17, 1938, proper entries were made each thirty minutes in the station operating log, in accordance with the requirements of Rule 172 B-d.

11. To determine whether the program log, to wit, for February 21, 1937, and for the periods October 8, 1935 to November 8, 1935, and February 15, 1938, to February 21, 1938, and the operating log for February 21, 1937, were kept in an orderly manner and in such detail that the information required was readily available; and whether the operating log for the period, to wit, October 8, 1935, to November 8, 1935, showed the year of such log; in accordance with the requirements of Rules 172 and 174.

12. To determine whether the program and operating logs of the station for, to wit, the period October 8, 1935, to November 8, 1935, and for August 17, 1938, were signed by the operator, or other person competent to do so, at the time such person started duty and again when going off duty, in accordance with the requirements of Rule 173.

13. To determine whether the granting of the application for renewal of license of the station and its continued operation will serve public interest, convenience and necessity.

The attention of the applicant is directed to the fact that while his application constitutes a part of the record, it is not a part of the testimony and he

should be prepared, at the hearing, to introduce testimony to prove the allegations contained in his application.

The specific grounds mentioned are not to be considered as exclusive of other grounds for the action and eventual decision of the Commission.

Attention is invited to Paragraph 104.6, subparagraphs b, c, and e of the Rules and Regulations of the Federal Communications Commission, which are as follows:

"104.6 b. In order to avail himself of the opportunity to be heard, the applicant shall, within 15 days of the mailing of the notice by the Secretary, file with the Commission a written appearance and statement of his desire to be heard, in accordance with Rule 105.25. Within 25 days of the mailing of the notice of hearing as aforesaid, any respondent who desires to participate in the hearing, shall file with the Commission his answer to any such appearance in accordance with Rule 105.26.

"c. In case no appearance or statement in writing of the facts to be proved upon such hearing is filed by the applicant within the time so specified, the hearing will be cancelled, the applicant deemed in default, his application denied, and the secretary shall so notify the applicant and other parties to the hearing.

"e. If at the date set for hearing, the applicant does not appear and offer evidence in support of his said application, a default will be entered, and the Commission will deny the application."

Attention is also called to the following: Rules and Regulations of the Federal Communications Commission, Paragraphs 105.25, 105.26, 105.34, 105.35, 106.22, 106.24, 106.26, 103.2, 103.3, 103.5, 103.8, 106.5, 106.8, 106.9, 106.10, 106.11, 106.12, 106.13, 106.15, 100.12, and such other said rules as may be applicable.

A copy of Practice and Procedure of the Federal Communications Commission may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., for a charge of ten cents a copy.

The hearing on the above mentioned application will be held on September 6, 1939, at the hour of 10:00 A. M., at the offices of the Commission, Washington, D. C.

Dated at Washington, D. C., December 27, 1938.

By the Commission.

[SEAL] T. J. SLOWIE, *Secretary.*

[Docket No. 5357]

IN RE APPLICATION OF CHARLES C. CARLSON (WJBW)

*Dated March 18, 1938, for renewal of license; class of service—Broadcast; class of station—Broadcast; location—New Orleans, La.; operating assignment specified—Frequency, 1200 kc; power, 100 watts night; 100 watts day; hours of operation, shares WBNO.*

[File No. B3-R-444]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine the technical and financial qualifications of the applicant to continue station operation under the terms of the license.

2. To determine the nature and character of the program service rendered.

3. To determine whether the station at all times has been operated in accordance with the standards of good engineering practice, as required by Rule 132.

4. To determine whether there has been maintained in the operation of the station a transmitter modulation below 55 percent, in violation of Rule 139.

5. To determine whether the power output of the station has been in excess of the amount specified in the license, contrary to Rule 142.

6. To determine whether provision has at all times been maintained by the station for accurately ascertaining the frequency of the transmitter wave independently of the frequency control unit, in accordance with Rule 145.

7. To determine the basis for all entries made in the station's operating log concerning the exact frequency in cycles used while its frequency monitor was inoperative.

8. To determine whether all entries made in the station's logs have been in accordance with Rules 172 and 173.

9. To determine whether any of the rights granted in the license of the station have been assigned or otherwise transferred in violation of Sections 301 and 310 of the Communications Act of 1934.

10. To determine whether the granting of the application for renewal of the license of the station and its continued operation will serve public interest, convenience and necessity.

The attention of the applicant is directed to the fact that while his application constitutes a part of the record, it is not a part of the testimony and he should be prepared, at the hearing, to introduce testimony to prove the allegations contained in his application.

The specific grounds mentioned are not to be considered as exclusive of other grounds for the action and eventual decision of the Commission.

The hearing on the above mentioned application will be held on September 8, 1939, at the hour of 10:00 a. m., at the offices of the Commission, Washington, D. C.

Dated at Washington, D. C., November 16, 1938.

By the Commission.

[Docket No. 5366]

IN RE APPLICATION OF JOHN F. ARRINGTON, JR. (NEW)

*Dated August 25, 1938, for construction permit; class of service—Broadcast; class of station—Broadcast; location—Valdosta, Ga.; operating assignment specified—Frequency, 1230 kc; power, 250 w night; 250 w day; hours of operation, unlimited.*

[File No. B3-P-2217]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine the legal, technical, financial and other qualifications of the applicant to construct and operate the proposed station.

2. To determine the need for service in the area proposed to be served; and whether the granting of this application will tend toward a fair, efficient and equitable distribution of radio service.

3. To determine the availability of economic support and talent for program material.

4. To determine whether the interests of Stations KGBX, WFBM, WOL and WPAX may be adversely affected by reason of interference.

5. Because of the pendency of another application with which conflict may be had by reason of interference, i. e., Fountain of Youth Properties, Inc., (WFOY), St. Augustine, Florida, (File No. B3-P-2249).

6. To determine whether the site at which the applicant proposes to construct and operate the station will be satisfactory.

7. To determine whether the transmitting equipment which the applicant proposes to use will comply in all respects with the Rules and Regulations of the Commission, particularly Rules 131, 132 and 139, and will render proper service.

8. To determine whether the granting of the application will serve public interest, convenience, and necessity.

Attention is invited to Section 15.31, subparagraphs b, c, d and e, and Section 9.02, of the Commission's Rules of Practice and Procedure, which are as follows:

§ 15.31 (b) *Appearances.* In order to avail himself of the opportunity to be heard the applicant in person or by his attorney shall, within fifteen days of the mailing of the notice of designation for hearing by the Secretary, file with the Commission one additional copy of the application and all papers incorporated as a part thereof and a written appearance, under oath, stating that he will appear and present evidence in support of his application on such date as may be fixed for hearing. Copies of such written appearance (not including the application and supporting documents) shall be served upon all other parties named in the notice of designation for hearing and accompanied by proof of service as provided in Section 9.01.

"Within twenty-five days of the mailing of the notice of designation for hearing by the Secretary, any respondent named in said notice who desires to participate in the hearing shall file in person or by his attorney with the Commission his written appearance, under oath, stating facts showing a substantial interest in the proceeding, the manner in which his interest may be aggrieved or adversely affected, and that he intends to appear at the hearing on the application on such date as may be fixed for the hearing. Copies of such appearance shall be served upon the applicant and accompanied by proof of service as provided in Section 9.01.

"(c) *Default for failure to file statement.* In case no such statement is filed by the applicant within the time specified, the applicant will be deemed in default, his application denied, and the Secretary shall notify the applicant and other parties.

"(d) *Notice of time and place.* In such case appearance is filed by the applicant within the time specified, the application will be entered upon the hearing docket and notice of the time and place for hearing shall be given by the Secretary.

"(e) *Default for failure to appear.* If, at the date set for hearing, the applicant does not appear and offer evidence in support of his application, a default will be entered, and the Commission will deny the application.

"§ 9.02 *Copies.* A party filing a petition or motion that, under Section 13.01, will be placed on the Motions Docket for action will furnish an original and eight copies thereof. An original and fourteen copies of all other pleadings or documents must be filed unless otherwise specifically provided for in these rules."

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

The applicant is hereby given the opportunity to obtain a hearing on such issues by filing a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure. Parties, other than the applicant, who desire to be heard must file a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure.

Dated at Washington, D. C., February 18, 1939.

By the Commission.

[Docket No. 5373]

IN RE APPLICATION OF UNIVERSITY OF WISCONSIN (WHA)

*Dated September 2, 1938, for construction permit; class of service—Broadcast; class of station—Broadcast; location—Studio, Madison, Wis.; transmitter, Arlington, Wis.; operating assignment specified—Frequency, 670 kc; power, 50 kw night; 50 kw day; hours of operation, unlimited, requesting the facilities of WMAQ.*

[File No. B4-P-2225]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine whether applicant is financially and otherwise qualified to install the new equipment and the antenna.

2. To determine the need for additional service in the area proposed to be served and whether the granting of this application will tend toward a fair, efficient and equitable distribution of radio service.

3. To determine whether the interests of Station WLW may be adversely affected by reason of interference.

4. To determine whether it would better serve public interest, convenience and necessity to grant the applicant herein the facilities of Station WMAQ as requested in the instant application.

5. Because of the pendency of another application with which conflict may be had by reason of interference, i. e., KFEQ (B4-ML-549).

6. To determine whether the site at which the applicant proposes to construct and operate the station will be satisfactory.

7. To determine whether the equipment which the applicant proposes to use will comply in all respects with the rules and regulations of the Commission, particularly Rules 132 and 139, and will render proper service.

8. To determine whether the antenna system which the applicant proposes to use will comply in all respects with the rules and regulations of the Commission, particularly Rule 131, and will render proper service.

9. To determine whether the economic interests of any stations or applicants may be adversely affected, particularly the following:

Existing stations: WCLO, WIBU, WEMP, WISN, WTMJ, KFIZ and WIBA.

10. To determine whether the granting of this application will serve public interest, convenience and necessity.

The attention of the applicant is directed to the fact that while his application constitutes a part of the record, it is not a part of the testimony and he should be prepared, at the hearing, to introduce testimony to prove the allegations contained in his application.

The specific grounds mentioned are not to be considered as exclusive of other grounds for the action and eventual decision of the Commission.

The hearing on the above mentioned application will be held on September 11, 1939, at the hour of 10:00 a. m., at the offices of the Commission, Washington, D. C.

Dated at Washington, D. C., December 27, 1938.

By the Commission.

[Docket No. 5510]

IN RE APPLICATION OF MASON CITY GLOBE GAZETTE CO. (KGLO)

*Dated January 28, 1939, for construction permit; class of service—Broadcast; class of station—Broadcast; location—Mason City, Iowa; operating assignment specified—Frequency, 1270 kc.; power, 1 kw (employing directional antenna system for nighttime operation) night 1 kw day; hours of operation unlimited; (requests facilities of Stations KWLC & KGCA).*

[File No. B4–P–2329]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine whether applicant is financially and otherwise qualified to install the new equipment and the directional antenna system.

2. To determine the need for additional service in the area proposed to be served and whether the granting of this application will tend toward a fair, efficient and equitable distribution of radio service.

3. To determine whether the interests of any other stations may be adversely affected by reason of interference, particularly Stations WOOD, WASH, WFBR, WJDX, KVOR, WIBA, KOIL, WTCN and KROC.

4. To determine whether it would better serve the public interest, convenience and necessity to grant to the applicant herein the facilities now licensed to Stations KWLC and KGCA as requested in the instant application.

5. Because of the pendency of another application with which conflict may be had by reason of interference, i. e. WFBR (B1–SA–295).

6. To determine whether the site at which the applicant proposes to construct and operate the station will be satisfactory.

7. To determine whether the equipment which the applicant proposes to use will comply in all respects with the rules and regulations of the Commission, particularly Rules 132 and 139, and will render proper service.

8. To determine whether the directional antenna system which the applicant proposes to use will comply in all respects with the rules and regulations of the Commission, particularly Rule 131, and will render proper service.

9. To determine whether the granting of the application will serve public interest, convenience and necessity.

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

The applicant is hereby given the opportunity to obtain a hearing on such issues by filing a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure. Parties, other than the applicant, who desire to be heard must file a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure.

Dated at Washington, D. C., April 13, 1939.

IN RE APPLICATION OF K. E. SCHONERT D/B AS (W9XTA) SCHONERT RADIO SERVICE

*Dated January 23, 1939, for renewal of license; class of service — Television broadcast (experimental); class of station—Broadcast; location—Harrisburg, Ill.; operating assignment requested—Frequency, 26500 kc; power, 500 watts, emission A3; hours of operation, unlimited time acc. Rule 983.*

[File No. B4–RHB–41]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine the technical qualifications of the applicant to continue the operation of this station.

2. To determine whether adequate funds have been and will be allocated by applicant for (a) the maintenance of the station and (b) the carrying forward of a program of research and experimentation.

3. To determine the nature and character of the applicant's program of research and experimentation; and whether the same has been and will be conducted in the manner required by the Commission's rules governing high frequency broadcast stations.

4. To determine whether the reports rendered by the applicant with reference to his program of research and experimentation are in compliance with Rule 1056.

5. To determine whether the granting of this application and the continued operation of the station will serve public interest, convenience and necessity.

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

The applicant is hereby given the opportunity to obtain a hearing on such issues by filing a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure. Parties, other than the applicant, who desire to be heard must file a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure.

IN RE APPLICATION OF CHARLES WALTER GREENLEY (KGCA)

*Dated January 25, 1939, for renewal of license; class of service—Broadcast; class of station—Broadcast; location—Decorah, Iowa; operating assignment specified—frequency, 1270 kc; power, 100 watts day; hours of operation, shares KWLC daytime.*

[File No. B4–R–519]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine the technical and financial qualifications of the applicant to operate the station.

2. To determine whether the antenna system used by applicant complies with Rule 131 of the Commission's Rules and Regulations.

3. Because of the pendency of the application (B4–P–2329) of the Mason City Globe Gazette Company (KGLO), requesting the facilities of Station KGCA.

4. To determine whether the granting of the application and the continued operation of the station will serve public interest, convenience and necessity.

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

Attention is invited to Section 15.31, subparagraphs b, c, d and e, and Section 9.02, of the Commission's Rules of Practice and Procedure, which are as follows:

"§ 15.31 (b) *Appearances.* In order to avail himself of the opportunity to be heard the applicant in person or by his attorney shall, within fifteen days of the mailing of the notice of designation for hearing by the Secretary, file with the Commission one additional copy of the application and all papers incorporated as a part thereof and a written appearance, under oath, stating that he will appear and present evidence in support of his application on such date as may be fixed for hearing. Copies of such written appearance (not including the application and supporting documents) shall be served upon all other parties named in the notice of designation for hearing and accompanied by proof of service as provided in Section 9.01.

"Within twenty-five days of the mailing of the notice of designation for hearing by the Secretary, any respondent named in said notice who desires to participate in the hearing shall file in person or by his attorney with the Commission his written appearance, under oath, stating facts showing a substantial interest in the proceeding, the manner in which his interest may be aggrieved or adversely affected, and that he intends to appear at the hearing on the application on such date as may be fixed for the hearing. Copies of such appearance shall be served upon the applicant and accompanied by proof of service as provided in Section 9.01.

"(c) *Default for failure to file statement.* In case no such statement is filed by the applicant within the time specified, the applicant will be deemed in default, his application denied, and the Secretary shall notify the applicant and other parties.

"(d) *Notice of time and place.* In such case appearance is filed by the applicant within the time specified, the application will be entered upon the hearing docket and notice of the time and place for hearing shall be given by the Secretary.

"(e) *Default for failure to appear.* If, at the date set for hearing, the applicant does not appear and offer evidence in support of his application, a default will be entered, and the Commission will deny the application.

"§ 9.02 *Copies.* A party filing a petition or motion that, under Section 13.01, will be placed on the Motions Docket for action will furnish an original and eight copies thereof. An original and fourteen copies of all other pleadings or documents must be filed unless otherwise specifically provided for in these rules."

The applicant is hereby given the opportunity to obtain a hearing on such issues by filing a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure. Parties, other than the applicant, who desire to be heard must file a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure.

Dated at Washington, D. C., April 13, 1939.

By the Commission.

[SEAL] T. J. SLOWIE, *Secretary.*

[Docket No. 5550]

IN RE APPLICATION OF BEN S. MCGLASHAN (W6XKG)

*Dated January 28, 1939, for renewal of license; class of service—High frequency broadcast (experimental); class of station—Broadcast; location—Los Angeles, Calif.; operating assignment specified—Frequency, 25950 kc; power 1000 w night; 1000 w day; emission A–3; hours of operation Acc. rule 983 (a).*

[File No. B5–RHB–6]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine whether the applicant has a program of research and experimentation which indicates reasonable promise of substantial contribution to the development of high frequency broadcasting, within the purview of Section 44.02 (1) of the Commission's regulations governing high frequency broadcast stations.

2. To determine whether substantial data will be taken on the propagation characteristics of the frequencies involved herein; on noise levels; on the field intensity necessary to render good broadcast service; on antenna design and characteristics with respect to propagation; and on other allied phases of broadcast coverage within the purview of Section 44.02 (2) of the Commission's regulations governing high frequency broadcast stations.

3. To determine whether the proposed research and experimentation will be conducted by qualified engineers, as required by Section 44.02 (3) of the Commission's regulations governing high frequency broadcast stations.

4. To determine whether adequate funds have been, or will be, allocated by the applicant for (a) the maintenance and operation of the station, and (b) the carrying forward of a definite program of research and experimentation.

5. To determine whether the applicant is technically qualified and possesses adequate technical facilities to carry forward the proposed program of research and experimentation.

Attention is invited to Section 15.31, subparagraphs b, c, d and e, and Section 9.02, of the Commission's Rules of Practice and Procedure, which are as follows:

"§ 15.31 (b) *Appearances.* In order to avail himself of the opportunity to be heard the applicant in person or by his attorney shall, within fifteen days of the mailing of the notice of designation for hearing by the Secretary, file with the Commission one additional copy of the application and all papers incorporated as a part thereof and a written appearance, under oath, stating that he will appear and present evidence in support of his application on such date as may be fixed for hearing. Copies of such written appearance (not including the application and supporting documents) shall be served upon all other parties named in the notice of designation for hearing and accompanied by proof of service as provided in Section 9.01.

"Within twenty-five days of the mailing of the notice of designation for hearing by the Secretary, any respondent named in said notice who desires to participate in the hearing shall file in person or by his attorney with the Commission his written appearance, under oath, stating facts showing a substantial interest in the proceeding, the manner in which his interest may be aggrieved or adversely affected, and that he intends to appear at the hearing on the application on such date as may be fixed for the hearing. Copies of such appearance shall be served upon the applicant and accompanied by proof of service as provided in Section 9.01.

"(c) *Default for failure to file statement.* In case no such statement is filed by the applicant within the time specified, the applicant will be deemed in default, his application denied, and the Secretary shall notify the applicant and other parties.

"(d) *Notice of time and place.* In such case appearance is filed by the applicant within the time specified, the application will be entered upon the hearing docket and notice of the time and place for hearing shall be given by the Secretary.

"(e) *Default for failure to appear.* If, at the date set for hearing, the applicant does not appear and offer evidence in support of his application, a default will be entered, and the Commission will deny the application.

"§ 9.02 *Copies.* A party filing a petition or motion that, under Section 13.01, will be placed on the Motions Docket for action will furnish an original and eight copies thereof. An original and fourteen copies of all other pleadings or documents must be filed unless otherwise specifically provided for in these rules."

6. To determine whether the supplemental reports filed by the applicant with reference to its program of research and experimentation are adequate within the purview of Section 44.07 of the Commission's Rules and Regulations governing high frequency broadcast stations.

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

The applicant is hereby given the opportunity to obtain a hearing on such issues by filing a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure. Parties, other than the applicant, who desire to be heard must file a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure.

Dated at Washington, D. C., May 26, 1939.

By the Commission.

[Docket No. 5568]

IN RE APPLICATION OF JACK POWERS, DAVID G. SMITH, (KUTA) FRANK C. CARMAN & GRANT WRATHALL, D/B AS UTAH BROADCASTING COMPANY

*Dated March 6, 1939, for construction permit; class of service—Broadcast; class of station—Broadcast; location—Salt Lake City, Utah; operating assignment specified—Frequency, 570 kc; power, 1 kw day; 1 kw night; hours of operation, unlimited; directional antenna day and night.*

[File No. B5–P–2342]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine whether applicant is financially and otherwise qualified to move the transmitter site as proposed, make changes in composite equipment and install the directional antenna system.

2. To determine the need for additional service in the area proposed to be served, and whether the granting of this application will tend toward a fair, efficient and equitable distribution of radio service.

3. To determine whether the interests of any other stations may be adversely affected by reason of interference, particularly Stations KVI, KMTR, WNAX and KGKO.

4. To determine whether the site at which the applicant proposes to construct and operate the station will be satisfactory.

5. To determine whether the equipment which the applicant proposes to use will comply in all respects with the rules and regulations of the Commission, particularly Rules 132 and 139, and will render proper service.

6. To determine whether the directional antenna system which the applicant proposes to use will comply in all respects with the rules and regulations of the Commission, particularly with Rule 131, and will render proper service.

7. To determine whether the granting of the application will serve public interest, convenience and necessity.

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

The applicant is hereby given the opportunity to obtain a hearing on such issues by filing a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure. Parties, other than the applicant, who desire to be heard must file a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure.

Dated at Washington, D. C., April 17, 1939.

[Docket No. 5593]

IN RE APPLICATION OF SAMUEL M. EMISON (NEW)

*Dated March 23, 1939, for construction permit; class of service—Broadcast; class of station—Broadcast; location—Vincennes, Ind.; operating assignment specified—Frequency, 1420 kc; power, 100 w night; 100 w day; hours of operation, unlimited.*

[File No. B4-P-2350]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine the legal, technical, financial and other qualifications of the applicant to construct and operate the proposed station.

2. To determine the need for service in the area proposed to be served; and whether the granting of this application will tend toward a fair, efficient and equitable distribution of radio service.

3. To determine the availability of economic support and talent for program material.

4. To determine whether the interests of Stations WCBS, WPAD and WIRE may be adversely affected by reason of interference.

5. Because of the pendency of another application with which conflict may be had by reason of interference, i. e., Vincennes Newspapers, Inc., Vincennes, Indiana (B4-P-1243).

6. To determine whether the site at which the applicant proposes to construct and operate the station will be satisfactory.

7. To determine whether the transmitting equipment which the applicant proposes to use will comply in all respects with the Rules and Regulations of the Commission, particularly Rules 131, 132 and 139, and will render proper service.

8. To determine whether the granting of the application will serve public interest, convenience, and necessity.

Attention is invited to Section 15.31, subparagraphs b, c, d and e, and Section 9.02, of the Commission's Rules of Practice and Procedure, which are as follows:

"§ 15.31 (b) *Appearances.* In order to avail himself of the opportunity to be heard the applicant in person or by his attorney shall, within fifteen days of the mailing of the notice of designation for hearing by the Secretary, file with the Commission one additional copy of the application and all papers incorporated as a part thereof and a written appearance, under oath, stating that he will appear and present evidence in support of his application on such date as may be fixed for hearing. Copies of such written appearance (not including the application and supporting documents) shall be served upon all other parties named in the notice of designation for hearing and accompanied by proof of service as provided in Sec. 9.01.

"Within twenty-five days of the mailing of the notice of designation for hearing by the Secretary, any respondent named in said notice who desires to participate in the hearing shall file in person or by his attorney with the Commission his written appearance, under oath, stating facts showing a substantial interest in the proceeding, the manner in which his interest may be aggrieved or adversely affected, and that he intends to appear at the hearing on the application on such date as may be fixed for the hearing. Copies of such appearance shall be served upon the applicant and accompanied by proof of service as provided in Sec. 9.01.

"(c) *Default for failure to file statement.* In case no such statement is filed by the applicant within the time specified, the applicant will be deemed in default, his application denied, and the Secretary shall notify the applicant and other parties.

"(d) *Notice of time and place.* In such case appearance is filed by the applicant within the time specified, the application will be entered upon the hearing docket and notice of the time and place for hearing shall be given by the Secretary.

"(e) *Default for failure to appear.* If, at the date set for hearing, the applicant does not appear and offer evidence in support of his application, a default will be entered, and the Commission will deny the application.

"§ 9.02 *Copies.* A party filing a petition or motion that, under Sec. 13.01 will be placed on the Motions Docket for action will furnish an original and eight copies thereof. An original and fourteen copies of all other pleadings or documents must be filed unless otherwise specifically provided for in these rules."

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

The applicant is hereby given the opportunity to obtain a hearing on such issues by filing a written appearance in accordance with the provisions of Secs. 15.31 and 9.02 of the Commission's Rules of Practice and Procedure. Parties, other than the applicant, who desire to be heard must file a written appearance in accordance with the provisions of Secs. 15.31 and 9.02 of the Commission's Rules of Practice and Procedure.

Dated at Washington, D. C., April 24, 1939.

[Docket No. 5609]

IN RE APPLICATION OF CLARENCE H. FREY AND ROBERT O. GREEVER (NEW)

*Dated February 17, 1939; for construction permit; class of service—Broadcast; class of station—Broadcast; location—Logan, W. Va.; operating assignment specified—Frequency, 1200 kc; power, 100 watts; hours of operation, daytime.*

[File No. B2-P-2340]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine the legal, technical, financial and other qualifications of the applicant to construct and operate the proposed station.

2. To determine the public need for broadcast service in the area proposed to be served, and whether a grant of this application will tend toward a fair, efficient and equitable distribution of broadcast service.

3. To determine the availability of economic support and of program talent.

4. To determine whether the interests of Stations WSAZ, WCPO, WJHL and WLVA would be adversely affected by reason of interference.

5. To determine whether the transmitting equipment which the applicant proposes to use will comply in all respects with Rules 131, 132 and 139, and

6. To determine whether a grant of the application will serve public interest, convenience and necessity.

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

The applicant is hereby given the opportunity to obtain a hearing on such issues by filing a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure. Parties, other than the applicant, who desire to be heard must file a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure.

Attention is invited to Section 15.31, subparagraphs b, c, d and e, and Section 9.02, of the Commission's Rules of Practice and Procedure, which are as follows:

"§ 15.31 (b) *Appearances.* In order to avail himself of the opportunity to be heard the applicant in person or by his attorney shall, within fifteen days of the mailing of the notice of designation for hearing by the Secretary, file with the Commission one additional copy of the application and all papers incorporated as a part thereof and a written appearance, under oath, stating that he will appear and present evidence in support of his application on such date as may be fixed for hearing. Copies of such written appearance (not including the application and supporting documents) shall be served upon all other parties named in the notice of designation for hearing and accompanied by proof of service as provided in Section 9.01. Within twenty-five days of the mailing of the notice of designation for hearing by the Secretary, any respondent named in said notice who desires to participate in the hearing shall file in person or by his attorney with the Commission his written appearance, under oath, stating facts showing a substantial interest in the proceeding, the manner in which his interest may be aggrieved or adversely affected, and that he intends to appear at the hearing on the application on such date as may be fixed for the hearing. Copies of such appearance shall be served upon the applicant and accompanied by proof of service as provided in Section 9.01.

"(c) *Default for failure to file statement.* In case no such statement is filed by the applicant within the time specified, the applicant will be deemed in default, his application denied, and the Secretary shall notify the applicant and others parties.

"(d) *Notice of time and place.* In such case appearance is filed by the applicant within the time specified, the application will be entered upon the hearing docket and notice of the time and place for hearing shall be given by the Secretary.

"(e) *Default for failure to appear.* If, at the date set for hearing, the applicant does not appear and offer evidence in support of his application, a default will be entered, and the Commission will deny the application.

"§ 9.02 *Copies.* A party filing a petition or motion that, under Section 13.01, will be placed on the Motions Docket for action will furnish an original and eight copies thereof. An original and fourteen copies of all other pleadings or documents must be filed unless otherwise specifically provided for in these rules."

[Docket No. 5629]

IN RE APPLICATION OF LAKELAND BROADCASTING CO. (NEW)

*Dated April 15, 1939, for construction permit; class of service—Broadcast; class of station—Broadcast; location—Willmar, Minn.; operating assignment specified—Frequency, 680 kc; power 250 w day; hours of operation, limited.*

[File No. B4-P-2370]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine the financial qualifications of the applicant to construct and operate the proposed station.

2. To determine whether the interests of Stations KFEQ, WMAQ and WPTF may be adversely affected by reason of interference.

3. Because of the pendency of another application with which conflict may be had by reason of interference, i. e., University of Wisconsin (WHA), Madison, Wisconsin (B4-P-2225).

4. To determine whether the site at which the applicant proposes to construct and operate the station will be satisfactory.

5. To determine whether the transmitting equipment which the applicant proposes to use will comply in all respects with the Rules and Regulations of the Commission, particularly Rules 131, 132 and 139, and will render proper service.

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

The applicant is hereby given the opportunity to obtain a hearing on such issues by filing a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure. Parties, other than the applicant, who desire to be heard must file a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure.

Attention is invited to Section 15.31, subparagraphs b, c, d and e, and Section 9.02 of the Commission's Rules of Practice and Procedure, which are as follows:

"§ 15.31 (b) *Appearances.* In order to avail himself of the opportunity to be heard the applicant in person or by his attorney shall, within fifteen days of the mailing of the notice of designation for hearing by the Secretary, file with the Commission one additional copy of the application and all papers incorporated as a part thereof and a written appearance, under oath, stating that he will appear and present evidence in support of his application on such date as may be fixed for hearing. Copies of such written appearance (not including the application and supporting documents) shall be served upon all other parties named in the notice of designation for hearing and accompanied by proof of service as provided in Section 9.01.

"Within twenty-five days of the mailing of the notice of designation for hearing by the Secretary, any respondent named in said notice who desires to participate in the hearing shall file in person or by his attorney with the Commission his written appearance, under oath, stating facts showing a substantial interest in the proceeding, the manner in which his interest may be aggrieved or adversely affected, and that he intends to appear at the hearing on the application on such date as may be fixed for the hearing. Copies of such appearance shall be served upon the applicant and accompanied by proof of service as provided in Section 9.01.

"(c) *Default for failure to file statement.* In case no such statement is filed by the applicant within the time specified, the applicant will be deemed in default, his application denied, and the Secretary shall notify the applicant and other parties.

"(d) *Notice of time and place.* In such case appearance is filed by the applicant within the time specified, the application will be entered upon the hearing docket and notice of the time and place for hearing shall be given by the Secretary.

"(e) *Default for failure to appear.* If, at the date set for hearing, the applicant does not appear and offer evidence in support of his application, a default will

be entered, and the Commission will deny the application.

"§ 9.02 *Copies.* A party filing a petition or motion that, under Section 13.01, will be placed on the Motions Docket for action will furnish an original and eight copies thereof. An original and fourteen copies of all other pleadings or documents must be filed unless otherwise specifically provided for in these rules."

[Docket No. 5630]

IN RE APPLICATION OF NATIONAL BROADCASTING CO., INC. (W9XBS)

*Dated April 20, 1939, for modification of license; class of service—High frequency broadcast (experimental); class of station—Broadcast; location—Chicago, Ill.; operating assignment specified—Frequency, 42,180 kc; power, 100 w night; 100 w day; emission A-3; hours of operation, unlimited; Acc. rule 983 (a).*

[File No. B4-MLHB-17]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. Because of the pendency of the renewal application of this station and the issues raised thereby.

2. To determine whether the applicant has complied in all respects with the rules and regulations of the Commission governing the operation of high frequency broadcast stations, particularly Section 44.02.

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

The applicant is hereby given the opportunity to obtain a hearing on such issues by filing a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure. Parties, other than the applicant, who desire to be heard must file a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure.

Attention is invited to Section 15.31, subparagraphs b, c, d and e, and Section 9.02, of the Commission's Rules of Practice and Procedure, which are as follows:

"§ 15.31 (b) *Appearances.* In order to avail himself of the opportunity to be heard the applicant in person or by his attorney shall, within fifteen days of the mailing of the notice of designation for hearing by the Secretary, file with the Commission one additional copy of the application and all papers incorporated as a part thereof and a written appearance, under oath, stating that he will appear and present evidence in support of his application on such date as may be fixed for hearing. Copies of such written appearance (not including the application and supporting documents) shall be served upon all other parties named in the notice of designation for hearing and accompanied by proof of service as provided in Section 9.01.

"Within twenty-five days of the mailing of the notice of designation for hearing by the Secretary, any respondent named in said notice who desires to participate in the hearing shall file in person or by his attorney with the Commission his written appearance, under oath, stating facts showing a substantial interest in the proceeding, the manner in which his interest may be aggrieved or adversely affected, and that he intends to appear at the hearing on the application on such date as may be fixed for the hearing. Copies of such appearance shall be served upon the applicant and accompanied by proof of service as provided in Section 9.01.

"(c) *Default for failure to file statement.* In case no such statement is filed by the applicant within the time specified, the applicant will be deemed in default, his application denied, and the Secretary shall notify the applicant and other parties.

"(d) *Notice of time and place.* In such case appearance is filed by the applicant within the time specified, the application will be entered upon the hearing docket and notice of the time and place for hearing shall be given by the Secretary.

"(e) *Default for failure to appear.* If, at the date set for hearing, the applicant does not appear and offer evidence in support of his application, a default will be entered, and the Commission will deny the application.

"§ 9.02 *Copies.* A party filing a petition or motion that, under Section 13.01, will be placed on the Motions Docket for action will furnish an original and eight copies thereof. An original and fourteen copies of all other pleadings or documents must be filed unless otherwise specifically provided for in these rules."

Dated at Washington, D. C., May 26, 1939.

By the Commission.

[Docket No. 5638]

IN RE APPLICATION OF AMERICAN BROADCASTING CORPORATION OF KENTUCKY (WLAP)

*Dated April 13, 1939, for special experimental authorization; class of service—Broadcast; class of station—Broadcast; location—Lexington, Ky.; operating assignment specified—Frequency, 1420 kc; power, 250 w night; hours of operation, 1:05 to 2:15 A. M. C. S. T.*

[File No. B2-SA-345]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine whether the applicant has complied in all respects with the rules and regulations of the Commission governing the operation of facsimile broadcast stations, particularly Section 43.31.

2. To determine whether the applicant will comply with the order of the Commission of January 31, 1938, governing the monitoring schedule of broadcast stations.

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

The applicant is hereby given the opportunity to obtain a hearing on such issues by filing a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure. Parties, other than the applicant, who desire to be heard must file a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure.

Attention is invited to Section 15.31, subparagraphs b, c, d and e, and Section 9.02, of the Commission's Rules of Practice and Procedure, which are as follows:

"§ 15.31 (b) *Appearances.* In order to avail himself of the opportunity to be heard the applicant in person or by his attorney shall, within fifteen days of the mailing of the notice of designation for hearing by the Secretary, file with the Commission one additional copy of the application and all papers incorporated as a part thereof and a written appearance, under oath, stating that he will appear and present evidence in support of his application on such date as may be fixed for hearing. Copies of such written appearance (not including the application and supporting documents) shall be served upon all other parties named in the notice of designation for hearing and accompanied by proof of service as provided in Section 9.01.

"Within twenty-five days of the mailing of the notice of designation for hearing by the Secretary, any respondent named in said notice who desires to participate in the hearing shall file in person or by his attorney with the Commission his written appearance, under oath, stating facts showing a substantial interest in the proceeding, the manner in which his interest may be aggrieved or adversely affected, and that he intends to appear at the hearing on the application on such date as may be fixed for the hearing. Copies of such appearance shall be served upon the applicant and accompanied by proof of service as provided in Section 9.01.

"(c) *Default for failure to file statement.* In case no such statement is filed by the applicant within the time specified, the applicant will be deemed in default, his application denied, and the Secretary shall notify the applicant and other parties.

"(d) *Notice of time and place.* In such case appearance is filed by the applicant within the time specified, the application will be entered upon the hearing docket and notice of the time and place for hearing shall be given by the Secretary.

"(e) *Default for failure to appear.* If, at the date set for hearing, the applicant does not appear and offer evidence in support of his application, a default will be entered, and the Commission will deny the application.

"§ 9.02 *Copies.* A party filing a petition or motion that, under Sec. 13.01, will be placed on the Motions Docket for action will furnish an original and eight copies thereof. An original and fourteen copies of all other pleadings or documents must be filed unless otherwise specifically provided for in these rules."

Dated at Washington, D. C., June 7, 1939.

By the Commission.

IN RE APPLICATION OF CLYDE E. WILSON & HOWARD A. SHUMAN, D/B AS HOT SPRINGS BROADCASTING CO. (NEW)

*Dated April 24, 1939, for construction permit; class of service—Broadcast; class of station—Broadcast; location—Hot Springs, Ark.; operating assignment specified—Frequency, 1310 kc; power, 100 w night; 250 w day; hours of operation, unlimited.*

[File No. B3-P-2380]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine whether the interests of Station KRMD may be adversely affected by reason of interference; and

2. Because of the pendency of another application with which conflict may be had by reason of interference, i. e., John R. Pepper, Greenville, Miss., (File No. B3-P-2312).

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

The applicant is hereby given the opportunity to obtain a hearing on such issues by filing a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure. Parties, other than the applicant, who

"Within twenty-five days of the mailing of the notice of designation for hearing by the Secretary, any respondent named in said notice who desires to participate in the hearing shall file in person or by his attorney with the Commission his written appearance, under oath, stating facts showing a substantial interest in the proceeding, the manner in which his interest may be aggrieved or adversely affected, and that he intends to appear at the hearing on the application on such date as may be fixed for the hearing. Copies of such appearance shall be served upon the applicant and accompanied by proof of service as provided in Section 9.01.

"(c) *Default for failure to file statement.* In case no such statement is filed by the applicant within the time specified, the applicant will be deemed in default, his application denied, and the Secretary shall notify the applicant and other parties.

"(d) *Notice of time and place.* In such case appearance is filed by the applicant within the time specified, the application will be entered upon the hearing docket and notice of the time and place for hearing shall be given by the Secretary.

"(e) *Default for failure to appear.* If, at the date set for hearing, the applicant does not appear and offer evidence in support of his application, a default will be entered, and the Commission will deny the application.

"§ 9.02 *Copies.* A party filing a petition or motion that, under Section 13.01, will be placed on the Motions Docket for action will furnish an original and eight copies thereof. An original and fourteen copies of all other pleadings or documents must be filed unless otherwise specifically provided for in these rules."

IN RE APPLICATION OF UNION BROADCASTING CO. (NEW)

*Dated April 8, 1939; for construction permit; class of service—Broadcast; class of station—Broadcast; location—Scranton, Pa.; operating assignment specified—Frequency, 1370 kc; Power, 100 w night; 250 w day; Hours of Operation, unlimited.*

[File No. B2-P-2366]

NOTICE OF HEARING

You are hereby notified that the Commission has examined the above described application and has designated the matter for hearing for the following reasons:

1. To determine whether the interests of Stations WABY, WDAS, WCBM, WFBL, WAWZ and WRAK may be adversely affected by reason of interference.

2. Because of the pendency of other applications with which conflict may be had by reason of interference, i. e., WBNX Broadcasting Company, Inc. (WBNX) New York, New York, (B1-P-1527) and Lackawanna Broadcasting Co. Inc. (New) Scranton, Pennsylvania, (B2-P-2392).

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

The applicant is hereby given the opportunity to obtain a hearing on such issues by filing a written appearance in accordance with the provisions of Secs. 15.31 and 9.02 of the Commission's Rules of Practice and Procedure. Parties, other than the applicant, who desire to be heard must file a written appearance in accordance with the provisions of Secs. 15.31 and 9.02 of the Commission's Rules of Practice and Procedure.

Attention is invited to Sec. 15.31, subparagraphs b, c, d and e, and Sec. 9.02, of the Commission's Rules of Practice and Procedure, which are as follows:

"§ 15.31 (b) *Appearances.* In order to avail himself of the opportunity to be heard the applicant in person or by his attorney shall, within fifteen days of the mailing of the notice of designation for hearing by the Secretary, file with the Commission one additional copy of the application and all papers incorporated as a part thereof and a written appearance, under oath, stating that he will appear and present evidence in support of his application on such date as may be fixed for hearing. Copies of such written appearance (not including the application and supporting documents) shall be served upon all other parties named in the notice of designation for hearing and accompanied by proof of service as provided in Sec. 9.01.

"Within twenty-five days of the mailing of the notice of designation for hearing by the Secretary, any respondent named in said notice who desires to participate in the hearing shall file in person or by his attorney with the Commission his written appearance, under oath, stating facts showing a substantial interest in the proceeding, the manner in which his interest may be aggrieved or adversely affected, and that he intends to appear at the hearing on the application on such date as may be fixed for the hearing. Copies of such appearance shall be served upon the applicant and accompanied by proof of service as provided in Section 9.01.

"(c) *Default for failure to file statement.* In case no such statement is filed by the applicant within the time specified, the applicant will be deemed in default, his application denied, and the

desire to be heard must file a written appearance in accordance with the provisions of Sections 15.31 and 9.02 of the Commission's Rules of Practice and Procedure.

Attention is invited to Section 15.31, subparagraphs b, c, d and e, and Section 9.02, of the Commission's Rules of Practice and Procedure, which are as follows:

"§15.31 (b) *Appearances.* In order to avail himself of the opportunity to be heard the applicant in person or by his attorney shall, within fifteen days of the mailing of the notice of designation for hearing by the Secretary, file with the Commission one additional copy of the application and all papers incorporated as a part thereof and a written appearance, under oath, stating that he will appear and present evidence in support of his application on such date as may be fixed for hearing. Copies of such written appearance (not including the application and supporting documents) shall be served upon all other parties named in the notice of designation for hearing and accompanied by proof of service as provided in Section 9.01.

"Within twenty-five days of the mailing of the notice of designation for hearing by the Secretary, any respondent named in said notice who desires to participate in the hearing shall file in person or by his attorney with the Commission his written appearance, under oath, stating facts showing a substantial interest in the proceeding, the manner in which his interest may be aggrieved or adversely affected, and that he intends to appear at the hearing on the application on such date as may be fixed for the hearing. Copies of such appearance shall be served upon the applicant and accompanied by proof of service as provided in Section 9.01.

"(c) *Default for failure to file statement.* In case no such statement is filed by the applicant within the time specified, the applicant will be deemed in default, his application denied, and the Secretary shall notify the applicant and other parties.

"(d) *Notice of time and place.* In such case appearance is filed by the applicant within the time specified, the application will be entered upon the hearing docket and notice of time and place for hearing shall be given by the Secretary.

"(e) *Default for failure to appear.* If, at the date set for hearing, the applicant does not appear and offer evidence in support of his application, a default will be entered and the Commission will deny the application.

"§ 9.02 *Copies.* A party filing a petition or motion that, under Section 13.01, will be placed on the Motions Docket for action will furnish an original and eight copies thereof. An original and fourteen copies of all other pleadings or documents must be filed unless otherwise specifically provided for in these rules."

Dated at Washington, D. C., June 7, 1939.

## FEDERAL POWER COMMISSION.

[Docket No. ID-893]

IN THE MATTER OF APPLICATION OF CHARLES MILLIKEN TENNEY

ORDER FIXING DATE OF HEARING

JULY 6, 1939.

Commissioners: Clyde L. Seavey, Actnig Chairman; Claude L. Draper, Basil Manly, John W. Scott.

It appearing to the Commission that:

(a) Upon application filed June 21, 1939, by the above named applicant, pursuant to Section 305 (b) of the Federal Power Act, for authorization to hold certain interlocking positions within the purview of said Section 305 (b), and for whom no authorization has as yet been granted;

(b) It is in the public interest that the above named applicant make further showing that neither public nor private interests will be adversely affected by reason of his holding said positions;

(c) Such further showing can best be made in the form and manner of a public hearing held for that purpose;

The Commission orders that:

A public hearing on said application be held beginning the 6th day of September, 1939, at 10 a. m. in the Hearing Room of the Federal Power Commission, Hurley-Wright Building, 1800 Pennsylvania Avenue NW., Washington, D. C., and that at said hearing the above named applicant make further showing that neither public nor private interests will be adversely affected by reason of his holding of positions within the purview of Section 305 (b) of the Federal Power Act.

By the Commission.

[File No. 47-36]

IN THE MATTER OF EBASCO SERVICES INCORPORATED AND EBASCO INTERNATIONAL CORPORATION

NOTICE OF AND ORDER FOR HEARING

Applications pursuant to sections 6 (b), 10 (a) (3), 10 (a) (1), and 12 (c) of the Public Utility Holding Company Act of 1935, having been duly filed with this Commission by the above-named parties;

*It is ordered*, That a hearing on such matters be held on July 25, 1939, at 10:00 o'clock in the forenoon of that day, at the Securities and Exchange Building, 1778 Pennsylvania Avenue, NW., Washington, D. C. On such day the hearing-room clerk in room 1102 will advise as to the room where such hearing will be held. At such hearing, if in respect of any declaration, cause shall be shown why such declaration shall become effective.

*It is further ordered*, That Edward C. Johnson or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice to continue or postpone said hearing from time to time.

Notice of such hearing is hereby given to such declarant or applicant and to any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before July 20, 1939.

The matters concerned herewith are in regard to a series of transactions by which it is contemplated that Phoenix Engineering Corporation, a subsidiary of Ebasco Services Incorporated, in turn a subsidiary of Electric Bond and Share Company, a registered holding company, will be eliminated following the transference by it to Ebasco Services Incorporated of all its assets, including the stock of its present Chilean subsidiary service company; that all of the property and assets of Ebasco Services Incorporated now used in its foreign business, together with all of the stock of the Chilean company and a Brazilian service company, will be transferred to Ebasco International Corporation, a newly organized wholly-owned subsidiary of Ebasco Services Incorporated in consideration for all of the remaining authorized but unissued shares of capital stock of said subsidiary company; and that said Ebasco International Corporation will then become a directly owned subsidiary of Electric Bond and Share Company through the transference of all of its shares of capital stock to such holding company, accompanied by a reduction in the capital of Ebasco Services Incorporated through the return to it for cancellation of an equal number of shares of its capital stock now owned by Electric Bond and Share Company.

The parties referred to hereinabove have filed the following described applications in regard to the proposed transactions:

Ebasco Services Incorporated has filed an application pursuant to Section 10 (a) (3) of the Act for approval of the acquisition of the business and assets of Phoenix Engineering Corporation, a wholly-owned subsidiary company.

Ebasco International Corporation has filed an application pursuant to Section 6 (b) for exemption from the provisions of Section 6 (a) for the issue and sale of 6,990 shares of its capital stock to Ebasco Services Incorporated, and an application pursuant to Section 10 (a) (1) for the acquisition from Ebasco Services Incorporated of the stock of Compania Constructora del Pacifico, S. A. and Emprezas Electricas Brasileiras, S. A.

[2] 4 F.R. 1546 DI.

JUL 13 1939

(foreign servicing companies) and the assets now used by the International Division of Ebasco Services Incorporated in foreign servicing.

Ebasco Services Incorporated has filed an application pursuant to Section 10 (a) (1) for the acquisition of 6,990 shares of capital stock of Ebasco International Corporation.

Ebasco Services Incorporated has filed an application pursuant to Section 12 (c) for the acquisition from Electric Bond and Share Company for the purpose of cancellation of 7,000 shares of its outstanding capital stock now owned by such parent company.

By the Commission.

VOLUME 4 NUMBER 132

*Washington, Wednesday, July 12, 1939*

## *Rules, Regulations, Orders*

### TITLE 10—ARMY: WAR DEPARTMENT

CHAPTER I—AID OF CIVIL AUTHORITIES AND PUBLIC RELATIONS

PART 5—SAFEGUARDING TECHNICAL INFORMATION [1]

§ 5.1 *Definitions.* To facilitate an understanding of these regulations, the following terms are defined:

(a) *Classified military information.* Classified military information includes all information concerning documents, cryptographic devices, development projects, and matériel classified as *secret, confidential,* or *restricted,* as well as the items themselves. All other military information, documents, development projects, and matériel are regarded as unclassified.

(b) *Document.* The term "document" includes printed, mimeographed, typed, photostated, and written matter of all kinds; maps, photomaps, and serial photographs and mosaics; drawings, sketches, notes, and blueprints, or photostatic copies thereof; photographs and photographic negatives; engineering data; correspondence and plans relating to research and development projects; and all other similar matter.

(c) *Foreign government.* The term "foreign government" includes any recognized or nonrecognized government and any faction or body of insurgents within a country with which the United States is at peace.

(d) *Matériel.* The term "matériel" comprises military arms, armament, equipment, and supplies of all classes, both complete and in process of development and construction, models that show features in whole or in part, designs, mockups, jigs, fixtures, and dies, and all other components or accessories of military equipment.

(e) *Reserved area.* A reserved area is an area on the surface of the land or water designated and set apart by executive order of the President for purposes of national defense, admittance to which is either prohibited or restricted.

(f) *Visitor.* As used in these regulations a visitor is any person admitted to a Government or commercial manufacturing establishment engaged in classified work or project for the War Department except—

(1) A person employed on the work or project, or

(2) A person directly and officially concerned with the work or project. (R.S. 161; 5 U.S.C. 22) [Par. 1, A.R. 380-5, June 10, 1939]

§ 5.2 *Responsibility.* (a) The safeguarding of classified military information is the responsibility of all military personnel, of civilian employees of the War Department, and of the management and employees of all commercial firms engaged in classified work or projects for the War Department. Classified military information will be discussed only with military or civilian personnel having a legitimate interest therein.

(b) Commanding officers, administrative officers, and procurement agencies are responsible that military personnel, civilian employees of the War Department, and the management and employees of commercial firms engaged in classified projects or developments for the War Department are familiar with the pertinent provisions of these regulations. (R.S. 161; 5 U.S.C. 22) [Par. 2, A.R. 380-5, June 10, 1939]

§ 5.3 *Right to possess classified military information.* (a) No person in the military service or employed by it is entitled to classified military information solely by virtue of his commission or official position. Such information will be entrusted only to those who need it in the performance of their official duties and to insure teamwork and efficient instruction of personnel, proper planning, or proper maintenance of equipment.

(b) Photographs of classified features of military equipment or of other classified items will be made by members of the military service or by civilian employees of the War Department only when neces-

[1] These regulations supersede Part 5, Chapter I, Title 10, of the Code of Federal Regulations.

FEDERAL REGISTER

Published by the Division of the Federal Register, The National Archives, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. L. 500), under regulations prescribed by the Administrative Committee, with the approval of the President.

The Administrative Committee consists of the Archivist or Acting Archivist, an officer of the Department of Justice designated by the Attorney General, and the Public Printer or Acting Public Printer.

The daily issue of the FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1 per month or $10 per year; single copies 10 cents each; payable in advance. Remit by money order payable to Superintendent of Documents, Government Printing Office, Washington, D. C.

Correspondence concerning the publication of the FEDERAL REGISTER should be addressed to the Director, Division of the Federal Register, The National Archives, Washington, D. C.

sary in the conduct of their official duties and if made will not be developed or printed in commercial establishments or retained in their personal possession. (R.S. 161; 5 U.S.C. 22) [Par. 3, A.R. 380–5, June 10, 1939]

§ 5.4 *Dissemination of classified military information.* When classified military information is disseminated under the provisions of these regulations to persons not subject to military law, they will be informed that it affects the national defense of the United States within the meaning of the Espionage Act and that its transmission to an unauthorized person is prohibited. (R.S. 161; 5 U.S.C. 22) [Par. 4*a*, A.R. 380–5, June 10, 1939]

§ 5.5 *Requests for military information.* (a) Requests from private individuals or firms for classified military information will be referred through channels to the corps area commander or chief of the arm or service concerned, who, if unable to make reply or if another agency is interested, will refer the matter to The Adjutant General for appropriate action.

(b) Requests for military information by foreign nationals, including representatives of foreign governments, such as military and air attaches, will be referred to the Military Intelligence Division, War Department General Staff, for necessary action. (R.S. 161; 5 U.S.C. 22) [Par. 5, A.R. 380–5, June 10, 1939]

§ 5.6 *Dissemination of restricted matter.* The information contained in restricted documents and the essential characteristics of restricted matériel will not be communicated to the public or to the press, but may be given to any person known to be in the service of the United States and to persons of undoubted loyalty and discretion who are cooperating in Government work. (R.S. 161; 5 U.S.C. 22) [Par. 10*d*, A.R. 380–5, June 10, 1939]

§ 5.7 *Loss or subjection to compromise.* Any person in the military service or in its employ who may have knowledge of the loss or subjection to compromise of a secret or confidential document or article of matériel will promptly report that fact to the custodian of the document or matériel. The proper commanding officer will then make a thorough investigation of the circumstances, fix the responsibility, and send to The Adjutant General, through military channels, a report with his recommendation in the case. (R.S. 161; 5 U.S.C. 22) [Par. 14, A.R. 380–5, June 10, 1939]

§ 5.8 *Responsibility for safeguarding technical information.* (a) Chiefs of arms and services engaged in the preparation of plans, research, and development work, or new design, test, production, procurement, storage, or use of classified matériel are responsible for the promulgation of such additional instructions as may be required for the safeguarding of information in the offices, establishments, laboratories, shops, or army posts under their jurisdiction.

(b) All secret, confidential, or restricted models, exhibits, dies, machines, and other similar items which are to be loaned, leased, or given to a commercial organization will be properly marked to indicate classification when practicable. If such marking is impracticable, the commercial organization will be specifically notified in writing of the classification of such items and of the pertinent provisions of the Espionage Act. (R.S. 161; 5 U.S.C. 22) [Par. 47, A.R. 380–5, June 10, 1939]

§ 5.9 *Classification of information from commercial firms.* Information obtained from civilian manufacturers concerning proprietary processes will be classified as *confidential* unless otherwise authorized by the firm concerned. (R.S. 161; 5 U.S.C. 22) [Par. 48, A.R. 380–5, June 10, 1939]

§ 5.10 *Dissemination of classified technical information.* Classified information concerning technical projects or developments may be imparted only to persons in the military and naval services of the United States, including civilian employees, who have a legitimate interest therein, and to American citizens of known loyalty and discretion who of necessity must be informed because of their cooperation in the work, project, or development. (R.S. 161; 5 U.S.C. 22) [Par. 49, A.R. 380–5, June 10, 1939]

§ 5.11 *Invitations for bids and contracts.* Prior to furnishing a prospective bidder with drawings, specifications, or other pertinent information concerning projects of a secret, confidential, or restricted nature, an agreement reading substantially as follows will be signed by the individual or by a responsible officer of the firm or corporation:

In consideration of the receipt of the referenced ---------- (secret, confidential, or restricted) drawings, specifications, and accompanying inclosures, and models or matériel, I agree on behalf of the undersigned individual, firm, or corporation, its representatives, agents, and/or subbidders to the following:

a. The undersigned will neither supply nor disclose any information regarding the drawings, specifications, and accompanying inclosures, or models or matériel referred to herein to any unauthorized person, or incorporate in other projects special features of design or construction peculiar to the article or articles specified herein.

b. The undersigned will not permit any alien employed or to be employed by the bidder or contractor or by any of its subbidders or subcontractors to have access to the drawings, specifications, and accompanying inclosures, or models or matériel referred to herein, or to engineering principles, composition, subassemblies, or assemblies which are vital to the functioning or use of the article without the written consent beforehand of the Secretary of War.

c. The undersigned will not make or permit to be made reproductions of the drawings, specifications, and accompanying papers, or of the models or matériel except as specifically authorized by the contracting officer or his agent.

d. If no bid is submitted on the subject proposal, if a bid is made and not accepted, or, in case award is made, upon the completion of the contract, the undersigned will promptly return by hand, by registered mail, or by insured express, the referenced drawings, specifications, and accompanying papers or models or materiel, together with all copies thereof, to the office from which the originals were received.

e. The undersigned and/or subbidder agrees to bring to the attention of all persons engaged in the preparation of the bid the following pertinent provisions of the Espionage Act (sec. I, act June 15, 1917 (40 Stat. 217); U.S.C. 50: 31). The successful bidder shall also bring to the attention of all persons engaged in the contract, including persons employed on subcontracts, these provisions of the Espionage Act.

"• • • (d) whoever, lawfully or unlawfully having possession of, access to, control over, or being intrusted with any document, writing, code book, signal book, sketch, photograph, photographic negative, blue print, plan, map, model, instrument, appliance, or note relating to the national defense, willfully communicates or transmits or attempts to communicate or transmit the same to any person not entitled to receive it • • • or (e) whoever, being intrusted with or having lawful possession or control of any document, writing, code book, signal book, sketch, photograph, photographic negative, blue print, plan, map, model, note, or information, relating to the national defense, through gross negligence permits the same to be removed from its proper place of custody or delivered to anyone in violation of his trust, or to be lost, stolen, abstracted, or destroyed, shall be punished by a fine or not more than $10,000 or by imprisonment for not more than two years, or both."

f. The undersigned further agrees that no information in connection with the contract will be given to any person not in the contractor's and/or subcontractor's employ except upon the written consent beforehand of the contracting officer or his agent. (R.S. 161; 5 U.S.C. 22) [Par. 50, A.R. 380–5, June 10, 1939]

§ 5.12 *Consultations with responsible manufacturers.* The commanding officers of arsenals and depots and other officers engaged in work on Government contracts are authorized to consult with all interested manufacturers or their representatives, inventors, and other persons concerning technical matters in which they have a legitimate interest. They will, however, inform all such persons of the classification of the projects, works, and developments. (R.S. 161; 5 U.S.C. 22) [Par. 51, A.R. 380–5, June 10, 1939]

§ 5.13 *Responsibility of Army representatives or inspectors.* (a) Army representatives or inspectors of the supply arms or services are the local representatives of the War Department and will take the necessary measures to insure the safeguarding of classified information or projects in the hands of the contractors or in process of manufacture in their plants.

(b) Army representatives or inspectors will advise contractors as to their responsibilities and the practicable measures to be taken to safeguard secret, confidential, and restricted matters and will act favorably, if practicable, on any suggestion or request of the company tending to preserve secrecy. If at any time conditions at any plant, or any action of a company or its employees, jeopardize the security of classified matter pertaining to the War Department or violate the provisions of the Espionage Act, the Army representative or inspector will request the contractor to take prompt remedial action. If adequate precautionary measures are not taken immediately, he will report promptly to the chief of the arm or service concerned and, if the situation requires, to the commanding general of the corps area in which the item is in process of manufacture.

(c) When Army and Navy inspectors are on duty at the same plant, the Army inspector will coordinate all security measures with the Navy inspector in order to avoid conflicting demands upon contractors. (R.S. 161; 5 U.S.C. 22) [Par. 52, A.R. 380–5, June 10, 1939]

§ 5.14 *Responsibility of Government contractors.* (a) A private individual, firm, or corporation which enters into a contract to engage in technical work for the War Department becomes responsible in matters within his or its control for the safeguarding of all secret, confidential, or restricted matters that may be disclosed or that may be developed in connection therewith. A clause to this effect will be included in such a contract, but its omission will not release the contractor from his responsibility under the Espionage Act.

(b) Contractors are responsible that all classified projects allotted to subcontractors or agents are fully protected by a similar agreement.

(c) Whenever for any reason a contract agreement or subcontract has been made which does not include a security clause but later is found to involve secret, confidential, or restricted matter, the supply arm or service concerned will take the necessary steps to insure that the project or work is properly classified and that the contractor, agent, or subcontractor is informed of the classification and of his responsibility in the matter. (R.S. 161; 5 U.S.C. 22) [Par. 53, A.R. 380–5, June 10, 1939]

§ 5.15 *Public display of classified matériel.* (a) Commanding officers are responsible that all classified parts, components, or features of matériel are properly safeguarded during maneuvers, drills, parades, ceremonies, assemblages, demonstrations, or exhibitions open to the general public.

(b) (1) Photographs of equipment while in process of development or those revealing processes of manufacture are prohibited unless authorized by the chief of supply arm or service concerned. After an article of equipment has been issued to combat units, release of photographs is permissible unless specifically prohibited by the instructions issued therewith.

(2) Requests for permission to take photographs of classified matériel, projects, or processes of manufacture will be referred to the War Department through the proper chief of supply arm or service. If authority is granted, it will be with the understanding that the resulting photographs will be submitted to the War Department for review prior to release. (R.S. 161; 5 U.S.C. 22) [Par. 55, A.R. 380–5, June 10, 1939]

§ 5.16 *Release of information or sale of matériel.* Domestic sale, divulging information in connection with negotiations for foreign sale, foreign sale, and foreign manufacture of items of Army and Navy Matériel and equipment are not permitted unless the War and Navy Departments are agreed that military secrecy is not compromised thereby. (R.S. 161; 5 U.S.C. 22) [Par. 56*a*, A.R. 380–5, June 10, 1939]

§ 5.17 *Classification of visitors*—(a) *Foreign nationals.* For the purpose of these regulations foreign nationals include—

(1) Representatives, officials, or employees of a foreign government having an official status.

(2) All other foreign nationals and citizens of the United States representing a foreign government, firm or corporation.

(b) *United States citizens.* All citizens of the United States not included in paragraph (a) above. (R.S. 161; 5 U.S.C. 22) [Par. 57, A.R. 380–5, June 10, 1939]

§ 5.18 *Authority for admission*—(a) *General.* Correspondence and communications relating to visits will be routed direct between the various offices concerned.

(b) *Foreign nationals.* (1) Foreign nationals (see sec. 5.17, par. (a)) will be admitted to Government or commercial manufacturing establishments and experimental laboratories engaged on classified work or projects only on written authority of the Assistant Chief of Staff, G–2, War Department General Staff. Their applications will be made through the appropriate diplomatic representative and will include the following information:

(i) Name in full.
(ii) Official title or position.
(iii) Name of plant or plants to which admission is desired.
(iv) Date of visit or dates between which visits are desired.
(v) Purpose of visit.

(2) Prior to authorizing a visit to a War Department or commercial manufacturing establishment engaged in classified work or projects, the Assistant Chief of Staff, G–2, War Department General Staff, will secure the recommendations of the Navy Department and the chief of the supply arm or service concerned.

(c) *United States citizens.* Subject to the approval of the commanding officer or the contractor, United States citizens, except those representing a foreign government, firm, or corporation, may be admitted to War Department or commercial manufacturing establishments engaged on classified work or projects under the following conditions.

(1) Casual visitors may be admitted provided no secret, confidential, or restricted work or project is shown or discussed.

(2) Representatives of other United States Government agencies, manufacturers, or their representatives, engineers, and inventors cooperating in War Department work and having a legitimate interest therein may be shown such works or projects as are considered necessary and desirable by the responsible chief of supply arm or service. Authority for admission will be in writing.

(3) Accredited reporters, photographers, and other representatives of publicity agencies may be admitted to manufacturing establishments engaged on work for the War Department provided classified matters, projects, or processes of manufacture are not shown or discussed with them. News items, photographs, and motion pictures resulting from the visit must be submitted to the Assistant Chief of Staff, G–2, War Department General Staff, for release prior to publication. (R.S. 161; 5 U.S.C. 22) [Par. 58, A.R. 380–5, June 10, 1939]

§ 5.19 *Responsibility of commanding officer, Army representative, or inspector.* The commanding officer of a military manufacturing establishment or the Army representative or inspector at a commercial manufacturing establishment is the local representative of the War Department in all matters regarding the admission of visitors. If in his opinion the situation at the time makes the admission of a visitor inadvisable, he is empowered to postpone the visit and request instructions from the office which authorized it. (R.S. 161; 5 U.S.C. 22) [Par. 59a, A.R. 380–5, June 10, 1939]

§ 5.20 *Responsibility of Government contractors.* (a) Contractors or subcontractors engaged in work for the War Department must place such restrictions on the movements of persons employed or entering their plants or offices as will give adequate security to secret, confidential, or restricted matters in their possession. In view of the wide differences in organization, arrangement, and physical make-up of individual plants, no specific rules are practicable. Therefore, local conditions at the plant and the classification of the project will determine the security measures to be adopted.

(b) The following general procedure in regard to visitors at establishments or plants engaged in classified projects for the War Department is prescribed:

(1) Visitors will be accompanied during their stay at the plant by the inspector or Army representative, a member of his office, or some responsible person who is specifically informed as to the necessary limitations or restrictions, the scope of the visit, and the information which may be furnished.

(2) Unless specifically authorized by the authorities mentioned in section 5.18, visitors will not be allowed in any shop, laboratory, drafting room, or section of a plant where secret, confidential, or restricted material is located or where classified work is in progress, nor will they be permitted to take photographs.

(c) (1) War Department contractors will submit to the contracting officer at the end of each month, and upon the completion of the work or project, a report of all visitors who have gained information concerning the classified work or projects. These reports will include the following information:

(i) Name, official position, and nationality.

(ii) Address.

(iii) Authority for visit.

(2) The contracting officer will submit the reports to the Assistant Chief of Staff, G–2, War Department General Staff, through the appropriate chief of supply arm or service. (R.S. 161; 5 U.S.C. 22) [Par. 60, A.R. 380–5, June 10, 1939]

§ 5.21 *Restricted areas*—(a) *Designation.* The commanding officer of a post, camp, station, or installation is responsible for the designation and proper safeguarding of restricted areas. If local conditions dictate, he will mark all ordinary entrances or approaches to such areas with a sign reading as follows:

WARNING

RESTRICTED AREA

It is unlawful to enter within this _____ (Area, _____ without written permission building, etc.) of _____ (Authority)

(b) *Procedure in case of violation.* (1) The commanding officer of a military reservation, post, camp, station, or installation will cause any person not subject to military law who enters a restricted area or building to be detained, warned of his rights, and interrogated by proper authority. If it is a first offense and there is no evidence of deliberate intent, the offender may be warned against repetition and released upon the surrender of any unlawful photograph, sketch, picture, drawing, map, or graphic representation in his possession. Otherwise the offender will be delivered without unnecessary delay to the nearest United States marshal with a written statement of the facts, the names and addresses of the witnesses, and such pertinent exhibits as may be available.

(2) When an investigation reveals that a person not subject to military law has entered such a restricted area or building, custody of the individual not having been effected, the commanding officer will promptly forward in writing to the nearest United States district attorney a report of all the facts, including the names and addresses of the witnesses.

(3) A report will be made through military channels to the corps area commander of each case brought to the attention of civil authority and will include a brief of all the facts and copies of all pertinent communications. (R.S. 161; 5 U.S.C. 22) [Par. 62, AR 380–5, June 10, 1939]

PART 9—SECRECY SURROUNDING TROOP MOVEMENTS IN WAR [2]

§ 9.1 *General.* (a) The provisions of this section apply only in time of war.

(b) Officers and men will avoid talk or discussion of military matters while in any public place and will view with suspicion any person asking questions about military subjects or discussing such topics where there is even a remote possibility that the information may reach the enemy.

(c) All persons connected with the military service who receive information of proposed inland or overseas movements of organizations, detachments, or individuals are forbidden to make public the details of such movements.

(d) (1) The names of organizations, ports of embarkation, or ships to be used in troop movements, or the date of departure, arrival, or embarkation will not be disclosed.

(2) When it is necessary to advise relatives or other civilians of approaching departure, persons connected with the military service will not convey any information in regard to rail routing, probable time and date of departure from or arrival at any station, names of ships, ports of embarkation, or the destination of organizations.

(e) In time of war commanding officers are responsible that their commands are instructed in the provisions of this section of the regulations and in the dangers involved in leakage of information concerning troop movements. (R.S. 161; 5 U.S.C. 22) [Par. 63, A.R. 380–5, June 10, 1939]

§ 9.2 *Rail movements.* The marking of cars or baggage to indicate an oversea destination, the date of departure, or the name of the ship is forbidden. Baggage for oversea shipment will be addressed to the commanding officer of the port or, where a port of embarkation or debarkation has been established, to the port storage officer. (R.S. 161; 5 U.S.C. 22) [Par. 64. A.R. 380–5, June 10, 1939]

§ 9.3 *Embarkation*—(a) *Admission to piers.* (1) All persons not on official business will be excluded from the piers at all times.

(2) Only official photographers will be permitted to take cameras within the limits of the pier or overseas.

(3) Arrangements will be made to have farewells completed before arrival at the piers. No members of families, relatives, or friends of those sailing will be allowed at the piers or thereabouts on the day of sailing. Should any such persons be found there, they will be ordered away summarily by the guard and report will be made of the officer or enlisted man with whom they were seen or with whom they attempted to communicate.

(b) *Movement of troops.* At ports of embarkation troop movements will be made insofar as practicable without attracting undue attention. Troops will be held at ease, bands will not play, colors will be cased, and no noise of any kind will be permitted. (R.S. 161; 5 U.S.C. 22) [Par. 65, A.R. 380–5, June 10, 1939]

[2] These regulations supplement Chapter I, Title 10, Code of Federal Regulations.

§ 9.4 *Movements of vessels.* In harbors, vessels loaded with troops or supplies will be moved under cover of darkness, whenever possible. If vessels must be moved during daylight, the commanding officer of troops will hold his men below deck or within deck superstructures to prevent attracting attention. Signals by flags or whistles should be limited to those necessary for safe navigation. (R.S. 161; 5 U.S.C. 22) [Par. 66, A.R. 380–5, June 10, 1939]

§ 9.5 *Overseas.* After arrival overseas no information will be given concerning names or destinations of organizations, names of vessels, data concerning convoys, routes pursued, measures taken to avoid attack, dates of arrival, debarkation, or departure, or number of troops or kind of cargoes carried. (R.S. 161; 5 U.S.C. 22) [Par. 67, A.R. 380–5, June 10, 1939]

CHAPTER IX—TRANSPORT

PART 91—GENERAL TRANSPORT REGULATIONS

Sections 91.8 and 91.9, Part 91, Title 10, Code of Federal Regulations are rescinded. (R.S. 161; 5 U.S.C. 22) [A.R. 380–5, June 10, 1939]

[SEAL] E. S. ADAMS,
*Major General,*
*The Adjutant General.*

## TITLE 12—BANKS AND BANKING

## FEDERAL DEPOSIT INSURANCE CORPORATION

PART 307—INSURANCE OF TRUST FUNDS

§ 307.1 *Claim by fiduciary insured bank for insured deposits of trust estates.* In the event of the closing of an insured bank for inability to meet the demands of its depositors, the claim for insured deposits made by a fiduciary insured bank which, in the exercise of its trust powers, had deposited trust funds therein will be determined as follows:

(a) *Allocated funds of a trust estate.* If trust funds of a particular trust estate are allocated by the fiduciary and deposited, the deposit with respect to such estate will be determined by ascertaining the amount of its funds allocated, deposited and remaining to the credit of the claimant as fiduciary in the closed insured bank.

(b) *Interest of a trust estate in unallocated trust funds.* If trust funds of a particular trust estate be mingled [1] with trust funds of other trust estates and deposited by the fiduciary bank in one or more banks to the credit of the depositing bank as fiduciary, without allocation of specific amounts from the particular trust estate to an account in such bank or banks, the deposit with respect to such estate in any closed insured bank will be the amount which will bear the same ratio to all unallocated funds of the estate for which the fiduciary is accountable as the entire unallocated trust funds to the credit of the fiduciary bank in the closed insured bank will bear to the entire amount of such funds so deposited by the fiduciary in all depositories.[2]

(c) *Claims for funds of corporate trusts determined on basis of allocation.* The rule stated in paragraph (b) hereof will not be applied to funds of an insured bank held as fiduciary under a type of trust created to facilitate the issuance, distribution, or servicing of corporate bonds, debentures or stock issues, commonly known as corporate trusts. The claim of the fiduciary bank with respect to deposits of such funds will be determined according to allocations of the funds of particular estates to particular deposit accounts.

(d) *Insured deposit of a trust estate.* In arriving at the total insured deposit of an insured fiduciary bank with respect to any trust estate, the deposit of such estate as determined in accordance with any paragraph hereof shall be combined with that determined under any other paragraph and the insured deposit shall be the total less any amount thereof in excess of $5,000. (Sec. 101 (c) (15), (h) (9) and (m) (3), 49 Stat. 686, 690, 697; 12 U.S.C., Sup., 264 (c) (13), (h) (9) and (m) (3)). [Approved, Res. July 8, 1939]

Approved by the Board of Directors of the Federal Deposit Insurance Corporation on July 8, 1939.

[SEAL] E. F. DOWNEY,
*Secretary.*

[F. R. Doc. 39–2480; Filed, July 11, 1939; 10:39 a. m.]

[1] This Section is not to be construed as an express or implied approval of such commingling of trust funds as may be involved in the maintaining of general trust accounts.

[2] In determining claims under this paragraph, unallocated trust funds in the insured fiduciary bank will be included in the totals of such funds.

## TITLE 24—HOUSING CREDIT

## HOME OWNERS' LOAN CORPORATION

PART 413—RENTAL AND CONTRACTS

CANCELLATION OF RENTAL AGREEMENTS

Amending Part 413 of Chapter IV, Title 24 of the Code of Federal Regulations.

Section 413.03 is amended to read as follows:

§ 413.03 When the rented office space for a Regional, State, Division, District, Field Station or Collection Office is released in whole or in part, written notice on forms provided therefor as required under the terms of the lease shall be given by the official directly supervising such office or station to the lessor or his agent, identifying the space to be released and designating the effecting date for the operation of the release. The Treasurer shall submit a statement of the space to be released and the space to be retained and the cost thereof to the General Manager, who is authorized to approve the same.

(Secs. 4 (a), 4 (k) of Home Owners' Loan Act of 1933, 48 Stat. 129, 132 as amended by Section 13 of the Act of April 27, 1934, 48 Stat. 647; 12 U.S.C. 1463 (a), (k).)

Adopted by the Federal Home Loan Bank Board on June 30, 1939.

[SEAL] H. CAULSEN,
*Assistant Secretary.*

[F. R. Doc. 39–2485; Filed, July 11, 1939; 12:29 p. m.]

[Administrative Order No. 1307]

PART 413—RENTAL AND CONTRACTS

FORMS FOR RELEASE OF SPACE

Amending Part 413 of Chapter IV, Title 24 of the Code of Federal Regulations.

Section 413.03–2 is amended to read as follows:

§ 413.03–2 On the effective date for the release of space, in whole or in part, the Manager of the office concerned shall cause to be executed by the lessor Form 147, 147–A, 147–B or 147–C for space to be released in whole or in part, and forward the original and two copies thereof to the Treasurer in Washington.

(Effective July 15, 1939.)

(Above procedure promulgated by General Manager and General Counsel pursuant to authority vested in them by the Federal Home Loan Bank Board acting pursuant to Secs. 4 (a), 4 (k) of Home Owners' Loan Act of 1933, 48 Stat. 129, 132, as amended by Section 13 of the Act of April 27, 1934, 48 Stat. 647; 12 U.S.C. 1463 (a), (k).)

Promulgated by the General Counsel and General Manager of Home Owners' Loan Corporation.

[SEAL] H. CAULSEN,
*Assistant Secretary.*

[F. R. Doc. 39–2486; Filed, July 11, 1939; 12:29 p. m.]

## TITLE 25—INDIANS

## OFFICE OF INDIAN AFFAIRS

[Irrigation 9001–36–S]

PART 130—AMENDMENT OF ORDER FIXING OPERATION AND MAINTENANCE CHARGES, SAN CARLOS INDIAN IRRIGATION PROJECT, ARIZONA

JUNE 28, 1939.

Sections 130.62 to 130.69, inclusive, of Title 25, Chapter I, Part 130, CFR, Fixing Operation and Maintenance Charges, San Carlos Indian Irrigation Project, Arizona, which read:

§ 130.62 *General.* In compliance with the provisions of the Act of June 7,

[Order No. 1400]

Further notice is hereby given that

1924 (43 Stat., 476), and acts supplementary thereto and the repayment contract of June 8, 1931, between the United States and the San Carlos Irrigation and Drainage District made pursuant to said act, the maintenance and operation charges assessable against the 50,000 acres of privately owned lands of the San Carlos project within the boundary of said San Carlos Irrigation and Drainage District for the calendar year 1938, based upon a total project area of 100,000 acres under constructed works, are hereby fixed as follows:

A fixed or basic charge of $1.65 per acre which shall entitle each acre in the District to have delivered for use thereon two acre feet of water per acre or its proportionate share of the available water supply. This fixed or basic charge shall be paid whether or not the land is in cultivation and whether or not the landowner uses any water.

Fifty cents per acre foot or fraction thereof for the first acre foot of water delivered in excess of the two acre feet provided for by the basic charge and one dollar per acre foot or fraction thereof for water delivered in excess of three (3) acre feet per acre, except such free water as may be delivered in accordance with the provisions of the repayment contract whenever such free water is available.

§ 130.63 *Basic charge.* The fixed or basic charge of $1.65 per acre shall be paid for each assessable acre within the San Carlos Irrigation and Drainage District on or before March 1, 1938.

§ 130.64 *Excess water charges.* Payments for excess water as herein provided for shall be made at the time of request for delivery thereof.

§ 130.65 *Receiving officer.* Payments made on account of the 50,000 acres of lands within the San Carlos Irrigation and Drainage District shall be paid to the Project Engineer of the Indian Irrigation Service, or other proper officer, by the San Carlos Irrigation and drainage District.

§ 130.66 *Payment for Indian lands.* The United States will make available for expenditure on account of the maintenance and operation of this project the $1.65 per acre fixed or basic charge for the 50,000 acres of Indian land in the project, and also the charge for excess water.

§ 130.67 *Operation by district.* The San Carlos Irrigation and Drainage District upon request of its Board of Directors may continue for the period of this order to operate the canals serving lands in private and public ownership within its boundary, and in the event said District elects to continue such operation a credit of 70 cents per acre shall be allowed from the said basic charge for the area of district lands so operated and the basic charge to be paid to the Government by the District will accordingly be reduced to $0.95 per acre.

§ 130.68 *Restriction of Government obligation.* It should be understood that the provisions of this order requiring funds to be made available by the United States are dependent upon appropriations being made by Congress therefor; that the charges based upon the conditions defined shall apply to the calendar year 1938 only, and that nothing herein shall be construed as establishing a precedent for future years.

§ 130.69 *District obligations.* Should the San Carlos Irrigation and Drainage District, through its Board of Directors, request and be granted the privilege of maintaining certain of the works of the project designated in the said repayment contract as "Works of the District," the rights and obligations of the District shall be prescribed and governed by the departmental order turning over the maintenance of such works to the District.

are amended to read:

ORDER FIXING OPERATION AND MAINTENANCE CHARGES FOR THE JOINT WORKS OF THE SAN CARLOS INDIAN IRRIGATION PROJECT, ARIZONA, AND WATER DELIVERY CHARGES FOR STATE AND FEDERAL AGENCIES, VILLAGES, TOWNS, AND SCHOOL LANDS, NOT UNDER THE PROJECT

§ 130.62 *Assessment, joint works, fiscal year 1939.* Pursuant to the provisions of the Act of June 7, 1924 (43 Stat., 476), and supplementary acts, and the Repayment Contract of June 8, 1931, as amended, between the United States and the San Carlos Irrigation and Drainage District, and in accordance with the Order of June 15, 1938 (3 F.R. 2006 DI), which defined the joint works of the San Carlos Irrigation Project, the cost of the operation and maintenance of such joint works, for the fiscal year 1939, was estimated at $60,000 including the administration of the Gila Decree, and in accordance therewith the assessment for the last six months of that fiscal year is hereby fixed on the basis of Sixty Cents ($0.60) for each acre of the 100,000 acres of project lands under constructed works.

Provision shall be made for the payment of this assessment by the San Carlos Irrigation and Drainage District for the District lands on or before June 30, 1939.

§ 130.63 *Assessment, joint works, fiscal year 1940 and until further order.* Pursuant to the Acts of Congress, Repayment Contracts and the Order of June 15, 1938, cited in Section 130.62 hereof, the cost of the operation and maintenance of the joint works of the San Carlos Irrigation Project, for the fiscal year 1940, is estimated to be $60,000, and the rate of assessment for the fiscal year 1940, and subsequent years until further order, is hereby fixed at Sixty Cents ($0.60) for each acre of land, as follows:

This per acre rate shall be assessed against the entire 100,000 acres of project lands under constructed works and shall include the cost of the administration of the Gila Decree but shall be exclusive of the costs of operating and maintaining the Electric Power Generating Plants at Coolidge Dam, the Diesel Plant at Coolidge, and the Power Transmission and Distribution Systems, which costs are payable from power revenues.

The assessment against the lands of the San Carlos Irrigation and Drainage District, for the fiscal year 1940 and subsequent years until further order, is payable on March 1, in advance of each fiscal year as provided in the Order of June 15, 1938 (3 F.R. 2006 DI). [Payment of the assessment against the 50,000 acres of Indian land will be handled as provided in Part 130, Sec. 130.110–130.116 (4 F.R. 2055 DI)]

§ 130.64 *Assessment, State and Federal agencies.* Pursuant to the provisions of the Act of March 7, 1928 (45 Stat., 210), and Article 12 of the Repayment Contract of June 8, 1931, and in accordance with the Order of June 15, 1938 (3 F.R. 2006 DI), the State Lands and Federal Agencies may be delivered water, out of such project water as may be set aside for that purpose, for the calendar year 1939, and until further order, upon the payment of $2.10 per acre per annum, payable in advance each year of the delivery of water. Such payment shall entitle the lands to receive two acre-feet of water per acre per annum or such lesser amount as represents the proportionate share of the available supply of water. Any water delivered to such lands in excess of two acre-feet per acre shall be paid for on the same terms under which excess water is furnished to the project lands.

The water service to the State Lands and Federal Agencies shall be made by:

(a) The San Carlos Irrigation and Drainage District shall serve the State Lands for which service the District shall collect and retain $2.10 per acre.

(b) The Indian Unit of the project, as defined in the Order of June 15, 1938 (3 F.R. 2006 DI), shall serve the Federal Agencies for which it shall collect and retain $2.10 per acre.

The collections for the sale of excess water, as defined in the Order of June 15, 1938 (3 F.R. 2006 DI) to the State Lands and Federal Agencies shall be made by the District and Indian Unit, respectively, in advance of the delivery of water, and shall be paid on or before December 31, 1939, as provided in said Order of June 15, 1938.

§ 130.65 *Assessment, villages, towns and schools.* Such project water as shall be available may be delivered to the Villages, Towns and Schools, not included in the designated area of the San Carlos Irrigation Project, for the irrigation of lawns and gardens. The charge for such service for the calendar year 1939, and until further order, shall be $2.50 per acre-foot of water delivered, payable in advance of delivery.

The delivery of water and the collection therefor shall be made by the San Carlos Irrigation and Drainage District. It is agreed that, for the season of 1939, the District shall retain $1.25 per acre-foot, for each acre-foot on which collection shall be made, as its compensation for rendering the service. The remainder of the collections shall be paid to the Project Engineer for the San Carlos Irrigation Project for the benefit of the Joint Works. This order is subject to modification for future years by the issuance and publication of changes hereto.

OSCAR L. CHAPMAN,
*Assistant Secretary of the Interior.*

## TITLE 30—MINERAL RESOURCES

### OFFICE OF THE SECRETARY OF THE INTERIOR

[Order No. 1399]

ESTABLISHMENT OF BITUMINOUS COAL DIVISION IN THE DEPARTMENT OF THE INTERIOR

JULY 5, 1939.

I hereby amend Order No. 1394 issued by me on June 16, 1939, to read as follows:

"1. In order to carry out the provisions of subsections (a) and (b) of section 4 of Reorganization Plan No. II, transmitted by the President to the Congress May 9, 1939, pursuant to the provisions of the Reorganization Act of 1939, there is hereby established in the Department of the Interior a Bituminous Coal Division, under the charge of a Director.

"2. The aforesaid Division shall administer the functions vested in the National Bituminous Coal Commission (including the functions of the members thereof) by the Bituminous Coal Act of 1937, approved April 26, 1937 (50 Stat. 72), exclusive of the power to appoint and fix the compensation and duties of personnel and exclusive of the power to make contracts for personal services (both of which powers are vested in said Commission by Section 2 (a) of the Bituminous Coal Act of 1937), which powers shall be exercised by the Office of the Secretary of the Interior; and shall assist the Secretary in winding up the affairs of the National Bituminous Coal Commission.

"3. The functions administered by the aforesaid Division shall be performed by and through its Director, who shall exercise all of the power and authority of the Division in the premises.

"This order shall be effective July 1, 1939."

HAROLD L. ICKES,
*Secretary of the Interior.*

[F. R. Doc. 39–2478; Filed, July 11, 1939; 9:24 a. m.]

[Order No. 1400]

ESTABLISHMENT OF A CONSUMERS' COUNSEL DIVISION IN THE OFFICE OF THE SOLICITOR

JULY 7, 1939.

In order to carry out the provisions of subsection (c) of section 4 of Reorganization Plan No. II, transmitted by the President to the Congress May 9, 1939 pursuant to the provisions of the Reorganization Act of 1939, there is hereby established in the Office of the Solicitor a Consumers' Counsel Division, under the immediate charge of a Director.

The Division shall administer the functions vested in the office of the Consumers' Counsel of the National Bituminous Coal Commission (including the functions vested in the Consumers' Counsel in charge of that office) by the Bituminous Coal Act of 1937, approved April 26, 1937 (50 Stat. 72), exclusive of the power to appoint and fix the compensation and duties of personnel (vested in said Consumers' Counsel by section 2 (b) of the Bituminous Coal Act of 1937), which power shall be exercised in the Office of the Secretary.

This order shall be effective as of July 1, 1939.

HAROLD L. ICKES,
*Secretary of the Interior.*

IN THE MATTER OF PROPOSED REVISION OF TRADE PRACTICE RULES FOR THE MARKING DEVICES INDUSTRY

NOTICE OF OPPORTUNITY TO PRESENT VIEWS, SUGGESTIONS OR OBJECTIONS

This matter now being before the Federal Trade Commission under its Trade Practice Conference procedure, in pursuance of the Act of Congress approved September 26, 1914, as amended (Federal Trade Commission Act), or other applicable provisions of law administered by the Commission;

Opportunity is hereby extended by the Federal Trade Commission to any and all persons, partnerships, corporations, associations, groups or other parties affected by or having an interest in the proposed revision of the trade practice rules for the Marking Devices Industry to present to the Commission, orally or in writing, their views concerning such rules, including such pertinent information, suggestions or objections, if any, as they desire to submit. For this purpose they may, upon application to the Commission, obtain copies of the proposed rules. Written communications of such matters should be filed with the Commission not later than July 27, 1939. Opportunity for oral hearing and presentation will be afforded at 10 a. m., July 27, 1939, in Room 332, Federal Trade Commission Building, Constitution Avenue at Sixth Street, Washington, D. C., to any such persons, partnerships, corporations, associations, groups or other parties as may desire to appear and be heard. After giving due consideration to all matters submitted concerning the proposed rules, the Commission will proceed to their final consideration.

By the Commission.

IN THE MATTER OF STONEWALL ELECTRIC COMPANY AND THE TUCSON GAS, ELECTRIC LIGHT AND POWER COMPANY

NOTICE OF AND ORDER FOR HEARING

A declaration and applications pursuant to sections 7, 10 and 12 of the Public Utility Holding Company Act of 1935, having been duly filed with this Commission by the above-named parties;

*It is ordered*, That a hearing on such matter be held on July 17, 1939, at 10:00 o'clock in the forenoon of that day, at the Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C. On such day the hearing-room clerk in room 1102 will advise as to the room where such hearing will be held. At such hearing, if in respect of any declaration, cause shall be shown why such declaration shall become effective.

*It is further ordered*, That Charles S. Moore or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice to continue or postpone said hearing from time to time.

Notice of such hearing is hereby given to such declarant or applicant and to any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before July 15th, 1939.

The matter concerned herewith is in regard to a declaration regarding the issue and sale by Stonewall Electric Company to the Rural Electrification Administration of a $65,000 mortgage note pursuant to Section 7 of the Act, the proceeds to be used in construction of rural distribution lines, and an application regarding a lease of and an option to buy said distribution lines to The Tucson Gas, Electric Light and Power Company pursuant to Section 12 of the Act and an application regarding the acquisition of said lease and option agreement by The Tucson Gas, Electric Light and Power Company pursuant to Sections 10 (a) (2) and 10 (a) (3) of the Act.

IN THE MATTER OF SECURITIES CORPORATION GENERAL

NOTICE OF AND ORDER FOR HEARING

An Application pursuant to section 12 (c) and Rule U-12C-2 of the Public Utility Holding Company Act of 1935, having been duly filed with this Commission by the above-named party;

*It is ordered*, That a hearing on such matter be held on July 27, 1939, at 10:00 o'clock in the forenoon of that day, at the Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C. On such day the hearing-room clerk in room 1102 will advise as to the room where such hearing will be held. At such hearing, if in respect of any declaration, cause shall be shown why such declaration shall become effective.

*It is further ordered*, That Willis E. Monty or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice to continue or postpone said hearing from time to time.

Notice of such hearing is hereby given to such declarant or applicant and to any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before July 22, 1939.

The matter concerned herewith is in regard to an application pursuant to Rule U-12C-2 by Securities Corporation General, a subsidiary of a registered holding company, International Utilities Corporation, with regard to the payment of a dividend by Securities Corporation General in the amount of $1.75 per share, payable August 1, 1939, on the 1,843 shares of Cumulative Preferred Stock, $7.00 Series, which it has outstanding, and with regard to the payment of a dividend by Securities Corporation General in the amount of $1.50 per share, payable August 1, 1939, on the 4,731 shares of Cumulative Preferred Stock, $6.00 Series, which it has outstanding.

## *The President*

### EXECUTIVE ORDER

REGULATIONS PERTAINING TO THE ADMINISTRATION OF THE ACT OF MAY 3, 1939, PUBLIC NO. 63, 76TH CONGRESS, 1ST SESSION

By virtue of the power vested in me as President of the United States and by the act approved May 3, 1939, entitled "An Act to amend the act entitled 'An Act authorizing the temporary detail of United States employees, possessing special qualifications, to governments of American republics and the Philippines, and for other purposes', approved May 25, 1938", I hereby prescribe the following regulations pertaining to the administration of the said act of May 3, 1939:

1. Requests of foreign governments for the services of United States Government officers and employees having special scientific or other technical or professional qualifications shall be made through diplomatic channels to the Secretary of State.

2. If the United States is unable to comply with the request of the foreign government because of lack of facilities or qualified personnel, the Secretary of State shall so inform the foreign government.

3. If the United States is able to comply with the request of the foreign government, but the Secretary of State, after consultation with the department or agency concerned, concludes that compliance therewith would not be in the public interest, he shall submit the request to the President with his recommendation and reasons therefor. If the Secretary deems compliance with such request to be in the public interest, he shall submit the matter to the department or agency concerned, indicating in his submission the nature of the services to be rendered, the probable length of the detail or assignment, and such other relative information as may be available, and requesting such department or agency to furnish the names of the officers or employees available, together with information as to their previous experience and special qualifications (including language qualifications), their basic salaries, their family status, and such other information as may in the opinion of the Secretary of State be necessary or desirable.

4. Upon receipt of the requested information from the department or agency concerned, the Secretary of State shall submit, with pertinent information and data, the request of the foreign government to the President with his recommendations, which shall include recommendations as to (1) length of detail or assignment, (2) amount of additional compensation, if any, of officer or employee detailed, (3) amount of monthly allowances to detailed officer or employee for quarters and subsistence, (4) amount of reimbursement for travel expenses of detailed officer or employee to and from the place of detail, and (5) acceptance from the interested foreign government of reimbursement, in whole or in part, of the cost involved. If the President determines that the request of the foreign government shall be granted by the United States, the Secretary of State shall so notify the foreign government, and shall in his discretion inform it as to the cost involved and request it to indicate whether it desires to reimburse the United States in whole or in part for such cost.

5. The Secretary of State shall establish for administrative purposes such forms as may be necessary for the maintenance of uniform records which shall include full information with respect to each detail or assignment. Upon completion of arrangements for each detail, the Secretary of State shall furnish a copy of the completed form to the agency lending the services of the officer or employee concerned.

6. The Secretary of State may prescribe such regulations not inconsistent herewith as he may deem necessary or

## EXECUTIVE ORDER

SUSPENSION OF EIGHT-HOUR LAW AS TO CONSTRUCTION OF CERTAIN EMERGENCY AIR BASES

WHEREAS the act of April 25, 1939, Public, No. 43, 76th Congress, 1st Session, authorizes the Secretary of the Navy to establish, develop, or increase naval aviation facilities at or in the vicinity of certain places mentioned therein, including Midway Island, Johnston Island, Palmyra Island, Kodiak, Alaska, and Sitka, Alaska; and

WHEREAS it appears that the interests of the national defense require the establishment of naval aviation bases at such places at the earliest practicable date; and

WHEREAS it further appears that it will be impossible to accomplish the work required in the establishment of such naval aviation bases at Midway Island, Johnston Island, Palmyra Island, Kodiak, Alaska, and Sitka, Alaska, because of the isolation of such places from sources of labor supply, within the time required by the interests of the national defense unless the provisions of law prohibiting more than eight hours labor in any one day of persons engaged upon work covered by contracts with the United States are suspended as to such work; and

WHEREAS the act of March 4, 1917, 39 Stat. 1168, 1192 (U. S. C., title 40, sec. 326), provides "That in case of national emergency the President is authorized to suspend provisions of law prohibiting more than eight hours labor in any one day of persons engaged upon work covered by contracts with the United States"; and

WHEREAS I find that by reason of the foregoing a national emergency exists:

NOW, THEREFORE, under and by virtue of the authority vested in me by the above-quoted provisions of the said act of March 4, 1917, I hereby suspend the provisions of law prohibiting more than eight hours labor in any one day of persons engaged upon work covered by contracts with the United States as to all work authorized and performed under the said act of April 25, 1939, at or in the vicinity of the following places: Midway Island, Johnston Island, Palmyra Island, Kodiak, Alaska, and Sitka, Alaska.

AMENDMENT OF EXECUTIVE ORDER NO. 7302 OF FEBRUARY 21, 1936, TRANSFERRING CERTAIN LANDS TO THE CONTROL AND JURISDICTION OF THE SECRETARY OF THE NAVY

VIRGIN ISLANDS

By virtue of the authority vested in me by the act of March 3, 1917, c 171, 39 Stat. 1132, and the Second Deficiency Act, Fiscal Year 1931 (46 Stat. 1552, 1570), and as President of the United States, Executive Order No. 7302 of February 21, 1936, transferring certain lands in the Virgin Islands from the control and jurisdiction of the Secretary of the Interior to the control and jurisdiction of the Secretary of the Navy for use in the establishment, construction, and operation of aviation facilities, as amended by Executive Orders No. 7686 of August 5, 1937, No. 7790 of January 12, 1938, and No. 8103 of May 2, 1939,[1] is hereby further amended by adding thereto the following:

"It is further ordered that the following tract of land embracing the east beach and bath house fronting on Lindbergh Bay, St. Thomas, Virgin Islands, more particularly described below by metes and bounds, be, and it is hereby, subject to valid existing rights, transferred from the control and jurisdiction of the Secretary of the Interior to the control and jurisdiction of the Secretary of the Navy for use in the establishment, construction and operation of aviation facilities at the Naval Air Station, St. Thomas, Virgin Islands.

"Beginning at a point marked '1' on Public Works Drawing No. 28, on file in the Navy Department, thence North 25°5' East, 210.06 feet to a point marked '2'; thence North 64°55' West, 282.21 feet, to a point marked '3'; thence South 25°5' West 172.22 feet to a point marked '4'; thence along the shore line of Lindbergh Bay to the point of beginning."

## *Rules, Regulations, Orders*

## TITLE 22—FOREIGN RELATIONS

## DEPARTMENT OF STATE

[Departmental Order No. 796]

PART 44—STUDY AND RESEARCH IN THE DEPARTMENT

REGULATIONS GOVERNING USE OF THE RECORDS OF THE DEPARTMENT OF STATE

Section 91, Title 20, of the United States Code reads in part as follows: "The facilities for study research and illustration in the Government departments * * * shall be accessible, under such rules and restrictions as the officers in charge of each department or collection may prescribe, subject to such authority as is now or may hereafter be permitted by law, to the scientific investigators and to duly qualified individuals, students and graduates of any institution of learning in the several States and Territories and the District of Columbia * * *" Pursuant to the provisions quoted and in order to clarify the present procedure in the Department, the following regulations, superseding those contained in Departmental Order No. 751 dated April 5, 1938 and all previous Departmental orders on the subject, are hereby prescribed to govern the use of the original records of the Department of State.

In view of the contemporary international situation it will not be possible to make the confidential or unpublished files and records of the Department of a date later than December 31, 1918 available to persons who are not officials of the United States Government. In order that the Department's records may be made available as liberally as circumstances permit, the Department each year will give consideration to the situation then existing with a view to advancing the date fixed whenever such action is deemed possible. The use of these records by Government officials will be subject to such conditions as the chiefs of the appropriate policy divisions in the Department of State may deem it advisable to prescribe.

The confidential or unpublished records of the Department of a date prior to December 31, 1918, or such subsequent date as may be fixed by the Department, may be made available to persons who are not officials of the United States Government, subject to the following conditions:

Files which are in current use in the Department or which cannot be made public without the disclosure of confidences reposed in the Department or without adversely affecting the public interest should not be made available to inquirers. Papers received by the Department from a foreign government which have not been released for publication by that government should not be made available to inquirers without the consent of the government concerned. If there is reason to believe a foreign government may be willing to permit the use of the papers in question under certain conditions the permission may, in the discretion of the appropriate officials of the Department, be requested. If such permission is requested, the expenses of communicating with the foreign government (cost of telegrams, postage, et cetera) will be met by the person desiring to consult the papers.

Permission to consult the records of the Department through the date fixed by the Department may be granted, subject to the limitations set forth in this order, to such persons as lawyers, publicists, historians, instructors and professors in accredited colleges and universities, and holders of the doctor's de-

gree (or its equivalent) in foreign relations or allied subjects from such colleges and universities, provided that they are authorities of recognized standing in the field to which the records relate and that they have an important and definite use for the information desired. Due to lack of personnel the Department is not in a position to assemble large quantities of papers or extensive files for consultation by persons not officials of the Government and requests for permission to consult material should therefore be definitely limited in scope and confined to specific subjects or particular papers.

An application from an alien to consult the Department's records under this order shall be considered only if accompanied by a letter from the head of the Embassy or Legation at Washington of the country of which the alien is a citizen, subject or national. Such a letter must show that the applicant is favorably known to the appropriate embassy or legation and that the mission is familiar with the purpose of the applicant's work

All applications to consult the original records of the Department of date prior to the one fixed by the Department shall be referred to the Chief of the Division of Research and Publication. If the Chief of the Division of Research and Publication is of the opinion that the applicant possesses the requisite qualifications as set forth in this order, he shall have assembled and shall submit to the chief of the policy division charged with the consideration of questions in the field which is the object of the research or inquiry all of the relevant papers and files which the applicant desires to consult, with the exceptions hereinafter noted. If the applicant is permitted to use all or part of the papers desired, the chief of the policy division concerned will inform the Chief of the Division of Research and Publication under what conditions the papers may be examined, that is, whether copies may be made of the relevant documents or whether only notes may be taken and whether the copies or notes may be published in whole or in part or used only for background information, or any other conditions which the chief of the policy division mentioned may deem it advisable to prescribe. This decision will be final except in cases of unusual importance where the question may be referred to an Assistant Secretary of State or higher officer. Documents or papers previously released or published, and unpublished papers clearly involving no question of policy, may be made available to qualified applicants by the Chief of the Division of Research and Publication without reference to other officials.

Upon receiving the decision of the chief of the policy division mentioned, with the conditions therein deemed advisable and necessary to prescribe, the Chief of the Division of Research and Publication will thereupon arrange for the applicant to consult the files subject to the conditions mentioned. After the papers have been consulted the applicant will submit all notes, copies of documents, et cetera, which he has made to the Chief of the Division of Research and Publication. The latter, when necessary, will refer these notes, copies, et cetera, to the chief of the policy division concerned for examination if desired by the chief of the latter division. The chief of this policy division may, after such examination, return the papers to the Chief of the Division of Research and Publication for transmittal to the applicant or he may, in his discretion, retain the notes and refuse the applicant permission to use them.

The provisions of this order are to be interpreted as liberally as possible. In this regard it is to be borne in mind that the further it is possible to go in the way of promoting legitimate historical research and the study of the foreign policy of the United States without violating the confidences necessary for the transaction of diplomatic affairs, the more likely the Department will be to receive the support and trust of the intelligent public.

CORDELL HULL.

### DEPARTMENT OF THE INTERIOR.

**Geological Survey.**

ORDER GRANTING AND DIRECTING A HEARING IN THE MATTER OF A MINIMUM PRICE FIXED AND ESTABLISHED BY THE SECRETARY OF THE INTERIOR FOR COMPUTING ROYALTIES DUE TO THE UNITED STATES ON CRUDE OIL PRODUCED FROM LANCE CREEK FIELD, WYOMING.

1. Under date of May 22, 1939, the Geological Survey submitted a report on a study of crude oil prices currently paid for oil produced from the Salt Creek and Lance Creek fields, Wyoming, and various Mid-Continent fields, and recommended that a minimum price be established for the purpose of computing royalties due to the United States on crude oil produced from Federal lands in the Lance Creek field, Wyoming, on the basis of a price per barrel which is four cents (4¢) per barrel above the price regularly posted by the major purchasers of crude oil in the Mid-Continent area for crude oil of 40° A. P. I. gravity, or currently $1.14 per barrel.

2. The report and recommendations submitted by the Geological Survey were carefully considered by me, and on May 31, 1939, under authority conferred upon the Secretary of the Interior by the Act of February 25, 1920 (Sec. 32, 41 Stat. 450; 30 U.S.C. 189), and in the exercise of the inherent power of the Secretary of the Interior over lands of the public domain, I approved the recommendations of the Geological Survey and fixed and established, effective July 1, 1939, for the purpose of computing royalties due to the United States on crude oil produced from Federal lands in the Lance Creek field, Wyoming, a minimum price of four cents (4¢) per barrel above the price per barrel regularly posted by the major purchasers of crude oil in the Mid-Continent area for crude oil of 40° A. P. I. gravity, or currently $1.14 per barrel.

3. Subsequently, the oil and gas supervisor of the Northwestern District notified the parties concerned of the action taken by me in the premises.

4. Under date of June 26, 1939, Continental Oil Company, The Buck Creek Oil Company, The Ohio Oil Company, and Argo Oil Corporation submitted a joint application for a hearing in the matter of a minimum price fixed and established for the Lance Creek field, Wyoming, and under date of June 28, 1939, Adams Oil and Gas Company and Fremont Corporation submitted a similar joint application for a hearing.

5. The hearing requested will be granted to afford all interested parties an opportunity to present oral arguments and file written briefs.

6. The Assistant Secretary of the Interior is hereby designated to conduct the hearing at Washington, D. C., said hearing to commence at 10 a. m., July 27, 1939.

7. The Director of the Geological Survey is instructed to promulgate this order to all interested parties by registered mail.

8. Effective July 1, 1939, and until further notice, the oil and gas supervisor of the Northwestern District will bill lessees and operators in the Lance Creek field, Wyoming, at the minimum price as fixed and established by me and will cause the following notation to be placed on each monthly royalty statement: "Subject to adjustment upon adjudication of appeals to the Secretary of the Interior."

HAROLD L. ICKES,
*Secretary of the Interior.*

JULY 11, 1939.

### DEPARTMENT OF THE INTERIOR.

**National Bituminous Coal Commission.**

[General Docket No. 15]

IN THE MATTER OF THE ESTABLISHMENT OF MINIMUM PRICES AND MARKETING RULES AND REGULATIONS: IN RE MINIMUM PRICES AS COORDINATED FOR DISTRICTS Nos. 9, 10, 11, 12, 13, 14 AND 15

AN ORDER FOR AND NOTICE OF FINAL HEARING IN THE MATTER OF THE ESTABLISHMENT OF MINIMUM PRICES FOR THE COALS PRODUCED IN DISTRICTS NOS. 9, 10, 11, 12, 13, 14 AND 15

Whereas, pursuant to Order No. 249[1] of the Commission and Section 4, II (a) of the Bituminous Coal Act of 1937, the District Boards for each of Districts Nos. 9, 10, 11, 12, 13, 14 and 15 proposed and submitted to the Commission minimum prices for the kinds, qualities, and sizes of coal produced in their respective districts, and

Whereas, pursuant to hearings[2] heretofore held in this Docket No. 15, the Commission made Findings of Fact and Conclusions,[3] relating to said proposals, and approved or modified such proposed minimum prices, as provided by Section 4, II (a) of the Act, to serve as the basis for the coordination orovided for in Section 4 II (b) of the Act, and

Whereas, pursuant to Order No. 270,[4] the District Boards for each of Districts Nos. 9, 10, 11, 12, 13, 14 and 15 proposed the price classification of each kind, quality, and size of coal produced by each code member within their respective districts for which no classification had been proposed pursuant to Order No. 249 and which were not included in the schedules approved by the Commission to serve as a basis for coordination, and

Whereas, the Commission, by its Orders Nos. 254, 255, 256, 260, 264 and 266,[5] directed the District Boards for each of Districts Nos. 9, 10, 11, 12, 13, 14 and 15 to coordinate in common consuming market areas upon a fair competitive basis the minimum prices as approved by the Commission for the respective districts to serve as a basis for coordination, and

The District Board for District No. 14, having reported to the Commission, pursuant to Order No. 269, that the approved minimum prices for said district had been coordinated as to all consuming market areas common to District No. 14 and all other districts with which it competes, and having submitted a schedule of such coordinated minimum prices, together with the data upon which they are predicated, to the Commission, and

The District Boards for Districts Nos. 9, 10, 11, 12, 13 and 15 having failed to coordinate said approved minimum prices as to all of their consuming market areas common to any two or more of said districts or common to any of said districts and any other district or districts, and

The Commission, in lieu of said District Boards for Districts Nos. 9, 10, 11, 12, 13 and 15 pursuant to Section 6 (a) of the Act and Order No. 267[6] of the Commission, having coordinated the approved minimum prices for said Districts Nos. 9, 10, 11, 12, 13 and 15 in all of the consuming market areas of each of said districts, and

Whereas, included in said schedules of coordinated minimum prices as coordinated by the Commission, are proposed coordinated minimum prices for the coals of the code members of their respective districts, the price classifications of which were proposed pursuant to Order No. 270, and

Whereas, the consuming market areas in which the aforesaid minimum prices have been coordinated, as above set forth, are numerically designated and geographically described in a document entitled "Consuming Market Areas as Proposed by the National Bituminous Coal Commission Pursuant to Section 4 of the Bituminous Coal Act of 1937", dated April 24, 1939, which document is on file in the Office of the Secretary of the Commission, Washington, D. C., together with a comparison of the descriptions of the former market areas and the present proposed market areas entitled "Comparison of Numbers Designating Former Market Areas (revoked), Market Areas as Coordinated, and Proposed New Numbers therefor", and which documents were published in the FEDERAL REGISTER in its issue of May 4, 1939 at Pages 1831 to 1854, both inclusive, and were also mailed, under date of May 1, 1939, to the Consumers' Counsel, to the Secretary of each District Board and to each code member, and which, by this reference are incorporated herein and made a part hereof, and which will be offered at a final hearing, as hereinafter provided, as the proposals of the Commission, and

Whereas, the aforesaid minimum prices for District No. 14 as coordinated by the District Boards, and the aforesaid minimum prices for Districts Nos. 9, 10, 11, 12, 13 and 15, as coordinated by the Commission, schedules of which are on file in the Office of the Secretary of the Commission, Washington, D. C., and by this reference incorporated herein and made a part hereof, will be offered at a final hearing, as hereinafter provided, as the proposals of the District Board for District No. 14 and as the proposals of the Commission for District Nos. 9, 10, 11, 12, 13 and 15, respectively, and

Whereas, the Commission has found the weighted average of the total costs per net ton produced in each of the minimum Price areas in the calendar year 1936, adjusted as provided by Section 4, II (a) of the Act, to be as follows:

| | Per net ton |
|---|---|
| Minimum Price Area 2 (District Nos. 9, 10, 11 and 12) | $1.762 |
| Minimum Price Area 3 (District No. 13) | 2.438 |
| Minimum Price Area 4 (District No. 14) | 3.608 |
| Minimum Price Area 5 (District No. 15) | 2.039 |

Now, therefore, pursuant to the provisions of the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders and directs:

1. That notice be, and the same is hereby given, that a final hearing will be held before examiners, to be duly designated,[7] commencing at 10 a. m. on the 7th day of August, 1939, at the hearing room of the Commission, 734 15th Street, N. W., Washington, D. C., for the purpose of receiving evidence to enable the Commission to establish minimum prices f. o. b. transportation facilities at the mines for the kinds, qualities and sizes of coal produced in Districts Nos. 9, 10, 11, 12, 13, 14 and 15, as provided by Section 4, II (b) of the Bituminous Coal Act of 1937.

2. That at said hearing, the aforesaid description of consuming market areas, and the aforesaid minimum prices for District No. 14 as coordinated by the District Boards, and the aforesaid minimum prices for Districts 9, 10, 11, 12, 13 and 15, as coordinated by the Commission, respectively, will be offered as proposals, and all interested parties will be afforded an opportunity to present evidence relating to the conformity or nonconformity of said proposed minimum prices with the standards prescribed by Sections 4, II (a) and (b) of the Act, and such other evidence as would enable the Commission to establish minimum prices in conformity with the procedure and standards set forth in Sections 4, II (a) and (b) of the Bituminous Coal Act of 1937. Said proposals shall be subject to such modification as may be warranted by the evidence adduced at the hearing to conform them to the requirements of said Sections 4, II (a) and (b) of the Act.

3. That the record of all proceedings heretofore held in this Docket No. 15, pertaining to the matter of the proposals of minimum prices submitted by the several District Boards, upon which the Commission's prior approval of the minimum prices to serve as a basis for coordination was based, will be made a part of the record of this final hearing.

4. That the Secretary of the Commission be and he is hereby directed to cause the reports of the producers within Minimum Price Areas Nos. 2, 3, 4 and 5, submitted to the Commission pursuant to Order No. 239[8] on Commission Forms D-1 and D-2, relating to the distribution of coal in the calendar year 1937, to be made available for inspection by those interested parties who have filed appearances in this proceeding, during business

hours on and after June 29th, 1939, at the offices of the Commission, Walker Building, Washington, D. C., or at such other place as may be hereafter designated upon proper public notice. Notices of appearance may be filed with the Commission at the office of the Secretary, Washington, D. C., or at such other place as may be hereafter designated upon public notice.

Coded listings of invoices for specified periods showing the sizes of coal shipped to certain destinations in the States of Indiana, Illinois, Missouri, Kansas, Nebraska, Minnesota, Tennessee and South Dakota; and the sales prices thereof, will be made available for inspection during business hours at the Offices of the Commission, 734 15th Street NW., Washington, D. C., commencing on July 5th, 1939, by those interested parties who have filed appearances in this proceeding.

5. That the Secretary of the Commission be and he is hereby directed to cause a copy of this Order for and Notice of Hearing, together with a copy of each of the aforesaid proposed coordinated minimum price schedules for Districts Nos. 9, 10, 11, 12, 13, 14 and 15 to be published forthwith in the FEDERAL REGISTER; and to cause copies thereof to be mailed to the Consumers' Counsel and to the Secretary of each District Board; and shall cause to be mailed to each code member a copy of this Order and Notice, and shall cause to be mailed to each code member within Districts Nos. 9, 10, 11, 12, 13, 14 and 15 a copy of the schedule of proposed coordinated minimum prices for the district of such code member; and shall cause to be made available for inspection by all interested parties at the proper Statistical Bureau of the Commission copies of the schedule for the respective district.

By order of the Commission.
Dated this 28th day of June 1939.

[SEAL] F. WITCHER MCCULLOUGH.
*Secretary.*

### PRICE INSTRUCTIONS AND EXCEPTIONS (FOR SHIPMENT BY RAILROAD)

1. All prices shown herein are in cents per net ton of 2,000 pounds and apply f. o. b. transportation facilities at mines.

2. All prices are subject to the effective Marketing Rules and Regulations and the Rules and Regulations governing distributors.

3. All size designations are for round hole screens. When screens having other types of openings are used and the percentage of over-size, as determined in accordance with the method of test prescribed by A. S. T. M. designation D-410-38, exceeds 5% the price for the next higher Size Group Classification for that mine shall apply.

4. The Market Areas used in this schedule are those areas numerically designated and geographically described in the document entitled, "Consuming Market Areas as Proposed by the National Bituminous Coal Commission pursuant to Section 4 of the Bituminous Coal Act of 1937," dated April 24, 1939.

5. The prices herein established for mines shipping by railways shall be applicable to all coal shipped by conveyances other than trucks or wagons.

6. Railway Locomotive Fuel prices herein designated shall not be used in the sale of coal to railways other than those recognized as common carriers by the Interstate Commerce Commission or by the Canadian Railways Commission.

7. All lump or double screened coal subjected to any chemical, oil or wax process for allaying dust shall be priced at not less than 10 cents per net ton above the prices shown herein.

8. The term *"Industrial Coal"* as used in this schedule is coal used in industrial plants which buy and receive coal in carload quantities for their own use.

9. The term *"Domestic Coal"* as used in this schedule is coal other than that defined as "Industrial Coal."

*Size Group Description—(For Shipment by Railroad)*

| Size group No. | Lump and M/R | Double screened |
|---|---|---|
| 1 | All Lump coal larger than 4". | All Egg coal with bottom size larger than 4". |
| 2 | All Lump coal 4" and smaller but larger than 3". | All Egg coal with a top size larger than 6" and a bottom size 3" and larger, but not larger than 4", and includes 6" x 4" Egg. |
| 3 | All Lump coal 3" and smaller, but larger than 2". | All Egg coal with a bottom size larger than 2" but not larger than 3", and a top size not larger than 6". |
| 4 | All Lump coal 2" and smaller, but larger than 1½". | All Egg coal with a bottom size larger than 1½" but not larger than 2", and a top size larger than 4". |
| 5 | | All Double Screened coals with a bottom size larger than 1¼" but not larger than 2", and a top size larger than 3" but not larger than 4". |
| 6 | | All Double Screened coals with a bottom size larger than 1¼" but not larger than 2", and a top size larger than 2" but not larger than 3". |
| 7 | All Lump coal 1½" or smaller. | All Double Screened coals with a top size larger than 3" and a bottom size not larger than 1½". |
| 8 | | All Double Screened coals with a top size larger than 2" but not larger than 3" and a bottom size not larger than 1½". |
| 9 | Straight Mine Run, no fines removed. Mine Run, modified by the removal of any intermediate size or sizes, no fines removed. All Resultants larger than 2", no fines removed. | |
| 10 | | All Double Screened coal *not* mechanically cleaned with a top size not larger than 2" but larger than 1½", and a bottom size larger than ⅜". |
| 11 | | All Double Screened coals *not* mechanically cleaned with a top size not larger than 2" but larger than 1½", and a bottom size not larger than ¾" or 10 mesh. |
| 12 | | All Double Screened coals *not* mechanically cleaned with a top size not larger than 1½" but larger than ¾", and a bottom size larger than ⅜". |
| 13 | | All Double Screened coals *not* mechanically cleaned with a top size not larger than 1½", and a bottom size ⅜" and smaller. |

### Screenings

Size group No. 14.—Modified Screenings having a top size 2" and smaller but larger than 1½", and a bottom size not larger than 8 mesh.

Size group No. 15.—Modified Screenings having a top size 1½" and smaller but larger than 1¼", and a bottom size not larger than 8 mesh.

Size group No. 16.—Modified Screenings having a top size 1¼" and smaller but larger than 1", and a bottom size not larger than 8 mesh.

Size group No. 17.—Modified Screenings having a top size 1" and smaller, and a bottom size not larger than 8 mesh.

Size group No. 18.—All Screenings *not* mechanically cleaned having a top size 2" and smaller, but larger than 1½", no fines removed.

Size group No. 19.—All Screenings *not* mechanically cleaned having a top size 1½" and smaller, but larger than 1¼", no fines removed.

Size group No. 20.—All Screenings *not* mechanically cleaned having a top size 1¼" and smaller but larger than 1", no fines removed.

Size group No. 21.—All Screenings *not* mechanically cleaned having a top size 1" and smaller but larger than ⅜", no fines removed.

Size group No. 22.—All Screenings *not* mechanically cleaned having a top size ⅜" and smaller but larger than ¼", no fines removed.

Size group No. 23.—Carbon—All Screenings *not* mechanically cleaned having a top size ¼" and smaller.

| White Bear | —5 | —5 |
| Whiteoorn | —5 | —5 |
| Wilkie | —5 | —5 |
| Wilber's Mill | —5 | —5 |

Note: A code member mine may reduce the price by the amount shown for the size of coal shipped where the minus amount in cents per ton is shown opposite such destination.

*All Railroad Fuel Prices F. O. B. Mines Subject to Price Instructions and Exceptions*

[Prices in cents per net ton of 2,000 pounds]

| Mine | Railroad | Size of coal | Price |
|---|---|---|---|
| Any mine | Any railroad. | Any lump or double-screened coal. | 180 |
| Any mine | Any railroad. | Mine run coal | 165 |
| Any mine | Any railroad. | Any screenings, 2" or less, from which no fines have been removed. | 100 |

RIVER AND EX-RIVER SECTION

The prices in the following section are applicable to any mine, shown at the beginning of this document, shipping either totally or partially by river.

NOTE 1: Rail or truck transportation charges to river loading ports from the mines are included in the base rates shown throughout the river or ex-river section.

NOTE 2: The specific deductions shown must be rebated by the producer of the coal to the ex-river forwarder upon proper showing (railroad waybills) that a specific tonnage was shipped to a specific destination. This information must be filed with the Statistical Bureau of the Commission. Further, on coals 1½" and larger that have been rescreened at the river dock, degradation removed, a further rebate may be made on this degradation. Such degradation shall be determined on the basis of the 1½" x 0 price of the coal ordered and is measured on the basis of the screening percentages of the sizes loaded into transportation facilities mines, and screening percentages of the same size shipped off the dock. The practice of rescreening mine run or resultants at the dock is not restricted in any manner provided, however, that rescreening does not permit the movement to destination of any size at a lower price than the effect of these coordinated prices. Rebates are also permitted on mine run and resultants over 2" if rescreened at dock or elevator as provided in the preceding sentence if the return based on the coordinated price for the size is less than the purchase price of the original size. Mixing of coals is not prohibited; however, the mine price for individual coals shall not be used as a basis for averaging prices for resale, but the mixture (any proportion) shall take the coordinated price of the higher priced coal f. o. b. mines as classified.

NOTE 3: Transportation charges within the industrial switching limits of any river destination may be absorbed from the f. o. b. mine prices but the absorption must not exceed the published rail industrial switching rates (coal). Absorption will not be permitted beyond the extent permitted in Note 2 when the ex-river movement is via transportation other than rail to a consumer with no rail connection. If a consumer has rail connections and takes ex-river delivery via transportation facilities other than rail, the rail industrial switching charge may be absorbed from the f. o. b. mine price.

*Prices F. O. B. Mines, for River and Ex-River Shipment, Applicable for All Uses Except Railroad Locomotive Fuel Subject to Price Instructions and Exceptions and Notes Shown Below*

[1] The prices shown are applicable to coal when washed.
[2] The prices shown are applicable only to "Domestic Coal."
[3] The prices shown are applicable only to "Industrial Coal."
*The above prices are based on a base river charge (including all charges necessary to reload coal in cars docks—See Note 1) of 65 cents per net ton. If the base river rate exceeds 65 cents per ton the exact difference between the actual rate and the base rate may be deducted from the above prices. If the base river rate is less than 65 cents per ton, the exact difference between 65 cents and the actual rate shall be added to the above prices. These flexible f. o. b. mine prices are subject to the notes listed hereinbefore.

[1] The prices shown are applicable to coal when washed.
[2] The prices shown are applicable only to "Domestic Coal."
[3] The prices shown are applicable only to "Industrial Coal."
*The above prices are based on a base river charge (including all charges necessary to reload coal in cars docks—See Note 1) of $1.15 per net ton. If the base river rate exceeds $1.15 per ton the exact difference between the actual rate and the base rate may be deducted from the above prices. If the base river rate is less than $1.15 per ton, the exact difference between $1.15 and the actual rate shall be added to the above prices. These flexible f. o. b. mine prices are subject to the notes listed hereinbefore.

*Prices F. O. B. Mines, for River and Ex-River Shipment, Applicable for All Uses Except Railroad Locomotive Fuel Subject to Price Instructions and Exceptions and Notes Shown Below*—Continued

[3] The prices shown are applicable only to "Industrial Coal."
*The above prices are based on a base river charge (including all charges necessary to reload coal in cars docks—See Note 1) of $2.85 per net ton. If the base river rate exceeds $2.85 per ton the exact difference between the actual rate and the base rate may be deducted from the above prices. If the base river rate is less than $2.85 per ton, the exact difference between $2.85 and the actual rate shall be added to the above prices. These flexible f. o. b. mine prices are subject to the notes listed hereinbefore.

## SCHEDULE OF PROPOSED COORDINATED MINIMUM PRICES FOR DISTRICT NO. 9

### TRUCK SHIPMENTS ONLY

### *Price Instructions and Exceptions*

1. The schedule of prices shown herein applies f. o. b. transportation facilities at mines on all coal produced by Code Members within District No. 9.

2. All prices herein are per net ton of 2,000 lbs. f. o. b. transportation facilities at the mines unless otherwise designated.

3. All prices are subject to the effective Marketing Rules and Regulations and the Rules and Regulations governing Distributors.

4. Invoices shall be paid in full in United States currency, or funds equivalent thereto, not later than the due date.

5. All size designations are for round hole screens. When screens having other types of openings are used and the percentage of over-size, as determined in accordance with the method of test prescribed by A. S. T. M. designation D 410–38, exceeds 5%, the price for the next higher size group classification for that mine shall apply.

6. All Lump or Double Screened coal subjected to any chemical, oil or wax process for allaying dust shall be priced at not less than 10 cents per net ton above the prices shown herein.

7. Not *less* than the actual cost of transporting coal from the ordinary loading facilities at the mines to any consumer shall be added to the established minimum price f. o. b. transportation facilities at the mine.

The cost of such transportation is subject to review by the Commission on complaint or upon its own motion. In every case reviewed by the Commission the Code Member shall have the burden of establishing or proving that the cost so charged was not less than the actual cost of transportation.

### *Size Group Description—(For Truck Shipment)*

| Size Group | Lump and M/R | Double screened |
|---|---|---|
| 1 | All Lump coal larger than 4". | All Egg coal with bottom size larger than 4". |
| 2 | All Lump coal 4" and smaller but larger than 3". | All Egg coal with a top size larger than 6" and a bottom size 3" and larger, but not larger than 4", and includes 6" x 4" EGG. |
| 3 | All Lump coal 3" and smaller, but larger than 2". | All Egg coal with a bottom size than 2" but not larger than 3", and a top size not larger than 6". |
| 4 | All Lump coal 2" and smaller, but larger than 1½". | All Egg coal with a bottom size larger than 1½" but not larger than 2", and a top size larger than 4". |
| 5 | ----- | All Double Screened coals with a bottom size larger than 1½" but not larger than 2", and a top size larger than 3" but not larger than 4". |
| 6 | ----- | All Double Screened coal with a bottom size larger than 1½" but not larger than 2", and a top size larger than 2" but not larger than 3". |
| 7 | All Lump coal 1½" or smaller. | All Double Screened coals with a top size larger than 3" and a bottom size not larger than 1½". |
| 8 | ----- | All Double Screened coals with a top size larger than 2" but not larger than 3" and a bottom size not larger than 1½". |
| 9 | Straight Mine Run, no fines removed. Mine Run, modified by the removal of any intermediate size or sizes, no fines removed. All Resultants larger than 2", no fines removed. | ----- |
| 10 | ----- | All Double Screened coal *not* mechanically cleaned with a top size not larger than 2" but larger than 1½", and a bottom size larger than ⅜". |
| 11 | ----- | All Double Screened coals *not* mechanically cleaned with a top size not larger than 2" but larger than 1½", and a bottom size not larger than ⅜" but larger than ⅜"or 10 mesh. |
| 12 | ----- | All Double Screened coals *not* mechanically cleaned with a top size not larger than 1½" but larger than ¾", and a bottom size larger than ⅜" |
| 13 | ----- | All Double Screened coals *not* mechanically cleaned with a top size not larger than 1½", and a bottom size ⅜" and smaller. |

### Screenings

Size group 14.—Modified Screenings having a top size 2" and smaller but larger than 1½", and a bottom size not larger than 8 mesh.

Size group 15.—Modified Screenings having a top size 1½" and smaller but larger than 1¼", and a bottom size not larger than 8 mesh.

Size group 16.—Modified Screenings having a top size 1¼" and smaller but larger than 1", and a bottom size not larger than 8 mesh.

Size group 17.—Modified Screenings having a top size 1" and smaller, and a bottom size not larger than 8 mesh.

Size group 21.—All screenings *not* mechanically cleaned having a top size 1", and smaller but larger than ¾", no fines removed.

Size group 22.—All screenings *not* mechanically cleaned having a top size ¾", and smaller but larger than ⅜", no fines removed.

Size group 23.—All screenings *not* mechanically cleaned having a top size ⅜", and smaller but larger than ¼", no fines removed.

Size group 18.—All screenings *not* mechanically cleaned having a top size 2", and smaller, but larger than 1½", no fines removed.

Size group 19.—All screenings *not* mechanically cleaned having a top size 1½", and smaller but larger than 1¼", no fines removed.

Size group 20.—All screenings *not* mechanically cleaned having a top size 1¼", and smaller but larger than 1", no fines removed.

Size group 23.—Carbon—All Screenings *not* mechanically cleaned having a top size ¼" and smaller.

### *For Truck Shipment Only—Prices in Cents per Ton for Shipments Into All Market Areas*
